## PIGSKIN PUSHERS DEFEAT NEW HAMPSHIRE STATE TEAM TO WIN N.E. CHAMPIONSHIP

Pale Blue Warriors Outplay Wildcats on Muddy  
Field in Most Exciting Game Seen on  
Local Gridiron This Year

MAINE TEAM HAD SUCCESSFUL SEASON

Breaking away from previous precedent, the Pale Blue pigskin pushers won last Saturday from New Hampshire State in a battle of mud and water. By so doing they gained right to an undisputed claim of the New England Conference Championship. The gridiron was a platter of mud and ooze. This fact accounted for the more or less loose game played by both teams. The breaks were fairly evenly distributed, however, even though certain elements of the game tried their best to make them otherwise. There was only a handful of spectators at the game, due no doubt to the adverse weather conditions. Even though the attendance was not very large, those missing the game lost out on seeing the most exciting game played on the local gridiron this year. Immediately after New Hampshire scored, what few supporters there were burst forth into a show of enthusiasm that has not been equaled, comparatively, heretofore this year. Even Bananas got excited and tried to take a fall out of one of the cheer-leaders.

Statistics show that Maine had a very decided edge over their Granite State rivals. Maine made 17 first downs and New Hampshire one. Maine gained 261 yards by rushing, 19 by forward passes, lost 22 yards, was penalized 34 yards and completed two forward passes. New Hampshire made 42 yards by rushes, nine on one forward pass completed, lost 27 yards and was penalized 10 yards. In the first period Maine rushed 197 yards. New Hampshire made 3 yards but lost 20, making a "gain" of minus 17 yards.

With this, the last game on the 1927 football schedule, passes into pleasant recollections the memory of one of the best seasons and football teams Maine  
(Continued on Page Four)

## MAINE FOOTBALL TEAM IS FIFTH IN POINTS

COLTART AMONG LEADERS IN  
TOUCHDOWN MAKERS

The Maine football team is the fifth highest ranking team in the country, with a total of 245 points. Heading the list is Georgetown with an aggregate of 339 points in eight games played, or a game average of 42.3 points. Dartmouth is in second place with a total of 280 points, a game average of 35 points. Pittsburg is in third place with 249 points, an average of 31.1. New York University is in fourth place with an aggregate of 246, a game average of 30.7 points. Maine has fifth place with a total of 245 points, or an average of 35 points. This makes Maine tie with Dartmouth for average points scored in a game.

In the Maine college teams, Maine is in first place in scoring points but second in the opponents teams scores. Maine has 245 points, Bowdoin is second with 55 points, Colby is third with 50 points, and Bates has scored 7 points. Colby has 26 points scored against them, Maine has 36. Bowdoin has 126, Bates has 114.

Coltart is leading scorer in Maine with 68 points to his credit. Peakes leads in scoring points after touchdowns booting 21 points.

## FOOTBALL SCHEDULE—1928

Sept. 26 Rhode Island State at Orono  
Oct. 6 Yale at New Haven  
Oct. 13 Connecticut Aggies at Orono  
Oct. 20 New Hampshire at Durham  
Oct. 27 Bates at Orono  
Nov. 3 Colby at Orono  
Nov. 10 Bowdoin at Brunswick

## COEDS HAVE DREADFUL LIFE AT BALENTINE IN EVENING AFTER 10:30

MANY COURSES WILL BE FLUNKED  
UNLESS NEW RULES  
ARE MADE  
Investigation Expected

"Life isn't what it used to be," is the plaintive cry of the coeds in Balentine. Last year it was the telephone, or rather the lack of telephone on the third floor that upset the peace and well being in the dorm; this year it is furniture and lights, or mysterious new rules on these all important subjects.

If once in a while a coed gets ambitious and decides to study after 10:30 P.M. so many difficulties are involved that by the time she finds a solution the poor thing is so worn out, she must recuperate in bed. For according to M.W.S.G. handbook (Maine Women Student Government for the unlearned), if one studies after 10:30 one must work in a study hall unless the roommate also elects late hours, but here the tragedy enters. This year, so they say, if one goes into the sun parlor or reception hall after the zero hour, persons in just as high authority as W.S.G. come tearing in and say, "Oh! No, you can't study here, the walls are being ruined by ink spots, and, so that Balentine may long live and flourish, the coeds are giving up studying.

And worst yet, if a chair or davenport be slightly moved in these newly sanctified regions, authority again asserts that the furniture is not to be touched. This is especially dreadful on Friday and Saturday nights when men are invited in, for the suffering guests forced to sit an entire evening with their backs close to a scorching radiator, and their toes in the icy regions toward the windows are liable to contract cold feet, and never come again. (Begin sad music here.)

"Long live the furniture movers!" seems to be the popular war cry along the corridors of the dorm.

## CHEMICAL ENGINEERS HELP MANUFACTURERS

Co-operation between the department of chemical engineering of the College of Technology of the University of Maine and three pulp and paper manufacturing concerns of eastern Maine has been going on during recent months, research work for the benefit of these concerns being done by Professor Paul D. Bray of the University. The problems considered arose in the usual activities of the mills, and required research and tests for solution.

The local mill of the International Paper Company has had some difficulty in obtaining a properly "sized" (that property which renders paper resistant to moisture and ink) paper during the summer season, because of the high temperature of the ground-wood pulp as it comes to the paper mill from the pulp wood grinders. Tests were run under Professor Bray's direction to determine if this trouble was directly proportional to the temperature, or if it reached a maximum at a definite temperature within the control of the mill, which would be taken into consideration and the situation thereby improved. Certain colors used in papers containing both ground-wood pulp and unbleached sulphite pulp show a different degree of absorption by each kind of pulp, with the result of uneven color of the paper produced. Tests were run to see what could be done to improve this condition.

The Orono Pulp and Paper Company makes many paper specialties, that is, papers to be used for special purposes. Among these is a tissue paper to be used for wrapping silverware. This paper must be of such purity that it will not contain any substance that will tarnish the article about which it is wrapped. Papers are being tested for the Orono Company at the University to see if they are safe for this use.

## MAINE HARRIERS EASILY WIN NEW ENGLAND CROSS COUNTRY CHAMPIONSHIP AT BOSTON

Kanallymen Make Lowest Score Ever Known  
To Association, With Richardson, Lindsay,  
McNaughton Taking First Three Places

CUSHING AND BENSON TIE FOR ELEVENTH

## TRACK CLUB WILL HOLD CHRISTMAS HANDICAP

Mr. Kanaly's track squad has nearly completed its fall training. The boys have worked hard and faithfully in this pre-season training period, perfecting form and developing endurance for active competition during the winter and spring meets. The trial in 390 held last week, completed the schedule and indicated the progress made during the fall by the sprinters who get no such opportunity to display their wares as the distance men do in cross-country.

During the fall several events of only minor importance to the college have been run off. The fall handicap, held annually, showed the comparative abilities of the men in all events and the victories by varsity men speaks well for spring successes. The Pumpkin Meet produced some excellent performances in all events. It was the best all-around meet of its kind for several years. The inter-class relays customarily run between the halves of featured football games, had to be abandoned this fall because of poor track conditions.

While the fall season has been very successful, it has hardly been a pleasure for the men involved. Few men are willing to extend every effort with no further aim than this effort. To fulfill its purpose, some recognition and appreciation of these efforts must be shown. That is just what the Track Club proposes to do. On December 9, the Track Club will stage the second annual Christmas Handicap, at which time the cream of the Maine track squad will exhibit their prowess.

The success of last year's initial attempt at this sort of thing will be recalled by many. The events were well-handled and run off according to schedule, with fine results. Because of the handicap nature of the affair, any winner will necessarily be forced to extend himself to the limit. This insures top-notch performances in all events.

To make this occasion even more attractive, a dance has been planned to take place immediately after the meet. Sufficient money to defray the expenses of the meet and dance are all that are required so that it should not be financially embarrassing to anyone. The social committee of the University is withholding all permits for that night so that the meet and the dance may have full sway on the campus. Everybody plan to see the meet and have a good time at the dance afterward.

## PRESIDENT BOARDMAN ON HAND FOR N.H. GAME

Following is an extract of a letter written by President Boardman to William M. Sawyer, a trustee of the University, in relation to the President attending the meeting of the Association of Land Grant Colleges in Chicago this week. This paragraph shows the keen interest of President Boardman in the athletics of the University.

"It may be of interest to you to know that we three are very desirous of seeing the New Hampshire game next Saturday and after more or less investigation we found that we can arrive in Chicago early Monday morning by leaving Portland on the Grand Trunk Saturday about six o'clock. This, however, would necessitate leaving Bangor on the 1.20 P.M. train and would not allow us to see the game. After  
(Continued on Page Four)

"Won't be home for  
Thanksgiving,  
folks!"

Once more have the harriers of Maine brought home the laurels by winning the New England Intercollegiate Cross Country run. The Kanaly-coached team from Maine turned in a sweeping victory last Monday over eleven other colleges from all over New England by the lowest score ever known to the association, the score being 29. Maine finished men in the first three places and in the eleventh and twelfth places. Richardson defeated Lindsay for first place by a few inches. McNaughton finished only a few feet behind. Captain Cushing and Benson tied for eleventh place to win.

That cross-country is a success at Maine under Coach Kanaly is shown by the fact that Maine teams in recent years have been consistent place winners. By winning the State Championship and later the New England, Maine is well placed for the Nationals that are to be run in Van Courtland Park next Monday afternoon with eighteen colleges in the East entered. Penn State, Cornell, Syracuse and Harvard are all looked to be the top notchers by the Boston papers. But Maine's record this season certainly changes the perspective of the whole matter and now the Pale Blue harriers are being conceded a chance. But the University has its own point of view and that is that their team will be in the scoring.

Cox of Penn State and Captain Reid of Harvard are expected to battle for individual honors but the leaders of Maine are expected to be up in the frontal ranks.

At the race held last Monday, Lindsey and Richardson seized the lead at the start and were never headed. McNaughton followed at a short distance. For a considerable distance Cushing ran in fourth place but Captain McClintock of M.I.T. passed him on a hill and finally finished in fourth place. The nearest team to Maine in point of scoring was M.I.T. with 69. New Hampshire had been expected to make a brilliant showing but did poorly, finishing in third place with 110 points. Bates, the only other Maine team entered, got seventh place with a total score of 186. Wardwell, their best bet, finished in fifth place, and Burke, their next man was in twenty-fourth place.

Leon Thorsen of Ellsworth, Maine sophomore, running his first year of cross country pulled one of the surprises of the day for M.I.T. finishing eighth and beating his Captain, Kirwin. Thorsen formerly attended Higgins Classical and Colby. Ronald Harmon of Bar Harbor, a B. U. man, finished 30th, and second for his team.

The score:

Maine, 29; M.I.T., 69; New Hampshire, 110; Rhode Island, 114; Wesleyan, 150; Bates, 186; Brown, 190; B. U., 211; Tufts, 238; Mass. Aggies, 242.

The freshman meet was as one-sided as the 'varsity, with New Hampshire finishing five men well in the lead after being ahead all the way around. Lazure, Howard, Benedict, and Tardiff finished hand in hand, with Hazen few steps behind. New Hampshire scored 39 points, M.I.T. 113, Bates 144, Maine 167, and Mass. Aggies 220. Viles of Bates was 6th, Jones 7th, Lee of Maine 12th, Chapman and Hayes of Bates 15th and 16th, and Nason of Maine 17th, even places scored in this race, which was a runaway for the Granite Staters from the first.

George Mahoney, '29, vice-president of Kappa Gamma Phi announced yesterday that the Sixth Annual Journalistic Conference for high and preparatory school publications will be held at the University on December 2 and 3 under the auspices of Kappa Gamma Phi, the journalistic society.

Thompson, in a certain sense, is Chicago's most sacrificing citizen. He has drawn the attention of a scandal-loving public from a serious and brutal crime wave, to one of a more intellectual and sophisticated nature, taking upon himself the honor of being the goat.

Football 1927 is over! The tumult and shouting has become silent; Alumni Field deserted; the bleachers and score board folded away for another year; Brice is figuring Maine's total score on an adding machine and wearing a contented smile for a job well done; six "heroes" are laying their uniforms in mothballs for all time; Yale suddenly remembers Harvard and her Centre, and wonders; a squad already drawing pictures for next year; and a student body thoroughly familiar with the Stein Song and possessing a little spirit which we hope will continue and seep into other problems and principles of Maine!

The diagrams are arranged in a 2x2 grid, representing the 1st, 2nd, 3rd, and 4th periods of a football game. Each diagram shows the field with yard lines from 0 to 50 yards on both sides of the 50-yard line. The top of each diagram is labeled with yard numbers (G 5 10 15 20 25 30 35 40 45 50 45 40 35 30 25 20 15 10 5 G). The bottom of each diagram is labeled with the period number and the score.

**1st Period:** Maine (M) 0, New Hampshire (NH) 0. Plays include: Fumble, Pass Intercepted, Pass Incomplete, Fumble, Fumble.

**2nd Period:** New Hampshire (NH) 0, Maine (M) 13. Plays include: Run, Kick, Forward Pass, Penalty, Lateral, First Down.

**3rd Period:** New Hampshire (NH) 6, Maine (M) 13. Plays include: Incomplete, Incomplete, Fumble, Fumble, Intercepted, Fumble.

**4th Period:** Maine (M) 13, New Hampshire (NH) 6. Plays include: Fumble, Incomplete, Pass Incomplete, Intercepted, Fumble.

SCIENCE VS. RELIGION  
STUDENT FORUM TOPIC

The question is always pertinent in academic circles as to whether or no there is a conflict between science and religion. The Student Forum of the Orono Methodist Church recognizing this eternal question mark in the mind of the student is trying to serve by offering a symposium on this very subject. In keeping with this intention the following program has been arranged:

Nov. 27 Dr. A. L. Fitch "Physics and Religion"  
Dec. 4 Dr. D. B. Young "Biology and Religion"  
Dec. 11 Dr. F. H. Steinmetz "Plant Science and Religion"

The Forum meets every Sunday after the morning service at 11:45 A.M.

Prof. L. M. Dorsey of the Animal Industry department, and Prof. G. E. Simmons were judges at the Annual Meeting and Exhibition of the Maine Dairymen's Association at Lewiston Nov. 15, 16, and 17.

Dr. Donald Folsom, Dr. Karl Sax, and Prof. E. R. Hitchner, all of the College of Agriculture, gave lectures at the Annual Meeting and Exhibition of the Maine Dairymen's Association and the Maine Seed Improvement Association which was held at Lewiston this Wednesday and Thursday.

C. E. Crossland of the Extension Department, attended the Annual Meeting and Exhibition of the Maine Pomological Society which was held at Lewiston on November 15, 16, and 17.

PLEDGES ANNOUNCED  
BY ALPHA CHI SIGMA

Alpha Chi Sigma, the national honorary scholastic society, in the department of Chemistry, announces the following pledges at the annual fall semester election: Walter T. Bouchard '29, H. Gardner Bourne, Jr., '29, John B. Calkin, Graduate, Kenton R. Condon '29, Charles E. Fogg '29, Allison K. Hill '29, Edward G. Kelley '29, Everett C. Lary '29, George A. Noddin '29, Oscar G. Purdy '29, George W. Sawyer '29, Joseph M. Thompson '29.

Dr. Carl Otto and Dr. William L. Gilliland were elected from the faculty.

## FUR COAT SHOWING

Balentine Hall  
Monday, Nov. 21st 10 A.M. to 2 P.M.

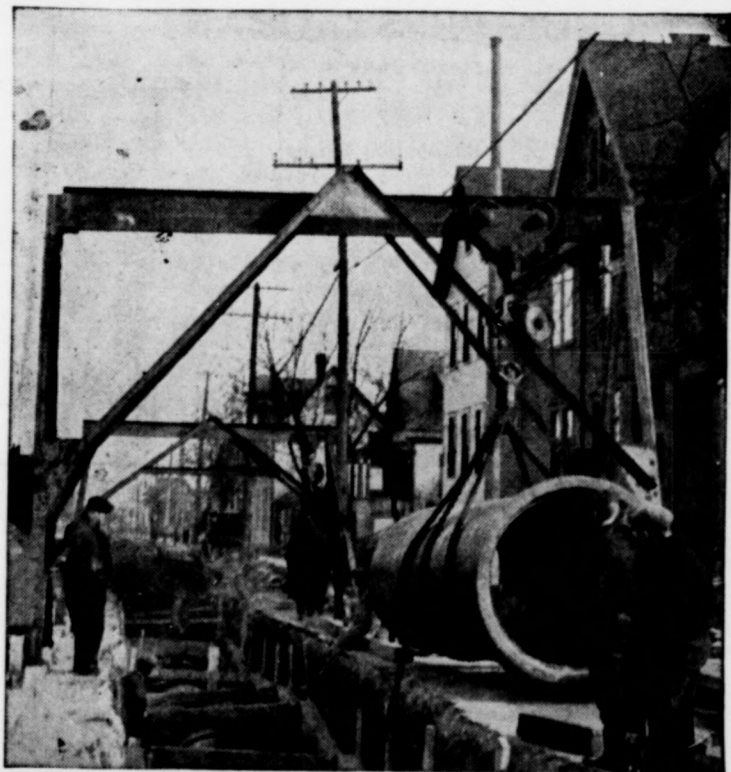

Our New York Furrier  
Mr. Paul Herrmann  
will be with us

with a large selection of beautiful Fur Coats and will be glad to explain to you the various peltries without any obligation to purchase.

These coats will also be shown at our store in Old Town, Monday evening, Nov. 21st, 7 to 9 P.M. and all day Tuesday, 9 A.M. to 9 P.M.

H. M. Goldsmith

44 No. Main St. Old Town

## Where dependability is vital

IN connection with a new pumping station at Milwaukee, Wisconsin, additional feeder mains were required. It was necessary that one of these should carry an unusually large proportion of the water supply, and 54-inch pipe was decided upon. Although pipe of material other than cast iron had a lower first cost, Cast Iron Pipe was chosen because the possibility of interruption to service had to be reduced to a minimum.

The photograph above shows a section of pipe being lowered into the ditch in the process of laying it.

THE CAST IRON PIPE PUBLICITY BUREAU, Peoples Gas Bldg., Chicago

## CAST IRON PIPE

Our new booklet, "Planning a Waterworks System," which covers the problem of water for the small town, will be sent on request

A fine college picture with lots of Football

Also plenty of short subjects every day

Telephone men are continually scouting along the frontier of better methods.

Who will scout  
this electrical frontier?

WHETHER in the Bell Telephone Laboratories, in the Western Electric workshop or in the various operating companies, telephone executives are scouts on the frontier of better methods to serve the public.

It is significant that your true telephone man, he with the feel of the calling in his blood, never speaks of having

"perfected the art of communication." And this in spite of the fact that America, by its solid achievements in telephony, shows the world.

Work in the Bell System demands the bold curiosity of pioneers and the infinite pains of pioneers who, like Columbus, Lincoln and Lindbergh, prepared "and when their chance came they were ready."

some more investigation we found that we could leave Mattawamkeag at 8.00 in the evening and still make Chicago Monday morning. We have, therefore, arranged to do this and after the game will have someone drive us to Mattawamkeag to make our connection."

The fall meeting of the college 4-H club was held Wednesday, November ninth at North Hall. There were thirty-one members present. The program was in charge of President Omar Gibbs. Both State Club Leader Mr. Shibles and his assistant Miss Brown were called on for short talks. A musical program was given by Miss Agnes Morse, Miss Hope Craig, Wendell Mosher and Alfred Rockley. Miss Eva Weimer gave a reading.

## **Chemical Engineers Help Manufacturers**

(Continued from Page One)

The Eastern Manufacturing Company at South Brewer is doing research in its own mills and laboratories on the development of a special purified grade of bleached sulphite pulp. It is necessary to dehydrate the pulp and obtain it in crude sheet or "lap" form. For this purpose the Company is making use of the University's semi-commercial "Wet Machine." Paper testing equipment is made use of by the local mills in many cases.

The development of the coloring of some Maine hard woods while growing is being investigated by this department, the work being done at Machias. Small borings are made into the growing tree in the sap running season and dye solutions are injected, the dye then being taken uniformly to all parts of the tree, so that when the tree is cut and manufactured into lumber it will be beautifully stained any desired color.

The pulp and paper industry leads all other industries in the State of Maine in the total value of its products, in the number of its employees, and in the amount of its payroll. Because of its importance it was felt in 1912 by the proper authorities at the University of Maine that it would be of value to offer courses aiming to

train theoretically, and in as practicable a way as possible, young men interested in entering this industry and so the pulp and paper branch of the Department of Chemical Engineering came to be. It not only attracts students from this state but from other states and foreign countries as well. It aims to fit men to assume the duties of chemists and chemical engineers, departmental foremen and to be able to develop into higher executive positions in a far shorter time than would otherwise be possible and this is of mutual advantage to the employer and employee.

While the chief effort of this department at the University is to develop students, it does feel that whenever possible it should render service to the local pulp and paper mills in helping solve some of their current problems of manufacture at a minimum expense to them, by the use of equipment, making tests and offering of suggestions.

**P.A.**  
is some  
little  
cheer-leader

EVERY pipe is a Sunny Jimmy-pipe when it's packed with P.A. The tidy red tin chases the blues—and how! Why, you feel better the instant you open the tin and get that marvelous P. A. aroma. Every chore becomes a cheer, and you're sitting on top of the world.

Then you load up and light up. That taste—that never-to-be-forgotten, can't-get-too-much-of-it taste! Cool as a cut-in from the stag-line. Sweet as retaliation. Mild and mellow and long-burning, with a balanced body that

satisfies, right to the bottom of the bowl.

You find that P. A. never bites your tongue or parches your throat, no matter how often you stoke and smoke. Get on the sunny side of life with a pipe and P. A. Buy a tidy red tin today and make the personal test. Pipes were born for tobacco like this.

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.
