Harvard Calls Prof. Draper

Invites Maine Professor to 1925 Summer Session

Professor John W. Draper of the English department has received an appointment to teach at the summer session of Harvard University next year. Professor Draper has been located at the University of Maine since 1922, coming here from Bryn Mawr College as associate Little Rhody affair with teams, officials, professor of English.

After graduating from New York University in 1914 with the degree of B.A., he did graduate work there until 1917, receiving a Master's degree in 1915. He attended Harvard from 1917 until 1920, receiving an M.A. degree in 1918 and a Ph.D. degree in 1920.

of Minnesota, and as lecturer at Bryn Mawr College. He served as sergeant Modern Language Association of Amerbooks, Poems (1913) and Exotics. (1915) and is a contributor to philological and Thelma Perkins. other periodicals in this country and

Others who and the Modern Humanity Research received honorable mention are John Association. He is the author of two Hall, Carl Lindholm, John Nolting, Thomas Harvey, Alice Lincoln, and

> The results in general compare favorably with those of the University of Iowa, where the tests were instituted.

INVADE THE CAMPUS **DURING HOLIDAYS**

AGRICULTURAL CLUB CHAMPI-ONS TO RECEIVE PRIZES

Two hundred dollars in cash prizes will be awarded by the Maine Central Railroad to the boys and girls attending the State Contest of the Boys and Girls Agricultural Clubs of Maine, to be held here January 1, 2, and 3. For a number The Rev. Alexander Mill of years this company has been giving money for the Contest which is the climax of each club year's work. In addition, the road is offering reduced rates of fare and a half for round trip tickets.

The club year begins with the calendar year when the boys and girls enroll and plan their work. During the year, these plans are carried out under the direction of the local leader, with the assistance of the county and state extension agents. The fall is devoted to local and county contests and fairs where the club members exhibit the results of their work. At the county contests county champions are chosen, the awards being based on the work done, the records kept, the exhibit made and the story of their year's work.

Then the climax comes when the county champions from all parts of the state meet in Orono and compete for state honors. State prizes are awarded at this time from the money given by the Maine Central. These prizes, however, go only to the boys and girls attending the contest. A boy or girl may win the state championship in a project even tho he or she is not present but no cash prize will be given. Only club leaders and county champions are entitled to attend this contest but every one of them is urged

For the seventh or eighth consecutive time, W. G. Hunton, Industrial Agent, will represent the Maine Central at the contest. He will deliver a talk to the club members and will make the awards. Mr. Hunton takes the greatest interest in this work with the boys and girls of the state and is a true friend to Maine voungsters.

FRESHMAN WEEK DEAN BOARDMAN WRITES OF BENEFITS DERIVED

(By Dean Boardman)

The University of Chicago has recently received considerable publicity in regard to its Freshman Week program. adopted this year. It should not be forgotten, however, that the Freshman Week plan as such originated at the University of Maine, and was first tried at that institution in 1923. The plan has been adopted this year with modifications, by such other Eastern institutions as Tufts, the University of Vermont, and the University of New Hampshire. It is true that attempts to bridge the gap between high school and college have been made tentatively or on a restricted scale before 1923, notably by Brown University. Freshman Week, however, involving as it does an extensive program of lectures and exercises designed to provide information concerning the abilities of the individual student and to adjust the freshmen to their new environment, is an educational development the credit for which, in

Order Windows Closed In Arts Building

Tests of the ventilation plant in the Arts building have shown that it provides for each recitation room more air than is necessary. The order has been posted that all windows must be kept closed, as an open window defeats the purpose of the ventilation system.

WILL PRESENT CANDIDA THUR.

Masque and Domino Members Ready to Open Season

At 8 P. M. on Thursday, Dec. 18, the Maine Masque and Domino combined will present Candida, by Bernard Shaw. The leading characters, in the order

ii. which they appear are: Proserpine Garnett Florence Gushee '27

The Rev. James Mayor Morell Cyril Cogswell '27

Kenneth Field '25

Mr. Burgess Edward Engel '27 Candida Marian Lord '27 Eugene Marchbanks Robert Thaxter '28

Morell, in the words of Shaw, is a vigorous, genial, energetic minister who likes to lecture people; but withal he's a great baby and pardonably vain of his powers and unconsciously pleased with himself. His wife, Candida, a woman of thirty, is the heroine of the play. She has rare insight and understands her husband better than he understands himself. Marchbanks, a poet with a poetical conception of himself, is in love with Candida. Burgess is a small town merchant, who thinks himself much more successful than he really is. Lexy, a curate, is a great admirer of Morell. And last, (but proverbially not least) comes Proserpine, a typist. Her chief attraction seems to be that she's in love with Morell. A glimpse into the plot is given by this statement of Candida's, All Morell's secretaries have Prosy's complaint;" that is, they fall in love with

The coaching has been done by the Public Speaking Dept. "Dan" Webster has done his duty as stage manager, and Bill" Bailey, the hard-working business manager, has worked harder than ever to make Candida the most glorious success in the history of University of Maine dramatics.

Thanks are owed to W. A. Mosher & Co. of Orono, for the furniture and lamps used in the play.

Will Have Christmas Tree at "White House"

Christmas exercises will be held to give everyone plenty of time in which to get to the chapel, where George Bernard Shaw's "Candida" will be presented by the Maine Masque at 8 o'clock.

A large Christmas tree in festive array will be set up in front of Dr. Little's home instead of on the oval as it was last year. Due to the enthusiastic work of Jim Blair, chairman of the ways and means committee, and "Bill" Wilson, an

excellent program has been arranged. Two outside speakers have been engaged to give short speeches, and carols will be sung by the Men's Glee Club and the women's chorus. The band will furnish music. Groups of carolers have been organized to serenade fraternity houses.

RELAY PROGRESSING

The candidates out for relay this year are making this branch of track a keen competitive sport. As never before the men are turning out in large numbers, and are running and training hard. Each afternoon finds the runners doing their daily workout on the board track rain or shine. Coach Kanaly is highly pleased with the spirit and attitude of mind that the students are taking towards this sport. . Out of the nucleus of men Frank is picking a' fast quartette of runners who are going to make a strong bid for capturing the relay race at the B.A.A. meet this winter.

After two weeks preliminary training Frank gave his relay men their first test. In a severe rain and snow storm last Saturday the men ran against time for 440 yards over a wet and slippery track. In spite of the handicap of the track condition very good time was made by the individuals. Henry Eaton broke the record by running the 440 yards in the fast time of 56.4 sec.

INTRA-MURAL A. A. **SHAPING PLANS FOR** WINTER CARNIVAL

TO CONDUCT EVENTS AT PENOBSCOT COUNTRY CLUB

With snow flying and steel skates flashing on the Stillwater thoughts turn instinctively to winter sports. It will not be long now before we are skiing, snowshoeing and tobboganing. All these out-door sports of the winter months are climaxed in the Winter Carnival in which are mixed sports, entertainment, social affairs and the carefree holiday spirit. Plans are being made to make

this year's Carnival better than ever. The tentative program for the fourth annual Winter Carnival is in some respects a little different from the programs of previous years. This is due partly to the fact that there is no available rink on the campus on which hockey games or fancy skating may be staged. In general, however, this year's Carnival will follow the approved program of other years.

At a meeting of representatives of the four Maine colleges held Saturday, Dec. 13, plans and dates for the Carnivals were discussed. As Bates college is having its finals at the time when the Intramural had arranged for the Maine Carnival, it will be necessary to postpone the date one or two weeks.

On the first evening, the Maine Masque will present a play, now in the process of rehearsal in the chapel. The Intramural A. A. has been assured that this play will surpass even "Cappy Ricks" of last year's carnival. The play is to be followed by an informal dance in the Gym. This dance is one of the new features, taking the place of the fancy skaters.

On Friday morning, trials in all the Intra-mural events except the cross country, ski, and snow shoe races and skijumping will be held on the Stillwater.

On Friday afternoon, the finals in all Intra-mural events including the finals in the faculty snow shoe race, will be held at the Penobscot Valley Country Club.

On Friday evening, the big social event of the carnival, the Carnival Ball, Thursday evening in front of President | will be held in the Gym. This will be a Little's house from 7 until 7:50 o'clock. two o'clock dance. The committee is try-The exercises will close at 7:50 in order | ing to secure Hardy's Orchestra of Worcester to play at the ball. FRESHMEN AND OWLS CONFER

Hope to Improve Inter-Class Relations

The freshman executive council met with the Sophomore Owls and President Little at the latter's house last Wednesday evening. The object of the meeting was to decide upon some way in which the two organizations can work together in disciplinary matters. In the past the Owls have punished all offending members of the freshman class. The freshman executive council intends to take an active part in future punishments if necessary. Their primary purpose, however, is to keep the freshmen out of trouble by warning them of their mistakes, and making known the rules and customs of the college.

These points were discussed and President Little told of his plans for the bettering of the aims of the Owls. He would like to have them promote a field day between the classes that would hold more interest for outsiders than the present annual bag-scrap which is, at best a free-for-all gang fight.

No definite action was taken but the meeting served to break the ice between the two bodies represented.

Information Tests

Amusing answers rendered in an in-Monday morning in a Boston paper. Those who read the story may have recalled that a similar test was given at Maine during the 1923 Freshman Week.

Results were about the same and a similar story was broadcasted. A Pittsburg, Pa. newspaper editor, reading that certain Maine freshmen were unable to identify Moses and Firpo, solemnly rebuked the Maine public schools for inefficiency.

When young people begin to guess as to the identity of the men and women who figure in the news, results are usually amusing. But that does not mean that those who take the test are unintelligent. There are so many people in the world who claim to be important, and who are constantly grimacing at us from smudgy photoengravings, that it is the rashest kind of folly to attempt remembering something about each one.

A young man who knows the complete pedigrees of Firpo, Babe Ruth, John Mc-Graw and other sporting celebrities is a young man who has wasted a good deal of time. In any pool room, he can find some one whose horizon is just as

We come to college, not to collect information, but to obtain a criterion on which to judge contemporary celebrities.

The Winter Carnival

For an event of its importance, the Winter Carnival has aroused surprisingly little comment this year. Not until last Saturday were the dates set, and now there seems to be some debate as to where the events should be conducted.

The proposal that the ski jumping and snowshoe racing be held on the grounds of the Penobscot Valley Country Club has found favor in some quarters and violent opposition in others. Before any action is taken by the Intramural Association, it would perhaps be well to test the sentiment of the student body as to whether or not such a departure from previous custom is favored by the majority.

There may be advantages in conducting a University of Maine carnival on a distant golf course, but many of us are too narrow and provincial to see them. The inconvenience and expense of making the pilgrimage to the events are the most obvious objections. If every student would contribute to a general fund as much as he would spend in carfares in case the carnival were held elsewhere, it would be possible to erect a new ski jump nearer home.

And then, if the carnival events are held on the club grounds, we will somehow have the feeling that we are trespassing on private property. A Univer- lege amour and its development, tells in Christmas and college songs and the sity carnival should be held at the Uni-

Candida

Editorial exhortations to "support" this or that activity are usually futile. Students, like their parents, give their attention to affairs which interest them. To urge a group of college people to yell frequently and vehemently at an athletic contest is equivalent to coaxing a dog to wag his tail. Yet every year, all over the United States, undergraduate America receives instruction in the technique of yelling.

The members of the Maine Masque do not expect the student body to greet them Thursday night with "Maine, the long way." Neither do they expect to be "set up" under the direction of the dynamic Stackpole. They will doubtless be gratified if a majority of the students attend the presentation of Candida in Alumni Hall, and they will do their best to provide a good evening's entertain-

If students fail to recognize the efforts of the Masque, their indifference will suggest the thought that the University of Maine is an educational institution only in name. Here is a play written by a brilliant dramatist. It is one of the formation test recently given Boston modern masterpieces. If we are not in-University freshmen were published terested, we are out of place in a Uni-

> Not often does Harvard University draw upon the faculty of small state universities for men to teach at its summer session. Consequently it is with some gratification that we announce in this issue the appointment of Professor Draper to the faculty of the 1925 summer school at Harvard.

> For vacation reading, The Campus especially recommends two magazine articles. One, by Professor Albert Feuillerat, is found in the January Yale Review under the title of "Scholarship and Literary Criticism." The other, by Professor Richard Burton, is entitled "Why Go to College" and can be found in the December American Mercury.

Mount Vernon Party

Merry Christmas! Perhaps it was a little forehanded, but the Christmas spircertainly radiated at Mount Vernon last Saturday night when the girls held their annual Christmas party. The house was decorated with holiday colors and gay red bells. There was even a Christmas arch, but where was the mistletoe? Although Santa couldn't come, he left his pack, and every guest found that he was remembered in an individual way.

Mrs. Estabrook and Mrs. Hart were the patronesses.

Maine-Spring Appears

The Maine-Spring has put in its first appearance for 1924-25. It is Maine's contribution to literature; in contradistinction to the Mainiac with purely humorous intent. It contains stories which won prizes in the Maine Intercollegiate Contest in Writing held last year; a verse or two, and original stories and sketches written by members of the Contributor's Club of the University.

It has a rather neat little cover of blue; and indeed the whole atmosphere of the magazine is quiet dignity. It is a fit setting for the stories within.

"Eros the Divine" by Madeleine Field, starts the issue. It is a short story of a tragic love affair, with a kind of question at the end. It is vividly written. Then follows "The Great Fear," a short incident of supernatural tenor, written

somewhat after the style of Poe. "Radio" by Charles E. Johnson, one of the prize stories, is a good account of a lethargical country weekly, and the events which led to its awakening. Another sketch of rural communities is "The Village Store." Although this is quite without plot, it is a graphic depic- and Santa Claus came in with a heavy tion of the types found in such a place, pack on his back. After wishing all a

of college days, and the more serious results which are apt to be their conclusion.

There are two poems by Barbara Dunn, a graduate. Both "Night" in free verse, and "My Pewter Plate" in blank verse, are effective through their choice of words. "Virtue" is a rather daring

To a Torn Evening Gown" by Alice Libby is a fanciful bit of verse on the

good, and cover a wide range of subjects. I would regret that the authors of the stories were so modest as to allow their sketches to appear anonymous. It would seem to me that it were better tural school under an American mission. to sign them. Yet it is quite a relief to find that Maine can turn out stories of real value, not such as are written merely to fulfill an assignment. There is much difference between the two. All in all, the December issue is quite successful, and the editors are to be commend-

The track club met at Beta Theta Pi on Dec. 10 for the first meeting of the year. President Eaton brought the meeting to order, and Carl Ring read a report on the financial condition of the club. This report showed a good balance in the treasury, and it is hoped that this money can be used to good advantage in the furthering of interest in track work at this University. It was voted to award to every Freshman making his numerals in Cross Country this fall, a jersey with the numerals. This has been the custom in years past, and the track club by continuing the custom hopes to get more men out for track.

The track club Scholarship, fifty dollars, is given to some member of the Freshman class who needs financial help. He must be a man interested in track athletics, and his scholarship must be satisfactory. The winner will be given the scholarship upon his return to college at the beginning of his sophomore year. Applications for this scholarship must be made in writing and sent to the president of the track club before Mar. 6-Machias at Orono May 1. Last year this prize went to Claude Lovely of Old Town.

The University of Maine track club was organized in 1912 with the purpose of creating a greater interest in track athletics; to encourage men to become candidates for the various teams, and to interest preparatory school men of track ability to come to Maine. Its membership includes one member from each fraternity and one member from the dormitory. All letter men in track automatically become members.

The Track Club for this year is made up of the following men:

Henry Eaton (President), Phi Gamma Delta; Spofford Giddings (Secretary), Beta Theta Pi; Carl Ring (Treasurer), Alpha Tau Omega; Robert Tate. Phi Eta Kappa; Andrew Small, Sigma Chi; John Hamilton, Delta Tau Delta; Ray Berry, Theta Chi; Earl Stevens, Phi Mu Delta; Prescott Thornton, Alpha Gamma Rho; Frank McDonald, Sigma Alpha Epsilon; Charles Gero, Kappa Sigma; Charles Collins, Lambda Chi Alpha; Clarence Dowd, Sigma Phi Sigma; Bryce Jordan, Sigma Nu; Theodore Rowe, Phi Kappa Sigma; Allen Burnham, Dormitory.

Phi Kappa Sigma

The Phi Kappa Sigma Fraternity held an informal party at their chapter house, Friday evening, Dec. 12.

Music was furnished by "The Troubadores."

At intermissioin refreshments of ice cream, cookies and punch were served. Chaperones were Prof. and Mrs. Pollard and Mrs. Lura Nutter.

Home Economics Club

The Home Economics Club met at North Hall last Tuesday evening. The meeting opened at seven o'clock by singing. About eight o'clock the girls drew numbers from a box for it was rumored that Santa Claus was coming and would distribute gifts corresponding to the numbers. As the last numbers were being drawn, bells were heard outside and as such is a fine piece of local color. Merry Christmas he gave them all pop "Fields of Conquest," a story of a col- corn balls from his pack. They sang

a rather frivolous way of the lighter side meeting was adjourned. . Thirty-seven members were present.

English Lectures

Several members of the English department have delivered lectures before various groups during the past week. Prof. W. I. Zeitler addressed pupils of Old Town High School on December 6 on "Uses of English Words." Prof. H. members of your tribe who fall in er-M. Ellis spoke in Skowhegan on "The Making of the Population of Maine. Prof. A. M. Turner addressed the Arts Club Saturday night on "Athens, Cairo, and India," and read a paper before the Modern Language Association Monday night on "A New Source for The Cloister and The Hearth." H. L. Flewelling addressed the Newport Women's Club last Friday on "Types of People I Met

Last Thursday evening in Coburn Hall Doctor Draper gave a lecture on the Elizabethan Amusements and Theater. First he described the amusements of the time of Chaucer,-hawking, hunting the stag, cock-fighting, bear-baiting, chess, bowls, and fencing. These were illustrated by lantern slides of illustrations from the Gobelin manuscripts.

"The Puritans thought bowling was wicked. Queen Elizabeth and Henry the Eighth made laws against it for a different reason; they feared that bowling would prove so interesting it would stop archery practice.

"Spinning the top was fun for grownups in the Middle Ages, but by Elizabethan times only the children enjoyed it. The ladies played at dice-and cheated by loading or "cogging" them with bits of lead."

In a riotous tavern scene, which was being enjoyed by both men and women, the victuals were plentiful and were often used as battering rams. The candles were placed in niches for safety's sake.

A stilted scene of a picnic showed Elizabeth and her courtiers grouped around lace-fringed tablecloths and other pleasures of home, out in the midst of the woods. The Queen's official taster stood by to sample all the food, in order to see that it had not been poisoned.

(Continued on Page Three)

By Scoop

Once upon a time there was a land where lived all the birds of the forest. For a long time the younger birds quarrelled among themselves as to which were the strongest and the fittest to rule. Finally it settled down to a feud between the birds who flew by night, and those who flew by day. But the birds who went abroad by daylight were too small to defend themselves long against the nocturnals. Finally the latter triumphed. and set up a council which was to tell the others what was best for them to do,-and when to do it. They were the Owls. Now the Owls were wise birds, and so for a while all prospered.

But after a while it came to pass that some among the Owls were harsh in their treatment of their subjects, and inflicted punishments upon them which they resented. So the day-birds gathered one day in secret, and talked over their afflictions, and discussed what ought to be done toward their improvement.

One of them was impatient to declare open war against their oppressors. Another suggested that their lack of leaders would make such a procedure useless. At last one among them arose and spoke as follows:

"There is, in the mountains not far distant, a tribe of our brothers who are big and strong; who can help us if they will. Let us call upon them and ask them for their advice."

This pleased all who were there, and so a committee of the day-birds called upon their neighbors, the eagles, and asked them what should be done. The eagles listened long and silently. Finally one of them asked:

"Why do you feel that you are unjustly treated?"

Then the head of the committee spoke, and told him how one of their number had fallen in love with a maiden from among the night-birds and so had visited her often; and how the Owls had torn the feathers from his head when he was discovered. It was told too, how another had neglected once to wear the badge of servitude which the Owls had provided for them, and how he had been held in the icy chill of the Great Waters until nearly dead because of it. Sundry other persecutions were told of and the spokesman of the mountain neighbors finally answered:

"It is inevitable that you should come under their rule; but it also seems that although you are not blameless, you should have a part in punishing any ror. I propose that you form a council your own to confer with the Owls, and that you try among yourselves to obviate any future transgressions on the part of your brothers. I have spoken." And the eagles bowed them out.

Then the day-birds reflected and saw the wisdom of the advice, and straightway they formed a little circle of their chief members, and drew up a set of rules of their own, which were to instruct their tribe in the duties expected of them by the Owls. Then they cast about for a name. For that they were puzzled until finally their chosen leader spoke as follows:

"All of our progress toward alleviating the oppression of the Owls, has come to pass through the advice of our friends, the eagles. Why do we not in respect for them, and in gratitude for their aid. call ourselves the 'Eagles.'"

And the brothers saw that it was good, and they approved.

Hence the band of advisers became known as the Eagles.

When the Owls found this out, they were exceeding wroth, for it snatched part of their power from them. But still, since they were wise, they realized that the poor day birds had no chance to defend themselves. So they took the matter to the Chief of all the Birds, in the big white nest, in the center of the land. The Big Chief, who acted only as adviser to the birds when it was really needed, considered the facts and spoke his decision, which was:

"The Owls and the lesser day-birds have too long been warring blindly. The time has come when we must substitute reason and justice for power and blind spite. The small birds of the waking hours have not done their part in carrying out the laws set upon them by the Owls; and the Owls have not been over-A reproduction of an English broad- just in punishing the wrongdoers. (Continued from Page One) Intra-Mural A. A. Shaping Plans for Winter Carnival

held at the Penobscot Valley Country Jub. Maine, Bates, Bowdoin, and Colby will compete for honors in ski and

Maine's winter sports team plans to put up a stiff fight for the honors captured by Bates last year. This is parcularly important because the University of Maine, thru the Intra-mural A.A. plans to join the Inter-Collegiate Winter Sports Associations this year. The winner of the Maine colleges will send a cam to McGill at Montreal.

Saturday night will be open house all wer the campus. This will bring the arnival to a close in a pleasing manner. These are the general plans for this ear's carnival. Much that is interesting nd fun evoking has been omitted because i lack of space. The Intra-mural is on the job looking for everything that posbly can make this carnival the best yet.

An explanation of the proposal to use he Country Club for some of the Carnival events is necessary. The first consideration of the Intra-mural is to be sure that Maine men and women have a Carnival that they can enjoy in reasonable comfort and at a minimum of expense. These considerations caused the Association to favor the Country Club project. At present Maine has no ski ump. The one used for the last three years collapsed during the recent storm. It is proposed that the Intra-mural and the Country Club Association build a new and larger jump on the Club's grounds. This will insure a jump that will give Maine ski-men a fair chance in that competitive sport. As the Intramural A. A. can not afford at this time to build a suitable jump, the above proposal seems the only solution.

There are, however, other points in favor of the Country Club for they propose to build a tobbogan slide and skating rink which will be open to Maine men, women and friends, as would the Club house itself. This will eliminate the freezing cold of the river that has had to be endured in former years for the club house is only a stone's throw from the jump.

Scoop's Corner

the Owls still reign, but let the Eagles reign to in their own domain. When subject breaks a law, let the Owls and the Earles too, come together, and decide what shall be done with the case. In this way, I hope that peace may be restored between you both. Go."

And the Eagles went out rejoicing, while the Owls went solemnly away; and thus far there have been no more lisputes between them.

Prof. H. M. Ellis of the English deartment attended a meeting in Augusta ast Saturday of the committee on the state syllabus of English for secondary

The Class Endowment And How It Can Be Done Through Life Insurance THE JOHN HANCOCK MUTUAL LIFE INSURANCE COMPANY worked out this problem for the 1923 graduating class of the Massachusetts institute of Technology, and is ready to do it for others. Many graduating classes, wishing to benefit their Alma Mater have turned to the insurance idea since it allows the participation of a large number of students. This plan provides for the payment of a certain specified sum to the University at the end of 20 or 25 years, the members of the graduating class paying a nominal sum each year to create an endowment. In case of the death of a graduate before the endowment matures his full share is paid into the fund. Every student is given a chance to put his John Hancock on the dotted line and become a continuing contributor to the future welfare of his Alma Mater. It has been successfully carried through in a number of cases, and it can be done with your institution. The John Hancock organization will be glad to render any service it can to college classes and individuals; also to interest ambitious college men in life insurance work. equipped throughout. The boys there are tåking up football, track, basketball, and other American games. All of this presents a difficulty at first for the Turks have no idea of team play. Each man wants to play the whole game himself. It is hard at first to make them feel a desire for team glory rather than individual glory. However, in general they are adopting American customs well in these colleges, and great numbers of young men flock to the college at Smyrna to learn American ways. It is here that Mr. and Mrs. Vrooman will take up their work.

"The greatest opportunity to present American ideals is thru the dormitory and home life. Moslem students have no conception of real home life, and they are much impressed with the Christian homes which missionaries have established there. In these homes the students meet for group discussions on local and international problems. The leader often entertains. Here the men and women meet as they would in American homes, the women laying aside their veils and adopting American standards. The Vroomans are looking forward to establishing one of these homes at the college in Smyrna where they can bring to the moslem students the best that America offers in the way of modern civilization and Christianity.

"Turkey is just waking up and beginning to want our civilization, and we ought to give them our best and highest ideals. It is a worth while investment. If we can get away from our provincialism and get an international mind we can do a great deal in spreading Americanism. Maine is taking one great step now in sending Lee and Helen over. It is a wonderful opportunity for them, for us, and for the college to which they are going. And it is going to mean a lot to them to be able to say that the University of Maine is standing behind them. It is friendship like this that is to bring about the linking together of the nations

of the world."

(Continued from Page One) Maine Declines Offer of De Paul University

state and city of resident nature. Maine showed willingness to co-operate and is now left with a seven-game schedule for 1925, unless Faculty Manager B. C. Kent is able to fill the open date, failure of which will see Tufts open at Orono,

Decision was passed along to Rhode Island and Brown at a recent meeting of the athletic board, which awarded the retiring football manager, A. H. "Doc" Turner, a football letter.

It was voted that in the event that the New England Intercollegiate Field and Track association decided to run a Freshman cross country race in conjunction with its annual varsity hill and date chase next Fall, the Maine yearlings would be entered.

Maine and New Hampshire University have signed a two-year contract for a dual cross country run next year at Orono and in 1926, at Durham.

(Continued from Page One)

Maine Had First Freshman Week

its comprehensive form, is due the University of Maine.

Freshman Week was first held at the University of Maine in September of last year just before the registration of upper classmen. The success of the plan was so great that it was again tried this fall. The mistakes of the year before were for the most part corrected, with a resulting increased efficiency of administration. Plans already under consideration for the following year point to

a still more carefully organized and directed schedule for the incoming class during its week of adjustment. The organization of the Week this year was in the hands of a committee of which Dean H. S. Boardman was chairman and President C. C. Little an exofficio member. The registration of

freshmen took place a full week before that of the upper classmen; and the new class, therefore had the entire campus to itself during the Freshman Week period. The entering class, about three hundred and fifty in number, was divided obtained; greater results are looked for into twenty-four sections, members registering for a given course being as far as possible grouped together. This ar- now a permanent part of the University rangement resulted in nine sections being of Maine's schedule. Other institutions, allotted to the College of Arts and Sci- after noting the success of the plan, are ences, ten to the College of Technology, adopting similar systems; and it is highand five to the College of Agriculture. ly probable that the University of Maine Each section was in charge of a Leader by its Freshman Week has developed an and an Assistant chosen from the fac- extremely valuable instrument in the ulty because of their special ability and field of higher education.

interest in the work of Freshman Week. It was so arranged that each student should come immediately in close contact with a member of the faculty of instruction who was interested in assisting him to adjust himself to his new envi-

Beginning on the day after registration, these sections followed a very definite and rigorous schedule of lectures, exercises, and tests. Lectures were given on the following subjects:

- 1. Taking Notes and Examinations
- 2. Use of the Library
- 3. Use of Books
- 4. College Duties and Responsibili-
- 5. The Three Colleges of the University
- 6. The College Students' Day's
- Work 7. College Customs
- Cultural Reading
- Current University Problems
- Honor Societies
- 11. Hygiene and Physical Training
- Social Conduct

14. The Higher Obligations of Life

In the first of these lectures the freshmen were given advice on how to take notes and examinations most effectively, utilizing their limited time to the best advantage, recognizing the important points of a lecture, and organizing and recording their ideas in coherent form. Another outlined the rules of the library and explained the use of the card catalog. In a third the proper way in which to use reference books was indicated.

The organization of the University and its three colleges was explained; respect for university property and the old and well established college customs was requested, and some of the current problems confronting the University were pointed out.

The apportionment of time for the day's work was suggested; the importance of cultural reading was stressed; and the place of the honor societies, Phi Kappa Phi, Phi Beta Kappa, Tau Beta Pi, and Alpha Zeta was explained. That there were certain higher obligations of life which the college student could not neglect, was ably set forth by Dr. A. A. Smith, pastor of the First Universalist Church of Bangor.

Departmental tests were given in Psychology, English, Mathematics, and Chemistry, as well as practice exercises in the use of books and the use of the library. These tests were primarily placement examinations, given for the purpose of grouping students in sections according to their knowledge of the subject. Such a sectioning on the basis of ability is extremely desirable, not only for the college authorities but for the students. The brilliant students are not retarded by poorer ones in the same section; the poorer ones are not discouraged by the superior achievement of the brilliant.

Four periods were set aside for Chapel, two for obtaining individual photographs, two for physical examinations, two for an inspection of the campus, eight for recreation, including competitive sports, and an entire afternoon for field events.

The evening programs included: a general welcome to the Freshman Class, an evening at a moving picture theater, an athletic rally and song night, a humorous entertainment by the freshmen themselves, an evening for dancing and games, vesper music on Sunday, and on Monday a meeting for the organization of the class under the direction of the University Student Government.

The program for Freshman Week was thus varied, though intensive and practically continuous. There was little time for the newcomers to become homesick, and much time for them to acquire an insight into the university life which was to be theirs. That they worked extremely hard, but that they got a great deal of pleasure as well as valuable information, was the opinion of nearly every freshman. The extra labor required of the faculty was in a measure offset by the valuable information obtained in regard to the freshmen, and by the knowledge that the work was a distinct personal service to the new stu-

Measurable beneficial results from last year's Freshman Week have been this year; and with plans already under way for next year, Freshman Week is
