## FRESHMEN DEFEAT MILLINOCKET TEAM IN FIRST B. B. GAME

### KENYON PRESENTS FORMIDABLE SQUAD UNDER EMERSON'S LEADERSHIP

The Freshman team that represents the class of 1931 on the basketball floor won the first game of the season last Saturday evening when it conquered Stearns High of Millinocket 24-14. In a game that was replete with many surprises the yearlings came from behind and conquered their opponents in the last half of the game. After trailing the Millinocket players for the first half the Kenyon coached boys came back and played basketball as it should be played and spurred home to an easy win in the final stanzas.

There was no outstanding player in Saturday's contest although there were several likely prospects. Besides the fellows that played Saturday night against Millinocket there are Whitten and Humphries, forwards, and Higgins at center, that look to help making the 1931 season one to success.

According to all reports and rumors the Frosh team of this year will be on a level, if not a bit advanced over that of last year's. Coach Kenyon stated that the material looked as good as he has ever worked with at this school. Although the team is slow in getting started he feels that once it has started it will prove a formidable opponent to any team of the same standing in the state. The job of coaching a freshman basketball team is not as easy as it at first seems. The material is hard to work together because the men are from different schools and necessarily received different coaching in their prep school days, all of which has to be ironed out and rounded into one system that will at once produce the players best as an individual and as a part of a smoothly working machine. That is a small part of a frosh coach's job.

Alberto C. Emerson, White Horse Beach, Mass., was elected captain of the freshman basketball team after a regular practice session Monday afternoon. Emerson is a graduate of the Plymouth High School, Plymouth, Mass., being a four letter man there. He is pledged to Sigma Nu. At the start of the present basketball season, Coach Kenyon was playing Emerson as a guard, but has now changed him to right forward.

## Faculty Members Noted By Scientific WHO'S WHO

Members of the faculty of the University of Maine who appear in the latest edition of *American Men of Science* issued in December include: Harold S. Boardman, president; James N. Hart, dean of the university; James S. Stevens, dean of the College of Arts and Sciences; Paul Cloke, dean of the College of Technology; Lucius H. Merrill, professor of Biological and Agricultural Chemistry; William E. Barrows, professor of Electrical Engineering; Charles A. Brautlecht, professor of Chemistry; Albert L. Fitch, professor of Physics; Donnell B. Young, professor of Zoology; Frederick H. Steinmetz, professor of Botany; Harley R. Willard, professor of Mathematics; Bertrand F. Brann, associate professor of Chemistry; William L. Gilliland, instructor in Chemistry; Carl E. Otto, assistant professor of Chemistry; Noah R. Bryan, associate professor of Mathematics.

Members of the staff of the Maine Agricultural Experiment Station who are included are: Warner J. Morse, director; Miss Edith M. Patch, entomologist; Karl Sax, biologist; Mrs. Karl Sax, a botanist, wife of Dr. Sax is also included; John W. Gowen, collaborating biologist; Forrest V. Owen, associate biologist; Donald Folsom, plant pathologist and Reiner Bonde, assistant plant pathologist.

## LARGE ATTENDANCE AT STATE CLUB CONTEST

The 14th annual state contest of boys' and girls' clubs which was held at the University during the Christmas vacation was the most successful ever held. There was a total registration of 175 as compared with the previous record of 152, established in 1926. Each county in the state was represented, the largest delegation being from Penobscot County with 18, closely followed by Franklin with 17.

For the third time in as many years the state club cup was awarded to Franklin for having done the best club work during the year. This trophy is offered by the Maine State Federation of farm bureaus and becomes the property of the county winning it twice. The other important announcement was the names of the winners of the state championships. This announcement was made at the closing session of the contest held in Alumni Hall Friday night, at which time also the prizes amounting to \$194, offered by the Maine Central Railroad, were distributed.

The state champions for 1927 are Beulah Starrett, Warren; Eula Rasmussen, Green Ridge; Andrew Watson, N. Belgrade; Mildred Luce of Farmington; Howard Pease, Jr., E. Wilton; Emery Edgerly, Windham; Harold Hackett, Bowdoinham; Ronald Jones, Wales; Thomas Findlen, Green Ridge; Louise Rich, Richville; and Helen Clements of Monroe.

First on the program following registration at Balentine Hall was the reception at North Hall, and in the evening was the address of welcome by Prof. C. P. Weston. Friday there was a lecture on health club work for 1928, the awarding of the cup and the tours of the campus. In the afternoon George L. Farley, Massachusetts State Club Leader, gave a most interesting and inspiring address on "Opportunities." Each county then put on stunts in competition for prizes.

Local leaders were particularly impressed with the fine banquet which was served Friday evening in Balentine Hall and by the program after the banquet which con-

(Continued on Page Four)

## New Course To Be Given For Technology Seniors

An elective course entitled Applied Engineering, open only to seniors in the College of Technology will be given the spring semester 1928. The course is given Thursday afternoon, 4:15 to 5:15 p.m., and carries one hour credit. It consists of a course of addresses and lectures by outside experts in various lines of engineering and industry. The list of speakers and dates follows:

- Feb. 9 Harry U. Fuller, Portland Water District, Portland, Me.
- Feb. 16 Doctor G. Esselen, Skinner, Sherman & Esselen, Boston, Mass.
- Feb. 23 Edward M. Graham, Bangor Hydro-Electric Company, Bangor, Me.
- Mar. 1 Llewellyn N. Edwards, Maine State Highway Commission, Augusta, Me.
- Mar. 8 H. F. Banan, Westinghouse Electric and Manufacturing Co., Boston, Mass.
- Mar. 15 F. L. Keene, General Electric Company, West Lynn, Mass.
- Apr. 5 Walter S. Wyman, Central Maine Power Company, Augusta, Me.
- Apr. 12 A. F. Dixon, Bell Telephone Laboratories, New York City
- Apr. 19 Doctor S. A. Moss, General Electric Company, West Lynn, Mass.
- Apr. 26 Paul Hanneman, Hartford Steam Boiler Inspection and Insurance Company, Bangor, Maine
- May 3 A. B. Larchar, Penobscot Chemical Fibre Company, Great Works, Maine
- May 10 C. G. McDavitt, New England Telephone and Telegraph Company, Boston, Mass.
- May 17 F. E. Frothingham, Boston, Mass.

Students should register with their major instructor for this course.

## METER COURSE ATTRACTS 47

Forty-seven visiting metermen and students were in attendance at the meter course given here Dec. 27 to 30. This number included Chairman H. M. Johnson and Vice-Chairman T. F. Breithaupt of the New England Meter Committee of the National Electric Light Association, and the Maine representative, Mr. M. L. Taylor of the National Meter Committee. Also four representatives from the Westinghouse Electric & Manufacturing Co., two from the General Electric Co., one each from the Sangamo Electric Co. and the Weston Electrical Instrument Corp. This latter group includes E. L. Brown, L. C. Blevins, R. T. Pierce, H. W. Carpenter, meter experts of national reputation. The Bangor Hydro-Electric Company sent nine men to take the course; eight came from the Central Maine Power Company; four from the Gould Electric Company; two from the Livermore Falls Power & Light Company, and single representatives from several smaller companies.

The success of these courses, which are held in different parts of the country, is due to a combination of theory and practice in proportions to be of the greatest benefit to the men responsible for the accurate measurement of the product of the electrical plant from which the revenue of the electrical power company is derived. The electrical engineering faculty is assigned the duty of explaining the principles and theory of the subject. The men from the manufacturing companies exhibit their apparatus and explain its use, operation, tests etc. The officers and representatives of the meter committee are experts in the operating field. This is obviously a combination hard to surpass.

In addition to the two daily sessions, a banquet was held Tuesday evening at which Dean Cloke presided and President Boardman spoke. A lantern slide lecture was given and three reels of moving pictures were shown on Wednesday evening. A lantern slide and microscopic projection lecture on "Jewels" was enjoyed on Thursday evening. An enjoyable feature of the course was the housing of the men in Hannibal Hamlin Hall where they could be together and gain in acquaintance. Representatives who had attended similar courses in other states were strong in their commendations of the success of the course and the enjoyment of their visit.

Professor W. E. Barrows, head of the electrical department, was in charge. It is probable that this course will become an annual affair at the University of Maine.

## PENNY CARNIVAL IS BRILLIANT AFFAIR

On Friday evening, January 6, the annual Penny Carnival was held in the gymnasium and this year it proved to be about the best that has been held for some years. In the chapel there were several booths where noisemakers and different things to eat were sold as in former years but new features of this carnival were the shooting gallery and the Beano game which furnished great amusement. The girls in the different booths wore the same type of costume making a very effective display. On the stage was a side show featuring wild animals impersonated by different girls and their trainer and also a band. Besides these attractions two short plays were given.

The gymnasium was very prettily decorated with green and white streamers and fir trees. The dance which was in the form of a Poverty Ball proved to be a big success for the dancers all came in appropriate costumes and entered into the spirit of the thing. During intermission an exhibition of the tango was given by Miss Molly Perkins and Mr. Frank Ruffo and another very good exhibition of tumbling was given by the girls in the tumbling class of Physical Education. Music for the dance was given by the Troubadours and Mr. and Mrs. Youngs chaperoned.

The proceeds of the Carnival go to the Women's Athletic Association and much credit for its success may be given to Frances Fuller who had charge of the affair.

## FACULTY MEMBERS AT VARIOUS MEETINGS

During the Christmas recess, several members of the faculty attended educational meetings in Washington, New Haven, New York and Nashville.

Dean James S. Stevens of Arts and Sciences spent the holidays at Nashville, Tenn. In this city he attended the annual meeting of the American Physical Society, and also a meeting of Phi Kappa Phi. Dean Stevens is a past president general of the fraternity and has been a national officer since its organization in 1897.

Prof. Roy M. Peterson of the Spanish department also represented the University at the Phi Kappa Phi convention, and attended a meeting of the American Association of Teachers of Spanish at New York City on the last two days of the year.

Prof. Caroline Colvin, Thornton P. Terhune, and Harry C. Mitchell of the History department were at Washington, D. C. for a meeting of the Historical Society.

Prof. John H. Ashworth was also at Washington to attend a conference of the American Economics Association.

Prof. Mark Bailey, head of the dramatic and public speaking departments, attended performances at the leading theatres of New York City during vacation.

John H. Hawkins, assistant entomologist at the experiment station, attended a meeting of the American Association for the Advancement of Science, at Nashville, Tenn.

Prof. Harley R. Willard and Maynard F. Jordan of the mathematics and astronomy departments, were present at the meetings of the American Society at New Haven, Conn., also held on the last two days of the year.

A paper entitled "Test on Tuber Unit Planting Machine" which has been prepared by Dr. Donald Folsom and Reiner Bonde, plant pathologists at the experiment station, was read at the meeting of the Potato Association at Nashville.

Mrs. Marion D. Sweetmen of the Home Ec. department was in Nashville for the

(Continued on Page Four)

## Three Maine Alumni Are Western Electric Heads

Mr. E. R. Morgan of the class of '10 became stores manager in October of the Western Electric Company's distributing house in Newark, New Jersey. He was previously stores manager of the Baltimore house, and before that was in sales work for the same company. In fact, Mr. Morgan has been identified with the Western Electric Company since his graduation from Maine some decade and a half ago. His first work was in "tracing" piece parts through the factory routine until they emerged ready for shipment. With this and other similar jobs as background, he was transferred to the company's Boston house within his first year. By 1918 he had worked himself up to be assistant stores manager there and in 1921 went to Baltimore to assume the duties of stores manager in that city.

Mr. A. W. Goodwin of the class of '11, who has been with the Western Electric Company since his graduation from Maine, was recently made head of the tool and test set department of the Hawthorne Works of the company in Chicago. Under his charge comes repair and calibration, stock maintenance and testing instrument service.

Mr. H. G. Lackee of the class of '18 has been appointed chief of apparatus development planning, a division of the development branch of the Hawthorne Works of the Western Electric Company in Chicago. Mr. Lackee has been with this company since September, 1919.

Edward G. Kelley has been elected to fill the position of Business Manager of the Junior Prism, to fill the vacancy left by John Flynn. Archibald Smith has been elected Sports Editor.

Dean Paul Cloke spoke to the Bangor Rotary Club Tuesday. His subject was "Friendship."

## KANALY EXPECTS TO HAVE WINNING TEAM FOR RELAY CONTESTS

### THREE VETERANS ARE AMONG MANY ASPIRANTS FOR POSITIONS

After their Xmas holiday rest, the relay aspirants are out again hard at work. Coach Kanaly makes the statement that even though the team cannot be judged very accurately at such an early date, the chances for a winning team look as promising, more so than they did last year. Three out of four of last years baton snatchers are back this year, the only man that the team will lose being Captain Torrey. The varsity men being on the job this year are Captain Fred Thompson, Winfield Niles, and Porter.

It has been authoritatively stated that time trials will not be given for two weeks. In all probability these trials will disclose certain other "possibilities." Among these "possibilities" we find: Bernard Berenson, Charles Hardy, Stephen Mank, Worth Noyes, Harry Murray, Emerson Stymiest, Edward Tolman, Lee Wescott, Matthew Williams, Stanley Winch, Gilbert, Austin, Robert Chandler, Andre Cushing, Karl Larsen, Francis Lindsay, and Victor MacNaughton.

From the above list and the veterans, will be chosen the team to represent Maine against New Hampshire State at the K. of C. Games in Boston January 28th. On February 4th the relay team will make another trip to Boston to the B.A.A. Games. It has not been definitely decided as yet whether any competitors besides the relay men will make this trip to participate in their respective events. However, in all probability, certain of the best performers will go along with the relay men.

The two-milers have a pleasant trip promised to them, that is the best among them. One man will go to the Milrose Games at New York on February 2nd to represent Maine in the two mile run and will run from scratch. The men trying out for this trip are: Lindsay and Richardson, the two sophomore stars of last year's cross-country team; Captain Cushing, last year's cross-country team; MacNaughton, Stinson and Noyes, all cross-country men of the first year.

There seems to be more or less difficulty in deciding on a definite date for the dual

(Continued on Page Four)

## Skulls and All-Maine Women Conduct Drive

Sponsored this year by the Senior Skulls and the All-Maine Women the annual drive for funds for Maine-in-Turkey is being conducted this week. The campaign opened with a supper last Sunday evening with George Dudley acting as chairman. At this supper Mr. James A. Gannett, registrar of the University, told of the record of Helen and Lee Vrooman while they were at Maine; Miss Erdine Besse spoke on the appeal of the work to the undergraduate; George Dudley read passages from letters written by Ruth Crockett and Ruth Hitchings telling about their work; Rev. H. C. Metzner of Orono explained the benefits of the movement.

Subscriptions to the drive may be placed on the term bill if the contributor so desires. If anybody who is not approached by the solicitors desires to make a contribution it may be given to any member of the Senior Skulls or the All-Maine Women.

Lee Vrooman is acting president of the International College at Smyrna while Dr. Reed, the president, is in this country.

All personal write-ups for the 1929 Prism must be turned in to George Mahoney or Robert Chandler immediately. Any members of the class who are not familiar with the type of write-up may find copies of old Prisms at the library for reference.

### Let's Keep a Carnival!

Dartmouth, a small New England college buried in the wilds of the Hanover hills, has surrounded itself with a barrier of precious traditions, and in doing so has made the name of Dartmouth a national by-word in educational circles. They had to, being threatened with provincialism that endangers all small New England colleges! Their annual winter carnival has been one of the means of escaping this isolation when the winter snows practically bury the place. And the Dartmouth winter carnival is known!

At Maine, probably best located of all New England colleges for a winter carnival, the faculty has to demand the support of the students, a *guarantee*, mind you, that they will attend and participate in all phases of such a winter sports party! We can hardly blame the faculty for the attitude they have taken; no one likes to plan a party and then be left holding an empty bag, while the campus leaves for their native hamlets. Not to say that a change from the "grab-and-run" fraternity breakfast, or the "take-it-or-leave-it" mush at the dormitories isn't welcome, but life isn't all sirloin-steaks, and you can't dodge actualities all your life.

There isn't a student at Maine that shouldn't deplore the fact that such a statement had to come from the faculty, and there is no doubt in the minds of those that know and reason, that it had to be. College pride in Maine's traditions, if such pride is present, and we believe it is, should so stir every student that this year's carnival should go "over the top" if only to show dubious ones that Maine's spirit of tradition is a tangible thing.

The question arises: Why are Maine's winter carnivals such successful failures that we have to consider dropping them? Are they poorly managed, too expensive, lack pep of the sort college students all over the country demand, or is the whole idea too old-fashioned? Probably one carnival is so much like the next one, that the novelty wears out after one experience. Parties at Maine have that sort of reputation! If committees could plan what a carnival *could* do, rather than what one has *done*, one wouldn't have to wonder that, after all, if history didn't repeat itself.

But after all, why worry, aren't we going to have may-flowers about that time anyway?

—M—

Radio artists may think they know how to tell bedtime stories, but they've never heard a dear brother telling a prospective pledge just how his fraternity rates on the campus.

—M—

### The Campus Recommends—

This is a presidential year! At the present time faint murmurings are already heard regarding presidential possibilities and those that do not choose! Three guesses by any novice or professional wouldn't unearth the White Horse (hic, pardon us!) dark horse of either party. The Democratic convention should go one better than last year's debacle, and the Republican convention can't be quite so "oily" with Sinclair off the band-wag-

## CORRESPONDENCE

Editor of Maine Campus,  
Orono, Maine.

Dear Sir:

A certain practice at the University of Maine was recently brought to my attention which in my opinion and the opinion of many Maine men that I have come in contact with, should be most heartily condemned. This is the practice of tossing a coin by the coach, captain or manager to decide who shall be given a certain vote in the election of a sport manager. This is not done in all cases by any means but it has been done a sufficient number of times for it to warrant some consideration.

To get down to a particular instance, recently at the election of a football manager for 1928 two votes out of a possible seven were decided by a toss of a coin. It so happened that both of these votes went to one man. (His lucky star must have been shining on that particular day.) Those two votes might have won him the election and perhaps he deserved the honor. But if you take it from the standpoint of the candidates themselves, I DOUBT IF EITHER ONE OF THEM WOULD CARE TO WIN AN ELECTION ON THE TOSS OF A COIN. I happen to know both men personally, and as to their particular merits I cannot say and wouldn't if I could but I think the above statement is true.

It seems to me that two men who have worked for a managership for three years deserve more consideration than a gambling chance at election. Also in that period of time if an official cannot form some opinion upon the relative merits of candidates, either upon past performance or judgment as to a future managerial ability, then it is time that a different system is devised in the election of sport managers.

I do not offer this in any sense in a destructive way. Those officials who are placed in a position where they have a vote must sometimes find it hard to decide. But I think that in the last two or three years the practice has become a little too common of deciding a vote by means of a coin.

I have always the interests of Maine at heart and wish her the best of success for the remainder of the school year and years to come.

Sincerely yours,

Robert A. Tate, '26

## MAINE SOPHOMORE IS INJURED IN CAVE-IN

While working for his home town of Middlesex, Vermont, shoveling dirt to fill up holes made by the November floods, Paul L. Taplin, a sophomore at the University, had his right arm badly fractured and lacerated above the elbow when the bank where he was working caved in. He was rushed to the hospital where he will remain for several weeks. Hopes are entertained that his arm may be saved.

This information was received at the University office today from his mother, Mrs. Albert C. Taplin. During the recent Vermont flood the Taplin home was in the path of the flood waters and the Taplins were among the heavy sufferers.

—M—

on. It will be a wise student that gets material now for his grandchildren's bedtime story about the great political events of 1927-28. Possibly Tammany-in-Maine may get a few pointers for current consumption. Congress isn't the only bunch that has a bag of tricks!

How are you going to get the low-down? Not through the newspapers to be sure. Hearst isn't the only one that peddles rubbish, or fanciful facts for the Babbitts. We would suggest *The Nation*, a weekly magazine published in New York. Not that we secure any royalties for increased subscriptions, but just because we believe it to be one of the most honest, out-spoken, and non-partisan papers in the country. Its weekly page "Covering Washington" should go a long way to convincing anyone that the dollar-a-year men are now a traditional myth, and that Coolidge economy isn't bunking in the Navy department. Aside from politics, however, there are always at least twenty pages of good reading matter about current affairs in American life, written in a manner which we would like to assume as being an American standard.

## Recent Elections Will Cause Investigation

The University of Maine apparently can have election scandals as well as, or as bad as, any state in the Union. Great interest is being shown at present over the class elections which took place Thursday, Dec. 15. Complaints have been received by President Boardman, who has announced that the complainants and representatives of the Student Senate will have a chance to state their case before the Board of Administration on Monday afternoon, January 16.

It seems that everything wasn't run just O. K. in Alumni the day before school closed, at least that is what is stated in the paper handed to President Boardman. The grounds for protest follow:

1. Resolutions of Student Senate concerning nominees not fully carried out.
2. Incomplete ballots were counted.
  - a. Totals do not check.
  3. Ballots not printed and made up clearly
    - a. All ballots same color
    - b. Full names necessary for identification not given
    - c. Condition that ballot is void unless fully filled out not stated.
  4. Voting and counting system inefficient.
    - a. Only two ballot boxes for four classes.
    - b. Members of a given class attending the box for that class.
    - c. Nominees attending boxes for their respective classes.
    - d. Poor checking system, as voters were checked off in any one of four books.

## Prof. Lutes Is Chairman Of Committee of N.E.A.

Steps have been taken to make a closer connection between the University of Maine, Orono, Maine, and the National Education Association in the Appointment of Dr. Olin S. Lutes as Committee Chairman on N.E.A. relations. J. W. Crabtree, Secretary of the National Association who provides this information for us considering that the institution is fortunate in having as its Committee Chairman one who is not only a constructive thinker and leader, but one of exceptionally high standing in the profession. The Chairman will be informed as to the policies and activities of the Association who will, in turn call the attention of the faculty to important matters.

Every college and university has been requested to appoint a representative and more than half of them have already complied with the request. Secretary Crabtree expects great results from this plan. He declares that the college is now the weakest link in the organized profession. While college professors have been de-

- c. Responsible committee not appointed to count votes.
5. Names of nominees omitted from ballots.

Who is right and who is wrong is the question now, which should find some definite method of settlement at the meeting next Monday. We hear and read of enough election scandals, etc., etc., without experiencing them ourselves, and it seems too bad that they should find a place at this University.

voted and loyal to their technical groups, they have not, as a rule, been greatly interested in problems relating to the larger fraternal welfare. He gives this as one of the reasons why colleges have been so slow in readjusting salaries to meet increased costs and new conditions.

College instructors receive the lowest pay in the profession in proportion to the type of service to be rendered. The Association urges better salaries for instructors and professors and better instruction in the Freshman and Sophomore years. The Secretary predicts that within a few years, college faculties will be among the leaders at work on the problems of the profession, and that the college will be a more vital force in shaping the policies of the Association. He thinks the local institution will lead the way.

## Dean Cloke Announces Lectures for January

Dean Paul Cloke announces the following lectures in the College of Technology during the month of January:

On January 11 at 4:15 P.M. Honorable Benjamin F. Cleaves, Executive Secretary of the Associated Industries of Maine will speak to the members of the senior class.

On January 12 at 4:15 Dr. Hugh P. Baker, formerly Dean of the New York State College of Forestry, will speak to engineering students on Forestry and the Wood Using Industries of Maine.

On Thursday, January 19, at 7:30 P.M., Walter A. Danforth of Bangor, Treasurer of the Bangor Savings Bank, will speak to the economics and engineering students on Maine Banking. The lectures will all take place in Aubert Hall.

## Fall Semester 1927, JAN. 25, FEB. 1—SCHEDULE OF EXAMINATIONS

Time of Exercise	MON. 1	MON. 2	MON. 3	MON. 4	MON. 5	MON. 6	MON. 7	MON. 8

Time of Exercise	TUES. 1	TUES. 2	TUES. 3	TUES. 4	TUES. 5	TUES. 6	TUES. 7	TUES. 8
Time of Examination	SAT. Jan. 28 1:30	TUES. Jan. 31 8:00	THURS. Jan. 26 8:00	FRI. Jan. 27 1:30	TUES. Jan. 31 1:30	WED. Feb. 1 1:30	WED. Feb. 1 1:30	
Time of Exercise	WED. 1	WED. 2	WED. 3	WED. 4	WED. 5	WED. 6	WED. 7	WED. 8
Time of Examination	FRI. Jan. 27 8:00		WED. Jan. 25 8:00	TUES. Jan. 31 1:30	WED. Feb. 1 1:30		MON. Jan. 30 1:30	
Time of Exercise	THURS. 1	THURS. 2	THURS. 3	THURS. 4	THURS. 5	THURS. 6	THURS. 7	THURS. 8
Time of Examination								
Time of Exercise	FRI. 1	FRI. 2	FRI. 3	FRI. 4	FRI. 5	FRI. 6	FRI. 7	FRI. 8
Time of Examination	MON. Jan. 30 1:30	MON. Jan. 30 1:30		FRI. Jan. 27 8:00	WED. Feb. 1 8:00		WED. Feb. 1 8:00	
Time of Exercise	SAT. 1	SAT. 2	SAT. 3	SAT. 4				
Time of Examination								

Please report conflicts to the Registrar at once.

NOTE: By the Time of Exercise is meant the time of the first exercise of the week in any given course. For example: If a course is given Monday, Wednesday and Friday at the third period, it is said to be given Monday the third period. By referring to Monday, third period, in the schedule, it will be seen that the examination falls upon Wednesday, Jan. 25 at 8:00.

Any instructor is allowed to continue an examination three or even four hours if it does not conflict with other examinations.

Note the following changes from the above:

Deciding that sororities are social and not scholastic organizations, the inter-sorority council of New York State College for Teachers has abolished all scholarship requirements heretofore requisite to election. Beginning immediately, any girl may be elected regardless of her scholastic average. This change in rules has the support of President A. R. Brubacher, who thinks "the main purpose of sororities is to provide the best housing conditions and the best possible social life." Scholarship is not expected to suffer, according to the council president. On the contrary, she believes it is one of the duties of the living organizations to try to bolster poor scholarship among its members after election. The university president thinks that the wholesome home life of the sorority may do much to rehabilitate the scholarship of persons who have heretofore been outside the pale. Scholarship requirements have long been the chief of bugaboos that haunt the college fraternities. —(New Student)

Vision and planning make the successful telephone pioneer.

## Behind the scenes with Columbus

THERE is a forgotten chapter in the life of Columbus which in its way had as much to do with the discovery of America as the voyage itself. We refer to the years spent in preparation before he set sail—years filled with painstaking study, planning his voyage with the aid of what crude maps and geographical data he could procure.

In telephony, too, the success of each new development depends on the years

of intensive research and careful planning that precede actual construction. Bell telephone men are continually mapping out the course of this great industry for years to come.

"The true telephone pioneer is he who brings vision and initiative to his work as supervisor, engineer or executive—and who backs this up with the painstaking study needed to crystallize the dream into the reality.

## BELL SYSTEM

A nation-wide system of 18,000,000 inter-connecting telephones

"OUR PIONEERING WORK HAS JUST BEGUN"

Sigma Nu won from Sigma Phi Sigma, 42 to 13, in an intra-mural basketball game played in the Armory Tuesday evening. The winners led during the whole game and were never in danger from their opponents. Emerson and Howe, mainstays on the freshman five, starred, the latter scoring twenty points.

## Large Attendance at State Club Contests

(Continued from Page One)

sisted of club members' short talks about their club experiences. No adults took part in the program. The Orono High School orchestra of eleven pieces, furnished the music for the occasion. The wind-up of the contest was, as already stated, the awarding of state championships and Maine Central Railroad prizes.

The boys stayed at Oak Hall and the girls in Balentine Hall, all taking their meals at the latter building. It was a fine contest, it gave many club members their first opportunity to become acquainted

with the university and they much appreciated the courtesy of the university in entertaining and of the students in loaning the use of their rooms for the two day period. The contest was a fine thing for club members all of whom are high school age and it was a fine thing for the university.

## Faculty Members at Various Meetings

(Continued from Page One)

meeting of the American Association for the Advancement of Science.

Prof. E. R. Hitchner attended the meeting of the Society of American Bacteriologists at Rochester, N. Y., and Prof. Maurice D. Jones was at Washington for the sessions of the American Farm Economics Association.

Prof. B. C. Kent, faculty manager of athletics, attended meetings of the National Collegiate Association of Athletic Directors at New York, and Coach Fred M. Brice is also in New York for the annual meeting of football coaches and Physical Directors Association.

Alma I. Johnson, of the University Health department, was representative at a meeting of the American Student Health Association at the Hotel Astor in New York City.

## Kanally Expects to Have Winning Team for Relay Contests

(Continued from Page One)

meet with Bates. There are two possible dates that may be agreed upon sooner or later by both parties concerned. February 28th, as favored by Coach Kanally, and March 3rd, the date given as authentic in the Portland Evening Express, seem to be quite plausible.

The freshmen are not to be forgotten. They are out training with quite a long list of contenders for positions on the 1931 relay outfit. We find on the list: Captain Raymond White, Warren Blockinger, Burgess Brooks, Charles Cogswell, Berne Kneeland, Donald MacKenzie, George Thurston, Kenneth Twitchell, and Wallace Weston.

It seems to be pretty contagious, this marriage business. We don't know from one day to the next who is single and who isn't. About the only way to account for it is that this is Leap Year. Even then some couples took advantage of it and didn't wait until 1928. But anyway, it was pretty close to it.

The Spectator Club held its regular monthly meeting Tuesday evening at the home of Mr. James A. Gannett. Prof. J. M. Briscoe was the speaker.

## Historical Pictures To Be Shown at Strand

The showing of Yale historical moving pictures series will begin at the Strand theater at Orono Wednesday evening, providing that the film can be secured in time. In the event that it is not possible to show them Wednesday evening the showing will begin the following Wednesday and will be continued every Wednesday evening throughout the winter.

The pictures are produced by the Yale University Press. They are being shown at the Strand under the auspices of the Department of History in cooperation with the management of that theater. They will be given in addition to the regular Strand program.

Columbus, undoubtedly the best of the pictures, will be the first of the series. It is a four reel film giving the life of Columbus from 1485-1492, disclosing the discouragements, the persistent efforts, and ultimate success of the "mad Italian." First seen at the court of King John of Portugal, and finally before Ferdinand and Isabella of Spain from whom he gets aid. The start of the voyage from Palos, the dangers of his fleet on the high seas, and finally his triumphant landing on Watling Island are all colorfully pictured in the film. Following this, Jamestown, a four reel film and others such as The Pilgrims, Peter Stuyvesant, The Gateway to the West, and Wolfe and Montcalm, will be shown.

The use of historical motion pictures is becoming popular among larger colleges in giving history courses. Maine students, especially those taking courses in history, should take advantage of the opportunity offered them and see these pictures.

The management of the Strand are showing these pictures at their own expense and the price of these films greatly increases the cost of their performance. The attendance of a large number of students at these shows will show the University's appreciation.

## The Holland Tunnel

Where do young college men get in a large industrial organization? Have they opportunity to exercise creative talent? Is individual work recognized?

THE HOLLAND TUNNEL is one of engineering's greatest triumphs, because—

—it is twice the size of any tunnel ever bored beneath the bed of the Hudson River.  
—it is over a mile and a half long.  
—it is designed for automobiles to use. Because they generate poisonous carbon monoxide gas,

motor cars create an entirely new need for tunnel ventilation. Yet even when the Holland Tunnel is filled to capacity and 2000 motor cars are passing through it in each direction, the air is fresh and pure.

This is a type of engineering undertaking with which young men in an organization of the size of Westinghouse frequently are brought into intimate contact. Opportunities to work on the

stupendous, the never-before-undertaken, are not rare here. Hence young men of capacity, of enterprise, of genius, find much to challenge their imaginations and abilities.

A battery of 56 fans driven by Westinghouse motors pump fresh air into, and foul air out of, the Holland Tunnel. Twenty-eight more Westinghouse-motored fans are a reserve. Westinghouse planned the lighting system in the tunnel; also the system of remote control.

# Westinghouse

WHEN gentlemen stroll forth—their first step toward style calls for shoes that are distinctive—correct. It is these little points of dress that betray taste. There is a simplicity to Bostonians' smartness that you can depend upon. Mostly \$7 to \$10 the pair.
