M. C. I. TAKES FINAL DEBATE

WINS FROM MATTANAWUCK IN LAST OF SCHOLASTIC

On Thursday, April 5th, the final contest of the Maine Debating League was held at the University of Maine, M. C. I., and Mattanawuck Academy. The debaters, Bucknam and Van der Putt for M. C. I., should be given the independent reputation of M. C. I. and Mattanawuck Academy. The debate was a highly animated one, and the question was: "Can a person be raised in public order?"

The affirmative team, represented by M. C. I., took the affirmative side. The members of the M. C. I. team were: John J. Flaherty, chairman, Mr. T. A./ts, Mr. T. C. Kerrie, Mr. K. Field, and Mr. T. C. Kerrie. The negative team, represented by Mattanawuck Academy, was: Mr. C. E. Bruce, chairman, Mr. T. C. Kerrie, Mr. K. Field, and Mr. T. C. Kerrie. There was a 3:0 decision for M. C. I.

The winning team were awarded a trophy for their school, and each member of the winning team received $100. The winning team members were: Mr. T. C. Kerrie, Mr. K. Field, and Mr. T. C. Kerrie.

During the debate, questions were raised about the economy and the role of the government in ensuring public order. The affirmative team argued that public order could be maintained through the provision of adequate social services, while the negative team argued that public order was dependent on the law and the police.

The debate was an important event in the history of the Maine Debating League, and it was a testament to the skill and talent of the debaters. The M. C. I. team's victory was a clear indication of their commitment to the principles of democracy and freedom of speech.
**Reforming College Life**

The student voice is a powerful one, and those who are willing to listen will hear it clearly. But there are those who are disinclined to listen, and most of those who are probably callous and obstinate. He had little's attitude toward the vote was intolerable and abolition of fogyism on three sides of the academic triangle.

One thing is certain, and that is that there can be no improvement by adding to the machinery of higher education. There is an endowment for study, but not for conduct. The college student is a part of society, and the freedom of the individual is limited by the needs of the whole. It is not enough to provide for the intellectual, social, and spiritual development of the student; the college must also provide for the physical and material needs of the student.

The State Forest Nursery, conducted under the direction of Mr. Mahoney '27, Henry Mahoney, is one of the most important departments of the University. This Nursery has been in operation for the last ten years and has produced excellent results. The Nursery is located on the bank of the Saint George, and is the center of all forest work in the State. This Nursery is supplied with seed by the Forestry department, and is considered as one of the best in the country.

The lighting of the indoor field will be cared for by twenty-eight 100-watt electric lamps, which will be turned on at night and off in the morning. The lamps will be placed in a row along the walls of the field, and will be controlled by a switch located in the center of the field. The lighting of the outdoor field will be done by four 200-watt electric lamps, which will be turned on at night and off in the morning. The lamps will be placed in a row along the walls of the field, and will be controlled by a switch located in the center of the field.

The indoor field is Mr. Engle's project. He is using the advice and services of Dennis Erng of Harvard University in building the track and the floor of the field. The field is designed to be used for a variety of purposes, such as track and field meets, soccer games, and other athletic events.

For practical purposes the indoor field will be divided into two parts. One for track and field events, and the other for baseball and soccer games. The field will be designed to accommodate all of the needs of the students, and will be used by all of the athletic teams of the University.

Mr. Engle's project is well underway, and he is hopeful that the field will be completed in time for the beginning of the fall semester. The field will be a great asset to the University, and will provide a place for the students to exercise and have fun. It will also be a great asset to the community, and will provide a place for people to come and watch the University's athletic teams play.
STUDY at HOME for EXTRA CREDITS

More than 450 courses in History, English, Mathematics, Chemistry, Zoology, Modern Languages, Economics, Philosophy, Sociology, etc., are given by correspondence. Learn how to invest, how to pay for your college education. A copy of the entire series will be sent to anyone requesting it.

“THE PLAY’S THE THING”

John Barrymore himself would get the hook” if he did not call for his cues, or read his lines as called for by the action of the play.

Engineers get cues, too—from the industrial drama of which they are a part. Like actors, their performance must fit the action of an economic play.

Thus the reason that the journals, the societies, the schools, colleges, teachers, and well-known public men are urging engineers to study economics — to learn the nature and effect of economic laws.

To build the largest generator or the smallest meter, for example, is not always in itself a great engineering feat. The feat consists in having it ready at a time, a price, and with such features as the prevailing economic situation calls for.

In this sense engineers—and particularly Westinghouse engineers—must be “practicing economists.” They must follow closely the “action of the play”—analyzing fundamental conditions in every field, and calculating their causes and probable effects.

All this, so that when a cue is spoken in factory or home, on farm or railroad, on the sea or in the air, they may be ready.

This advertisement is subject to regular rates, reducing the field of eligibility in the Westinghouse organization.

A copy of the entire series will be sent to anyone requesting it.
