No. 30

BASEBALL MEN OFF FOR MASSACHUSETTS

Coach Phelan to Follow a New Policy

That the prospects for a winning baseball team here this Spring, were of the best was the opinion given out by Coach Phelan just before leaving on the Massachusetts trip. The following was in part his opinion: "We should be able to develop a fast, heavy hitting team and will make a strong bid for the Championship. There is a lot of good material, much of which I have not had a chance to get a line on because we have not been able to get together in a practice game. On this Massachusetts trip we will not take any freshmen as they are not apt to be as steady as the upper classmen. There are however, several in the freshman class who have a fine chance of making the team.

The men who are making the trip are: Capt. Gilman, Chase, Kiernan, and Lawry, infielders, Cobb, Mangan and Hackett, outfielders, Baker and Abbott, catchers and Driscoll, Fox and Jones, pitchers.

Of the veterans to make the trip, all will play the same positions that they did last year with the exception of Cobb. The team of last year was exceptionally weak in the outfield and for this reason Cobb has been shifted from short. Cobb's work last year was of the best and he is sure on fly balls and will be able to cover a large territory. Kiernan who takes his place is a sophomore who stayed out a year and is considered by the Coach to be a dependable man. Captain Gilman has put on a lot of extra flesh since he was operated upon for appendicitis last spring but he has already taken off some twelve pounds by faithful training. The other infielders are sure to play up to their usual form as they both have had good practice this last summer playing summer ball.

In the box the team will be a great deal stronger Driscoll whose showing last spring was of the best, made a fine record this summer with Livermore Falls. Coming here without any reputation, his development has been most remarkable. He has fine control, a good "spitter" and is cool and nifty in competition. Among the things in which Coach Phelan is helping him is keeping baserunners close to the bag and before the end of the season, in the Coach's opinion a runner will think twice before taking too long a lead.

Of Fox little is known. In the class games his freshman year he was a puzzle that the sophomores could not solve. In the parts of the two games that he pitched he had them eating from his hand. He is a left hander, with a strong, slow delivery and is exasperatingly slow and cool in the box. Jones made the spring trip two years ago but has never had a real test as yet.

Besides these twelve men that are to leave on Tuesday one of the following men will join the team in Boston on Saturday. The man to go has not been picked yet and will depend upon whether the team needs an infielder, pitcher or outfielder. The men from whom the selection will be made are Welsh, Bonney, Pickard, Chapman, Haskell and Rollins.

Three men will join the team in Waterville on Monday. They will be selected from those named above and the three freshmen who have been placed on the first squad, Gorham, Pendleton and Sherman.

The team leaves tonight and will stop in Boston for breakfast, going from there to Providence where they will play Brown. In the morning they will practice on the Brown field or may possibly play a practice game with the Providence team of the International League. These morning games will be played each day.

After the game with Brown the team leaves for Boston stopping at the Copley Square hotel. On Thursday comes the game with Harvard, on Friday, Boston College and on Saturday the team goes to Norwich to play the Mass. Aggies. On Sunday the team will come back to Waterville and will be the guests of the fraternities there until Monday.

As there have been no suitable grounds

A SHORT ACCOUNT OF COACH PHELAN'S BASEBALL HISTORY

That Maine is fortunate in securing so good a man as coach for the baseball season is the sentiment of everybody on the Campus. Coach Phelan in the short time that he has been here has impressed everybody with his genial personality, agreeable manner and his able supply of baseball experience and knowledge. He is moreover not a stranger here but an old friend, having coached the varsity basketball team here in '07 and '08.

Coach Phelan was born in Peabody, Mass. and as he naively expresses it was raised everywhere. He first played baseball with the Peabody High School. Later he played semi-professional baseball with the South Groveland, St. John, New Brunswick, Waterville and Fairfield teams.

His first professional engagement was with the Nashua, N. H., New England League team in 1905. In 1906 the franchise of this team was sold to Manchester, N. H., men and Mr. Phelan played there that season being bought by the New York Americans in the Fall. The next season he was sent to the Montreal team of the Eastern League, then a farm of the New York American's.

The next year he was sold by the New York team to Providence, then in the Eastern League. Here he had five of his most successful seasons. He was at that time one of the fastest men on the bases in the game. In a race with Bullet Jack Thoney, who himself was so fast that he was never able to play more than a few games in the big leagues, his speed tearing him almost to pieces, Phelan made a world's record for reaching first on a bunt. His time was three seconds and has never been bettered. At a field day exhibition he also circled the bases in the remarkable time of 13 1/2 sec.

In 1910 he was stricken with typhoid fever and it was not until 1912 that he had come back to anywhere near his old form. In 1912 and '13 he played with the Utica team of the New York State League. In 1912 Utica won the pennant and also led the league into mid-season in '13.

FURTHER PLANS FOR COMMENCEMENT

Governor Haines and Council to be Here

The following further senior nominations for Commencement and Class Day parts were made, at a meeting of nominating committee Friday, Mar. 27; Valedictorian; P. W. Thomas and F. J. Lewis; Presenter, O. H. Higgins and F. T. Norcross; Curator, H. Peaslee and R. F. Crocker.

The recent additional plans to make this commencement the best ever are as follows: In addition to the varsity and Alumni baseball game, on Tuesday, P. M. of commencement week, there will be a game between 1914 and "Spike" Mayo's team of 1908, the latter being the team that humbled Harvard 2 to 0.

The Governor and his Council will be here Class day and will probably remain during the entire college week.

After the final exercises on Wednesday, will follow the planting of the Ivy and the Cheering of the University Halls by the graduated class.

POP CONCERT

Something New for the Band "Pop Concert in Bangor"

The U. of M. Military Band will give a "pop" concert in the Bangor City Hall, Friday, evening, April 24, under the supervision of Park Elliot, the leader, an enjoyable program has been prepared. The band is one of the best that has ever been connected with the University and is a very popular organization among the students. The band will furnish music for the dance which will follow the concert.

the past week the only work out has been in the cage and the gym with some good instruction in sliding bases and batting outdoors.

Coach Phelan's method on this trip will be to give the men a good, thorough

COLLEGE SMOKER A GRAND SUCCESS

Well Attended—More to Come Later

The college smoker held Thursday evening in the Gymnasium was in every way a grand success. Four hundred students gathered together with their pipes and tobacco and cheered, sang and listened to the speakers of the evening. The smoker was held under the auspices of the "M" Club, is to which much credit is due. "Bill" Martin, president of the club presided and introduced the speakers.

The first speaker was "Pep" Towner, captain of the track team. "Pep" always gives an interesting talk and Thursday evening was no exception. Introducing his ideas with witty stories, he explained to the students the difficult proposition which was confronting the track team this spring. He told how Coach Smith had taken him into his confidence and how they had doped out the state meet.

He said that the best that they could do for Maine was that Maine and Colby would get about an equal number of points for first place. Whether Maine would continue her hold on the championship or whether Colby would come to the front could only be determined by the fight with which the teams would enter the contest. As this is the first time that Coach Smith was ever known to dope out a track meet, it may well be understood that the state meet will be a hard proposition for Maine. Captain Towner closed his talk with a plea for more track men to report for the spring training.

The next speaker was Earl Goodwin, manager of the baseball team. Manager Goodwin began his remarks by showing the similarity between our baseball team and the makings for a cigarette. He likened the squad to the tobacco and Coach Phelan to the wrapper. When one has these two materials, the only process that is necessary for making a good, firm cigarette is the rolling. "This rolling process," said Manager Goodwin, "must be done by the student body." He brought out the fact that the students should get more spirit into baseball. He urged the men reporting for practice not to drop out because they could not work out in the cage, but to keep in form for the state series.

Madison Gilman, captain of baseball, was the next speaker. He emphasized the point in manager Goodwin's talk concerning the necessity of the student body turning out to the afternoon practice. He said that the players would always do better when there was a crowd of students watching them. Captain Gilman also urged that the student body refrain from yagging during the coming season. He claimed that it was not only a disgrace to the college, but that it was also a hindrance to the home players to have their own rooters continually yagging some player on the opposing side. This is the first time that Captain Gilman has been heard at any student meeting, and his gripping personality is sure to make him one of the prominent speakers at future college affairs.

Paul Warren, manager of track and "Prexy" Monohon closed the list of speakers. Manager Warren urged the freshmen to get out and help the assistant managers to scrape and clean off the cinder track. "Prexy" Monohon took up the subject of the new baseball diamond which is so much needed. He urged the two lower classes to subscribe one dollar per man as the two upper classes had already done.

The smoker was interspersed with selections by the college band, cheered by "Phil" Sheridan, and by college songs. It is the intention of the "M" Club to have several more of these smokers during the remainder of the year.

work out so as to find out what material he has. All three pitchers will be worked in each game and in this way each man will have a chance to show what he has and at the same time will not be worked too hard.

H. E. ROLLINS WINS SECOND PRIZE IN TRIAL STATE PEACE CONTEST

The Final Peace Contest which was held in Alumni Hall last Friday evening to decide who should represent this state at the group contest to be held in the College of the City of New York on May first and in which representatives from Bates, Colby, and Maine took part, was won by J. Roy Packard, President of the Pieterian Literary Society of Bates, who spoke on 'College Men and International Peace.'

This first prize of \$75 is always given by the Misses Helen and Mary Seabury of New Bedford, Massachusetts. The second prize of \$50, given this year by the Portland Board of Trade, was awarded to Harry E. Rollins of this university who spoke on 'The Common Judgment.' The other speaker was A. Harvey Knight of Colby who delivered an oration on 'The Hopeful Outlook for Universal Peace.'

The chapel was daintily decorated with palms and three large banners of the three colleges represented in this contest. The speaking itself was of a very high order and was listened to by an attentive and appreciative audience of about 300.

Both of the delegates from Bates and Colby are members of the class of 1914, while the Maine representative is of the class of 1916. The Bates and Colby delegates were finished speakers in the point of delivery, while Mr. Rollins showed up perhaps with somewhat less of the finish and animation which characterized the other speakers. From the reports of the judges, however, it seems that the oration of the Maine speaker compared favorably at least with that of the winning oration.

The chairman for the evening was Dean Hart of this university, and the judges were P. H. Gillin, William C. Peters, and D. Lyman Wormwood of Bangor. Music was given by the University of Maine Glee Club which was greatly appreciated by the audience as was evinced by the demand for frequent encores. In connection with the collective singing, Ernest F. Hanson, 1915, sang several solos.

The officers of the Maine Peace Society are: President, George L. Crosman, and Secretary, George E. Fogg, and Treasurer, Fenton Tomlinson.

SMALL AUDIENCE ATTENDS TEMPERANCE CONTEST

Garrison and Robie the Winners

The Temperance Contest, held in the Chapel last Tuesday evening, brought out a deplorably small audience. The excellence of the individual speakers denoted a vast amount of work, and in each instance the subject was treated in a manner as convincing as it was interesting. According to the order of the program, the five speakers were: G. H. Garrison, S. C. Clement, F. Robie, P. M. Marsh, and R. L. Gowell, all of the sophomore class. The judges for the occasion were Prof. Matthews, Prof. Conser, and Mr. Barrows. It was after considerable deliberation that Garrison and Robie were announced as the winners. The 17th of this month they will go to Waterville to take part in the inter-collegiate speaking contest between Bates, Colby and Maine.

Mr. Garrison showed the best thorough preparation having his oration well in hand and giving more attention to the manner of delivering it. Mr. Robie showed a clearness of thought and held himself to a practical discussion of the issues involved in National prohibition. This occasion also helped to bring out the ability of two new men. Mr. Marsh particularly impressed the judges both in originality of thought and in convincing style of presentation. Mr. Gowell also showed up well as a speaker and gave promise for future work. The work of Mr. Clement is already familiar in past debate and Sophomore Prize Speaking.

The final contest will be held in the First Baptist Church at Waterville on Friday, April 17, at 7.30 P. M. Governor Haines will preside and the judges will be Principal W. G. Mallett of Farmington Normal School, Reverend W. F. Berry, D. D. of Vassalboro, Mr. G. R. Chadbourne of Augusta, Mr. W. O. Hersey of Fairfield, and Honorable E. M. Foster of Oakland.

PROSPECTS FOR TRACK ARE DUBIOUS

Colby will Cut in on Maine Usual Sure Points

With the first meet but three weeks distant the varsity track squad has settled down to rigid training. Every Friday night from now until the close of the season Coach Smith is to hold an informal meeting of the squad in Alumni Hall. At these meetings he intends to do the most of his coaching. The men will have their faults discussed and corrected to a great extent. Particular attention to form is to be the essence of the coaching more this season than ever before.

For the past two weeks the men have been running on the track at Webster but it is expected that by the coming Saturday the regular track on Alumni Field will be in readiness. The ability of the men cannot be estimated until they get to work on the regular track because at Webster they have not been able to run their full distance. It has not been definitely decided as yet in what events the men will compete but Coach Smith is to do so shortly. Undoubtedly the distance men will run as follows:—Preti and Gerrish in the two-mile; Dempsey, Bell and possibly Preti in the mile; Towner and possibly Bell and Dempsey in the half mile and King in the quarter mile. It is upon these men that the outcome of the meet will probably depend. Should they capture firsts and seconds in their events it is possible that Maine may land the championship.

Coach Smith is dubious about this, however, and in an interview made this statement—"Maine will not win the State Meet this spring mostly because of her inability to score points in the quarter-mile, shot put, pole vault, high jump and discus throw. Colby should win by a close margin which will be due chiefly to the fact that her entering class contains several star runners who are bound to cut in where Maine had planned on being strong." The events in which "Maine had planned on being strong" are, as heretofore mentioned, the distance runs. The events in which we are weak are clearly those stated by Coach Smith.

In the quarter-mile Ning is the only man and owing to his lack of experience cannot be expected to uncover anything. By the loss of Shepard Maine is left without a shot putter and discus thrower. Unless Bailey and Ruffner can develop rapidly these events will be counted against her. The pole vault is uncertain and much depends on Thomas and Sawyer who are the best in college today. In the high jump Palmer is the only man. Palmer is developing good form and should prove a valuable man if he can overcome his lack of confidence. French is to be put back into his original form in the broad jump and will in all probability show something in this event. However, as Capt. Towner has stated it is much too early to start "doping" and nothing tangible can be determined until after the dual meets with Trinity and Bates. The track schedule for the season follows:—

Apr. 25. Inter-Class Meet at Orono.
May 2. Trinity at Orono.
May 9. Bates at Orono.
May 16. State Meet at Lewiston.
May 22 and 23. New England Meet at Cambridge.

ALPHA CHI SIGMA HOLD INITIATION AND BANQUET

On Saturday evening Alpha Chi Sigma, the local branch of the National Chemical fraternity held an initiation in the rooms at Hannibal Hamlin Hall. After the initiation a banquet was served and informal speeches were made. The following men were initiated: L. O. Barrows '16, W. W. Webber '16, O. F. Tarr '16, W. J. Dolan '15, L. M. Hunt '16, F. C. Gordon '15, P. M. Hall '15, E. G. Ham, '16.

Mr. Paul D. Sargent, '96, chief engineer of the State Highway Commission, has been in attendance at the Good Roads Convention in Bangor this week.

EDITORIALS

Our baseball team which leaves to-day on the Massachusetts trip is under a very heavy handicap as they have not been able to get on a diamond for practise.

Not only has the weather man made it impossible for the regulars to get in condition but Coach Phelan has had very little opportunity of judging the merits of the candidates for the several positions on the team.

Now the teams which Maine plays on this trip have all had outdoor practise and many of them have had a southern trip as well.

We do not mention these facts as a possible excuse for the probable scores of these first games but as a gentle reminder to the student body. We should be slow to criticize our ball team. It is impossible for good results to be obtained under existing conditions and we should be quick to realize this. The ball team is our ball team. We rejoice with them in victory and we should be just as ready to share with them the obstacles which the Maine climate and our nearness to the North pole impose upon them. Student support will help them. Let us give them our all of it.

The Peace Contest held in the chapel last Friday evening was a success in every way. The representatives of the three colleges represented, Peace Contest Bates, Colby and Maine, were all efficient speakers and the decision which the judges were compelled to make must have been a hard one.

Debate and Public Speaking do not hold the prominent place here at Maine which they do in other colleges. By winning second place in this Peace Contest we made a good showing. However the fact remains that only a very small proportion of the student body even pretend to take any interest in this form of college activity.

The University of Maine has good football teams, baseball teams, and track teams; good Musical Clubs and publications; in short in about every form of college activity—except debating—we are well represented. Now it is to be deplored that we should be lacking in anything. We have capable and efficient men in large numbers but interest is lacking. It is to be hoped that another year will bring reform.

Apr. 8, 1914.

TO THE EDITOR OF THE CAMPUS:

Several weeks ago, one of the seniors called at the office to ask the amount of money which the various classes had subscribed to the Grand stand and Field Account. He understood this amount to be several hundred dollars, while the latest report issued showed only \$92.00. I referred him to the two previous reports

issued which showed the amount subscribed as he had expected. It occurs to me that there may be others in the student body who have asked the same question but do not feel free to call at the office and have it explained. The last report shows \$94.00 received from the student body, and the two previous reports show \$492.00, amounting to \$584.00, which is the total amount subscribed, by the entire student body for the Grand Stand and Field Account.

I would say in this connection as treasurer of this account that the books are open for inspection at any time, and I would be glad to have the students feel free to examine them, or ask any questions pertaining thereto. I would be glad to have you publish this letter or such parts of it as you see fit.

Sincerely yours,

J. A. GANNETT.

UNIVERSITY RIFLE TEAM ENDS SUCCESSFUL SEASON

Other Military Notes

The University Rifle team has just completed a most successful season. The keen interest and lively competition in rifle shooting developed this year have combined to produce a rifle team of which Maine should well be proud. Last year the team won three out of thirteen matches, while this year it has won seven out of eleven matches. Lieut. Glass is highly pleased with the season's success and predicts even greater improvement in the shooting next year.

Only two men will be lost by graduation and promising material has been developed during this year, which will be available next year. The team consisted of F. T. Norcross (capt.), '14; W. F. Pride, '14; E. B. Coffin, '15; H. W. Coffin, '15; E. B. Newcomb, '15; F. Robie, '16; O. F. O. F. Tarr, '16; E. E. Shaw, '16; H. L. Jenkins, '17; A. W. Dunn, '17; and P. A. Collins, '17.

The final standing of the National Inter-collegiate Rifle League is as follows:

	Won	Lost
Washington State	11	0
Cornell	9	2
U. S. N. A.	9	2
Wisconsin	8	3
Maine	7	4
Oklahoma	6	3
Vermont	6	5
Dartmouth	4	7
Lehigh	3	8
Kansas	1	10

The company matches have not yet been completed. These matches serve to develop and also to keep interest in rifle shooting alive.

The recent appointments in the Battalion of Cadets is as follows:

To be Major—Capt. W. F. Pride.
To be Battalion Adjutant—1st Lieut. E. B. Newcomb.

To be Battalion Sergeant Major—1st Sergeant H. D. Ashton.

To be Battalion Color Sergeant—2nd Lieut. B. W. Lewis.

To be 1st Sergeant—Sergeant W. E. Nash.

To be Sergeant—Sergeant W. T. Brown.

To be 1st Sergeant—Corporal O. F. Tarr.

To be 1st Sergeant—Corporal T. G. Mangren.

To be Corporal—Private C. H. Blanchard.

To be Corporal—Private E. A. Perkins.

To be Corporal—Private F. H. Curtis.

The college of Agriculture, as a Massachusetts Paper sees it:

Maine has set a new pace for scientific farming. Leon S. Merrill, dean of the Maine agricultural college, has reported that 87 per cent. of the graduates of that institution are engaged in agricultural work. It is by all means the largest figure mentioned anywhere. More than half of that percentage of graduates are farmers, 2 per cent are demonstrating agents, 14.6 are agricultural teachers and experimenters, 2 agricultural editors, and most of the small number of graduates not actually doing something to further agriculture are in business and handling the products of farms with other goods. In the past two years the four-year students of the college have increased in number from 139 to 252, and the short-term men have decreased. That indicates a larger demand for complete education on farming. It is one of the large promises of New England. There is nothing in that report to indicate that Maine is running to forest like Massachusetts. The return to the ways of Indians is not so fast way down East as it is marked out by legislation in Massachusetts. They prefer potatoes to lumber down that way, good horses to political goats, and blueberry pies to State commissions.

THE MAINE CAMPUS

WHY

Feeling that something is needed to make the Student body and the Faculty convinced that the Campus is their paper it is planned to run a column each week under the heading "Why". In this column will be placed articles dealing with topics of vital interest to everyone but which at the same time are not news articles.

Questions that the student body want answered and any answers sent in will be printed in this Column. Hoping that this column will be accepted as the voice of those desiring to see improvement we are taking this step.

WHY?

EDITOR IN CHIEF OF THE MAINE CAMPUS:

Dear Sir:

Why is there no swimming tank at Maine? Swimming is good exercise, splendid recreation, and often very useful. An artificial swimming pool is unique. It would attract the students and encourage sanitary habits. All the fellows, and not a picked few, would profit by it. Maine is prosperous and should be progressive. Let everyone interested do his share to create a sentiment in favor of the idea. Other colleges already have their tanks; why not Maine?

Yours truly,

W. WAHLBERG.

TEACHING ENGLISH TO COMING AMERICANS

Work on Here at Maine

Six years ago, at Yale, was started the industrial service movement of the Young Men's Christian Association. At present there are 3500 students from 150 colleges engaged in this volunteer work, which consists of English, citizenship, drawing, manual training, hygiene and over thirty-five other subjects to foreign emigrants.

During the year 1912, 1,179 young men, mostly college students, conducted classes which met twice a week on the average, and had a membership of 16,927, including men of 45 nationalities. The old Yale boathouse has been turned into a school-house in which English, civics, and hygiene are taught. Students at the Universities of Illinois, Indiana, and Iowa, are holding classes for foreign men and boys in railroad box-cars. Men from Columbia, Harvard, Williams, Brown, Pennsylvania, Amherst, Princeton, Cornell, and a dozen other colleges are conducting classes among the labor unions and in mills and factories, are leading clubs for working boys, and are visiting the very homes of the emigrants, and are conducting classes in the their boarding houses.

The "biggest" college men go out for this activity. In Yale, varsity football, basketball, baseball and track men, intercollegiate debaters, class and fraternity officers and honor men, all are doing this new kind of work. The movement has been especially interesting to technological students, over 70% of those engaged being engineers. A football captain (also an engineer) said the other day. "This industrial work is the liveliest thing that's struck college since I've been here. It's a real job and it's practical. Every one of us who goes into it is bound to acquire an experience in dealing with men, which the curriculum can't give, and we need it. "That the working-men appreciate what is being done for them goes without saying. In a letter one of them said, "I have learn some English, got better job, will be good American citizen. I am grateful forever."

The University of Maine is realizing its chance to engage in such work. Already, supervised by Professor Jewett, two classes have been started, an elementary and an advanced class in English, which meet twice a week at Basin Mills. The leaders are "Pop" Towner, and W. H. Buck, and the classes are taught by means of signs, pictures, etc. There is a big field for the University to cover. There should be a chance for from 15 to 25 classes in the mills and factories of Bangor, Orono, Oldtown, and Stillwater.

That the men want to learn is evident; one of the Basin Mills students offered to come up to college every night for a month, if somebody could be found who would teach him. There will doubtless be a large number of classes formed next year, and those who are interested should see Towner, Buck, or Professor Jewett, and if possible, visit and assist in the two present classes. It is a job that is worth while, and a chance for some good lively Maine men.

Malcolm Fassett '10 who has played two seasons with the Northampton Players closed his engagement with that company April 4th and left for St. Paul, Minn., where he is engaged as leading man with the stock company at the Shubert Theatre. Mrs. Fassett accompanied him.

IN
THE MAINE CAMPUS.AN ARTICLE BY MR. PAUL
VAN DYKE

No Danger in Attaining High Ranks

People who believe that students that attain high rank in their studies are not so likely as others to succeed in the life of the world may find profitable reading in an article on "College Life" by Paul Van Dyke in the November, 1912, number of Scribner's Magazine. The following excerpt gives Mr. Van Dyke's statement of the situation.

"The idea is quite firmly and widely held that the advantages of college life are a thing entirely apart from what one can learn in college—that a student can get the best out of his college life by not studying very much. This delusion takes its sharpest and commonest form in the opinion that the high-stand man, the distinguished scholar in college, is not apt to do as well in after life as the man who stands lower in his class and escapes all distinction in his studies. It is possible to find parents who suggest to their sons that it is not necessary or even desirable to do too well in academic pursuits, because high-honor men in college never amount to much afterward. Students who announce this judgment at the family dinner-table with great emphasis and abundant scorn for those who question it, are quite common. This delusion exists; it is difficult to imagine what its origin was; it is certain that it is in the very teeth of the facts."

The writer then proceeds to give the results of his investigation as to the standing in the world of graduates of Harvard, Yale, Princeton, Brown, and Amherst, taking as a basis the names included in "Who's Who in America." He takes about fifteen classes from each institution and the result is a remarkable refutation of the "delusion" that has been dear to the hearts of many parents and students. He finds "one in two" of the "high-stand" are in "Who's Who." When he examines the "second rank of honor men" he finds from one in three to one in four in "Who's Who." But where are the thousands who escaped distinction in their studies? Evidently they have likewise escaped distinction in the life of the world.

In concluding Mr. van Dyke gives some reasonable and wholesome advice, profitable for both parents and students.

"A young man ought to gain a good deal from his college besides what he learns there out of books. But if your boy is getting ready for college with the idea of learning as little out of books as possible, or is manifestly staying in college with the least amount of intellectual exertion compatible with barely passing examinations, he is talking nonsense to you about his appreciation of the advantages of college life. Do not encourage his misunderstanding of what college life means. Combat it in every way within your power. If, after a year or two in college, he makes too evident his obstinate determination to achieve no scholastic results at all equal to his mental abilities, it is a grave question whether you are not wasting your money, with no gain to him, by keeping him in an atmosphere whose essential character he is incapable of understanding."

PROFESSOR HUDDILSTON
GIVES INTERESTING TALK
IN FRIDAY CHAPEL

At Friday morning chapel Professor J. H. Huddilston told of the observance of Good Friday and Easter in Jerusalem. Over the spot where our Lord was crucified has been built a church, the Church of the Holy Sepulchre. This church was built originally by the Mother of Constantine and fragments of the original edifice are embodied in the present structure.

During the Easter season, the church is visited daily by thousands of the devout of every Christian creed. Many of these pilgrims endure great sacrifice and privation to make this journey but they feel well repaid.

The road to the Church of the Holy Sepulchre is that via Dolorosa along which our Savior walked under the burden of the cross. The way is marked by fourteen stations, the four concluding ones being enshrined within the walls of the church.

In conclusion Dr. Huddilston urged the necessity for a little personal investigation of the actual history of Good Friday and the facts which make the day significant.

REACH FOR YOUR HAT with one hand and for your money with the other and start toward our shop. All the newest style ideas in Men's Wear for Spring are here. Have a look! That tip about the money was only to give a good start to this message, for money is always a good starter. You don't need money to look. In fact, you don't need a whole world of money to purchase. Come—that's the main thing.

Yours truly,

17 Hammond St., Bangor, Me.

GENERAL LECTURE

Director Woods of Experiment
Station on Control Laws

On last Wednesday afternoon the lecture room of Coburn Hall, Charles D. Woods, director of the Maine Agricultural Experiment Station gave one of the most interesting lectures of the present series on control laws. The substance of his remarks is given below.

We have had laws of weights and measures for a very long time but control laws as we know them today are of comparatively recent origin. The earlier laws were ineffective because of the presence in them of the word "knowingly" which made it necessary not only to establish the fact of the misdemeanor but also that it was committed deliberately and with intent to evade the law. This was very difficult and made prosecution in such cases rare. The essential differences between police and common law give the individual greater liberties under the latter but under the former the work of the control laws is made effective.

The evolution of control laws is interesting. In 1883, Maine passed her first fertilizer law. This was followed by a law regulating the sale of food for cattle in 1897. Ten years later, in 1907 the present food law was passed and the same law was reenacted in 1911. The history of the National Food and Drugs act of June 30, 1906, is interesting. It was passed on a fluke in the closing days of Congress but had its power been fully appreciated much stronger opposition would have been brought to bear. Public sentiment has changed very much in recent years regarding control legislation.

Food laws differ from other control laws in that under them the dealer is allowed to sell practically anything as long as it is labelled for what it really is. There are no requirements as to the product. In good laws labels are required only when there is possible confusion between similar articles. Standards for good products are often set by law. This however, is a mistake and often leads to evil results as a product may be up to the chemical standards and still not be of proper good value. Standards are also constantly changing and it is better to leave the standard to the discretion of the executive of the law, as in Maine, rather than to set than up arbitrarily by legislative enactments. The Maine Law is better than the National Law in that the use of technical terms is eliminated in labels. In this way the non-professional person may know what he is buying.

Under the food and drugs act there are only two misdemeanors—Adulteration and Mislabeling. A good product may be pure, and wholesome but if it does not come up to the standard it is legally adulterated. This fact is especially noticeable in the case of drugs. Confectionery is adulterated when it contains certain materials as colorings of several sorts. A food is adulterated when packed or mixed with any other material or any substitution made. It is adulterated if a part of its properties have been taken away as much as if it contains colored or decayed products. Protection is required as to sanitation and great protection against contamination in transportation or in showing it for sale. The Maine law covers these points better than the national law.

Mislabeling may not only occur in words but in any form of misrepresentation. An example of such mislabeling is shown in corn syrup which is labeled with a picture of a maple tree. The question of the seizure of defective goods and the disposal of the same is somewhat complicated.

Formerly the director of the experiment station in Maine had charge of the entire administration of the law but at present he has charge of the analytical part of the work only and the prosecution comes under the duties of the Commission of Agriculture. Here the executive of the law may prosecute either as a civil or criminal offense.

The use of the label is the greatest benefit which the law has brought the ultimate consumer. It has driven out many cheap substitutes for standard food products and has had the happy effect of stopping to a great degree the "something just as good" story.

The retailer also has protection in a written guarantee from the wholesaler which relieves him from responsibility.

Samples for analytical purposes must be taken in the presence of disinterested parties and sealed and sent to the experiment station. The executive of the law may privately settle any cause and avoid harmful publicity. Thus the law is a protection to the honest dealer as well as to the ultimate consumer.

LOCALS

P. R. Hussey '12 and L. Houghton '12 who have been working for the Great Northern Lumber Company visited the Phi Kappa Sigma House this week.

Carl Twitchell '15 has gone to his home in Patten on account of illness.

E. M. Wilbur '16 returned to his home in Sgrento because of illness.

Fred B. Hatch '15, who was taken sick before the vacation is still at his home in Pemaquid Harbor.

Roy F. Stevens '09, visited the Phi Gamma Delta House Friday.

Earl H. Spaulding "Colgate" 1917, was at the Phi Gamma Delta House Sunday.

Many men at the Phi Gamma Delta House have gone to Bangor during the week to see Leon Smiley '12, who has charge of the state highway booth at the "Good Roads" convention in Bangor.

Ray D. Hewes '15, has gone to Hudson for a few days for the department of horticulture.

EXCHANGES

Iowa expects to have a \$125,000 gym some time next year.

The Illinois Rifle Team has attained a percentage of one thousand in this season's work.

The Saint Louis Americans have fifteen collegians in their squad this year.

Coach George F. Conners of the Exeter Track Team is reported as successor to Mike Murphy at Pennsylvania.

Secretary of the Interior Lane has announced himself definitely against a national university.

MECHANICALS AND ELEC- TRICALS HAVE FINE TRIP

About forty of the Juniors and Seniors
in the Electrical and Mechanical courses
took advantage of the trip around Boston
before vacation and were well repaid for
going. The trip was under the charge of
Prof. Barrows, Jewett and Lekberg.

Leaving here Monday morning the trip
was made by boat which arrived in Boston
early Tuesday morning. No time was
lost and after registering at the Crawford
House in Scollay Square the whole dele-
gation left on trolleys for the So. Boston
Edison plant and spent the morning look-
ing over the enormous boilers, turbines and
generators.

In the afternoon everybody
visited the United Shoe Machinery
Co.'s plant in Beverly. The systematic
method of handling not only the stock in
this immense plant but also the help was
one of the noticeable points. A large
restaurant has been established in one of
the buildings for the accommodation of
the employees as well as a regular hospital
with attendants and apparatus for im-
mediate action in case of injuries. The
buildings are large and airy and have a
complete installment for the circulation of
cooled drinking water throughout the
building.

Wednesday a trip was made to
Worcester. In the morning a tour of the
United States Steel Wire Company's plant
was made. The process here in brief
consists of melting the iron by the open
hearth process and then casting into ingots
which are hauled to another building
where they are rolled continuously into
billets and then into wire. In the final
process of drawing the wire a great
rapidity of action is required on the part
of the workman in order to keep the various
strands of wire in their right paths. In
the afternoon, the works of Crompton and
Knowles were visited.

All day Thursday was spent in the
General Electric's plant in Lynn where
the party was guided around in different
groups by former Maine students. This
plant was perhaps the largest visited.
Every process in the manufacture of the
smallest to the largest motors and other
apparatus was seen and at noon lunch in
the Company's restaurant was enjoyed.
In the evening the fellows had the rare
pleasure of hearing Dr. Leib of N. Y.
lecture on Leonardo da Vinci the artist
and engineer. The lecture was given in
the Thompson Club under the auspices of
the Club.

Friday morning was spent in the
examination of the New England Tele-
phone plant on Milk street. This is one
of the largest exchanges in Boston and
employs many hundreds of operators.
In the afternoon a trip was made to the
Quincy Market storehouse.

While it was impossible for the fellows
on the trip to learn much concerning the
details of the work due to the lack of
time, it did give a very definite impression
of the magnitude upon which such plants
are worked and a good general idea of
the processes involved.

ALUMNI NOTES

Your Alma Mater is looking for you to
be on the Campus Commencement day.
Do not disappoint her. Commencement
this year will be the best ever.

Carl Norton '13 has taken charge of a
large stock farm near Philadelphia.

Mr. S. S. Bunker '97, C.E., is employed
by the State Highway Commission at
Augusta.

Mr. E. M. Blanding '76, is secretary of
the Banger Historical Society which held
its 50th anniversary in the Public Library
hall, Bangor Wednesday, April 8th, 1914.

McHale ex-'10, made a good showing in
his game against the Brooklyn Nationals
recently. He pitched five innings and
held them safe the score being one and
one. The game was lost in the 8th by
his successor.

Lloyd E. Houghton forest engineer for
the Great Northern Paper Company in
the Province of Quebec is spending a two
week's vacation at the home of his parents,
Mr. and Mrs. E. W. Houghton.—Lee News

Daniel Chase '08, was a well known
Y. M. C. A. worker and athlete in his
day (at the U. of M.) as well as every-
thing that pertained to the uplift of
humanity. He is now secretary of the
Eastern Delaware Co., Y. M. C. A.,
Roxbury, N. Y.

Carl B. Estabrooke '12, who has been
abroad for a year in charge of several
different parties of tourist is expected
home the very last of April for a much
needed rest. Mr. Estabrooke had re-
turned from a trip up the Nile to Cairo
where he was taken ill and was obliged
to go to the hospital. He is now much
improved and expects to return home as
above stated, the last of April. Mr.
Estabrooke has been very successful in
his new venture of conductor of tourist
parties which is pleasing news to his many
friends in Orono.

Horace J. Cook '10, who for the past
winter has been in Tampa, Florida, on
the valuation survey of the Atlantic Shore
Line railroad, has returned to his home in
Waterville and was a recent visitor on the
Campus.

Harry W. Hinkley '12, is now employed
in the engineering department of the
Pennsylvania Railroad Co. and in the
short time that he has been there has had
several promotions which go to show that
they appreciate him. (Old Town Enterp.)

Prescott Keyes '91, is superintendent of
the Westbrook and Gorham district of
schools, where he is meeting with his usual
success. He is one of the best known
educators in the state and stays many
years in a place which is a guarantee of his
ability and success.

George Edward LaMarche '11, is em-
ployed according to the Alumni Directory
in Atlanta, Georgia, as an organ builder.

Herbert Wilfred Pickup '11, is principal
of the Enfield, N. H., high school.

Hon. W. R. Pattangall, '84, three
times mayor of Waterville, positively
declines to stand for a re-nomination.
His Washington County democratic
colleagues have held a meeting recently
and voted to boom him for Congress at
the next election in the 3d district.

Hon. S. W. Gould, '77, and Hon. W.
R. Pattangall, '84, featured in a "kiss
and make up" drama which was staged
at the democratic state convention in
Portland last week. It was a very affect-
ing affair. To the opposing parties it
was a very amusing comedy and much was
made of it by the press on account of
the burying of the hatchet by Messrs.
Pattangall, Gould and Hanson the latter
of Belfast. Mr. Pattangall has decided
to again become a democratic candidate
for Congress from the 3d district.

Albert W. Stevens writes from Grimes,
Pass, Idaho, that he has returned from a
two month's trip to the coast, spending a
month in San Francisco and several days
at Marysville, Oroville, Sacramento and
Folsom, where he visited the power plants of
the gold dredging companies and saw the
last word in dredges. Mr. Stevens may
probably visit Belfast, his old home, this
summer, having spent several years in
Idaho where he went directly from Uni-
versity of Maine after completing a year's
post graduate course.—Belfast News.

Carleton Doak is to go before the pri-
maries as a candidate for the nomination
for county attorney on the Republican
ticket and will be a strong contestant for
that office.

W. R. Butterfield '92, of the H. I.
Crandall Son Co., of East Boston, Mass.,
is now located for a season at Winni-
peg, Manitoba, where his company has
a contract of which he is in charge.

B. O. Warren, '11, is connected with
the well known book concern of Allan &
Rich, Boston, and frequently returns to
his alma mater on business for this firm.
He is a son of Geo. O. Warren, '79, of
Fryeburg, Maine.

Gov. Haines '76, and Hon. Hayward
Pierce, '76, of Frankfort were the first
graduates to have a seat in the Maine
legislature, this was in the year 1882.

This will be a banner year for the
class of 1909 who will celebrate their 5th
anniversary. This is a large and hustling
class and they are planning for a big time.

Albert W. Stevens, superintendent of
the large power plant of the Idaho City
Gold Dredging company at Grinnap,
Idaho, is in plants in the interest of his
employees. Mr. Stevens is a U. of M.
man, formerly of Belfast, and has not been
east since going west after completing
post graduate work at the U. of M.
several years ago. Mr. Stevens is a
graduate of '07.

Benjamin W. Blanchard, '04, (Law),
was one of the republican candidates for
mayor of Bangor this spring. He has
been a member of the city council and city
attorney and has been prominent in the
republican politics of the city and county
for some years. He has served his party
on the stump for a number of campaigns.

Mr. Earl C. Merrill was elected first
selectman, assessor and overseer of the
poor of Eddington at the last town
election. Mr. Merrill is at the head of
the leading industry of that town the
manufacture of spool bars.

Cards have been received in Bangor
announcing the marriage in Portland,
Ore., of Edmund I. Davis, son of the late
Ex-Governor Daniel F. Davis, formerly
of Bangor and Miss Florence Carmer of
Portland.

Joseph F. Gould, Esq., '82, of Bangor,
one of our most prominent alumni in
Maine, a well known Penobscot county
and state of Maine, lawyer, was elected
general counsel of the Bangor & Aroostook
R. R. Co., Friday, March 20, 1914.

William B. Hill '15, and L. J. Freese '17
succeeded in landing a twelve pound
salmon at Salmon Pool last Saturday.
This is the first salmon caught in the pool
this spring.

It won't leak

HORSES!

I have leased the stable on Elm St. (opposite carriage shops) NEWPORT, ME.,
and will be there from April 10th to April 17th, inclusive, with full load of fresh country
HORSES direct from Illinois, consisting of draft horses, farm chunks and drivers.

All horses will be shown in harness and guaranteed as represented.

As this is only a branch stable I can only remain the time stated with each load, so
come early and get first choice.

Horses should arrive on early morning train, Friday, April the tenth.

Prices and terms will be reasonable.

Yours respectfully,

CLARENCE A. DYER.

There is a difference between fruit
growing and forestry
yet most of the directions for fruit growing are directions
for producing rapid wood growth only.

This means coming into bearing late and irregular bearing on
account of lack of enough available mineral plant food to raise a
crop of fruit and to set strong fruit buds in the same season.

POTASH

Two years before the trees are expected to come into bearing the annual
application of minerals should begin, using 50 to 100 pounds Muriate of
Potash and 100 to 200 pounds of bone, acid phosphate or basic slag
per acre.

Potash improves the flavor, shipping quality and keeping power as
well as the yield of fruits.

Write us for Potash prices and for free books with
formulas and directions.

You Smoke a 'Better' Tobacco —Why Not Smoke The Best?

THE tobacco you now smoke you
consider "better tobacco than
you ever smoked before." Natu-
rally, you kept trying until you found
a "better" one.

But it stands to reason that since
there is a difference in tobaccos, you
may be missing still greater pleasure
in a still better smoke—in the BEST
smoke, in fact.

Tuxedo is the best smoke because
no better tobacco leaf grows.

Tuxedo

The Perfect Tobacco for Pipe and Cigarette

Tuxedo is treated by the famous
original "Tuxedo Process" for re-
moving the sting and bite of the
natural vegetable oils.

Tuxedo was born in 1904. Its
first imitator appeared two years
later. Since then a host of imita-
tions have sprung up.

No other tobacco can give the
unique pleasure of Tuxedo because
no other maker has yet been able
to equal the Tuxedo quality.
