## Supervisor's Report.

*Fellow Citizens:*—I respectfully submit the following report as Supervisor of Schools:

As was fully explained at Special Town Meeting, there was not money enough to run the schools the usual length of time this winter. Some of the schools had commenced at the time the matter came up, and so were continued until it was decided in town meeting that the town would not raise more money for the continuance of the common schools. Immediately after the action of the town the teachers were all notified that the schools could not continue longer at the expense of the town. I am exceedingly sorry that it so happened, but as I explained at town meeting there was an overdraw of \$75 two years ago when the schools were changed over from a district to a town system, and \$300 one year ago, which was not apparent at the time of making the report, as the schools were then all in session, that being the first report made, Feb. 1st, under the new law. The money, however, appropriated for schools has all been expended for the schools and none of it misappropriated. The fact is the town, for the past two years at least, has not raised a sufficient amount to run the schools as they now exist. It is said that I have been extravagant in the expenditure of the money; of this I must allow you to be the judges, I can only say I have used my best judgment and employed the best teachers I could find, and I believe that in order to have first-class schools it will be necessary for the town to raise more money for the support of them.

I give you herewith a full statement of every order drawn for the support of schools, and you can see what has been done with the money. You will see that the statement includes the schools in session at the time of making my last report.

A class of seven graduated from Welchville High School last June. Every member of that class performed the part assigned

them at the graduation exercises very creditably. They would compare favorably, I think, with any High School in this part of the State.

The school in No. 7 was continued this winter about two weeks by an arrangement made between the teacher and the district.

No. 11 also made arrangements with the teacher whereby the school will continue, as I understand, the usual length of ten weeks.

No. 3 also raised a sufficient amount of money to keep all four of its schools in session for the usual ten weeks. The same teachers as last term are in charge. The fact that this district has raised by subscription over four hundred dollars for the support of these schools during this term is proof enough, I think, of the efficiency and popularity of these schools in the opinion of the people.

So far as I am able to judge every school in town, during the past year, has done a good work. Only first-class teachers have been employed and they have given the schools their best services. I know that they have not in all instances been perfectly satisfactory to all, but such a thing as giving perfect satisfaction to all is out of the question. I am well pleased with the work that has been done and think a large majority of the people are satisfied of the same thing.

I hope my successor will be able to give you better school and better satisfaction. I shall do all in my power to assist him and to advance and improve the education of our children.

The following is a table of names of the teachers in each district, number of weeks schooling and prices paid teachers:
