VARSITY RELAY FLIERS BREAK EVEN IN RACES AT TWO BOSTON MEETS

NORTHEASTERN RUNNERS ARE DEFEATED WHILE N. H. IS WINNER

Fast Times Feature Races

During the recent period of holidays (?) the varsity relay fliers won a race and dropped one. At the K. of C. games held in Boston the 28th of January Maine beat Northeastern by a sizable margin in one of the best races of the evening although Maine was never headed by the runners of Northeastern.

Berenson was lead-off man for Maine. Niles ran in second position and was followed by Porter running third. Captain Thompson ran anchor and turned in a strong performance.

The next weekend the fliers again journeyed to Boston, this time to run in the B.A.A. meet against New Hampshire State. Berenson grabbed the pole at the beginning and held it until the last lap when the New Hampshire man tried to pass him and succeeded. In passing the baton to Niles a twisted mass found the baton on the ground. By the time it was recovered and Niles had finished his running New Hampshire was leading by about thirty yards. Porter running third and Lee Wescott running fourth could not seem to make up the loss of yardage and consequently Maine lost by about sixty-five yards. The Boston papers speak of it as being one of the best races of the evening. New Hampshire's time was equal to that of Harvard, and faster than that of either Bates, Bowdoin, or Colby, all of whom lost their races except Bates who won both a quarter and a half mile relay. Time, 3m. 33.3-5s.

Vocational Guidance Will Be Given to Women

Dean Bean, at a recent mass meeting of the women students, informed the coeds that no longer was the career of a woman limited to the two fields—undoubtedly broad, and yet perhaps overfull—of marriage and teaching. Almost limitless opportunities are open to the woman college graduate, and the women at Maine are to be shown these possibilities.

Dean Bean went on to outline the plan of vocational guidance to be followed at Maine. The A.A.U.W. has kindly offered to secure the services of Miss Jackson, a well-known vocational guidance expert. Miss Jackson will be at the University on February fourteenth to discuss the professional fields now open to woman and to advise and instruct any students desiring information in any field. Miss Jackson was here last year, but owing to lack of previous organization the full benefit of her valuable services were not realized by as many students as was desirable. This year Dean Bean, with the hearty cooperation of the All-Maine Women, has prepared forms which all woman students must fill out. These state three branches of after college work in which the student would be interested.

If a sufficient number of students register interest in a subject, a group will be formed and a professional man will be secured to speak to that group on the possibilities, merits, requirements for, and benefits, social and financial, to be derived from their professions.

On February tenth there will be a meeting of student interest groups to talk over the possibilities of the various professions. It is important that those interested in this vocational work attend this meeting.

The purpose of this work is to give students an idea of the many directions in which women's professional work is being extended.

It is hoped that this work will develop into a personnel system for the women students of the University of Maine.

Later in the year Dean Bean plans to give interviews to each girl in which this personnel work will be further developed.

B. H. E. COMPANY WILL STOP TROLLEY ABUSES

PRES. BOARDMAN DEPLORES STUDENT PRACTICE AND HOPES IT WILL STOP

President H. S. Boardman recently received a call from officials of the Bangor Hydro-Electric Company in regard to a misuse of the facilities offered by the electric car line. It appears that for some time certain students have attempted to "beat their way" and obtain free rides upon the cars by lowering the rear fender and using it as a means of support. Although the company considered the attempt to evade the fare a distinct breach of law and etiquette they considered the danger to life and limb far more serious and expressed belief that they were likely to be involved not only in a law suit but also with the Public Utilities Commission should an accident occur under such conditions. They have made various unsuccessful attempts to prevent such practice without evoking the aid of the law and now feel that the time has arrived when more stringent action must be taken.

President Boardman, in commenting on the matter, said, "I know that all fair-minded students will see the position in which the company is placed and will remember the many courtesies which the officials have extended to the University, and will use their best efforts to see fair play. The corporation is a public utility and as such has the privilege of receiving a just compensation for carrying its patrons and may take proper precautions against accidents. I think I can fully appreciate and enjoy a legitimate college prank but I cannot see the justice in an attempt to defraud the company by evading the fare. I sincerely hope that the students will show the same courtesy to the company which they show to us."

Gov. Brewster Appoints Committee For Survey

Upon the invitation of President Boardman, Governor Brewster has appointed a committee to advise and give assistance to President Boardman in the Educational Survey of the State, which is being conducted by the University of Maine.

The committee is composed of Dr. A. L. Thomas, State Commissioner of Education; Dr. Kenneth C. M. Sills, President of Bowdoin College; Dr. Clifton D. Gray, President of Bates College; Honorable Herbert E. Wardsworth, President of the Board of Trustees of Colby College; W. B. Mallett, Principal of Farmington Normal School; William B. Jack, Superintendent of Schools of Portland; E. E. Roderick, Superintendent of Schools in Belfast, and President of the Maine Teachers' Association; Mrs. Arthur S. Staples of Auburn, and Mrs. John P. Scholfield, President of the Federation of Women's Clubs of Portland.

President Boardman and Dr. Lutes, head of the Department of Education at the University, will go to New York soon to meet Dr. Robert J. Leonard, Director of the School of Education of Columbia University, who has been engaged as consulting expert. They will make out a tentative plan to present to the advisory board for their discussion.

The Economic Educational Survey will attempt to answer two questions. What is going to be the probable call in the state for higher education for the next ten or fifteen years, and how can the institutions of higher learning in the state best meet that call, are the two subjects of the investigation.

The ultimate aim of the survey, says Dr. Boardman, is to collect data to use as a basis for a ten year program for the University. Such a program, if approved by the State would allow for a definite income for the University, and plans might be made according to it.

At the recent house election Clara Elizabeth Sawyer was chosen president of Balentine Hall and Marguerite Joyce Stanley, vice-president, for the spring semester.

FORMER INSTRUCTOR HERE GIVES RESULTS OF STUDY OF GRADES

MR. ALVIN C. EURICH FINDS THAT FRATERNITY MEN ARE AVERAGE STUDENTS

Interesting Facts Shown

That "a fraternity environment does not affect the scholastic achievement of the average college student" is the conclusion based by Alvin C. Eurich, instructor in public speaking at the University of Maine in 1925-26, upon a comparative study of the grades received by fraternity and non-fraternity men at the University of Maine in a period of eleven years. Mr. Eurich's research, which was done at the University in connection with graduate study for the degree of Master of Arts, is published in the November 12 issue of "School and Society." Mr. Eurich is now a member of the faculty of the University of Minnesota.

"In the specific research," Mr. Eurich's thesis states, "the registrar's records for 2,817 students at the University of Maine were scrutinized. Among the facts singled out for attention were 36,174 marks which these students received in certain freshman and sophomore subjects."

"The records of the first two years of the student were considered more valuable than the junior and senior years for the purpose of determining the relative significance of fraternity environment, as those are the critical years of the student. Then, too, there have been cases in the past when fraternities recognized their scholastic standing as being low and sought to affiliate non-fraternity members of the upper classes whose scholastic average has been markedly high."

Strictly mathematical interpretation of the data which he collected, Mr. Eurich states, indicates that the non-fraternity men are superior to the fraternity men in freshman subjects, in the sophomore subjects of the Colleges of Technology and Agriculture, and in the total for all the marks studied. The reverse appears to be true, he continues, for the sophomore subjects of the Arts College.

"Guided by common sense, however," the paper asserts, "one must immediately recognize that the actual differences are insignificant as shown in the detailed study. As a result of totaling such a large number of marks the probable errors of the differences become so small that it makes the differences themselves appear significant."

"The conclusion of this study, then needs no further emphasis as an essential (Continued on Page Four)

Dr. Segall to Teach at Northwestern University

Dr. Jacob Segall is to be visiting professor at Northwestern University during the coming summer session. He is to give two courses, one in the Modern French drama which is open to graduate students only, and the other a third year course for undergraduates.

Dr. Segall has taught at the U. of M. since 1903, first as professor of Romance Languages, and since 1915 as head of the French Department. He was graduated from the Lycee, Jassy, Rumania in 1884 with the degrees of B.L. and B.S., and took his doctor's degree at Columbia in 1893.

Before coming to Maine Dr. Segall taught at Cornell, and McGill Universities and the College of the City of New York.

During the war he was in charge of the foreign press information bureau under the U. S. Food Administration at Washington, D. C. After the war he served with the American Relief Administration abroad, and was located in Paris, London, Trieste and Belgrade.

Dr. Segall is a member of the National Modern Language Association, and the Modern Language Association of New England. He is the author of a number of books, and translations, and a frequent contributor to educational journals.

REGULAR ASSEMBLIES MAY BE INAUGURATED

PRES. BOARDMAN DECLARES MATTER UP TO STUDENT BODY

Whether there will be regular chapel assemblies in the future or not, depends entirely on the student body, declared President Boardman at the first winter assembly held Monday morning in Alumni Hall.

If this assembly was indicative of the student sentiment, then we will undoubtedly have chapel, for at this meeting, when the new organ was played for the first time, the hall was filled to capacity with students compelled to stand along the back of the room and in the balcony.

The program was as follows:

Assembly	Incoming Prelude	Organ
Tenor Solo	Invocation	Choir
University Hymn		
Lord's Prayer	In Unison	
Short Address	Mr. Irving Pierce	
Address	President Boardman	
	Professor Raymond C. Brooks	
	Pomona College, Clairmont, Calif.	
Assembly Outgoing Postlude	Organ	

The President said that for the first time in two generations the University has an organ, and that for over one generation Maine has been without regular chapel assemblies.

He went on to say that the popularity of chapel has in the past risen and fallen, now it seems to be the students themselves who desire it, and it is up to them whether they have it or not.

President Boardman then introduced the speaker of the morning, Prof. Raymond Cumming Brooks, D.D., of Clairmont, California. Dr. Brooks who is head of the department of religion at Pomona College is one of the chief speakers at the Convocation Conference this week in Bangor.

Dr. Brooks spoke briefly on the great changes the world is going through, politically, socially, and religiously, and said that three great ideas had so far permeated the world. They are Jesus Christ, the new views of science, and democracy. He concluded then by maintaining that when these three important ideas are combined, a new order will be originated and will lead to great things.

TWO NEW COURSES ARE OF INTEREST TO MANY

J. H. Huddilston, professor of the Greek Language and Literature, has announced that he will give a new course during the present spring semester called *Masterpieces of Art*, scheduled the fourth hour, Tuesday and Thursday. This course is intended to point the way to art appreciation and will deal with matters of universal interest. It is open to all students.

The course is an exceptional opportunity to develop along cultural lines, and considerable interest has already been shown since its announcement. It was first given during the summer session last year, and was extremely popular with summer students. Practical illustrations are drawn from the present trend of architecture in New York City and a survey of these origins is contemplated. Professor Huddilston in commenting on the course, stated that one of his summer session students who came from New York said, after completing the course, that she was going back home more able to appreciate the masterpieces in New York's architecture.

Dean Cloke, of the College of Technology, has also announced a new course for the spring semester, called *Applied Engineering* to be given the eighth hour on Thursday. This course will be given in the form of lectures by prominent and well-qualified men who are in the engineering business. The lectures are not to be of a purely engineering nature, and it is not confined to technology students only. While engineering will be the predominant note, the human factors in business will be included, and should be of interest to all students in the university. Credit will only be given to seniors.

BASKETBALL GAMES FURNISH EXCITEMENT FOR CARNIVAL CROWD

VARSITY PLAYERS CONQUER TEAM OF ALUMNI STARS OF RECENT YEARS

Frosh Aggregation Strong

Saturday afternoon witnessed the return to basketball circles at the University of Maine, several stars of past Pale Blue teams when the varsity basketball team conquered a team representing the Alumni 37-28. The game itself was interesting to watch and was replete with surprises. The Alumni started off strong but condition soon told and the varsity seizing the advantage forged ahead never to be headed. Team work was prevalent among the older team that is rarely seen among teams got together with so little preparation. The Alumni presented a strong team that was a shade of past great teams at the University.

The summary:

VARSITY (37)	(28) ALUMNI
Sylvester, rf 1 (1)	lb, Hanscom
Stone, rf 2	3, lb, Everett
Bailey, rf	
Kent, lf	1, rb, Berg
Daly, lf, 1	
Hartley, lf	
Branscom, c 4	2 (5), c, Lake
Gray, c 1	
Gillespie, rb	1 (1), lf, Kamenkovitz
Abbott, lb 2 (4)	4, rf, Epstein
	rf, Carter

The Freshmen also did their share of entertaining the Winter Carnival enthusiasts by beating the E.M.C.S. outfit 47-35 in a fast encounter that was enjoyable to watch. Starting the game rather slowly the Freshmen found themselves on the short end of the score at the end of the half. But the third period saw the Freshmen instilled with new life and in the first few minutes put in enough baskets to get ahead from which position they were not to be removed. Breton played well for the Freshmen, but as usual the teamwork of the yearlings was the outstanding feature of the tussle. Viles and Cassidy played well for the prep school aggregation.

The summary:

MAINE FRESHMEN (47)	(35) E. M. C. S.
Hickson, rf	lb, Cassidy
	lb, Todd
Garrett, lf	rb, W. Witham
Anderson, lf	rb, Kaulotis
Howe, c	c, Witham
	c, Clark
Emerson, rb	lf, Simpson
Barker, rb	lf, White
Breton, lb	rf, Viles
Referee, Wasgatt.	

Teams representing New Hampshire State visited and conquered the Maine varsity and Freshman teams a week ago. The varsity won from Maine 27-24 and the Freshmen won 28-26.

The Freshmen have had a successful season on the polished surface thus far and Coach Kenyon is well satisfied at the creditable showing made by the Frosh. There are not any individual stars but rather a coordinating team composed of individuals who play well together. As yet Coach Kenyon has had little chance to experiment with substitutes and so does not feel sure that the best team is on the floor, but with the coming of a few easier games the substitutes will get a chance to show their wares and it is possible that some of the regulars may be displaced. The Freshmen hung a 31-23 defeat on the Big Green of Hebron just before finals started. Varsity material is lurking with this year's yearling team and a pleasant future seems ahead.

There will be a meeting of Sigma Xi, February 14, at 4.20 P.M., Aubert 204. Dr. Fitch, professor of physics will speak on *Electrons*.

Honor Sickness

Almost every college in the entire country, now that examinations are at hand, or, as in our case, just completed, is faced with the honor question. Judging from reports that are leaking through, numerous honor systems are facing their last charge. There has been much discussion about the recent confessions of the students of Hunter College, in which they faced the facts and openly admitted cheating in examinations. Yale is now having a referendum regarding the advisability of continuing its system, and there are many other colleges with the same troubles.

We will agree with anyone who wishes to discuss or is interested in the problem, that, in general, honor systems are "a good thing" and do much to contribute to any university's mythical creation of a "well-rounded individual" but balk with the many who try to explain why student morality breaks down when it comes to cheating.

It is much easier to determine why students cheat. Colleges are so organized that to the average individual and what student isn't an *average individual*, the main point is to accumulate so many "points" and get by. The graduation goal is mutual. The student wishes to graduate, and a university wishes to graduate students. The means to the end are the storing away of vast quantities of factual information. Daily quizzes, weekly quizzes, and term examinations are devised to get the facts. Such a system lends itself to cheating. When the major stress is placed upon original viewpoints, broad study, and what a student *thinks* rather than knows, a great step will have been taken in lessening the fears that the student who passes has been helped by notes in his pockets.

On the other hand the question has been asked, whether it really matters that students cheat? Students have probably heard since their grade school days, that the cheater only cheats himself. "Go ahead and cheat, you aren't putting anything over on me, you are just fooling yourself!" Nine out of ten students that cheat will agree with this theory, but at the same time will keep his eyes on June, 19—

Some students say, "I can't conscientiously admit that this examination is indicative of my grasp of the subject, whether I pass the course or fail. If this examination is not a true test of my ability, I can't take the chance, and fail to see the wrong in cheating." Such an attitude is in the minority, for which we are thankful. Until a system is devised, and here we would like to add, that Dr. Alexander Meiklejohn, of the Wisconsin Experimental College seems to be on the right track, that will allow some elasticity from the rigid restrictions of facts, the entire question is one of personal morality.

No More Free Car-rides!

Unfortunately, we are almost wholly devoting ourselves to the discussion of college morals this week. Public opinion to the contrary notwithstanding, the

college man of today is keenly interested in morals. There was a time when the college man went about with some air of gusto in describing his antics and code. But times change and there are many burly alumni who mournfully state that "the good old days are gone." The college students of today do not present the same problem to faculties as the former generation did, and we have a faint suspicion that there will be many a faint "amen" to this statement, when it is read. But even as sophisticated as the college man of today has become, the public still insists in placing him in a special class and a model for all young men. We have yet to be convinced that "little college boys" should be any different from any normal healthy boy who has not had the advantages of a college education. Pranks, as practised by collegians have become an integral part in the romance of the development of the American college.

The book *Eight O'clock Chapel* would be a very dull book indeed if the section on college customs were omitted.

Stories, both past and present, of college customs and pranks, all of which ultimately are harmless, lead us to believe that were Maine to have more of them we could expect a somewhat less passive Maine Spirit. But there is a sharp distinction between college pranks and just plain rowdiness. There is none of the latter here at Maine, hence we have no excuses to make for it.

A short while ago, the railway company which maintains and operates the Toonerville Trolley between here and Bangor, held up their hands in judicial horror and said that college boys must stop stealing rides. It was a custom that might make weak dividends! They cited *one* good reason why the practise should be stopped, however, and it was that a consideration should be given to the safety of life and limb. The country spends millions of dollars annually in safety first propaganda, and yet we have our percentage of fools who, nevertheless, still insist in finding out what makes the wheel go 'round. Intelligent instruction would go a long way to convince those who indulge, that stealing rides isn't worth the risk of a dime or a quarter. The law, lawyers, and even the majesty of the courts would have to go a long way to put across the same idea. A college student can be *reasoned* into anything *much, much easier*, than *forced* into it.

The railway company failed to show that redeeming quality of *human understanding*, when they proceeded to show students that carfare could be as high as \$15.85, even though they themselves would grant that no carfare was worth that much.

We do not understand how anyone could suppose that the evil custom, or rather personal prank, has been remedied in the least. The stimulus that prompts anyone, be he college man or not, lies more deeply rooted than that. How dull this world would be if we all lost our incentive to slip the bonds of restraint once in a while!

Students do wrong when they steal rides; railway companies do wrong when they resort to the judiciary as a corrective measure; two wrongs do not make a right—the problem consequently is not solved to the best interests of all parties, so there you are!

Human nature insists, that the public in general, as well as college students will continue to "get away" with any opportunity that presents itself.

Here are two true railway stories:

There was once an honest individual. The conductor overlooked his customer, so the honest customer hailed the conductor back to make up the missed fare. The traveller was promptly "balled out" and the conductor finished by saying, "—what if an inspector was on and saw that. I lose me job for being careless. If I miss you, let it go." Honesty the best policy?

Reports from a Canadian university town recently stated that the students had "painted" one of the company's cars, de-

MISS JACKSON WILL HOLD CONFERENCES

Through the efforts of the A.A.U.W. and All-Maine Women, Miss Florence Jackson, of Wellesley, one of the best known vocational guidance leaders in the United States, will visit the University, February 14. Miss Jackson is employed part time by Wellesley alumnae, and in addition, she travels to various schools and colleges in the interest of vocational guidance for women. Colby is cooperating with Maine in bringing Miss Jackson to this state.

On the day of her visit here, there will be group conferences in the Balentine sunparlor from 8 a.m. to 11. At 11 o'clock there will be special chapel for women students. After lunch, personal and group conferences will be held until 5:15 at Balentine.

Preliminary discussion groups will be held at Balentine on Thursday, Feb. 9, at 7 o'clock. Mr. Grube Cormack, of the State Department of Public Welfare, will speak on social work, and Mr. Willard Chase, Superintendent of Schools at Old Town, will lead the educational group.

ANNUAL FARMERS' WEEK WILL BE HELD IN MARCH

The twenty-second annual Farmers' Week is to be held at the college of agriculture March 27-30 according to the announcement of Dr. Leon S. Merrill, dean of the college. The event this year and in the future is to be known also as Home-Makers' Week because of the increasing attendance at the home economics meetings.

Professor Lamert S. Corbett, head of the department of animal husbandry has been appointed in charge of arrangements for the week while Professor Pearl S. Green, head of the home economics department, is to be responsible for the women's program. The heads of the various departments of the college are co-operating by arranging the program of lectures pertaining to subjects taught by the department.

Until about ten years ago farmers' week was held while college was in session but of late years it has been necessary to schedule it during the college spring vacation in order to have sufficient dormitory and class rooms available to accommodate the increased attendance.

Lectures, demonstrations, discussions, business meetings, and social features will be included to make the program interesting and attractive. Many speakers of prominence both within and outside of the state are being invited to give lectures.

claring that, "—it probably wouldn't have been done any other way." The public probably thought the same thing, but here again honesty—oh, well!

HI-LITES

Open House night—the night when the whole campus seems to burst suddenly into jazz and lighted shields were seen over the doorways of every frat house; the night when couples go from one house to another to have a few dances, look the people over, exchange "Hellos" and then go on to the next; the night when students and other people attending the University forget the wear and tear of finals and the formality of the Ball the night before and just go in for a grand good time!

Beginning with the upper end of the campus there were the boys of Sigma Nu who staged their barn dance to the tunes of the Jarvis orchestra of Brewer. Professor and Mrs. W. J. Sweetser and Professor and Mrs. B. C. Kent chaperoned the party.

Next in line was the Theta Chi House which threw open its doors to let strains of music from Cobby O'Brien's orchestra float out and inveigle all passers-by. Pat Peakes did the "fixing" for his house and Mrs. Alice Witherley and Professor and Mrs. Harry Smith were the chaperones.

Another part of Cobby O'Brien's orchestra played next door where the Betas held forth. Carroll Osgood gave the signals for his team to carry the dance through. Mr. and Mrs. Frederick Youngs were the chaperones.

Everyone had a very enjoyable stop-over at Sigma Alpha Epsilon during Open House. The committee, headed by Wilson Hayden, had secured for the occasion a *Novelty* Orchestra from Chagoggagoggmanchaggogochabunagumamong. "Among My Sioux Veneers" and other war dances were rendered with that engaging simplicity. Eleven o'clock saw the Last of the Mohicans, but their place was ably filled by the Homespun Trio. Prof. and Mrs. Richard Talbot and Mrs. Edith McCullum chaperoned.

"Kappa Sigma" is always a safe answer to that "Where Shall We Go from Here, Boys" query of Open House night. Gordon Bither's orchestra furnished the music. Rudolph Lewsen, Roger Wilkins and Charles Hardy were on the committee. The chaperones were Prof. and Mrs. Mark Bailey and Mrs. Mason.

The music for Phi Eta Kappa was furnished by the Barleycorn Boys from Bangor. E. Pluribus Lancaster and Lee Wescott were in charge of the affair; while Mr. and Mrs. Stanley Wallace and Mrs. Verrill chaperoned.

Delta Tau Delta ran true to form last Saturday night and crashed through with some potent music. None other than Frankie Shea and his Julep Joy Boys, at their best! Through the manly efforts of Harold Eclair MacLaren and his faithful retainers the Delt House was very attractively decorated in purple and gold, the fraternity colors. The chaperones were Mr. and Mrs. Horace Chapman and Prof. and Mrs. Warren Gamell-Lucas.

Lambda Chi Alpha extended an unusually cordial welcome during Open House.

The music, which was furnished by the Lapis Lazuli Lads from Lincoln, had been run to earth through the praiseworthy efforts of Stanley Gordon Winch of Scotland Back-yards. Prof. and Mrs. Evans and Mrs. McDonough chaperoned.

At Phi Gamma Delta, Fiji hospitality was shown to the tunes of the elite Colby Collegians. This orchestra was extremely popular last year at open house, and the large number of guests during the evening showed that they had not been forgotten. Mrs. H. Plummer was the patroness, with W. Jones as chairman of the social arrangements committee.

The Phi Mu Delta offered the in hospitality across the way. Rice's red hot music played its stuff here. Dr. and Mrs. Lutes and Mrs. Chase chaperoned and Ed Rose was in charge of the affair.

At Phi Kappa Sigma a wonder orchestra from the wilds of Newport hastened the pulse and made the youngsters step. Professor and Mrs. Bray and Mrs. Abbott were the patron and patronesses here and all the boys had a hand in getting the dance together.

Those white houses under the spreading chestnut trees—or is it fir?—at the far end of the campus, Alpha Tau Omega and Sigma Chi also welcomed guests during the open house revelry. At A. T.O. Major and Mrs. Glover chaperoned and the Goodie boys of Bangor furnished snappy (?) music mostly in ¾ time. Blue and gold streamers were used to decorate the house. The success of the party was due to the untiring efforts of "Hal" Folsom, "Jack" Walker and "Prexy" Pearce. At Sigma Chi the dancers made merry to strains of music rendered by the New York Philharmonic Orchestra—or was it that? Anyway they made merry. Professor and Mrs. Chadbourne chaperoned and Vaughan Daggett did his bit towards making the party a success.

(A Clipping from the Newport Recruit)

During the University of Maine game at Barracks "B" on Saturday night an accident occurred, which made a profound impression on all members of the regiment that were fortunate enough to see the game, and can very well be brought to the minds of those who were not present. During a rally in front of the University of Maine's basket, after Maine had obtained the ball, one of our men tripped and fell. His opponent from the University immediately stopped, reached down and picked him up before going down the court to assist his team.

That was sportsmanship in its highest degree! That was the action of a sportsman, who put sportsmanship even before his desire to win. This man was giving all he had, and he actually scored the majority of points for his team. He was a basketball player; but even before that he was a sportsman and a gentleman.

Every man in the regiment can learn a lesson from this. Always fight hard, play hard, and work hard, but never let your fight, your work or your play interfere with your being a gentleman and a sportsman.

VIRGIE'S MID-WINTER SALE of SUITS and OVERCOATS

Hickey Freeman, Adler's Rochester and Griffon Suits and Coats are the finest in the land—Priced for quick disposal at a fraction of their real worth.

Exclusive but not Expensive

INTRA-MURAL BASKETBALL RESULTS

Intra-Mural basketball has provided plenty of keen rivalry between the fraternities on the campus and furnished plenty of fast and interesting games to watch. This season has been successful thus far and certainly promises to eclipse the games of last year. As yet no feud has started and the competition seems to be in the right spirit, that of fraternal feeling among the fraternities. Some of the contests have been very close while others did not appear too fast.

The leagues' standing are as follows:

NORTHERN LEAGUE

	Won	Lost	Percentage
Beta Theta Pi	1	0	1.000
Sigma Nu	2	1	.666
Sigma Alpha Epsilon	1	1	.500
Commons Council	2	2	.500

Lambda Chi Alpha vs. Phi Kappa Sigma	Jan. 21	11-18
Lambda Chi Alpha vs. Phi Gamma Delta	Jan. 24	Postponed
Delta Tau Delta vs. Phi Gamma Delta	Feb. 7	10-35

SOUTHERN LEAGUE

Beta Kappa vs. Phi Mu Delta	Jan. 10	6-46
A.T.O. vs. Sigma Chi	Jan. 14	34-12
Phi Kappa vs. Alpha Gamma Rho	Jan. 14	36-8
Beta Kappa vs. Phi Kappa	Jan. 19	7-60
A.T.O. vs. Alpha Gamma Rho	Jan. 21	28-16
Phi Mu Delta vs. Sigma Chi	Jan. 24	24-12

GO-TO-CHURCH SUNDAY
WILL COME ON FEB. 19

Go to Church Sunday has become an established institution, and upon that day a special effort is made to attend divine worship in the church of one's choice. The custom is excellent provided it is followed in the correct spirit. It is a time when one is expected to show a little more attention to the observance of the Sabbath Day and to take a count of stock of the past and to plan for the future. Going to church on this day does not excuse us from past or future attendance. No matter what one's religion may be, surely he or she is a better man or woman for a study at least once a week of the higher things of life.

Sunday, Feb. 19, will be Go-to-Church Sunday this year at Maine.

The University of Maine Band played at the seventh WABI concert in Bangor January 22 at the Universalist Church.

These concerts are given by the Universalist Church each Sunday evening during the winter.

The program comprised the following selections:

University of Maine Band March

Overture Fra Diavolo

Fantasia for Euphonium

(Baritone solo by Karl Larsen)

March Fort Lawton

Gavotte Louis XIII

Chimes of Normandie

Stein Song

The band was conducted by Delmar Lovejoy '28 and Karl Larsen '28

The biggest and best event of the year will take place March 9 in the form of a real, true circus. It is to be an unusually good performance. There are to be fat ladies and pink lemonade, tight-rope artists and wild west shows, polar bears and pop corn, and with Bill Kenyon as ringmaster we are assured of a successful entertainment. The M.C.A. and Y.W.C.A. are putting it on with Bob Parks in charge. The chairmen of the various committees are: Entertainment, "Billie" Bixby; Publicity, "Archie" Smith; Grounds, "Doc" Moulton; Refreshments, Sylvia Gould.

Dr. Edith M. Patch, head of the department of entomology in the Experiment Station, was elected first vice-president of the Entomological Society of America at a recent meeting in Nashville, Tenn.

Coronado
blazed the trail

As explorer and discoverer in the great southwest, Coronado pioneered a trail which telephone lines now traverse.

To project and construct these lines across plain and desert and over mountain range was also the work of pioneers, men not afraid to grapple with the frontiers either

of geography or of scientific knowledge.

Men of the Bell system have penetrated through trackless problems of research, of manufacture, of telephone operation and of management. They purpose to continue their advance, all in the interest of better service to America.

BELL SYSTEM

A nation-wide system of 18,000,000 inter-connecting telephones

If it is impossible for any group to be at the gym at the time specified, please notify either Mary Robinson at Balentine or "Russ" Coggins at the Beta House

Capt. Vermette Becomes
New Cadet Commandant

Word has just been published that Raymond E. Vermette, U.S.A. stationed with the military department of the University of Maine has been promoted to a captaincy in the regular army.

Captain Vermette has been at the University for the last three years, coming here from the Fifth Infantry stationed at Portland, Maine.

The promotion has been approved by Congress and Captain Vermette assumes his new duties at once.

He is to be commandant of cadets, relieving Captain Ready who will act as an instructor for the rest of the school year. Major Glover and Captain Ready will leave the college at the end of this year and Vermette will be in charge.

A regular twenty minute assembly will be held on Monday, February 13th. This assembly is to give the students who attended the Student Volunteer Convention at Detroit an opportunity to report on the Convention. After the opening exercises three of Maine's delegates will speak for a few minutes. These will be Fred Thompson, Virginia Smith and Mary Robinson.

Former Instructor Here Gives
Results of Study of Grades

(Continued from Page One)

difference was not found to exist between the marks of the fraternity men and the non-fraternity men at the University of Maine. Since this fact is derived from such a comprehensive set of figures extending over a period of eleven years it at least suggests that a fraternity environment does not affect the scholastic achievement of the average college student.

CO-EDS WILL BE GIVEN
MOTOR ABILITY TESTS

We are living in an age when efficiency is spelled with capital letters. No individual can be one hundred per cent efficient mentally or socially who is physically inefficient. No individual can be physically efficient whose body mechanics are poor or whose organs do not function properly. To be absolutely efficient an individual should be in good health according to the accepted standards of health, should be sound organically, have good health habits, be possessed of endurance and strength, be well poised, endowed with mental and moral qualities which makes him socially valuable, and be capable of certain definite high neuromuscular control as exhibited in his reactions to certain motor ability tests.

Few students realize that health is only a by-product of physical education. It is a tangible thing which will surely result because through the vigorous activities under hygienic conditions every organ in the body will act normally.

The Department of Physical Education for Women is giving a series of motor ability tests. These do for physical education what the various mental tests do for other educational fields. That is, they attempt to provide an objective standard for measuring the individual's inherent capacity. In this case it is that capacity which permits her to learn and become proficient in motor skills. However, like the mental tests, they actually succeed in measuring what exists at the time of measurement—in this case, her skill, strength, neuro-muscular coordination, and fundamental ability.

Each part of the tests offers the girl a norm for comparing her motor efficiency with that of others.

Students who pass the tests, thus demonstrating their superior physical ability, need no longer elect elementary sections in physical education. In such sections the main purpose of instruction lies in teaching fundamental activities, by means of elementary coordinational drills, without offering the individual much opportunity to excel. Each such student, instead, may elect from a number of activities offered by the department, having thus the opportunity to become more efficient in her favorite activity.

These tests are not to be regarded as the ultimate object of physical education. They serve two purposes at this university: (1) They offer a yardstick, a measuring rod of ability; (2) They serve as a sort of hurdle which, if accomplished, opens the way to something more difficult, more worth while. In connection with the second purpose, they not only stimulate muscular development, which many people assume to be the only aim of physical education, but they assist in training the intellect, guiding the judgment, and developing the social and moral standards.

CARNIVAL BALL HAS
LARGE ATTENDANCE

The seventh annual Winter Carnival Ball was held Friday evening, February 4, and proved to be about the most successful that has ever been held. This ball is the biggest social event here during the winter season and a large attendance was a proof of its popularity.

The gymnasium was very well decorated so that the bare appearance of the place was covered up. Colored lights were strung along under the balcony and a sort of ceiling was arranged from which festoons of white crepe paper moss hung down giving a very pretty effect. The customary booths for the different fraternities were arranged around the hall and each booth had the fraternity's shield or banner for a decorative effect.

A ten piece orchestra made up of the U. of M. Troubadours and Tom Kane's Band played. Professor and Mrs. Pollard and Dean and Mrs. Clark were the patrons and patronesses.

As in former years the Intra-Mural Association were responsible for the Carnival Ball and Fred Thompson and Gordon Walker were in charge of arrangements.

Deputation Team Visits
E. M. C. S. at Bucksport

A University of Maine Deputation team spent last week end at the Eastern Maine Conference Seminary in Bucksport.

The team which was under the leadership of Clifford Simpson, associate secretary of the U. of M., Y.M.C.A. consisted of:

Miss Arlene Robbins, Miss Janet Roney, Mr. Linwood Cheney, and Mr. Alfred Rackley.

Sunday morning Miss Robbins and Mr. Rackley spoke at the Congregational Church, while Miss Roney and Mr. Cheney spoke at the Methodist Church. Miss Robbins and Mr. Cheney talked on the "Responsibility of Being a Christian" while Miss Roney and Mr. Rackley had for their subject "How does the Christian differ from the non-Christian?"

Sunday night a united meeting of all the churches was held. At this time the subject was foreign missions.

Mr. Cheney told about the Student Volunteer Convention recently held in Detroit, Michigan.

Modern missionaries was the subject of Miss Roney's talk while Miss Robbins gave objections to foreign missions and Mr. Rackley answered her objections.

Distinguished by a favor that places it first

It is a natural pride that Camel feels for its triumphs. Not only did it lead the field shortly after its introduction. It passed steadily on with each succeeding year until today it holds a place in public favor higher than any other smoke ever reached. Camel is supreme with modern smokers.

Obviously, there is a quality here that particular smokers appreciate. It

is indeed the myriad qualities of perfection that are to be found in the choicest tobaccos grown. And the art of Nature is aided by a blending that unfolds each delicate taste and fragrance.

You will more than like Camels. You will find a solace in them every smoking hour. Their mildness and mellowness are an endless pleasure.
