## LAST INTERFRATERNITY MEET

### Kappa Sigma Wins Series

By capturing 38½ points in the last of the three inter-fraternity meets, Kappa Sigma won the series with a total of 110½ points, thereby winning the beautiful silver cup, the gift of Coach A. N. Smith. Because of the cold weather Saturday, the events were a little slower than usual, but some interesting races were furnished nevertheless.

The final in the 45 yard Freshman race was one of the best races on the program. Ashton, Leecock, Lawry and Purington lined up for the final in this event. Lawry got the jump, and finished first being pushed by Ashton and Leecock in the order named.

The mile handicap was another close race, Brooks winning by a yard over Kelley. Webster finished a good third. The 220 yard dash was a good race Donahue winning with Lawry second. Morse won the open hurdle events easily, and Purington captured the Freshman high hurdles.

The medley relay race was won by Kappa Sigma. In this event the first man ran 780 yards the second 390, and the third 260.

The summary:—

#### High Jump

1st, Worden, Delta Tau Delta; 2nd, Hall, Phi Gamma Delta; 3rd, Keyte, Phi Eta Kappa. Height, 5 ft. 1 in.

#### Broad Jump

1st, Donahue, Kappa Sigma; 2nd, Rogers, Kappa Sigma; 3rd, Glover, Beta Theta Pi, and Palmer, Kappa Sigma, tied. Distance, 18 ft. 8 ins.

#### 45 Yard Dash (Freshman)

1st Heat: 1st, Ashton, Phi Gamma Delta; 2nd Leecock, Delta Tau Delta. Time, 5 sec.

2nd Heat: 1st, Lawry, Beta Theta Pi; 2nd, Purington, Kappa Sigma. Time 5 2-5 sec.

Final: 1st, Lawry, Beta Teta Pi; 2nd, Ashton; Phi Gamma Delta; 3rd, Leecock, Delta Tau Delta. Time, 5 2-5 sec.

#### 45 Yard High Hurdles

1st Heat: 1st, Purington, Kappa Sigma; 2nd, Small, Phi Kappa Sigma. Time, 6 4-5 sec.

2nd Heat: 1st, Morse, Phi Kappa Sigma; 2nd, Ferguson Kappa Sigma. Time, 7 sec.

#### 45 Yard Low Hurdles

1st Heat: 1st, Ferguson, Kappa Sigma; 2nd, Small, Phi Kappa Sigma. Time, 5 4-5 sec.

2nd Heat: 1st, Morse, Phi Kappa Sigma; 2nd, Purington, Kappa Sigma. Time, 6 sec.

#### 880 Yard Handicap

1st, Bell, Kappa Sigma; 2nd, Phelps, Sigma Chi; 3rd, Biglow, Delta Kappa Time, 2 min. 19 sec.

#### 45 Yard Dash (Open)

1st Heat: 1st, Ashton, Phi Gamma Delta; 2nd, York, Beta Theta Pi. Time, 5 1-5 sec.

2nd Heat: 1st, Lawry, Beta Theta Pi; 2nd, Rogers, Kappa Sigma; Time, 5 2-5 sec.

mFinal: 1st, York, Beta Theta Pi; 2nd, Lawry, Beta Theta Pi; 3rd, Ashton, Phi Gamma Delta. Time, 5 1-5 sec.

#### 45 Yard High Hurdles

Final: 1st, Morse, Phi Kappa Sigma; 2nd, Purington, Kappa Sigma; 3rd, Small, Phi Kappa Sigma. Time, 6 3-5 sec.

#### 45 Yard Low Hurdles

Final: 1st, Morse, Phi Kappa Sigma; 2nd, Ferguson, Kappa Sigma; 3rd, Small, Phi Kappa Sigma. Time, 6 1-5 sec.

#### 45 Yard High Hurdles (Freshman)

1st Heat: 1st, Fish, Phi Gamma Delta; 2nd, Cutler, Non-frat. Time 6 4-5 sec.

2nd Heat: 1st Purington, Kappa Sigma; 2nd, Small, Phi Kappa Sigma. Time, 6 2-5 sec.

Final: 1st, Purington, Kappa Sigma; 2nd, Fish, Phi Gamma Delta; 3rd, Cutler, Non-frat. Time, 6 3-5 sec.

#### 220 Yard Dash

1st, Donahue, Kappa Sigma; 2nd, Lawry, Beta Theta Pi; 3rd, Barret, Sigma Chi. Time, 26 2-5 sec.

#### Mile Handicap.

1st, Brooks, Phi Kappa Sigma; 2nd, Kelly, Phi Eta Kappa; 3rd, Webster, Sigma Chi. Time, 4 min. 53 4-5 sec.

#### Medley Relay Race

1st, Kappa Sigma, (Bell Rogers and Ferguson); 2nd, Phi Kappa Sigma, (McLaughlin, Morse and Littlefield); 3rd, Phi Eta Kappa, (Coffin, Totman and Merrill.)

#### Shot Put

1st, Bailey, Beta Theta Pi 2nd, Ruffner, Kappa Sigma; 3rd, Purington, Kappa Sigma. Distance, 36 ft. 6 ins.

POVERTY BALL

Unique Affair to be run by the "M" Club

The "M" Club will hold their first dance in the form of a Poverty Ball on April 11 in the gymnasium. It will be something of an innovation here at the University of Maine and a great deal of interest is already being shown in this coming event. Arrangements are nearing completion and the "M" Club committee consisting of R. H. Bryant, '15, L. E. Seekins, '13, and H. V. Cobb, '14, are putting in some hard work which is sure to bring results.

A number of surprises are planned and all the features will not be made public until the night of the Ball. Something very unique is promised in the line of dance orders, decorations and refreshments. All four classes will be allowed to attend and the committee are confident that this will be one of the social events of the college year.

The University Orchestra which is the best for years will furnish the music. The price of admission is seventy-five cents a couple for dancers and twenty-five cents for spectators. The tickets can be purchased at the college store or from members of the committee in charge. No one will be allowed on the floor without a costume.

Mr. Charles P. Antony of Tufts college and Pierce Long, Harvard Law School were at Theta Chi last week.

MUSICAL CLUBS

Will take Trip to Boston

The Easter trip of the Musical Clubs will begin this Thursday and will continue into the following week. The clubs will give a concert in Portland on Thursday night in the Pythian Temple and another in Boston in the Huntington Chambers on Saturday night. This concert is in charge of the Alumni and is looked forward to by every member of the clubs as the biggest concert of the year. On the way back the clubs will give a concert in North Berwick, Monday night, in Biddeford, Tuesday and in Lewiston, on Wednesday. With the exception of a few numbers the program will be the same as on the Aroostook trip. The clubs have been practicing steadily since they have returned and the Alumni in Boston as well as in any of the other places will certainly have reason to feel proud of the representation of their college when they hear the especially fine talent on the Clubs this year.

CAMPUS BOARD ELECTION

Three New Members Added

Three new members were added to THE CAMPUS Board at a meeting held Monday, March 24. These men are R. P. Clark, F. D. Freese, and Ingalls, '15.

## DEUTSCHER VEREIN

## Prof. Segall Speaks on Ibsen

Under the auspices of the Deutscher Verein, Wednesday evening, March 14, at the Library, Dr. J. B. Segall gave a most interesting talk on Ibsen. Preceding the lecture Doctor Drummond spoke briefly of Ibsen's place in literature and his influence on all modern drama, especially the German.

Dr. Segall began his lecture by assigning to Ibsen a place with the great dramatists of all time, Aeschylus, Euripides, Shakespeare, Corneille, Racine, Goethe and Schiller. To convey a just impression of the power of the man would require all his genius. He was of humble origin, but he rose to fame so that the German dramatists, Sudermann and Hauptmann looked to him as their model in dramatic art.

The main purpose of Ibsen's life was to discover the tragic element in commonplace life. He was the essentially tragic genius. This fact is often forgotten and Ibsen charged with pessimism. Ibsen's method differs from Shakespeare's in that Ibsen deals with particular motives, particular situations, Shakespeare with general motives and situations.

The prevailing motif in ancient Greek tragedy is the dominance of fate. In Ibsen a new note is sounded. His characters are not heroes but real men and women of the middle class. Handling the tragic element in middle class life was difficult for Ibsen because the same class had hitherto been treated from other points of view. The hero of ancient tragedy puts up a good fight and dies, conquered by fate. The hero of Ibsen wages a war against his own conscience. There are no murders in Ibsen's tragedies, no open transgressions. As there are no heroes, neither are there villains. His men and women are not weaklings but they possess somewhere a weakness that brings about catastrophe.

Among the plays discussed were "Brand", "Peer Gynt," and the long series of social plays upon which Ibsen's fame chiefly rests. Of these "The Wild Duck" is remarkable for the originality and the subtle thought, characteristic of the author. Each of his plays is a powerful weapon of argument prepared to win men's minds, because of Ibsen's knowledge of men's hearts.

The next lecture given by the Verein will occur in May when Dean Walz of the Law School will speak on Bismark.

H. A. King, '14, recently spent a few days at his home in Peabody, Mass.

## TRACK TEAM TO TRAIN DURING VACATION

## Twenty-Four Men Will Stay

Due to the fact that the track season is extremely short here at Maine it has been deemed advisable to retain the 20 or more candidates that will form the nucleus of the 1913 track team, during the Easter vacation. There will be no track work this week so that the men may start on their spring training after having had a sufficient rest. Beginning with next week there remain but seven weeks before the State Meet. With such a short season it would be a costly waste of time for the men to go home during the vacation. Those who stay will take their meals at some one of the fraternity houses together with the Coach. The runners will practice either on Alumni Field or down at the Webster railroad station. The weight men and the pole vaulters will train on Alumni Field and in other temporary places on the Campus. The following men will be requested to remain on the Campus, during the vacation:—Littlefield, Powers, Burgess, Worden, Rogers, Shepard, 1913; Morse, Ferguson, St. Onge, Morris, Towner, Brooks, Kelley, Thomas, 1914; York, Donahue, Bailey, 1915; Leeock, Lawry, Ashton, Fox, Bell, Palmer, Purington, 1916.

The first outdoor competition will be in the form of the annual Outdoor Interclass Meet on April 26. The following week, May third, the team will travel to Hartford to compete in a dual meet with Trinity. May eleventh the team goes to Lewiston to meet Bates College. About twenty men will be taken on each of these trips. The following Saturday the State Meet will be held at Orono and every possible man will be used to bring points to Maine. Much hard work and training will be put in by the men and the Coach during the next seven weeks and all in the hope that Maine will be the State Champion for the year 1913.

## IN CASE OF FIRE

Telephone to the Power House, have the fire alarm sounded. The Janitor, H. R. Wing, should then be notified, and also Mr. E. W. Davee. The fire stations, two in number, are situated in the rear of Hannibal Hamlin Hall and Winslow Hall. The fire carts with the necessary material should be taken at once to the scene of the fire.

BANGOR CO-OPERATIVE PRINTING COMPANY

## EDITORIAL.

On Thursday the Musical Clubs will start on the last trip of the season. A final request is

**Alumni** made of all alumni, who are in or near the places where concerts are to be  
**Support** given to give their best support to the clubs. The presence and interest of

alumni will be much appreciated by the members of the clubs, who will, because of this interest give a better concert, and this will, in turn, help maintain the high standing which the University of Maine Musical Clubs have already attained.

During the Aroostook tour of the clubs the number of alumni attending the concerts was small. This was due primarily to the fact that in the places where concerts were given there were few Maine graduates. The support, how-

ever, of the few was very good, and it showed that those who have once been at Maine always remember the college and are ready to help along her interests.

In the towns and cities where concerts are to be given on this trip there are many alumni of the University. In Boston, especially, there is a very vigorous alumni association which will take charge of the Boston concert. In Portland and Lewiston there are many Maine alumni.

The management and members of the Musical Clubs are very anxious to have the alumni present at their concerts. With the clubs carefully trained, as they have been this year, a very good program will be offered and the acquaintances which may be formed between college men and alumni will strengthen this branch of our college activities and renew the interest of the alumni in "Maine."

Our "live wire" started things moving in the right direction last Friday night at the Bijou.

The attendance was smaller than it should have been but the whole evening was a success. Such an event if planned annually would surely serve to keep up student enthusiasm. Next we are informed that the "Poverty Ball" is to be given on the 11th of April. Here is another opportunity for the students to keep on the right side and help our college.

The details of this "Ball" are given in another part of this issue, and no one who reads can doubt that an exceptionally pleasant evening awaits all who will go. And there is also no doubt that many should go! Our social events seem to be coming along close together but none should, for that reason, be neglected.

The very name poverty does away with any concern over formality or informality and thus opens the way for all to enjoy the dance. The "M" club requests the co-operation of the students in this dance, and such cooperation should be given.

Our college life is not made up entirely of Musical Clubs, or "Poverty Balls," or athletics:—

for tonight the Freshmen and sophomores will meet in their annual debate.

**Debate** This debate calls for student support  
**Tonight** just as much as do other activities; and it is a support easier to give in that it involves no financial expenditure.

In the past the class spirit and enthusiasm of the freshmen has helped them to victory. This year the same spirit and enthusiasm exists in both class teams and thus a good debate can be expected, with the outcome in doubt.

Organization of class support at the debate will do two things, it will help debating as a college activity, and it will strengthen class spirit which is not very strong in the two lower classes. To accomplish these things is decidedly worth while and for these reasons the attendance at the debate tonight should be very large.

—◆—

"Where is the Handbook?" For the past seven weeks this question has been constantly asked of the editor, business manager and Senior Skulls, until those people have almost repented of their connection with such a book; but at last the question has been answered by the appearance of the book itself.

Altho nearly eight weeks late it is felt and hoped that the Handbook will prove of real value to the students. The information contained in it is of general interest and of a character designed to be of daily use to all students.

The "Maine Handbook" has been in use among the students for many years and this present volume was planned to keep the series unbroken. It is hoped that next year a book can be published early in the fall.

### BIOLOGY STUDENTS ENTERTAINED

Dr. and Mrs. M. A. Chrysler held a delightful party for the major students in the Biology Department, at their home last Saturday.

Several of the students gave violin and piano solos and all joined in the familiar college songs.

Many interesting games were played and the company enjoyed a dainty lunch to conclude the evening.

### JUNIOR WEEK

#### Prom to have Japanese Effect

While the exact order of the Junior Week exercises, May 8-10, has not been fully decided upon, an especially enjoyable program is assured. As usual, the Junior prize speaking will come at this time, probably on Thursday, May 6. However, the Dramatic Club wishes to play on that day, in which case the speaking would be held on Saturday. The class is undecided as to whether it will have a class lunch, but the matter will soon be voted upon in a class meeting. Possibly there will be open house among the various chapter houses on Friday afternoon.

The Junior Prom will be held on Friday evening, that date having been approved by the Faculty and the dancing will continue until 2 o'clock. In the decorations, an entirely new idea is to be employed. By means of artificial cherry blossoms lanterns, and parasols, a Japanese effect is to be secured. This year, the colors will be varied yet the class colors will predominate. The same ideas will also be carried out in the dance orders.

On Saturday forenoon, visitors will have an opportunity to witness the military drill, while in the afternoon there will be a baseball game, Maine vs. Bowdoin.

The Junior Week programs may be ordered after the Easter recess, as the samples will be here then. While the style and the price of the program are not known at present, the size will be the same as last year.

### BANQUET OF ALUMNI

"A Greater University of Maine" will be the topic about which the after-dinner speeches at the annual banquet of the Penobscot Alumni Association of the University will centre. This banquet is to be held on the evening of March 24, in Bangor.

E. H. Kelley, '90, is to be toastmaster. Among the speakers of the evening are Dr. Robert J. Aley, President of the University, Physical Director Wingard, Dean J. N. Hart, '85, ex-mayor Mullen, '82, of Bangor, Judge Pierce '90, of Bangor, Judge Dunn, and Raymond Fellows, '08.

—◆—

Dr. Alice M. Boring of the Biology department of the University of Maine published two papers in the *Biological Bulletin* for February. The first of these was on "The Old Chromosomes of *Cerostipiosus Venosus*." and the second was the "Chromosomes of the *Cercopidae*."

## MAINE NIGHT AT THE BIJOU

### Students Attend in a Body

Saturday night proved to be a gala night at the Bijou. Through the kindness of Manager Bogrett, the students owned the house during the second performance. The orchestra seats were emptied after the first performance and then the Maine men filled the whole floor. The band played a few pieces and cheers were called for and given repeatedly. This event was arranged by the "M" Club, this club getting a certain per cent of the receipts. According to the latest figures about 500 tickets were sold at the college during the week. The proceeds of this entertainment will be used to bring men to Maine.

### ARRANGEMENTS ARE NOW BEING MADE FOR THE NEXT BIG COLLEGE DANCE

Arrangements are being made for the next big college dance, the Military Hop. The date has just been settled and the dance will take place on April 25. The Military Hop is given by the Freshmen class in connection with the military department. It is the only college dance which Freshmen are allowed to attend.

Preceding the dance an exhibition drill will be given by the various military companies. A special drill has been assigned to each company and both officers and men are putting in hard practice under the instruction of Lieut. Glass.

The following is the list of drills that will be given:

- Company A—Manual of Arms
- Company B—Close Order Drill
- Company C—Bayonet Exercise
- Company D—Double Rifle Drill
- Company E—Single Rifle Drill

This year the new faculty ruling regarding college dances goes into effect and the Freshmen are restricted both as to the time of closing and the amount of money that can be spent. Also, the Military Hop of this year will be informal.

So far no further arrangements have been made. The committee in charge consists of: Charles W. Ruffner, '16; Fred H. Curtis, '16; Paul E. Chadbourne, '16; Casil E. Barrett, '16; and George E. Kirk, '16.

C. E. Twitchell, ex-'14, and L. E. Houghton, '12, spent a few days at the Phi Kappa Sigma House last week.

## FRIDAY CHAPEL

### Prof. J. W. Stephens Speaks on the Panama Canal

At the regular Friday Chapel Prof. G. W. Stephens gave a lecture on The Panama Canal. He explained the treaty between Great Britain and United States Senate which provided for the use of the Panama Canal on equal terms by vessels of all nations, as it was interpreted at the time.

He showed that the present policy of the United States was not in accordance with this treaty. The treaty is not exceptional and is in form similar to the one governing the use of the Suez Canal. He stated England's objections and said that the matter would probably be settled by another treaty or some neutral arbitration tribunal.

### ALPHA TAU OMEGA HOUSE PARTY

Alpha Tau Omega held a most enjoyable dancing party last Friday evening. The house was neatly decorated in the fraternity colors of blue and gold. Music was furnished by Richmond. The guests present were: Prof. and Mrs. Paul L. Bean of Orono; Ralph Whittier '02, of Bangor; George L. Parker, '12, of Skowhegan; W. N. Jones, Orono; Mary E. Emery of Skowhegan; Winfred A. Gerry of Brownville; Molly C. Hutchins, Luzetta A. Stearns, Mildred Dow, Campus; Minnie May Park, Gladys Thompson, Sadie Haley, of Orono; Liela J. McAvey, Ruby E. Cronkhite, Gertrude Hammond, Tilda W. Mulholland, of Bangor; Elizabeth Helchey, and Lena F. Gibbons of Old Town; Mary A. Phillips of Selinsgrove, Penna.

### TO LECTURE IN CANADA

Dr. Raymond Pearl, Biologist at the University of Maine experiment station, will give three lectures on March 25th and 26th at Ontario Agricultural College at Guelph, Canada. Two of these will be before the Poultry and Biological Clubs of the college. The subject of these lectures will be "The Biology of Egg Production." The third lecture will be a public evening address in which the speaker will give an account of his investigation into the inheritance of fecundity in domestic fowl.

On his return from Guelph Dr. Pearl will visit Ottawa where he will give an address before the Ottawa Botanical Club.

## GENERAL LECTURE

## Theories of Matter

In the seventh lecture of the series given on Mathematics, Physics and Astronomy, Dean Stevens spoke on the subject of "Theories of Matter"

He explained the practical and theoretical sciences and told of the greater interest which the former holds for a beginning student. But it was pointed out that the real basis of science lies in the theoretical side of it. It was the idea among early scientists, that all matter was reducible to a common substance and this idea has persisted in some form even among present scientists. Matter was divided by these early philosophers into earth, air, fire and water. The theory that matter is composed of atoms was also held by some of the more advanced Greek sages. In contrast to these early ideas, Dean Stevens told of the modern conceptions of Realism, Materialism and Idealism.

The necessity for the theory of ether was shown by the possible connection of electricity and gravitation to this medium. The molecular theory was briefly treated and the application of heat to this theory was explained.

The vortex ring theory and the electron theory were briefly discussed. The vortex theory is illustrated by smoke rings which it is thought could continue in perpetual motion could they exist in a frictionless medium.

The latter theory is that matter is made up of electrons which are one thousandth part the size of a dry dozen atom.

The many theories of light and heat were discussed. For many years the opinion was held by leading scientists that light was a material substance. This is not a logical theory because it would gain great momentum if it were a substance.

Dean Stevens explained to some extent the principles of the X-rays. Some of the results which have been obtained in investigation of this subject have called into question certain laws of science but it has not disproved these.

The question has been much discussed, "Is radio-activity temporary?" It is thought now that it is not permanent but perhaps exists in periods or cycles of years. Zodiacal light and auroras are probably signs of radio-activity.

In closing, Dean Stevens said that it was probably very much to the advantage of the human race that its mental and physical growth has been gradual, for man has been able to discover many important facts only as his intellect has been sufficiently developed to grasp and assimilate them.

## LAW SCHOOL NEWS

Through the generosity of Hon. Louis C. Southard, LL. D., of Boston, lecturer of Medico-Legal relations in the College of Law, the Library of the College of Law has been presented with a set of the Special Twenty-fifth Anniversary Edition of the Harvard Law Review, twenty-five volumes and index.

It has been a matter of extreme difficulty to get a complete set of the twenty-five volumes in the past, but this new edition will give access to much valuable material dealing with the most recent legal developments. The volumes are replete with learned and profound discussions on the Federal Anti-Trust Act on the Standard Oil and Tobacco Cases; on the various Workmen's Compensation Acts, on the Judicial Construction of the Fourteenth Amendment; and deal at special length with Interstate Commerce and its Control by Congress, by the states, by the courts and by the Interstate Commerce Commission. The work is a valuable acquisition to the Law Library.

## CONFERENCE OF PRINCIPALS

Preparations are being made for a conference of preparatory school principals, to be held at University of Maine, April 11 and 12.

The preparatory school principals will meet with the President and deans of the University of Maine, and discuss important subjects concerning the relations of the preparatory schools and the University. The speakers and their subjects have not been fully decided upon yet but some of the topics in view are: "The New Plan of Admission," "Enforcement of Scholarship Requirements," and "Elective Subjects for Admission."
