## HIGH SCHOOL EDITORS GUESTS AT ANNUAL JOURNALISTIC CONFAB

### DELEGATES REPRESENTING SCHOOLS IN ALL PARTS OF STATE ATTEND

The annual conference of high school papers of the state was held on the campus Friday and Saturday of last week and was by far the most successful in the history of the affair. Nineteen schools from all parts of the state, from Biddeford to Caribou, were represented, and participated in the program of the convention.

Registration of delegates took place on Friday morning. It had also been planned to hold the first session of the conference before noon that day, but the inability of many of the editors to arrive on the campus in time to be present caused the committee in charge to postpone the first meeting until afternoon. At two o'clock Chairman Robert Turner opened the convention with a short welcoming address, and the conference was on. Irving Kelley, president of Kappa Gamma Phi, welcomed the delegates in behalf of the entertaining organization. Acting President H. S. Boardman extended the welcome of the university in a few well-chosen words.

Kenneth W. MacGregory, editor of the *Campus* and the *Mainiac*, was the next speaker, and discussed the principles of the editorial column, with special emphasis on the place of the editorial in the high school publication. A. E. Keough, a representative of the Arnold Roberts Company of Boston explained the processes of making cuts and electrotypes, and their use in the school paper. He was followed by Dr. H. M. Ellis of the English department, who spoke of the necessity for the use of good English in high school publications. The last speaker of the day was Robert Turner, business manager of the *Campus*, who discussed the problems of the advertising man.

At 5:30 a journalistic banquet was held in the gymnasium, with the delegates, committee members, and Kappa Gamma Phi members present. Miss Helen Havener of the Portland Evening Express acted as toastmistress. The feature of the banquet was the staging of his popular Indian Club stunt by Mr. R. T. Patten of the Skowhegan Independent Reporter. At the conclusion of the banquet Mr. Patten was presented with a Kappa Gamma Phi key as an honorable member in recognition of his assistance in the planning of the conference.

The delegates later attended the football rally in the chapel, where they got their first taste of "college spirit." They then were guests at a "journalistic" dance in the gym.

Saturday morning the second business session of the conference convened in the M.C.A. building. The speakers were Mr. Patten and Henry E. Dunnack, state librarian. Mr. Patten discussed the financial side of the management of the school paper, while Mr. Dunnack spoke on the opportunities which the state library affords for study to the journalist, also mentioning some of the Maine newspaper men who have made their marks in the world. The last event on the program was the awarding of prizes to the best papers exhibited by the schools represented.

## Chautauqua Here This Week

The Swarthmore Chautauqua is at the University this week, Wednesday, Thursday and Friday, presenting afternoon and evening programs in the Chapel. Season tickets have been sold during the past two weeks and all those who wish to attend the performances and who have not already bought these tickets, must pay the single admission charge of \$75. These entertainments are well worth the price and a large number of students are expected to attend.

## BATES RUNNERS WIN AT BOSTON

### Kanaly Protests Officials' Action in Awarding Maine Fourth Place

Bates College won the New England Intercollegiate cross country championship race held Monday over the five mile course at Franklin Park, Boston. M.I.T. finished second and Williams third, with Maine coming home in fourth place.

Fred Peaslee of the University of New Hampshire was the individual winner. His time was 28 min. 23 3-5 seconds. He led his nearest competitor, Wills of Bates, across the tape by fifty yards. "Artie" Hillman, the Maine captain, finished third.

Bates was able to win the race with a score of 77. M.I.T.'s count was 90, and Williams, 97. Maine was awarded fourth place, but Coach Kanaly protested the decision, since "Charlie" Gero, who finished thirtieth, was not tabulated by the judges. With Gero tabulated in his proper place, Maine would have taken second place.

The Blue harriers were hounded by plenty of tough luck. Hillman, "Grunt" Taylor, who finished fifth, and "Janie" Hart, finishing ninth, all ran beautifully. The error of the officials in not giving Gero any place at all, and a tough break for "Brad" Baker, who lost his shoes and was forced to run the last mile and a half in his bare feet, was enough to beat the Bears.

The freshman team had better luck, tying with New Hampshire for second place with a score of 104. The M.I.T. frosh won this race with a score of 96. Norman L. McClintock of Tech was the individual winner, going around the shorter course in 18 minutes 43 and 2-5 seconds. Cleveland and Calahan of New Hampshire finished second and third respectively.

The teams finished as follows:  
Varsity: 1. Bates, 77. 2. M.I.T., 90. 3. Williams, 97. 4. Maine 108. 5. Boston University, 153. 6. Wesleyan, 165. 7. Holy Cross, 175. 8. Mass. Aggies, 184. 9. New Hampshire, 195. 10. Tufts, 210. 11. Rhode Island, 217. 12. Boston College, 247.

Freshmen: 1. M.I.T., 96. 2. Tie, Maine and New Hampshire, 104. 4. Rhode Island, 143. 5. Tufts, 224.

## MAINE MASQUE REORGANIZES

### Adopts New Constitution At Recent Meeting

At a meeting of the Maine Masque, November 11, the new constitution of the organization was formally adopted. This revised constitution was drawn up by a committee, of which Professor Mark Bailey, Cyril Cogswell and Edward Engel were members. The constitution adopted at the founding of the organization by Professor Daggett was destroyed in the fire at the Beta House during the Christmas vacation of 1923.

The new constitution provides for a meeting, of a social nature, to be held the first Wednesday of each month. New plays will be read and discussed at these meetings, and to facilitate this the organization is subscribing for several prominent theatre magazines. A library of plays and magazines is gradually to be built up. The chapel stage, for years an obvious eyesore to Masque supporters, is being rebuilt and remodeled. Professor Bailey hopes this work will be completed and a new curtain ready for the Christmas play. Rehearsals for John Galsworthy's "Loyalties" are progressing rapidly and the play will be presented on December 17. The Masque is fortunate in having the assistance of several men who have had professional experience in directing and acting, and everything points to a successful season.

The active members of the Masque are: Irving B. Kelley, Emery S. Dickey, Cyril Cogswell, Lawrence Cogswell, (Continued on Page Four)

## COEDS RETURN FROM CANADA WITH VICTORY

### DEFEATED DALHOUSIE GIRLS AT HALIFAX BY 1-0 SCORE

The hockey girls returned from Canada with a victory of 1-0 over the Dalhousie University team. They brought not only a victory but enthusiastic accounts of how well they were entertained at Dalhousie.

At Halifax they put up at the Halifax Hotel where they arrived during an Armistice Ball. The next evening there was a dinner at Slurreff Hall, the beautiful new girls' dormitory. A light practice Friday morning put the girls in shape for the game which was played in a pouring rain. The Maine team was supported by a group of Nova Scotia Tech men who were on the train during the trip up. They had learned "Maine the long way" and their cheering rivaled that of the Dalhousie rooters.

The game was fast and interesting; the Dalhousie girls played an open game with a splendid defense. The Maine forwards, supported by the capable work of the backs were equal to the situation. One of the most interesting points of the game was the penalty bully, a penalty very rarely given to the defending team, but the Maine girls, because of the novelty of the play, were not able to make the best of it.

(Continued on Page Four)

## BASKETBALL MEN

### REPORT TO BRICE

### BLUE COACH NOW TURNS ATTENTION TO HOOP GAME

Having tucked away his football charges and their trophies for another season, Fred Brice, Maine's new head coach of basketball has turned his attention to the court game. Prospects for a winning hoop team are fairly good, with four veterans and several promising members of last year's frosh team available.

Captain "Mack" Lake, and "Bill" Hanscom, forwards, "Swede" Olsson and "Cub" Bryant, backs, are the lettermen who were on deck Wednesday afternoon when the first call for candidates was sounded. At the close of last season, it looked as though there would be two other veterans available for this year's outfit, but the death of "Dutch" Bunton and the failure to return to school of "Pete" Johnson, depletes the ranks of the experienced men.

Although the season as a whole last winter was not as productive of victories as it might have been, "Cuddy" Murphy had developed a team which promises great things this year. In Captain Lake, Maine has a brilliant player, who was one of the outstanding stars in New England last winter. Lake had a little trouble with his knee which kept him out of a few games, but it is hoped that this year his old injury will be sufficiently cured to allow the Wilton boy to cavort as of old.

Bryant, Olsson, Johnson, and Bunton all fought it out for guard positions last year, with scarcely any noticeable difference showing up among them. The possibility of any sophomores displacing Bryant and Olsson is not considered very great, however, this year, since both boys are all set to have one of their best years. Bryant has been playing football this fall and is in first class shape to take the floor any day. It is expected (Continued on Page Three)

### Paul Lamoreau to Lead 1926 Eleven

Paul D. Lamoreau '27, right tackle, was elected captain of the 1926 Maine eleven at a meeting of the letter men Wednesday noon. Lamoreau is also president of the Junior Class, a member of the M Club, and of Phi Eta Kappa fraternity.

## CAMPUS PICKS ALL-STAR TEAM

### Takes Part in Post- Season Sport

By Fred C. Newhall  
Athletic Editor

The all-Maine season is here! Inspired by most of its older brothers, the *Campus* has been moved to look through the apple orchard and pick its own fruit. Behold!

LE. Robinson, Bowdoin  
LT. Fraser, Maine  
LG. Tucker, Bowdoin  
C. Simon, Maine  
RG. Peacock, Colby  
RT. Lamoreau, Maine  
RE. Folsom, Bates  
QB. Erickson, Colby  
LHB. Farrington, Bowdoin  
RHB. C. Ray, Bates  
FB. Barrows, Maine

With the announcement of this winning team, the *Campus* stands ready to receive and answer all criticisms. In our opinion, this team will clean up all opposition. There are several berths which are open for discussion. Most experts will pick O'Donnell of Colby for center. Although the Colby man is a first-class pivot man, our "Joe" Simon is king of them all. The Millinocket youth, playing his second year as a regular, has been as steady as a clock and a bear on the defense. Throughout the season, Simon has made his passes to the backfield under all sorts of conditions, and never has he failed and made a shady toss. He has outplayed his opponents in practically every game, and looked good against Davis, the Dartmouth star. What better recommendation can one wish?

The guard positions also are open to considerable controversy in the selection. It is hard to leave out one "Tom" Dickson of Maine, who has played a bangup game all season against opponents who have outweighed him ten pounds in a majority of cases. Dickson is also a ball hawk, and his feat of winning the game with Connecticut Aggies should not go unnoticed. However, both Tucker and Peacock are guards of three and four years experience, while this is Dickson's first year at the position. This gives the others a slight edge.

The other positions are filled by men who are almost unanimous in the opinion (Continued on Page Three)

## FORESTERS LEAVE FOR WINTER CAMP

### Twenty-one Seniors to Spend Eight Weeks In Maine Woods

The Senior Forestry class of twenty-one boys left this morning for camp. They were accompanied by Mr. D. B. Demeritt of the Forestry department, George Gruhn, Maine '25, of the State Forestry department, and Mr. F. F. Jones of the Great Northern Paper Company. The Forestry department works in cooperation with the Great Northern Company, and the camps used by the department are those used last year, the property of the Great Northern, above Grindstone Station.

The foresters will remain in camp until Christmas and return for four weeks more after the Christmas vacation. They will work eight hours a day for six days a week. The time will be divided into cruising and mapping, two days a week; logging engineering, two days a week; and forest management, two days a week.

They will also study problems in practical pulp wood logging, surveying, land lines, and the drawing of accurate maps. For recreation the "knights of the axe" are planning a big hunting expedition at Thanksgiving time and will also devote their Sundays to a relaxation from the strenuous work of the week.

## MAINE BATTLES NEW HAMPSHIRE'S UNBEATEN ELEVEN TO 0-0 TIE

### VISITORS FAIL TO SHOW EXPECTED STRENGTH ON MUDDY FIELD

### BEARS OUTPLAY OPPONENTS

### Locals Make Ten First Downs— Peakes Kicking A Feature

In a sea of mud, Maine's Bears wound up their most successful season in years Saturday afternoon by battling the strong New Hampshire University team to a scoreless tie. By so doing, the Bricemen forced the Granite stagers and Massachusetts Aggies to move over on their perch at the top of the New England Conference standing to make room for them. Thus exists the first triple tie in the history of the conference. None of the three teams has met defeat, and Massachusetts Aggies is the only outfit to be untied.

Saturday's battle between the champions of Maine and the prospective New England champs was a fight for the breaks, and the breaks never came. New Hampshire seemed content to remain on the defensive throughout most of the battle, often kicking on the first and second down. Maine had the ball oftener, and made ten first downs to the Durhamites four. Twice the Bears were within striking distance of their opponents goal line, but lacked the punch to put it over. The battle reverted to a kicking duel, with "Pat" Peakes more than holding his own, both with and against the strong wind, with the brilliant O'Connor.

New Hampshire also had a chance to score in the second period, after working the ball far into Maine territory by virtue of some Titanic line plunging by Abbiati. O'Connor, who was never able to get away all afternoon, tried an end run, after a fake double pass, but Nangan drove him back around the other end, where half a dozen Maine players annihilated him. Peakes got away a beautiful punt which carried seventy yards in the strong wind, and New Hampshire's only threat was muzzled right there.

The much vaunted driving offense of the heavy New Hampshire backs and the clever open field work of their captain, O'Connor, failed to be noticeable. The Maine line and ends were impregnable, and O'Connor was forced to punt time after time.

From a Maine standpoint, the game was entirely satisfactory. The ball was in New Hampshire territory a greater part of the time. Once, with the ball on the enemy eight yard line, a place kick might have won the game, but the Maine field general, Cassista, elected to try a forward pass, and the ball was lost on downs. The ball was wet and heavy, and the field slippery, making it extremely difficult to handle.

"Ginger" Fraser, "Freddy" Newhall, "Moose" Elliott, and "Bump" Barrows, playing their last game for Maine, outdid themselves, and were the outstanding players of the game, together with Peakes, whose punting was a feature, (Continued on Page Three)

## Junior Prism Notice

Juniors: Your individual Prism pictures should be submitted to Elwin Hodgins or Helen Peabody by December 1; detailed instructions on the bulletin board in Alumni Hall. Group pictures will be taken beginning the first week in December.

A call will be sent out in a few weeks for your literary contributions, snapshots and wise-cracks. We need them. Remember that the 1927 Prism is going to eclipse all former yearbooks but to do this we must have your help.

## Reactions

*"To every action, there is always an  
opposite and equal reaction..."*

Newton

When a ball is thrown against a wall, it does not stop and fall inert to the ground, but with a swiftness bounds back toward the thrower. When a stone is thrown in the air, it does not reach its highest point and maintain that level, but immediately falls earthward with as much speed as it ascended. When a gun is fired, the explosive force of the gunpowder not only ejects the bullet, but imparts a backward thrust to the butt of the gun which has given birth to many a sore shoulder. If one attempts to climb out of a boat near the shore, the energy which is imparted to the jump is often led astray when the boat absorbs that energy in a backward glide, often throwing the person in the water.

Thus it would seem that there are distinct ups and downs in the world of solid bodies, and that the downs all too eagerly follow the ups. Yet life in general offers itself as a poignant analogy. The man who overworks is forced to retire in a nervous breakdown. While that is extreme, it may be readily admitted that any abnormal effort or strain is consistently followed by fatigue and lethargic disinterest.

So it may be inferred that the peaks of existence not only are few, but are brief. Only for a short while can one work at a high pitch, and when the time is up the reaction is often disastrous.

For nearly a month, the college has been lifted out of the rut of ordinary college routine to the suspense and nervous excitement of important football games and cross country meets. Rallies and parades; cheering and snake dances; trips and visiting colleges; a conference or two and now a Chautauqua have arrived a disrupt the accustomed serenity of campus life, and have left us weak and exhausted, feebly attempting to beguile our instructors into believing that we have learned enough to warrant a passing mark. It is in consideration of such a reaction that this editorial is written.

Next week there will be an emotional comedown for all of us. Very little will be going on. Midsemester examinations will have become history once more. We will have a new sheet to write on. The first few lines of this sheet may be inclined to be feebly written. But Newton's law was not evolved with the mental aspect of existence in mind. He was concerned with physics and not psychology. If there is any reaction at all to this unused tension let its force be absorbed in efforts to improve ourselves and our opportunities in and outside of college.

## 1929 and the Owls

The action taken by the Owls in stating their intention to enforce the freshman regulations appeals to the editor as

a very laudable step. Traditions of this sort have shown a lamentable tendency to slip backward for several years. Although the freshmen may not agree with the announcement, there has never been heard an ex-freshman who regretted the treatment he received, no matter how severe it may have seemed to him at the time of infliction.

The editor would like to see the return of the old posters with the rules flagrantly announced to all. Perhaps the wording might be less harsh than was the case, but the idea of the jubilant sophomore and the lowly freshman has an appeal to anyone who is at all imaginative.

A lot of fun may be had if the relations between the freshmen and sophomores are judiciously handled. If matters were to proceed as they have tended to, the rising night would begin to mean little but custom in a year or two; whereas it should be a night when freshmen heave a mighty and voluminous sigh of relief, shake off the shackles of servitude and gambol on the campus green with sweaters, bow ties and golf sox, blowing curly blue rings of smoke at their erstwhile oppressors. It's all in fun, but it means a lot in memory.

## SNYDER ADDRESSED STUDENTS AT CHAPEL

Frederick Mehrle Snyder in his chapel talk of Thursday, November 12, earnestly appealed to the students to support the entry of the United States into the World Court. Mr. Snyder had a wide experience as newspaper correspondent during the World War, and he spoke as one firmly convinced of the necessity of peace. His message was more of an inspirational rather than an informational nature, because he desired to provoke the students to do some original thinking on the question.

He said in part: "Peace is the first interest of this nation. We have been asked to risk everything for war and now we must risk something for peace. The World Court is a doorway to peace, established by 47 nations to apply justice. This organization needs the United States, because our presence would be a great moral factor, and we should cooperate with them in their search for peace."

Mr. Snyder deplored our delay, declaring that friction had already resulted from the failure of the United States to enter the Court. He continued: "Do not think that war is inevitable. We cannot live in an atmosphere of hate. We must war with our vices and be at peace with our friends. If we do not assist Europe in stamping out her political diseases, in time the plague will come to us. We need the actionist to steer to peace, not so much the optimist to drift to peace."

The question of the World Court will come before the Senate December 17, and Mr. Snyder asked that a poll be taken of all the students of the University in order to obtain an expression of opinion on the subject.

The results of the M.C.A. drive a week or two ago, although not entirely complete, are enough so, that the following may be announced. Out of the \$1416 which was the objective of the organization, \$1140 has been recovered from the student body. This is as much as was hoped for, and the cabinet feels confident that the few friends who made donations last year will be able to bring the figure up to the minimum which was hoped for.

Professor Mark Bailey of the Public Speaking department is planning to stage several one-act plays of different nationalities during the next few weeks, and desires students to take part in them, both men and women being asked to try out. Russian, Irish, and Spanish plays are among the ones to be put on. These plays are in the nature of something new at the University and are planned to uncover possible talent for the productions of the Masque during the year.

Commencing with this issue the Campus will be published until further notice on Thursday instead of Wednesday.

## CORRESPONDENCE

Editor of the Campus:

Monday evening members of Oak Hall and Hannibal Hamlin were called to a meeting in the Commons dining room to discuss the question of Military Inspection of the dormitories. A majority of the students felt that the inspection which has now been in vogue for two weeks, is an infringement on personal liberty, but no objection has been made to the inspection of buildings for property damage.

A petition circulated in the dormitories was handed last week to Acting President Boardman. As a result three members were summoned before the Administrative Board and informed that students opposed to military inspection of the dormitories could seek other quarters.

An incident of a student being reprimanded for not standing at attention in the presence of a military officer caused some antagonism. After a thorough discussion of the matter, a committee of ten members was elected to approach Acting President Boardman, obtain a written statement of the policy and purpose of the military inspection, and return with this statement to the students of both dormitories.

The students in the men's dormitories object to the militaristic spirit of room inspection under guise of looking for property damage, etc. They claim that property damage has passed unnoticed, and only the failure to have beds made or rooms swept and tidied, has attracted the attention of the inspecting officers.

Though this inspection is conducted by the Military Department, the students place no blame on the officers. Rather, arbitration with the Board of Administration, and not stern denial of personal privacy and liberty, is desired by the dormitory students.

A Dormitory Student

## M. C. A. ACTIVITIES

The discussion groups sponsored by the M.C.A. began last week with discussion on "What are we in college for?" These groups were introduced last year for the first time, and proved to be of so much interest that there was no hesitation in proposing that they be continued for the present year.

Each of the organizations which hold these groups had the opportunity to choose the professor who was to lead the discussion, and thus there was greater opportunity to satisfy each body and make the affairs more of advantage to their members.

So far two sessions have taken place. A list of topics has been suggested, but there is no rule to make the bodies adhere to the program. Whatever seems to be most timely and important will have a place upon the outline.

The men chosen by the houses and the topics for discussion follow.

1. What are we in college for?
2. Does the campus give a fair chance for all?
3. Shall we always keep the rules and laws?
4. What shall we do when loyalties conflict?
5. Where shall we stand on relations between men and women?
6. Does college weaken or strengthen religious faith?

The Maine-in-Turkey movement this year has a particular interest for all Maine students, because Ruth Crockett '25 is connected with the project as a teacher at the American Collegiate Institute, in Smyrna. The following extracts from her recent letters are of interest in picturing the conditions under which American teachers work in the Turkish city.

"We reached Smyrna the afternoon of August 31. I spent my first night at the Vroomans' and it certainly seemed good

## ORGANIZATIONS

The Order of the Temple held its first regular meeting Nov. 12, at the Masonic Hall in Orono, Carl H. Bischoff presiding. Laurence B. Blethen was elected to serve as secretary-treasurer for the coming year. After the regular business session ice cream, cookies, cigars and cigarettes were served. The next meeting will be the first Thursday in December, as the last Thursday in this month, the regular night for the meeting, will be Thanksgiving.

Although many members of this organization are not back, steps are being taken to secure new men and continue the work of past years. This order is affiliated with the National League of Masonic Clubs and is open to all Master Masons.

The French Club held the first meeting of the year Tuesday, November 10. Officers were elected as follows: president, Joseph R. Dougherty '26; vice-president, Mary Larkin '26; secretary, Mary Roche '26; and member of program committee, Angeline Mornault '27. After the business meeting Professor Kueny read selections from the fables of La Fontaine.

A regular meeting of the Contributors' Club was held Thursday evening, in the Arts Building. It was open to members of the club and also to English majors and minors.

Miss Mary Robinson of the Bangor High School faculty gave a very interesting lecture upon the life and works of Elizabeth Barrett Browning. She related several humorous incidents in Mrs. Browning's life and read some of her poetry.

Theta Phi Kappa fraternity held an informal party Saturday night at the Penobscot Valley Country Club.

Refreshments of punch, ice cream and cake were served during intermission. Chaperones for the evening were Major and Mrs. Glover.

Music was furnished by Boucher's Collegians.

An informal dinner party was given by Beta Theta Pi fraternity at their chapter house, Saturday evening, November 14.

Lloyd Berrie's orchestra furnished music for the occasion.

Mr. and Mrs. Paul Bray were chaperones. Among the guests were Ralph Brown, Miss Black of Bangor and Mr. and Mrs. Youngs.

## Dr. Fernald's History On Sale at Book Store

In view of the remarks made by "Joe" McCusker at Maine Night relative to the establishment of an interest in the history of the University, it will be of interest to students and faculty to know that there are still some copies of Ex-President Fernald's History of the University to be obtained. They can be secured thru the University Store at \$1.50 a copy.

to have some real "Mainiacs" to greet you in a strange land. I am sure I shall enjoy my work here. Of course it will be hard until I get accustomed to doing without many of the comforts that I have been used to in America."

"My school opens the 21st. I have already met quite a few of the Turkish girls and teachers. The school is beautifully located on a hill and affords a view of Smyrna Bay. The buildings, however, and especially equipment are very inadequate. It seems that everything was lost in the disaster of '22 and replacement has been very slow.... Just at present I am giving a little Turkish girl an examination in composition.... I do hope some of the girls will make plans to come out here next year. Wouldn't it be great if we could have new Maine people coming out every year?"

Throughout the year the Maine representatives in Turkey, Mr. and Mrs. Vrooman and Miss Crockett, are going to keep in touch with the campus by sending monthly news letters telling of their work, in order that all the students may be acquainted with this foreign work as an integral part of the University.

## Scoop's CORNER

Last Wednesday, on its fifteenth birthday, the Maine Masque was reorganized. Whether or not this was the exact day of its birth has not been ascertained so for all practical purposes we will say that it was. The first constitution of the society was drafted in the fall of 1910 by Professor Windsor P. Daggett and took the place of the constitution of the then existing Maine Dramatic Club. Professor Daggett had been the coach and director of the club for many years and can truly be called the founder of dramatics on the campus.

Several unusual provisos are incorporated in the new constitution, one of which is that no social organization shall have more than one third of the active membership of the society. The other and most radical proviso is that women may be elected to membership. The decision to insert this clause was reached only after long and careful deliberation, for the Masque has always been a men's organization and to elect women to it would take from its exclusiveness. It was the contention of some of the members that if women were elected it would make the society too general and it would finally drift into being "just a club" like the many clubs barely existing in the various departments of the University; but as the society had already drifted in the past few years everything was to be gained and there was nothing to be lost.

The adoption of the proviso was probably due to the unanimous agreement on the following point; that if women should take part in Masque plays they should also share in Masque honors. The Domino, a more or less honorary women's dramatic society, has been inactive for the past several years.

Scoop would like to call attention to why the Masque did not include women when it was first founded. The following is an extract from a report given by Professor Daggett some years ago:

"When the Masque was first organized there were about twenty-five women at the University. The Mount Vernon House was their guest chamber, and they escorted one another to and from classes. In college life the co-ed serves as class secretary. There her participation ceases. She was a happy spectator; she received many courtesies; she sat on a cushion at the Bowdoin game; she was content. The men enjoyed an occasional flutter, and a chance to vary the military salute with a more yielding salutation. The women kept their side of the walk, they did not crowd the cars. Like an express package, the Mount Vernon House was labeled "to be called for," and man in his flannel shirt and corduroy trousers was monarch. These conditions continued, women remained "elective," and no one was urged to register. Man could conceive of nothing more important than himself.

"Just what the future of the Masque will be at the University, no one can say. That depends on general tendencies and unanticipated turns in college life. If conditions at the University ever require that dramatics be co-educational, the Masque will adapt itself to such conditions."

One of the many things the reincarnated Masque is going to do is to try to present a Shakespearean drama for Junior Week next May. "The Merry Wives of Windsor" seems to be in general favor for since it was first suggested many suggestions have come in relative to who would be best suited to impersonate the part of the rotund John Falstaff.

## PENNY CARNIVAL DEC. 5 Freshmen Ended Season With 0-0 Tie With M. C. I.

December 5 is the date set by the Girls' Athletic Association Board for their annual Penny Carnival. This year the girls are planning to expand their former program, by adding novelties, or specialty numbers, which will give the affair more color and real carnival atmosphere. Just what these are to be, the Board has not as yet stated definitely. Good music will be obtained for the dancing which will follow later in the evening.

### Campus Picks All-Maine Team

One of the experts throughout the state, and more about them would be superfluous. The brilliant playing of "Ginger" Fraser and Paul Lamoreau, not only on the defense, but offensively as well, both men having recovered blocked punts and scored touchdowns; the flashy work of Ray of Bates and Farrington of Bowdoin; the steady plugging of "Bump" Barrows of Maine, one of the country's leading scorers; the outstanding work of Erickson at quarter and Robinson and Folsom at ends; all this is an old story and it is not necessary to call any further attention to any such foregone conclusions.

So there you are. Now pick a team of your own if you don't like this one.

(Continued from Page One)

### Basketball Men Report

that Brice will give the Lincoln ace a few days of rest, however, before he takes up the winter's grind.

The loss of "Pickleholder" Soderberg and "Tubby" Everett will be the hardest to replace. Soderberg, the lanky center, was one of the mainstays of the team, and was the high point man in most of last year's games. Everett played his second year of varsity basketball last winter, and, after a rather rocky start, found himself and played the game of his career at forward.

Brice's freshman team of last year may be productive of several stars of varsity caliber. Notable among these is "Speed" Branscom of Northeast Harbor, who captained the yearlings and played a brilliant game at forward; "Roy" Fitzhugh of New York, who played center and a back position; "Charlie" Stone of Fort Fairfield, who teamed up with Branscom at forward, and "Pete" Bennett, who showed more than ordinary promise at guard.

With this wealth of material, Brice should be able to develop a winning team. The genial Mr. Murphy made a good start, and Maine fans will watch with interest the first college team which Brice will turn out.

The complete varsity schedule is not yet ready for publication. The team will make its usual Christmas trip, opening with Dartmouth at Hanover, and then jumping over to New York, where several games will be played. Manager Delmont Parsons of Portland will handle the business end of the outfit, and will announce the full schedule in a few days.

### Maine Battles New Hampshire's Unbeaten Eleven to 0-0 Tie

and Cassista, who made several dashes for substantial gains. Maine was out-weighted, as she has been in every game but the Bates tilt this year, but consistently outplayed the New Hampshire outfit, man for man.

Abbiati, Nicora, and Stewart, and Hoagland, the giant guard, stood out for New Hampshire.

high. Time, 4 12 m. periods.

The results of the inter-class cross country meet, which was held November 9, are as follows:

1929, 42; 1927, 59; 1926 and 1928 failed to finish five men.

The Maine freshmen wound up their season Armistice Day morning by battling to a scoreless tie with the strong M.C.I. team at Pittsfield. In some respects, this scrap was a forerunner of the Maine-N. H. game, since the field resembled a muddy section of the Bay of Fundy at low tide, and the two teams fought through four periods without either being able to establish its supremacy. The two outfits were about evenly matched, the Pittsfield boys slightly outweighing "Jack" Quinn's charges.

The frosh had the ball on M.C.I.'s fifteen yard mark once, but a pass went astray and the ball was lost. The only noticeable break of the game came when a M.C.I. back fumbled and Leavitt, the 220 pound frosh guard scooped the ball and attempted to "do a Dickson," but he was overtaken and downed by a more speedy foe.

The playing of Coltart and LaPlante in the backfield and Lydiard in the line featured for the freshmen, and Karkos and Stitham stood out for M.C.I.

## Going

## Up

R. W. Owens

EVERY time you go up in a modern building having high-speed elevators (the Chicago Athletic Club, for instance) you are lifted by the ingenuity of at least one Westinghouse engineer who is barely ten years off the campus.

Until three years ago, high-speed elevators invariably required direct electric current. There was no practical method of using alternating current, and since many districts are supplied only with alternating current, a serious handicap existed.

It was possible to employ a motor generator to convert alternating current into direct current, but when that was done no practical system of control was available if the elevators were to be operated at high speed. The suggestion was made that the control be accomplished by varying the

The question is sometimes asked: Where do young men get when they enter a large industrial organization? Have they opportunity to exercise creative talents? Or are they forced into narrow grooves?

This series of advertisements throws light on these questions. Each advertisement takes up the record of a college man who came with the Westinghouse Company within the last ten years, immediately after graduation from his university.

voltage of the generator, and (among others) to a young man of thirty-three—R. W. Owens, Illinois '14, now head of the direct-current section of the motor engineering department—came the special problem of designing an electric generator that would perform as one had never performed before.

Many were associated in the

undertaking, for it involved pioneering in control apparatus as well as in generator design, but eventually all difficulties were overcome, and there emerged the "Variable Voltage Control System for Electric Elevators", now standard throughout the building industry.

Here you have the type of problem that confronts the design engineer in an organization like Westinghouse. Not all are as large as this, or lead to such sweeping results. The design engineer works for the customer. He starts with an analysis of the customer's needs and develops apparatus to meet those needs.

His responsibilities are varied and heavy. The jobs of the direct-current section of the motor engineering department range from motors for driving ventilating fans to those for dumping whole cars of ore at the docks. A force of 1,000 men is constantly occupied building the motors designed by this section.

Friday evening a dance in honor of the Maine girls was given, at Slurreff Hall. It was an informal, jolly affair full of pep and go the whole evening. The Dalhousie hockey girls were eagerly assisted by a group of the medical students.

The girls got a vivid impression of life at Dalhousie. Among the most noticeable features to the Maine girls was the way the men turned out to help the girls. They met the train with their cars, took the girls all over the city the afternoon after the game, and taxied the crowd to the station Saturday morning. Not only this, but a number of them assisted the manager in preparing the field for the game.

The trip was a success from every point of view. It was not only an athletic victory but also an educational treat.

### (Continued from Page One) High School Editors Guests at Annual Journalistic Confab

The papers were divided into three groups: newspapers, monthlies and quarterlies, and year-books. In the first class the honors were awarded to the Stephens Broadcast of Rumford, with the Jordan Booster of Lewiston second and the Ellsworth Jester third. The prize in the quarterly class went to the Houlton North Star, with the Cony Cue second and the Hallowell Venture third. The Coniad of Augusta was first among the annuals with the Gardiner Quill and the Dexter Signet second and third. The judges of the contest were Robert T. Turner and John H. Mahoney of the Campus staff, and Irving Kelley, president of Kappa Gamma Phi. They were assisted by Mr. Patten and members of the English department.

When the prizes had been announced, the meeting was thrown open to discussion of the problems of the different papers, led by the students who had acted as judges. Suggestions for the improvement of the conference were offered by several of the delegates, but on the whole it was voted the most successful to yet be held. The new plan of conducting the meetings in the fall instead of in the spring as has been customary in former years met with the unanimous approval of the delegates.

The schools represented and their delegates were as follows:  
Auburn: Edwin Fowler, John Manning; Bangor: Bruce Cunningham; Biddeford: Prescott Howard, John Finn; Caribou: Helen Briggs, Cecil J. Brown; Augusta: Ida Drapkin, Dorothy E. Mosler, Melvin A. Mower, William H. Weeks; Dexter: Carl Moses, Richard Ramsay; Ellsworth: Harlan Bragdon, Thomas Holmes, Lelia K. Morrison, Helen L. Whitcomb; Dover-Foxcroft: Dana Bryant, Verna Green; Gardiner: James Booker; Hallowell: Munroe Getchell; Hampden: Vida Nickerson; Houlton: Harold E. Foster, Jos. H. McGillicuddy; Lewiston: John Driscoll, Leonora Ferguson, Fannie Saunders, Dorothy Stiles, M. E. Wallace; Milinocket: Arline McPheters; Patten: Manley Kilgore; Rumford: Mary Hoag, Alton Lessard, Helen MacDonald, McKenzie; South Portland: Fred Dingley, Virginia D. Dudley; Unity: Isabella Brown, Kenton R. Bagley; Waterville: Stanton Weed.

### Do you know? "HOW TO STUDY"

The Students' Hand-Book of Practical Hints on the Technique of  
Effective Study

by  
WILLIAM ALLAN BROOKS

A GUIDE containing hundreds of practical hints and short cuts in the economy of learning, to assist students in securing MAXIMUM SCHOLASTIC RESULTS at a minimum cost of time, energy, and fatigue. ESPECIALLY RECOMMENDED for overworked students and athletes engaged in extra curricular activities and for average and honor students who are working for high scholastic achievement.

#### Some of the Topics covered

Scientific Shortcuts in Effective Study  
Preparing for Examinations  
Writing Good Examinations  
Brain and Digestion in Relation to Study  
How to Take Lecture and Reading Notes  
Advantages and Disadvantages of Cramping  
The Athlete and His Studies  
Diet During Athletic Training  
How to Study Modern Languages  
How to Study Science, Literature, etc.  
Why Go to College?  
After College, What?  
Developing Concentration and Efficiency  
etc., etc., etc., etc., etc., etc.

#### Why You Need This Guide

"It is safe to say that failure to guide and direct study is the weak point in the whole educational machine." Prof. G. M. Whipple, U. of Michigan.  
"The successful men in college do not seem to be very happy. Most of them, especially the athletes are overworked." Prof. H. S. Canby, Yale.  
"Misdirected labor, though honest and well intentioned may lead to naught. Among the most important things for the student to learn is how to study. Without knowledge of this his labor may be largely in vain." Prof. G. F. Swain, M.I.T.  
"To students who have never learnt 'How to Study,' work is very often a chastisement, a flagellation, and an insuperable obstacle to contentment." Prof. A. Inglis, Harvard.  
"HOW TO STUDY" will show you how to avoid all misdirected effort.

Get a good start and make this year a highly successful one by sending for this hand-book and guide NOW.

Name  
Address

"Everything's jake"  
when you  
smoke P. A.

TROUBLE'S a bubble, just as the song says. And you can stick it with the stem of your old jimmy-pipe, filled to the brim with good old Prince Albert. A remedy? It's a specific! Ask any jimmy-piper who ever butted into trouble.

Cool as the zone-of-kelvination you read about in the refrigerator ads. Sweet as the kiss of spring on a winter-weary brow. Fragrant as locust blossoms. Soothing as a cradle-song. And—P. A. can't bite your tongue or parch your throat. The Prince Albert process fixes that!

Get on the sunny side of life with a jimmy-pipe and P. A. Tie a tidy red tin to trouble. Smoke the one tobacco that's got everything you ever wished for—Prince Albert. Quicker you get going, the sooner your worries will be over. Men who thought they never could smoke a pipe are now P. A. fans. You'll be a cheerleader too!

# PRINCE ALBERT

—no other tobacco is like it!

P. A. is sold everywhere in  
tidy red tins, pound and half-  
pound tin humidors, and  
pound crystal-glass humidors  
with sponge-moistener top.  
And always with every bit of  
bite and parch removed by the  
Prince Albert process.

Look at the U. S. revenue  
stamp—there are TWO full  
cigarettes in every tin.
