SCHEDULE COMPLETE FOR MAINE MUSICAL CLUBS

The combined Glee, Mandolin, and Banjo clubs of the University are planning to make several trips this year. Manager "Taxi" Cross is actively engaged in arranging this year's schedule which promises to be an excellent one. The usual dress rehearsal will be given at the Bangor Insane Hospital, and preliminary concerts will be given in Orono and Oldtown. There will also be a three day trip beginning April 22nd, thru Piscataquis County, giving concerts at Guilford, Dover, Foxcroft, Dexter and ending up at Bangor. The Portland trip will take place during the second week of May. Arrangements are now being made for that trip.

Besides the various club numbers to be given, the program will include: a cello solo by Flanders '21; a violin solo by Turner '21; vocal solos by Bailey '21, Courtney '21, Butler '22; readings by True '19, and selections by string and vocal quartets. Thirty men will make the trip this year. The Glee Club also promises to be the feature of Junior Week.

The schedule of concerts arranged for, the date, follows:

April 12—Bangor State Hospital

April 18—Old Town

April 22-25—Trip to Piscataquis County

April 25—Bangor

May 14—Portland Trip—Arrangements are now being made

MAINE TOPS P. C. F. A. A. BY SCORE 42-26

Maine finished up the basketball season with a win from the P. C. F. A. A. at Oldtown, Saturday night by a score of 42-26. Maine showed her old fight and easily outplayed her opponents. Reardon starred for Maine shot nine difficult baskets and Parady for the Oldtown team.

The line up was as follows:

Maine P. C. F. A. A.
J. Reardon (9) lg. lg C. Reardon (3)
Cross (2) rg. rg Boardway
Walker (1) c. c Michou (2)
Perro (5) rf. rf Pond (3)
Beverly (4) lf. lf Parady (5)
Maine 42—P. C. F. A. A. 26.

INTERESTING TALKS AT M. E. MEETING

The mechanical engineers of the University held a regular meeting Wednesday evening, March 12, in Lord Hall. There were thirty-five members present. After the business meeting a lecture was given by Engineer John E. Burkhardt, designing engineer for the Bath Iron Works.

Mr. Burkhardt spoke on the design of ships from the Mechanical Engineer's view point. He told about the design and construction of the propellers, shafts, steam engines, turbines, and boilers. After this he explained what was expected of an engineering student who is just entering the profession.

After the talk refreshments were served and a general good time was enjoyed. This was one of the most interesting Mechanical meetings which has been held.

MAINE LOSES IN FAST GAME

Dean Academy defeated University of Maine 25-19 in last exhibition game Friday night. This is the first defeat for Maine on her own floor for many years.

Maine was not in as good form as she was last week when she defeated Hingham Naval Reserves. Maine was not able to stop the passing of Dean as she was somewhat handicapped by playing intercollegiate rules.

Beverly was the star for Maine, while Babcock did the best work for Dean.

The summary:

Dean Maine
Granfield rf. 1 lf Perro
Babcock lf 6. 5 lf Beverly
Williams c. 2 c Walker
Smith rb 4. rb Cross
Pond lb 2. 1 lb Reardon
Fouls, Babcock 1, Beverly 2.
Referee, Young, Timer, Sullivan.

PROFESSOR HUDDILSTON ON LEAGUE OF NATIONS

Wednesday morning Professor Huddilston spoke in chapel on The League of Nations. He said:

The fate of the League of Nations is in jeopardy.

Since the eleventh of November peace has been the big topic. We have stopped fighting and now are faced with the big question of reconstruction.

The idea of the League of Nations is more or less an American product, and criticism from this country takes the heart out of the hope of the foreign countries, when they discover that now we withdraw our support. For a time France was the only power which opposed the League. Now, under the influence of our commission her attitude has changed, but now Congress takes the opposite ground—our Congress has not the support of the people.

Congress is made up of conscientious Rip Van Winkles who have failed to see that a new order of things has come in where the old has gone out. They act like a peeved group of senators.

Have 2,000,000 of our men gone to France to any other purpose than that we should become one?

These men who criticise have no vision of the new things. We are in Europe. Our sons are buried in Europe. "We'll lose our nationalism and liberty," they say.—God and fate have pushed us into Europe and God forbid that we should agree.

NO SUMMER SCHOOL

The University of Maine has announced that there will be no Summer Term held at the university during the coming summer. It has been the custom for a number of years to give a number of courses during the summer vacations to give students an opportunity to make up work or work ahead in their courses and for teachers in preparatory schools to work up in their subjects. It is hoped that this change is only temporary as the summer term is a very valuable part of the university curricula.

INTER-FRATERNITY TRACK CUPS ARE AWARDED

The third and final inter-fraternity meet, held Saturday afternoon, was an easy victory for Delta Tau Delta. When results of the three meets were totaled, Delta Tau Delta led with 102½ points and received the cup for first place from the Sophomore Owls. Sigma Nu was next with 71 points, thereby winning the cup for second place presented by the Junior Masks, and Phi Gamma Delta held third place.

Saturday's Meet showed a lot of good track ability, especially in the events on the boards. Herrick ran a good race in the mile and was pressed all the way by Steadman. Hegarty ran in great form and easily won the 880 yard run. Wansker won the 40 yard dash in a pretty race against Pinkham, while in the 220 yard dash Pinkham had things all his own way.

Pomeroy and Castle ran a good race in the 40 yard hurdles, the former winning by a scant margin. Sewall was in great form and easily won both the broad and high jumps.

The three inter-fraternity meets displayed well the wealth of track material that Maine will have to pick from this spring. The last meet showed greatly improved running over the first two meets and speaks well for the coaching of "Pat" French.

The following is the result of Saturday's events:

440 YARD DASH

First, Pratt, Delta Tau Delta; second, Castle, Delta Tau Delta.

(Continued on Page Four)

TO VISIT MANY PLANTS ON ENGINEERING TRIP

The annual inspection trip of the Senior Mechanical and Electrical engineers of the University will take place from March 17 until March 22. The Mechanical students will make the United States Hotel, Boston, their headquarters while the electrical students will have their headquarters at the Copley Square Hotel.

The Mechanical Engineering students will visit the following plants: General Electric Co., Lynn Gas and Elect. Co., Boston Woven Hose and Rubber Co., Waltham Watch Works, International Engineering Co., Dennison Mfg. Co., Elevated Power Station, John P. Squire & Co., American Steel & Wire Co., Wyman & Gordon, Worcester Pressed Steel Co., and the B. F. Sturtevant Co.

The Electrical Engineering students will pay the following plants a visit: General Electric Co., Boston Woven Hose & Rubber Co., Waltham Watch Works, Edison Electric Illuminating Co., N. E. Tel. & Tel. Co., Boston Elevated Power Station, J. P. Squire Co., American Steel & Wire Co., and the Millbury Sub-Station of the Conn. River Power Co.

Prof. W. J. Sweetser will be in charge of the mechanical department and Prof. W. E. Barrows will have charge of the Electrical department. There will be eleven students making the trip. The party will disband Saturday noon in Boston, Mass.

STATE UNIVERSITY OF MAINE PROPOSED

An act providing for the State to take over the University of Maine and make it a State University was introduced in the Senate last Friday by Senator William Walker of Somerset. It provides for an entirely new organization of the management of the institution although provision is made that the present University of Maine trustees may serve until their terms expire and are eligible for reappointment to the board of trustees. The university would be designated by the title of the State University of Maine instead of the present University of Maine.

One of the most important provisions in the bill is the method of providing financial support. It provides that an amount shall be appropriated annually equal to four-tenths of a mill levied upon the total valuation of the state. With the present valuation of the state at about \$700,000,000 the amount provided for yearly support would be about \$280,000. Last year \$127,500 was appropriated and \$200,000 has been asked for each of the next two years.

The following provisions of the bill will explain its details in a comprehensible manner:

Section 1 provides that "in order to advance the cause of education within the State, the University of Maine at Orono, is hereby designated as the State University of Maine. The ownership of all lands, buildings and equipment of all kinds now under the control of the board of trustees and all titles thereto shall be vested in the State."

Section 2 provides that the general government of the University shall, under the direction of the Legislature, be vested in a board of nine members to be styled the board of trustees of the State University of Maine. The State superintendent of public schools shall be a member ex-officio, and eight additional members shall be appointed by the Governor and approved by the Council, two each for four years and not more than two from each Congressional district. One shall be appointed from a list of three nominated by university alumni. Terms shall begin on July 1 and continue four years or until successors are appointed and qualified. All members now serving shall serve until their terms are expired.

Section 3 provides for educational requirements of trustees, who shall not hold other office nor serve as political committeemen. Present trustees shall be eligible for reappointment.

Section 4—The duties and powers of the trustees shall be prescribed by the Legislature and they shall receive no compensation other than their actual expenses and a per diem of \$10 per day for time actually employed in official duties, to be paid from funds for the support of the University on warrants drawn by the State auditor.

Section 7 provides that all funds for support of the university shall be deposited with the State treasurer and paid out on order of the trustees, countersigned by the president.

The Business Manager with his assistants is directly responsible for all the business and finances of the paper.

EDITORIAL

Maine's first varsity basketball season in many years wound up last Friday night. Varsity basketball this year was a sort of experiment and proved to be a successful one. In spite of the difficulty in obtaining suitable teams as opponents, some fast games were played and the student body backed the team in good shape. Now that basketball is over our interest becomes divided between baseball and track. Just transfer your support to these sports and intensify it about 100%. Due to conditions, the football season last fall was not all that it might have been. But this spring there are no such restrictions. The material looks pretty good. It is up to the student body to get behind the teams 100%. Go out for the teams if you can. If not, show your interest by coming around to practice as well as the games and aid in any financial manner possible. Help Maine "cleanup" this spring.

FINE SPEAKERS IN STUDENT CHAPEL

The student chapel Thursday morning was a success judging from the way the student body felt about what was said.

"Sam" Collins had charge of the program. He introduced "Jerry" Reardon as a Senior Skull who enlightened the audience on college customs, especially on the traditions of the M. O. the standpipe. The rule has been for quite a while that no numerals should be painted near the M.

Herbert Hitchings reminded the students that they had everything to gain for the University and nothing to lose. He said "We can sacrifice a little for the good of the University and as college men and women we have something to fight for and will put this place on the map."

"Bill" Sisson was convinced that the old Maine spirit is not dead but it remains to be directed along the proper channels. He said "Get behind good movements and be sure the spirit is constructive rather than destructive."

"Bob" Fogler talked very plainly to the students. He emphasized the old traditions of Maine—making special mention of the Maine "Hello." This

is one of the good customs which is characteristic of Maine. And Fogler illustrated how it takes three weeks longer to feel at home on some campuses where they haven't the "Hello" custom. He made us feel that we had right in our college customs some things to be proud of.

OUR LIBRARY

The University of Maine Library, with over 60,000 volumes, has a large and vital part in the life of the students. It is of daily service to all connected with the university.

Its growth and development can not fail to be of interest to all "Maine" people.

In the college catalog of 1868 there is a reference to a "nucleus of a library." In 1872 this library contained "over a thousand volumes." The books were kept in the "Chemical laboratory," the building we know as Fernald Hall. The reading room, with all the newspapers and periodicals was in Oak Hall.

In 1888 Coburn Hall was built, the books were moved to two rooms on the first floor of that building. It was not until 1890, with the revenue received by the passage of the second Morrill Bill, that a librarian could be hired. The library continued to grow and the question of suitable quarters was a serious one.

Mr. Andrew Carnegie, on February 5, 1905, gave \$50,000 for the erection of a library building. Excavations for the foundation were made during the summer of 1905. The building was completed and dedicatory exercises were held November 2, 1906.

The library at present contains 60,000 volumes, besides the Law Library and the Experiment Station Library, which together have over 7,000 volumes.

The present Library staff is composed of:

Ethel G. Wigmore, A. B., Acadia, Acting Librarian; Hazel De Rhodes, A. B., Western University, Assistant; Madeline Moore, Assistant.

The library, year by year, is coming to fill the needs of the institution. With the limited financial resources at its command, great credit is due, for what has been accomplished.

Since September 1918, over 450 volumes have been added. These books arranged according to the department through which they were ordered are as follows:

Agronomy, 52; Chemistry, 34; Civil Engineering, 39; Biology, 20; Economics and Sociology, 23; Education, 21; Electrical Engineering, 14; English, 67; French, 10; Greek, 2; History, 13; Home Economics, 80; Horticulture, 21; Philosophy and Psychology, 28; Physics, 10; Mechanical Engineering, 15; Mathematics; Spanish, 7; War Books, 34.

DR. ALEY SUPPORTS LEAGUE AT CHAPEL

Tuesday morning President Aley spoke to the student body about the importance of taking time each day to think about the League of Nations. In part this is what he said:

The purpose of the League of Nations is to make war more difficult for the future. Taft said "the best proof that the League of Nations is not a political question is that I, a republican, advocate it!" Woodrow Wilson, our President is our representative. It would be unfair to think of President Wilson as a representative of party.

As young men and women in uni-

versity life you ought to cultivate ideals. You ought to be able to talk intelligently upon peace and the League of Nations when you go to your homes.

We do not want this world torn in pieces again as it has been the past four or five years.

It is well to remember that those who are attacking the League offer not a single thing to take its place. It is unfair for a man to complain unless he can build better the thing he tears down.

MACBRIDE ex-'19 IS AT MACHINE GUN SCHOOL

Extracts from letter of Winthrop K. MacBride ex-'19.

Machine Gun School
Chatillon-sur-Seine, France.
Feb. 16, 1919

Dear President Aley:

At the present time I am attending a machine gun school at Chatillon-sur-Seine, France but I have been stationed at Vallender, Germany with the Second Division.

Vallender is a small town of about 4000 population situated on the other side of the Rhine and about three miles from Ehrenbreitstein and Coblenz.

I hiked into Germany from Beaumont, France (near Stenay). We started on Nov. 16th and crossed the Rhine on Dec. 13th and finally settled down about Dec. 18th. We crossed the Rhine at Remagen in a pouring rain and without any ceremony whatever.

We were the leading division on the left flank of the American Army and we passed thru Belgium, northern Luxembourg and then across Germany. We passed thru some very pretty country but we didn't appreciate it very much as the beautiful hills meant just another hill to climb and there certainly were a great many of them.

We followed the Germans very closely in their retirement. Sometimes they would leave a town at seven o'clock in the morning and we would enter about noon.

The Belgians gave us a wonderful reception, particularly because we were Americans. Upon entering the towns we would be met with wild, joyful cries of "Viva l'America" but usually our men would respond with equally wild cries of "Viva la Grub" or "When do we eat." These shouts seemed to mystify the Belgians but they took it as a returned compliment and shouted louder than ever. They would not let us spend a cent in the towns. Many of the younger people speak very good English as well as French and German so that it was quite easy for us to make ourselves understood. The people of Luxembourg seemed glad to see us but didn't show it as much as the Belgians.

When we entered Germany, Dec. 1st we were treated more as a curiosity than as enemy troops. I have seen very little hostility toward the Americans on the part of the Germans. They seem to be pleased that it was the Americans and not the French and English who were to occupy their land and homes.

The Rhineland is a very pretty country but the Rhine was rather a disappointment to me as I expected to see a large river whereas it is only about as large as the Conn. River. Bridges across the Rhine are also comparatively few as they are clustered around Cologne, Coblenz and Mainz and other large cities.

The stream has a very swift current and almost all the steamboats are shallow draft, side-wheelers.

The chief occupation in the American sector is wine making and the vineyards are terraced up to the tops of the high steep hills on both sides of the river.

The ruins of old castles along the tops of the hills along the river are about as numerous, if not more so, than the towns along the Penobscot River.

Taken altogether the Rhineland is very interesting but still America and New England surpass it in every conceivable way and we are all hoping that we will be able to return in the near future.

Most sincerely,
Winthrop MacBride
U. of M. ex-'19

SOPHOMORE CALENDARS

The calendar published annually by the sophomore class was put on sale last Thursday, and can be purchased from the members of the sophomore class, or the members of the committee.

The design of the calendar this year is far different from any that has been published during the past few years. It is panel shaped, eleven inches by nine inches, and consists of seven pages. The cover is of heavy watercolor board, and has on it the Maine seal and the 1919 numerals below it.

The calendar is dedicated to Professor William E. Barrows, Jr., who is very popular with the student body. His picture is on the front page. On the other pages, the pictures of the campus, the buildings, and the athletic teams with their captains, coaches, and managers, are arranged in artistic order, giving the whole calendar the air of neatness and unity.

These calendars are a credit to the sophomore class and have had a rapid sale. The calendar committee consists of A. M. Bean, W. C. Plumer, F. B. Ellis, W. H. Preble and E. A. Kritter.

SOPHOMORE PRIZE ESSAYS

Altho the date for the prize essays has not been definitely decided, they are scheduled for the spring term and the papers are due April 1.

These Sophomore Prizes, two of \$15 each, one for the men and one for the women of the university are awarded to members of the sophomore class for excellence in composition. The need of the student is also taken into consideration.

The following students are eligible to compete for the prizes:

Andrew Adams, Chester Austin, Frank Beale, Alberd Bedard, Stephen Becaker, Percy Blackwell, Marion Bragg, Edith Deering, Robert Dow, Dorothy Hanington, Alice Jones, Edward Mack, Ruth Sullivan, Virgil Trouant, Ora Underhill, Hester West-singer.

BALENTINE NOTES

Balentine is, at its best now. The rooms never looked quite so clean nor so artistic as they have the last few days. But there is a reason—it is the style now to have a picture taken of your room. As these pictures will probably travel quite extensively, it is policy to have the room look as well as possible. This accounts for the unusually neat appearance of some of the rooms.

ALL RIGHT BUDDY!

HE'S HERE

"Never knew how homesick I felt, Chief, until I saw you come aboard." Everybody laughed but the Red Cross Man. He knew what it meant to the boys to see the familiar wrappers and the "Good Old United States" on the labels. He had been back and forth on the transports long enough to know how eagerly they wait for the chocolate, smokes and fruit that never fail to arrive.

Down the long rows of the wounded he passed, distributing fruit, chocolate, smokes, the overflow going to the jostling, laughing crowd on deck.

Every transport carries a Red Cross man, who keeps in close touch with the boys all the way across, calling on the navy for a detail whenever necessary. Transports are also boarded by a Red Cross representative as soon as they arrive at ports of debarkation.

WILL CHAPEL

BE RESUMED?

It seems that the majority of students are anxious for chapel to be continued. To those interested some action may be taken by the last of the week and there is a possibility that chapel will be resumed before long.

(Continued from Page One)
STATE UNIVERSITY OF
MAINE PROPOSED

Section 8 says that the trustees shall elect a president for from one to five years or for indeterminate tenure and shall fix his compensation. It also prescribes his duties.

Section 9 provides for the selection by the trustees on the recommendation of the president, of the faculty and other employees, their salaries and term of service.

Section 10 authorizes the trustees to establish and maintain such departments, colleges and stations as they may deem advantageous, and all such adjuncts of the present university are hereby placed in their hands.

Section 11 provides that the trustees shall establish rules and regulations for the admission of students, fees, graduation and dormitory arrangements, but "persons of good moral character who have completed a four-year course in a Class A school, who have mastered a standard preparatory course or an equivalent shall be admitted."

Section 12—In order that the State University of Maine shall be maintained in the proper degree of efficiency and that proper extension may be provided there is hereby annually appropriated four-tenths of a mill levied upon the total valuation of the State. The same shall be placed in the State treasury as collected to the credit of the University and shall be drawn therefrom in the manner as provided by the auditor of the State.

DON QUIXOTE UP TO DATE

"Lead me to it," said a young American captain when a doughboy told him a German count—a high officer, of course—was waiting to surrender to a colonel.

"No colonels in my company today; just come with me," the captain said, and the count came.

The count wore a monocle; he carried a cane; he was some count. The doughboy didn't say "your highness," or spill any of that kind of bunk. He shook hands with the count, gave him a cigarette, and hustled him back to the prison cages like he was a regular fellow.

And perhaps the count is a regular fellow by this time. The last time the doughboy saw him he was feeding upon a package of old fashioned ginger cookies—the regular American variety—given him by a Red Cross canteen worker.

COLONEL ROOSEVELT'S
REMEMBRANCE

Colonel Theodore Roosevelt, shortly before his death, arranged to give substantial expression of his gratitude to the people of the little village in France near which his son Quentin is buried. Through the Red Cross he provided that \$6,900 of the Nobel Peace Prize money awarded to him should be used for the benefit of the simple country people who have kept Quentin's grave covered with flowers.

Colonel Roosevelt left the decision of the exact form his gift should take to the discretion of the Red Cross and that organization is now trying to ascertain the wishes of the villagers.

LOST!—somewhere between Winslow Hall and Balentine 125 calories. These calories are very essential to my happiness and are also valuable so will the finder please return them to Room 305, Balentine and receive a generous reward.
