REPORT OF HEALTH OFFICER

To the Citizens of North Yarmouth:

The Health Report for the year ending Feb. 1, 1942.

There have been twelve (12) cases of measles; nine (9) of German measles, fourteen (14) of mumps.

Respectfully submitted,

HENRY H. YORK,
Health Officer.

REPORT OF SUPERINTENDENT OF SCHOOLS

During the past year there have been few changes in the policies established in the previous years controlling the operation of the schools. Children who live considerable distances from the schools are transported and we have continued the practice of transporting whole grades from the school having enrollments too large to allow for effective teaching. Considering the number of miles travelled and the number of pupils transported, the cost of transportation is relatively small.

I would like to take this opportunity to impress upon the citizens the need of continued support for education. There will be an appreciable increase in the appropriations needed to meet the needs of the coming year. This is to be expected at a time when the cost of living is increasing. There is a very definite shortage of trained teachers not only in the State of Maine but in the country as a whole. In many towns married and retired teachers have been urged to return to the profession during the emergency period. Every effort is being made to maintain the standards so that unqualified teachers will not be certified during this period.

Two new teachers were hired in September to teach in the Walnut Hill School and in the Buxton School. Some of the Surplus Commodities have been used in the schools to supplement the lunches brought from the home. A better program of hot lunches for all pupils would be desirable but there are some difficulties in securing the necessary equipment and material for a balanced program that are hard to overcome.

We are gradually replacing the worn arithmetic texts with new books of the same type. New reading books for the lower grades have been purchased and there is a need for new geography texts in some of the schools.

The usual repairs were done during the summer and in addition the Dunn School was painted and the Buxton School shingled.

The dental clinic was carried on as usual with all of the children, whose parents desired, receiving dental treatment. For the sum of \$55.00, 52 children received dental treatment that would have cost \$220.00 if the regular dental rates had been charged. This work included:

50 cleanings, 36 fillings, 31 extractions. (25 of these extractions were temporary teeth.)

MISCELLANEOUS

The school financial records are closed twice a year. The accounts are balanced and closed in February for the Annual Town Meeting and also in June for the State Reports.

In order that the school costs published in the Town Report may correspond with State Report figures the following school costs cover the school year beginning July, 1940 and ending June, 1941.

In the Town of North Yarmouth the children are being housed, educated, and in some cases transported at the following per pupil costs:

	Yearly Cost	Daily Cost	Hourly Cost
Elementary,	\$37 73	\$0.209	\$0.029

The school buildings in this town have been kept in repair at a cost per pupil of \$1.74.

The number of pupils per elementary teacher is 27.

REPORT OF PUBLIC HEALTH NURSE

Annual Report, 1941

Public health nursing is concerned with securing and maintaining better health for all members of the community. Recognizing that whatever is done to assure physical and mental health during maternity, infancy, childhood and youth will affect the health of adult population.

During the past year visits were made to prenatal patients to help them carry out their physician's instructions, or if not under a physician's care, to urge them to secure medical advice as early in pregnancy as possible. In many cases the mother was helped to make plans for her confinement.

Visits were made to young infants to urge the mothers to keep the baby under medical supervision, to have him vaccinated against smallpox and immunized against diphtheria. When necessary the nurse assisted the mother in planning a daily regime for the baby. Special emphasis was placed on the prevention of communicable diseases which take a heavy toll in childhood.

Arrangements were made for crippled children to attend one of the Crippled Children's Clinics conducted by the Bureau of Health. Follow-up visits were made in the homes to assist the family with the care of the patient.

THERESA McNEIL,
Public Health Nurse.
