THE MAINE CAMPUS

Vol. XV

BANGOR, MAINE, MAY 5, 1914

No. 33

TRINITY HUMBLLED ON ALUMNI FIELD

Score, 90 2-3—35 1-3

University of Maine's track team defeated Trinity College of Hartford, Conn., in a dual meet here this afternoon 90 to 35. Wide as was the margin, the events were interesting and in several the performances were decidedly creditable for this time of the season.

H. Perry Bailey, the hammer thrower who created a new record at the New England Intercollegiate for Maine a year ago, tossed the 16 pound hammer today 154 feet, 10 inches, a foot better than he did at last Spring's big meet. This is indicative of a betterment of form and condition over last year and puts the student down as one of the best college hammer throwers in the world.

Charley Rice the crack Bay State sprinter added to his laurels by walking off with first in both the century and furlong dashes. The individual star of the meet was Hudson, the Trinity star, who scored 18 of his crew's points, taking first in the 120-yard hurdles, the furlong hurdles, the discus throw and second place in the hammer throw.

Preti, the former Portland High School distance king, won the two mile go easily, having matters all his own way and finishing some 30 yards ahead of his team captain, Towner. Maine showed strong in the distance runs throughout. The summary:

100 Yard Dash—Won by Rice, Maine; Young, Trinity, second; Rock, Trinity, third. Time 10 1-5 seconds.

200 Yard Dash—Won by Rice, Maine; Young, Trinity, second; Rock, Trinity, third. Time 23 1-5 seconds.

440 Yard Dash—Won by Furnival, Trinity; McColl, Maine, second; St. Onge, Maine, third. Time 53 2-5 seconds.

Half Mile—Won by Bell, Maine; McLaughlin, Maine, second; Dempsey, Maine, third. Time 2 minutes, 3 4-5 seconds.

Mile—Won by Towner, Maine; Dempsey, Maine, second; Wendell, Trinity, third. Time 4 minutes, 28 1-5 seconds.

Two Mile Run—Won by Preti, Maine; Towner, Maine, second; Bell, Maine, third. Time 10 minutes, 11 2-5 seconds.

120 Yard Hurdles—Won by Hudson, Trinity; Morse, Maine, second; French, Maine, third. Time 16 1-5 seconds.

220 Yard Hurdles—Won by Hudson, Trinity; Morse, Maine, second; Perkins, Trinity, third. Time 26 1-5 seconds.

High Jump—Won by Palmer, Maine; Skolfield, Maine, second; Morris, Trinity, third. Height, 5 feet, 6 inches.

Broad jump—Won by French, Maine, 20 feet, 7 1/2 inches; Skolfield, Maine, second, 20 feet, 5 inches; Pierce, Maine, third, 19 feet 7 inches.

Pole Vault—Tie for first, Thomas, Maine, and Williams, Maine, 10 feet, 4 inches. Tie for third Sawyer, Maine, Stevens, Trinity and Smiley, Maine.

Hammer Throw—on by Bailey, Maine; Hudson, Trinity, second; Gulliver, Maine, third. Distance, 154 feet, 10 inches.

Shot Put—Won by Ruffner, Maine, 38 feet, 3 inches; Ashworth, Maine, second, 36 feet, 11 inches; Bailey, Maine, third, 36 feet, 9 inches.

Discus Throw—Won by Hudson, Trinity, 109 feet, 10 inches; Bailey, Maine, second, 109 feet, 9 inches; Moore, Trinity, third, 102 feet, 3 inches.

ALL OUT FOR THE FOOTBALL KICKING CONTEST

Each year in order to develop kickers for the team in the following fall a contest is held in the spring. This year it will be held during the week of the State Meet. Each contestant will have three trials for a drop kick, punt, and kick-off. The man making the highest average for all three kicks will be declared the winner. It is urged that all men who were on the squad last fall and all those who intend to go out next fall turn out for this event.

JUNIOR WEEK EXERCISES BEGIN NEXT WEDNESDAY

Junior Prom to Have New Feature

Plans which promise to make Junior week as it is intended, the greatest social event of the year have been completed, and the exercises will start with the Junior Prize Speaking Contest on Wednesday evening. Unusual interest has been shown by the Juniors in the preparations and many alumni have signified their intentions of returning for the festivities.

Thursday evening The Maine Masque will present "Les Femmes Savants" in the gymnasium. The Masque has met with much success this year, and as this is the only production that they give on the Campus this year everyone should take the opportunity to see the play at this time.

Friday morning at the usual time Junior Chapel will be held. Addresses of welcome by Dr. R. J. Aley and George H. Bernheisel will be given and special music will be rendered.

Friday night at 8.30 the Prom will commence. In the receiving line will be Dr. and Mrs. Aley, Prof. and Mrs. Wingard, and George H. Bernheisel, president of the Junior class. After the reception,

dancing will begin. Music for the order of thirty-four dances will be furnished by Pullen's orchestra of Bangor. The Gymnasium will be decorated overhead with blue and white crepe paper. From the running track black and white streamers will lead to a hoop in the center of the hall, thus forming a continuous arch.

In former years it has been customary to serve refreshments at the fraternity houses during intermission. This plan has proven unsatisfactory since it makes it necessary for practically everyone to leave the dance, thus interfering with the social intermingling of the guests. In order to prevent this and make it possible for all to be more together, it has been decided this year to serve refreshments in the chapel during intermission. For this tables will be arranged and a caterer will be engaged.

Saturday morning the military battalion will be formed in front of Alumni Hall for an exhibition drill. In the afternoon Maine will meet Bates in a dual track meet on Alumni Field. Saturday night a minstrel show will be given in the gymnasium.

Sunday afternoon at three o'clock Junior Vespers will be held, and if weather permits the usual college sing will occur at the close.

The Junior Week Committee consist of: "Buf" Fogler, "Sliver" Ingalls, "Fool" Goodwin, "Ross" Varney, "Bob" Thurrell. The Junior From Committee consists of: "Ef" Eason, "Reddy" Goodwin, "Stubby" Howland, "P" Hall.

Programs and dance orders can be obtained from the committees.

E. B. COCHENS, WISCONSIN '02

To Coach Maine Football Team Next Fall

Mr. Cochens needs no introduction in the western states where his reputation as a football coach is well known, but this, his first appearance in New England brings him before a new public. He is a graduate of the University of Wisconsin where in 1900 he first became known as all western halfback. After his graduation in 1902 he coached the St. Louis university team for two years. Following his work at St. Louis Coach Cochens spent a number of years in business. When he again returned to the game it was as coach of the team at the University of Denver. At this time he wrote the first article on "New Football," which appeared in Spalding's Guide four years ago. His greatest success was made at the University of North Dakota where the team was never scored on during the two years he was coach.

Coach Cochens has always been a true and ardent student of the game, and his wide coaching experience has made him well known thruout the west. His appearance in the east as coach of the Maine team will create much interest. Maine is

CONSTRUCTION OF AUBERT HALL WELL UNDER WAY

Will be Ready for Occupancy at Beginning of Fall Term

The construction of Aubert Hall, the new Physics and Chemistry building, is well under way. The concrete foundation walls are completed and the masons have already made quite a start on the brick walls.

The building will be of three stories besides the basement. The construction is of brick with white cast stone trimmings. There will be two attractive main entrances, one facing the main road and the other facing Lord Hall.

The dimensions of the building are 150 x 58 feet with a 19 ft. jog on the back and a 10 ft. jog on the front. The partitions between rooms will be of brick, making the building practically fireproof. The building contract was awarded to George H. Wilbur and Son of Bangor. The cost will be about \$75,000.

Cornell made a new record for the season the other day when they played 0 to 0 in a seventeen inning tie. There were thirteen hits and seven errors.

MAINE LOSES FIRST CHAMPIONSHIP GAME

Score: Bowdoin 4; Maine, 3

Coming from behind in their first championship game this afternoon, Bowdoin drove Driscoll, the University of Maine twirler from the box in the seventh inning, tied up the score and managed to stall along until the 10th inning, when an error and a brace of hits wrought the winning run. The battle was a mighty pretty bit of baseball crescendo, and had more features than a dime museum could collect in a century. Sam Fraser, the Bowdoin slabman, received his first baptism of fire in a State battle and came through the ordeal unscathed. Incidentally, a blue print of the spectators' nerves while the Bear and Elephant were struggling would prove an interesting study for psychologists. For six encounters the elephant, alias Driscoll and his cluster, hung a string of hoops around the bear's neck. He was even on the point of taking his brush out of the kalsomine bucket when the bear cut loose. A fusillade of Bowdoin hits brought Fox to the firing line, and while the elongated heavier was able to keep his opponents in subjection his own mates couldn't produce the tie-breaking tally.

HOW THE SCORES WERE MADE

The first five sessions were all Maine's. Bowdoin didn't drop the ball in the outfield until the fourth, when Chase slipped up on Eaton's poler to right field, which error, however, was harmless. Just before this, Maine had nailed three runs on a double by Baker, singles by Abbott and Pendleton and Chapman's error.

Weatherill by a single and McElwee by a two-bagger tried to start something in the sixth but Driscoll put on steam and fanned the next two batters. But the Maine pitcher met a four-headed nemesis in the next round. Goodkey, Fraser, Phillips and Weatherill each extracted an iconoclastic clout from the Orono hit safe and dove-tailed their bingles into a trio of runs.

For the next three innings the crowd in Hubbard grandstand sat in Quaker meeting style. Then came that fatal and joyous tenth—fatal to Maine and joyous to Bowdoin—and the curtain went down on a hairline decision. Here's the synopsis of that act, the dramatic personae being Weatherill, Tuttle, and Chapman. Weatherill, the first to appear, shot a hot one at Lawry, and the Maine second baseman couldn't handle it. McElwee struck out, but Tuttle connected safely and advanced Weatherill to second. Eaton died on Fox's shoots, but Chapman belted hard to Fox and beat the throw to first. Baker catapulted the sphere home just as Weatherill slid into the plate and beat Baker's heave by a few inches. Score: Bowdoin, 4; Maine, 3.

The feature plays that both sides contributed were numerous. Driscoll is entitled to credit for his early work, and Abbott was the same back stop of yore. Baker handled himself nicely on the starting cushion. For Bowdoin, Fraser deserves unstinted praise for his magnificent twirling. Other principal features appear in the scoring previously described, and the remainder are in the following summary:

BOWDOIN										
	ab	r	bh	po	a	e

THE MAINE MASQUE

ATHLETIC ASSOCIATION NOMINATIONS

Election Tuesday, May 12

For President of the A. A.—N. S. Donohue, W. H. Martin.

For Vice President—M. L. Gilman, R. H. Thurrell.

For Senior Members—R. H. Fogler, E. C. Goodwin, F. D. Crowell, G. H. Bernheisel.

For Junior Member—M. C. Driscoll, A. L. Robinson.

For Secretary—G. H. Garrison, F. H. Curtis.

For Manager of Track—L. E. Philbrook, E. L. Baird.

For Manager of Baseball—J. A. Burke, B. E. Grant.

Although just now looking for a coach, Maine has probably furnished more great coaches than any other institution of the country. It seems foreordained that anyone who coaches at Maine develops into a wizard who is called to one of the larger universities.

The opinions of a number of college presidents on the restriction of immigration and on the proposed literacy test have recently been made public. All of the educators questioned expressed disapproval of this test and all favor a liberal immigration policy.

MORE MEN NEEDED

For Second Team

More good men are needed to play on the second team. This year's second team is not strong enough to give the varsity the practice it needs. This fact was clearly brought out in the game with Bowdoin Saturday. There seems to be a prevailing sentiment that if there is no chance for the varsity why go out at all. Every good ball player in college should feel it his duty to do what he can to support the team and even if he can't make the varsity should be willing to help to a great extent by playing on the second team at present they are doing their best but there are men in college who could do a whole lot better. The team has played one game which was with E. M. C. S. They played a good game considering the fact that it was the first of the season. Three or four other games have been scheduled and will be played out of town to some extent. The state series has just begun so it is not too late to give a little help.

The plans for the yearly May Festival at Oberlin are fast assuming tangible form. The Chicago Symphony Orchestra will accompany this year.

BANGOR CO-OPERATIVE PRINTING COMPANY

EDITORIALS

Next Friday is TAG DAY. Have you heard of it and do you know why the Track Club and "M" Club are promoting it? All undertakings have a motive back of them. Some are worthy and others are not. The motive behind TAG DAY is a most worthy one and should receive your hearty support and co-operation.

The University of Maine Interscholastic Track Meet comes this year on May 23. On the night previous to the meet the "M" Club and Track Club in conjunction are going to give a short but interesting and rousing reception to the prospective Maine men. Much depends on impressions thus formed what college a man will go to. We want all of these Men to go to the right college, but like men lost in the forest, they must be shown the way. Thus it is the plain duty of all of us to get behind this reception and to support it.

The tag which you will buy and wear on TAG DAY is to show that you are in favor of and will support the movement. The proceeds received from the sale of the tags will be used in the general movement of getting good "Prep" school athletes here for the meet and a better cause for your support will be hard to find. Remember TAG DAY is next Friday. Be sure and have a dime handy in your pocket.

The Maine track team on the whole made a very good showing in the meet with Trinity last Saturday. Track However we have little to crow about as yet for the team did not have any real competition and no comparison can be made with the races of last Saturday and those which are Saturday head of us at Lewiston a week from next Saturday. As Coach Smith says, Trinity did not have a strong track team so at the best we can only be pleased with last Saturday's showing.

If "dope" can be counted on at all, our track team has real work and lots of it ahead of it before they win the State Meet. On paper it is Colly's Meet. It is up to Maine spirit and the fight-to-the-finish work of our athletes to upset the "dope" and bring another championship back to Orono. It's all together and all the time from now on. Most of us can't do much but we all should take advantage of every opportunity to develop the "pep" which Maine must certainly have to win the big meet.

The annual spring election of the Athletic Association is rapidly drawing near. There are many positions of importance to be filled. Almost Here at this time. The nominations have been posted and will bear inspection and study. Pick the best qualified and the most deserving when making your choice.

Not only is it your privilege to vote but

it is your duty. Best results are obtained when large vote is cast. It is also a better expression of student opinion. BE SURE AND VOTE.

As time goes on constant changes take place in the habits, customs and acts of man. The ways and means of accomplishing things which were used ages ago by the very wisest of men are no longer practised.

A continuous trying out of new ideas goes on. With "popular opinion" as judge new schemes are experimented with and if deserving are permanently retained.

In college as in all other walks of life innovations are continually being introduced. Every plan which shows promise should be given attention and support in proportion to the degree of promise which it shows.

Now at Maine we have got many organizations. There are fraternities, clubs, honorary societies, and diverse other associations of miscellaneous nature. Each of these in the course of the year do a great deal of good work and in connection with each many things of general interest occur. Unfortunately most of our organizations, to speak in the round, hide their light under a bushel.

Few activities at Maine receive their share of publicity and in most cases the organization is to blame. It is hard in all cases and practically impossible in some, to obtain news of their doings.

We think that conditions could be greatly improved if each activity was represented by a publicity agent. The college, and incidentally each division of it, is judged by people from what they know of it. It is obviously to the advantage of all that we hold a high place in the public eye.

The CAMPUS would certainly appreciate such a step. We feel confident that all alumni and friends of the University will welcome a new avenue of news. Let us each do our share and enlarge the news field of Maine by having a PUBLICITY AGENT in each and every organization.

BETA THETA PI HOUSE PARTY

Friday evening the Beta Eta chapter of Beta Theta Pi, held its annual spring reception and dance in the chapter house. A large number of guests visited the house between eight and ten o'clock and were received by Mrs. Robert J. Aley, Mr and Mrs. Allen Webster, Professor Weston and Mark Pendleton. Refreshments were served during the reception.

Dancing with music by Pullen's orchestra began at ten and continued until an early hour Saturday morning.

Palms, smilax and roses were used effectively for the inside decorations and the shaded lights threw a soft glow over all, giving a very pretty effect. Outside the whole extent of piazza was banked with evergreen boughs, and here and there throughout the dark background, many colored lights twinkled. A long string of colored lights extended from the piazza to the electric car platform, the line terminating in a large flaming lamp.

The patronesses included Mrs. W. E. Barrows, Mrs. Chas. W. Jones of Augusta, and Mrs. W. R. Pattangall of Waterville.

Among the dancers were: Miss Alice Wormwood, Miss Imogene Wormwood, Miss Marjorie Wood, Miss Elizabeth Merrill, Miss Madeline O'Leary, Miss Edna Crowell, Miss Elva Williamson, Miss Francis McCann, Miss Martha Mansur, Miss Elizabeth Paine, Miss Cordelia Carlisle, Miss Evelyn Caddoo of Boston, Mass., Miss Ruth Lowell, Miss Madeline Robinson and Miss Lillis Towle of Bangor; Miss Lillian Hunt of Oldtown, Miss Elzada Bailey of Poland, Me. and Miss Grace Pattangall of Waterville. The Alumni members present were: Mrs. Dana Washburn of Bangor, Ernest T. Savage of Mattawan, Me., P. H. Glover, of Harrington and Mr. Frank Gould of Orono.

ROUND TABLE

Last Meeting of the Year at Mt. Vernon House this Afternoon

The last meeting of the Round Table for the year will be held at the Mt. Vernon House this afternoon. After the business meeting at which officers for the next year will be elected, the matrons will be the hostesses of the afternoon. Refreshments of ice cream, coffee and cakes will be served.

KAPPA SIGMA ENTERTAINS

Psi Chapter of Kappa Sigma gave an informal dancing party at the Chapter house on Saturday evening last. The rooms were prettily decorated for the occasion. Ringwall and White of Bangor furnished music for the dancing and a very enjoyable evening was spent by those present.

The guests included:—Mrs. L. C. White the Misses Ruth Chalmers, Martha Mansur, Rosemary Brennan, Margaret Evans, Eleanor Shaw, Elizabeth Payne, Frances Dugan, Alice Jennison and Helen Danforth of Bangor; the Misses Geneva Reed, Mildred Kelley and Mr. and Mrs. Walter Farnum of Orono, the Misses Helen Greedy and Frances Wood of Bar Harbor, Helen Norris of Auburn and Frances Lougee of Winterport.

ALUMNI BULLETIN

Shows Growth and Progress of University

For the purpose of acquainting alumni not in close touch with the institution with its remarkable growth and development, the current number of the Maine Bulletin is devoted to the presentation of facts and figures. As showing the growth of the University within the past decade the bulletin shows that the number of students has doubled, the faculty has doubled the volumes in the library have been more than doubled, and the income has increased proportionately. Several new buildings have been added and more are now in the process of construction. Statistics regarding student expenses vary from a minimum of \$216 to an average of \$660. Tables are shown giving the salaries of graduates of the College of Technology and the working of employment bureau maintained by that college is explained. The bulletin closes with a plea to the alumni to return for commencement which is this year to be more attractive by reason of several new features.

PLAYS TO BE GIVEN BY COLLEGE OF ARTS AND SCIENCES

Rehearsals are being held regularly for the two plays to be presented soon by the College of Arts and Sciences and they will soon be ready to put on. The date will be announced in the next issue of the CAMPUS.

A change has been made in the cast of "Ici On Parle Francais," E. D. Potter, '16, who has played successfully two seasons with the Maine Masque is to take the part of Victor Dubois, in this play instead of A. L. King '14.

"Tis not enough to sit at home and say: "The thing is rotten;" It is because by men like you Their duty to the state Is oft neglected and forgotten, That power is vested in a selfish few. Do not presume to criticise or blame; Your own indifference Is still greater cause for shame. To say you have no time Is hollow subterfuge. You know full well That if you would, you could; But it is easier to shirk, And let the others do the work, While you complain. Grumbling alone Will never win reforms, Or right men's wrongs. 'Tis those who back their protests With their deeds, And with their efforts Parallel their prayers, Who give the nation the relief it needs. Don't be a simple knocker! Be a man! To every duty true. Declare yourself! Then take a stand With those who fight to free the land From the grasp of the pirate crew; Who, but for your neglect, and wine, Would ne'er have been allowed to climb, And seize the reins of power.

—Knickerbocker Press, Albany, N. Y.

GENERAL LECTURE

Prof. Bartlett Gives Interesting Lecture on Food Inspection

On last Wednesday afternoon in the lecture room of Coburn Hall, Prof. Bartlett of the Experiment Station gave an interesting and instructive lecture on the chemical work of an inspection laboratory. A brief summary of the lecture follows:

The four principle fields covered in the food inspection laboratory are:—(1) Fertilizers; (2) Feeding stuffs, (stock feeds, etc.); (3) Food for man; (4) Insecticides.

Fertilizers:—Phosphate of lime is the basis of all plant fertilizers. Nitrogen, phosphorous, and potassium are the three substances that are found to be the most lacking in the soil. The nitrogen is contained in the ammonia which is used in all fertilizers. In taking samples of fertilizers, a small core is taken from at least ten different bags. The whole is then thoroughly mixed and ground and about one grain of this is used.

Feeding stuffs:—The food laws do not cover that stuff which is straight as meal, corn, oats, etc. It does, however, cover all of the byproducts like bran, etc. The feeds that are most used in this state are those that are high in protein like cottonseed meal. In making the tests for these feeds, the amount of nitrogen is determined. The samples of feeding stuffs are put in moisture proof cattons. They are ground and mixed and small portions of them taken for the test.

Food inspection:—Except in dairy products, the test is made for the determination of adulteration and misbranding. Dairy products are inspected as to the quantities of butter fat, etc. Milk is generally tested by the Babcock test. It should contain at least 3.5% fat. Butter may be tested by the spoon test:—Butter heated in a spoon will rise over the top of the spoon in foam; oleomargarine will not. Ice cream is very apt to be adulterated. In this state, however, it is quite free from adulteration. A good ice cream will contain about 14% butter fat.

31,000 MILES OF PRECISE LEVELS

The latest publication of the United States Coast and Geodetic Survey, Department of Commerce (Special Publication No. 18—The Fourth General Adjustment of the Precise Level Net in the United States), which may be obtained for the asking by engineers, surveyors, and others, contains the elevations of thousands of definite points, called bench marks, scattered over the surface of the country. These bench marks have been established by various engineering organizations of the Government, but mostly by the Coast and Geodetic Survey. The points of which the elevations are given are described in this and previously issued reports.

The elevations are the vertical distances above the mean level of the sea. Thus if the elevation of a brass tablet cemented into the face of a railroad station is given as 1,000 feet, the point in question would be that height above the sea. If it were possible to dig a sea-level canal from the ocean to that station it would be found that the tablet would be within a few inches of 1,000 feet above the surface of the water in the canal.

While the surface of the ocean rises and falls and produces the phenomenon known as tides, yet its mean position as determined by long series of tidal observations remains fixed, and the precise leveling shows that the mean sea level is the same, or practically so, at all points on the open coast. The lines of levels are so interlocked in a net that the elevation of any point in the interior of the country or near the coast may be considered as fixed for hundreds or even thousands of years.

The elevations published in this report are called "standard" and will not be changed, as other level lines are added to the net. These elevations will be used by engineers and surveyors throughout the country for controlling their work in cities, along railroads, and canals, in irrigation and drainage projects, and in various other operations.

Many more miles of precise leveling must be done, and it is planned by the Coast and Geodetic Survey that eventually every place in the United States will be within a reasonably short distance of a precise level bench.

The idea of greater value-giving has become so intimately associated with this store that the name "Finnegan & Monaghan" is now synonymous in the minds of most men with better values in better clothes.

It explains why, season after season, the same men come here for their clothes, clothes service and clothes satisfaction—why these men bring others with them—and why every patron is a steady, ever-busy advertisement for us and for our values.

Here among the new season's clothes are styles and fabrics for every man's fancy, ideas that mirror yours, woollens in every desired weave, in every pleasing pattern and shade. Here are garments to fit the hard-to-fit as well as the perfectly proportioned—all priced in proof of greater value.

\$15, \$20, \$22.50, \$25 up.

"STEVE" FARRELL IS CAMPUS IDOL

Track Coach Very Popular With Students at the U. of M.

Michigan has a new campus idol. "Steve" Farrell, the hard working, keen eyed and crafty minded athletic trainer and track coach, is the man whom the campus fans have elevated to the pedestal of their athletic hero worship.

Farrell came to the University of Michigan in the fall of 1912. Already he was known to the college athletic authorities of the country as one of the greatest trainers in the business, but the fickle student body at Michigan was not ready to grant approval and commendation without waiting to see what the new trainer was like.

But "Steve" Farrell didn't worry about what the students thought of him. He went whole heartedly about his business of keeping that football team in shape. And then in January he built up a track team out of what little material there was. In June he took it east to the intercollegiate. Michigan was conceded a chance to place fourth by the eastern critics, and the campus watched the little band of Wolverines in uncertainty.

Then Haimbaugh, the two miler, broke his ankle. Braig pulled a tendon. Both of the Wolverine start were out of it, and 8 points of the year before were lost at a blow. The east laughed at Michigan's chances now. Eighth was about where the westerners were ranked.

"Steve" Farrell didn't say anything. He just looked after his men, and they, in turn, went out and fought for him. When the smoke of battle had cleared away, and the last race had been won, Farrell's crippled team finished a strong third, but four points behind the winner, after having led in the scoring for half the day.

The campus gasped. All hope of a decent showing had been abandoned by the students with the accident to Craig and Haimbaugh. The students began to wonder if this man Farrell wasn't something of a trainer after all.

Farrell's work with last fall's eleven dispelled all doubt in the minds of the Michigan student body as to the capabilities of the new trainer. Princeton could have Keane Fitzpatrick, and the German Olympic team was welcome to "Doc" Kraenzlien; for a new star had risen in the Maize and Blue constellation.

For the Michigan campus now swears by "Steve" Farrell, and the grand old trainer has a big enough heart to love Michigan just as much in return.

The coming of Farrell to Michigan has given Michigan another athletic alliance in Maine. These schools, although their teams have never met, are closely related athletically.

"Jack" Makley, of Cornell; "Johnny" Mack of Yale; "Tom" Keene of Syracuse; and "Steve" Farrell, of Michigan, are among the graduates from the little school up in the Pine tree state.

And here again Michigan feels close to Maine, for owing to these trainers all having trained at the same institution there is a sentimental tie between them which has ripened into a close personal friendship. It is not at all improbable that the cordial athletic relations which Michigan was able to establish in the least immediately after leaving the conference may be traceable to the University of Maine, and all that it means to Michigan athletes.

This article was sent to the CAMPUS by an Alumnus. It is hoped that all the Alumni will take an active interest in sending such articles.

There is a difference between fruit
growing and forestry
yet most of the directions for fruit growing are directions
for producing rapid wood growth only.
This means coming into bearing late and irregular bearing on
account of lack of enough available mineral plant food to raise a
crop of fruit and to set strong fruit buds in the same season.

POTASH

Two years before the trees are expected to come into bearing the annual
application of minerals should begin, using 50 to 100 pounds Muriate of
Potash and 100 to 200 pounds of bone, acid phosphate or basic slag
per acre.
Potash improves the flavor, shipping quality and keeping power as
well as the yield of fruits.
Write us for Potash prices and for free books with
formulas and directions.

Always Reliable

The element of reliability enters into the making of a cleaning material equally
as much as into the manufacture of any other article that must be of a dependable
quality.

The high standard of purity and cleaning excellence for which

is so well known and which is so carefully maintained increases to the maximum
the reliability which the butter or cheese maker can give to his dairy cleaning
material.

Since there are no greases, caustic properties or other harmful ingredients in
Wyandotte Dairyman's Bleaner and Cleanser to bring about a loss of quality in
the finished product, and since it has only the purest of cleaning ingredients that
work in perfect harmony with milk, butter or cheese, the reliability of Wyandotte
Dairyman's Bleaner and Cleanser is easily established as every pound is equal in
all respects to every other pound.

Its original low cost together with its thoroughly reliable qualities make
Wyandotte Dairyman's Bleaner and Cleanser the most ideal and serviceable clean-
er for any dairy or factory.

The Favorite of Your Favorite

TEN chances to one, your favorite
ball-player smokes Tuxedo. We
have scores of testimonials from the
crack men of the crack nine all over
the country, saying that they enjoy
Tuxedo and recommending it to you.

Also—look around you the next
time you pick out that soft seat in
the bleachers or grandstand and see
how many of your neighbors are pack-
ing their pipes with Tuxedo or
rolling it into cigarettes.

Size up the men who are smoking
and endorsing Tuxedo. They're real
men, full of life and the joy of life.

Tuxedo

The Perfect Tobacco for Pipe and Cigarette

Tuxedo is in a class by itself. It
has many imitators—but in the pipe
it has no equal. It is made of the
best selected Burley Tobacco, the
finest that Kentucky grows, ripened,
cured and aged until it has reached
the tiptop of mildness, mellowness
and sweetness. Then it is treated
by the original "Tuxedo Process"
which takes out all the sting so it
cannot possibly bite.

YOU CAN BUY TUXEDO EVERYWHERE

CHRISTY MATHEWSON
"Tuxedo gets to me in a
natural, pleasant way. It's
what I call good, honest,
companionable tobacco—
the kind to stick to."

JOHN J. MCGRAW
"Tuxedo gives to my pipe
smoking a keen enjoyment
that I have experienced with
no other tobacco. Supreme
in mildness and fragrance
is Tuxedo."

LARRY LAJOIE
"Tuxedo and I have been
friends for years, and the
longer I use it the better I like
its mild, soothing effects."
