Vol. IV

ORONO, ME., JANUARY 15, 1903

No. 7

## INSTRUCTION IN FORESTRY

THE growth of interest in the subject of forestry during the past twenty years or since the first meeting of the American forestry congress at Cincinnati, in 1883, has been almost phenomenal. From a subject of general ridicule it has come to be looked upon as of vital importance to the national prosperity.

The men who scoffed at the idea of a limit to the forest resources of our country have seen one section after another denuded of merchantable timber; one kind of wood after another adopted as the main stay in building operations; one area after another rendered worthless for purposes of timber production or for agriculture, until now the recognized experts on forestry matters are convinced that unless wasteful methods are still further checked and more rational forestry methods are adopted, the limit of the visible supply of large forest growth will be reached within thirty years.

The federal government has taken the matter in hand, has established a well arranged Bureau of Forestry of the Department of Agriculture, has set aside large forestry reserves; and is in every way possible extending a knowledge of the value of our national forest resources and of the most rational treatment of them. Several states, likewise, have established reservations or parks, and in some cases have appropriated large sums for the purpose of buying back lands which had been sold to private parties and denuded of forests. These lands are being re-forested and held as a permanent investment by the states. Private owners of large forest areas are also em-

ploying trained foresters to care for their property, and an improvement in the smaller holding is everywhere noticable.

The leading objects of U. S. Bureau of Forestry are clearly set forth in the report of the chief of the bureau for 1898, as follows: (1) "To introduce in practice better methods of handling forest lands of private owners, including both wood-lots and large areas chiefly held for timber, and afterwards to spread a knowledge of what has been accomplished; (2) to assist the Western farmer to plant better trees in better ways; (3) to reduce the loss from forest fires, the reported amount of which reaches a yearly average of \$20,000,000; (4) to inform our citizens regarding the extent and value of new opportunities for forest enterprises in Alaska, Cuba and Puerto Rico."

In brief it may be said that the work as above outlined is being carried out on an extensive scale. As a result of this fact, and of the demands by states and private owners of forest property for trained foresters, an unusual interest is at present being taken in the subject of forestry education. The forest as well as the social conditions of the Old World are very different from those in our own country, and the men educated in the forestry schools of Germany or France are, as a rule, poorly equipped to meet American conditions.

To meet this increased demand for specially trained men, the leading colleges of the country are introducing more or less extensive courses in the science of forestry. As shown by the report of the secretary of the American Forestry

Association, last week, there are at present in this country, three technical forestry schools—Biltmore, Cornell and Yale—and forty-five colleges and universities which give more or less instruction in the subject. The school at Biltmore is conducted, essentially after the German models and the 10,000 acre forest, tributary to the school, is used for model forestry operations, patterned very largely after those in vogue in the old world. The Cornell University College of Forestry aims to give instruction in extensive operations with distinctively American ideals in view. The Yale Forestry School aims more particularly to meet the conditions existing in New England; the management of the wood-lot, and the supply of forest products to our manufacturing centres.

Because of the importance of the forest interests of our own state, there has been repeated demands that forestry instruction be given at the State University. To be of special value, such instruction should extend over a period of at least two years, and should be much more extensive than the University, in the absence of direct financial aid from the State, can possibly undertake without seriously interfering with other equally important established lines of work. During the present term an elementary course in forestry has been offered and was elected by fifteen students—chiefly sophomores and juniors. The course necessarily gives but a brief outline of the nature and scope of the subject, with some emphasis upon a few of the more important features. It should be followed during the spring term by a more technical and systematic course in practical silviculture which would bring the students into close personal touch with the production and management of trees. Such a course cannot be given the present year, however.

In order to give a partial idea of the work involved in establishing a definite course in forestry at the University, it may be well to state a few of the more important features which should be emphasized in the education of a trained forester.

The first step towards forestry is a better utilization of forest products. The forester is

more than a botanist; he is more than a lumberman; he is *both*, and in addition he is an acute business man. The science of forestry comprises all knowledge that pertains to forest growth. The art of forestry applies the knowledge and teaches "*how to do*." Its aim is forest production—the use of the soil for the growing of wood crops. The lumberman utilizes the product nature has provided; the forester looks into the future and provides for reproduction. Some one has rightly said: "Lumbering is the tail end of forestry."

The questions relating to the general subject of forestry may be arranged in three general groups or classes, viz: (1) Economic questions, (2) the technical aspect, (3) administrative and financial questions.

The first group of questions would naturally include such subjects as forest areas, conditions, products, by-products and substitutes; the relation of forests to climate, soil, water-supply, health, etc., the relation of government to forestry problems.

The second or technical aspect of forestry naturally includes a thorough study of forest botany; soil physics and chemistry as related to forest growth; timber physics; forest technology—including harvesting, transporting, use of by-products, etc. Here also would be discussed the practical problems of forest reproduction by both natural and artificial means; methods of improving and hastening the crop; systems of management; protection against fire, insects, etc.; treatment of barren slopes and shifting sands, forest road building, etc.

The third group of questions would include those of forest surveys; the probable financial results of various kinds of management; the rate of increase in value; the preparation of working plans; distributing the yearly cut; routine methods of business practice, etc.

Such, in merest outline, are a few of the more important questions which confront the forester. To the young man who loves the woods, however, provided he is willing to master the subject, there is abundant opportunity for advancement.

#### LOCAL EDITORS.

THOMAS E. LEARY, 1903.

CHAS. L. LANG, 1905.

#### ALUMNI EDITOR.

CLIFFORD G. CHASE, 1904.

#### AMONG THE COLLEGES.

VICTOR E. ELLSTROM, 1903.

ISAAC E. TREWORGY, 1903,

Business Mgr.

ROY M. SNELL, 1904,

Asst. Business Mgr.

Terms: \$1.50 per year, strictly in advance; single copies 10 cents.

Address all business communications and make all checks payable to Isaac E. Treworgy, Business Manager, Orono, Me.

Contributions from undergraduates and alumni are earnestly solicited. They should be addressed to the Managing Editor.

Entered at the Post Office at Orono, Me., as second-class matter.

PRINTED BY BANGOR CO-OPERATIVE PRINTING CO.

### STUDENTS' DIRECTORY.

TRAINS—Leave Orono for Bangor at 6.46, 8.57, 9.57, 10.52, A. M.; 12.45, 1.42, 2.46, 4.02, 7.12, 11.49 P. M.

Leave Orono for points north of Old Town at 4.05, 7.06, A. M.; 3.35, 5.14, 6.43, P. M.

Leave Bangor for Orono at 3.45, 6.45, 8.30, 11.32 A. M.; 1.15, 2.20, 3.15, 4.50, 5.30, 6.20, 11.00 P. M.

Leave Bangor for the south and west at 7.15 A. M.; 1.35, 4.40, 8.00, 12.25 P. M.

Leave Bangor for Bar Harbor at 6.00, 10.00 A. M.; 4.55 6.00, P. M.

ELECTRICS—Cars leave Bangor at 5.30 A. M. and each half hour until 9.00 P. M.; after 9.00 P. M. on the hour until 11.00 P. M. Cars arrive at U. of M. fifty minutes after leaving Bangor. Cars pass the campus going north, 10m. of and 20m. past the hour; going south, 20m. of and 10m. past the hour.

The college library is open from 8.00 to 12.00 A. M. and from 1.30 to 5.30 P. M. but only matters of special importance should be submitted during the latter hours.

### EDITORIALS.

**B**EFORE another issue of THE CAMPUS is published the examinations for the fall term will be finished and another mile stone of our college life passed. With the new year comes the old habit of making resolutions, and of all resolutions to be made that of honesty is the most essential. With the examinations comes the temptation to "crib" as it is termed, or to obtain rank by dishonest means. Like most all acts of this nature the results are more disastrous to the perpetrator than to anyone else. The one vital object of a college education is to fit men to cope successfully with the world at large and the only means of testing this fitness is by the examinations that are held from time to time. It is evident that if by dishonest means one succeeds in securing passing rank in a given study, whose knowledge of the subject is insufficient to get passing rank, that when such a one comes to meet these problems in actual life he will be found decidedly lacking, and, as many times has happened, may lose a promising position which he might otherwise have held.

As a general thing the students at the university are here for an education and come for that purpose rather than being sent. Among such the spirit of honesty and fair play is always present. They feel that they ought to make the most out of their course, and as a financial investment, to get their money's worth.

There is an old saying, "Trust men and they will be true to you," which is very true in cases of this nature. It is a well known fact that in those examinations given by professors who trust their students to do honest work, that little

if any "cribbing" is ever done. Until the millennium comes there will always be some who will betray the trust imposed in them, but with the great majority of men the so-called honor system is the most successful. The knowledge that one is being watched is a temptation in itself to commit some forbidden act.

A student's conduct in college is to a great degree a foreshadow of what his habits will be in his after life and it should be the object of everyone to foster habits of an honest and conscientious nature.

**A** FEW weeks now and the one subject of discussion will be the term bills and it is feared that there is a surprise in store for the members of Oak Hall. In years past an effort has been made to make the expense of lighting a minimum but this year the opposite has been the case. The lights in the corridors and basement were kept turned off after ten o'clock but for a long time no effort has been made to reduce this factor of expense. These lights have been running all night for quite a while and must be a source of great expense. This cannot be the fault of any one student but of many and the remedy lies in the co-operation of all interested. Each one should keep his lights turned off when he is not in his room and also lend his efforts to do what he can to remedy the other conditions.

**W**HEN an editorial appeared some time since in one of our sister college papers concerning the conduct of the students in chapel, there was a feeling of pride that no such conditions existed here. Such a feeling would have been indeed justifiable at that time, but since then some one or more students have tried to imitate the conditions that

exist elsewhere by placing an alarm clock in the chapel to alarm during chapel time. Their only object seems to be to break up the chapel services of which we all have been so proud.

There may be some disagreeable feature in the service to some who have no regard for things of a religious nature and even the more thoughtful could find fault with some well worn prayer-book, but the chapel hour is the students' meeting ground and as such should be encouraged. It is hoped that such child's play as that recently committed, will not occur again.

### DEBATING SYSTEM.

The debating clubs are getting under way and it is expected that the work will go on with renewed vigor after the Christmas recess. A plan has been layed out which it is believed will tend to increase the interest in debating and make intercollegiate debates possible. The plan as adopted is as follows:

I. The purpose of this system shall be to develop material for University debating teams.

II. Plan. The purpose shall be accomplished by means of class debating clubs using the camp system, and by interclass debates.

A. According to the camp system, each class will elect its own officers, among whom are a president and two captains. The two captains shall then divide the remaining numbers of the class into two camps which shall oppose each other in weekly or fortnightly debates.

It shall be the duty of the camp captains to choose questions for debate, to appoint three principal speakers for each debate from their respective sides, to procure judges, and to open and close argument; or they may appoint members of their camps as vice presidents to act for them. It shall also be their duty to assign points for their men to look up and present. This will avoid needless repetition of a point advanced and ensue a logical presentation of the case.

After the principle speeches and before the closing argument, the question shall be thrown

open to the house—members of the opposing camps speaking alternately. When all have had an opportunity of speaking the debate shall be closed by the camp captains or by speakers chosen by them.

**B. Interclass Debates:**

Interclass debates shall be held once a year—Juniors versus Seniors and Freshmen versus Sophomores. Then the two winning teams shall compete for the class championship.

**C. Intercollegiate Debates:**

1. Debates are to be solicited and accepted, from other colleges and universities.

2. Speakers to represent the University in an intercollegiate debate shall be chosen by the University Debating Committee, in the following manner:

A first trial shall be held open to all members of the University. From the speakers six shall be chosen to compete in a formal debate, at which time three varsity debaters shall be chosen.

**D. University debating committee:**

1. A University debating committee shall consist of seven persons; and shall include the presidents of the four debating clubs and three members of the faculty chosen by the four presidents.

2. It shall be the duty of this committee to arrange for Intercollegiate debates and to choose judges for the 'Varsity debating trials.

**E. Prizes:**

1. The members of a champion interclass debating team shall receive silver debating medals, appropriately engraved.

2. The members of a victorious 'varsity debating team, shall each receive a silver debating cup, gold lined and appropriately engraved.

Already several of the classes have elected presidents and camp captains and are as follows: senior—Pres. R. M. Conner, Camp Captains, T. E. Leary and G. L. Freeman.

The junior class chose a committee consisting of C. S. Chaplin, Ira M. Bearce and L. C. Smith to have the matter of debating in charge for the present.

Freshmen—Pres. G. Wilson, Camp Captains, E. A. Stanford and A. A. Whitmore.

## SIGMA ALPHA EPSILON CONVENTION.

The Sigma Alpha Epsilon fraternity held its forty-second national convention at Washington, D. C., Dec. 23-26. The sessions of the convention were held in the large convention hall of The New Willard and the greater part of the delegates made this hotel their headquarters.

Monday evening the delegates were tendered a smoker by the Washington Alumni Association. The smoker was a most enjoyable affair, over two hundred being in attendance.

Business sessions were held all day Tuesday, and Wednesday morning, but the convention was adjourned Wednesday afternoon in order to attend the private reception tendered them by President Roosevelt. Just before the reception the delegates assembled on the steps of the Army and Navy building where a group picture was taken.

No sessions were held on Thursday and the day was spent in sightseeing. A great many of the delegates took advantage of the opportunity to visit Mount Vernon and other places of interest about Washington. A Christmas dinner was served at the Ebbett House at four o'clock and the delegates with ladies spent the evening at the National theatre.

The convention closed at eight P. M. Friday and was followed by a grand banquet in the spacious banquet hall of The New Willard, at which nearly one hundred and fifty sat down. Nearly all the delegates left for home on the morning trains, but a few remained a few days longer to enjoy the pleasures of Washington.

The convention was the largest and most important in the history of the fraternity. Charters were granted to societies at University of Chicago, University of Wisconsin, University of Kansas, Colorado School of Mines, and Virginia Military Institute.

Prof. Stevens, Prof. Lewis and Prof. Estabrook attended the teachers' convention held in Waterville, January 30 and 31. Dr. Fellows was on the program for an address on "State and Education," but was unfortunately confined to his bed at the time.

### ALPHA TAU OMEGA CONGRESS.

The eighteenth biennial congress of the Alpha Tau Omega Fraternity was held at the Auditorium Hotel, Chicago, Dec. 31, 1902 and Jan. 1 and 2, 1903. About one hundred and seventy-five delegates were present, all but two of the forty-five chapters being represented.

Two business sessions were held each day and the evenings were spent in a social way. A reception was given Wednesday evening, a "smoker" Thursday evening, and a banquet Friday evening, all of which were most enjoyable occasions. James Parker Coombs, who coached the foot ball team here three years ago, was present and entertained the assembled brothers with several vocal selections. "Jim" is singing in Grand Opera with the Castle Square Opera Company, now playing in Chicago.

The New York Alumni Association of the Alpha Tau Omega Fraternity was given permission to offer a prize of fifty (50) dollars for the best essay, not exceeding three thousand words, on the subject of college fraternities. A more extended account of this is given in another column.

Most of the delegates left Chicago Saturday morning, re-imbued with the spirit of A. T. O., and resolved that 1904 should find them at the next congress, which is to be held in New York City.

### PRIZE ESSAY CONTEST.

Are fraternities an aid or a hindrance to the development of the ideal college man? What is the value of the fraternity to college life? The rapid growth and development of the fraternity system in American colleges and universities during the last decade have made the answer to these questions of undeniable importance.

Appreciating the fact that insufficient data is at hand to warrant a logical answer to these questions, the New York Alumni Association of the Alpha Tau Omega Fraternity has decided to give a prize of \$50.00 for the best essay on the value of American college fraternities.

The aim of the Association is first, to get the

facts, and second, to stimulate research in a new field of sociological thought. The judges will be representative literary men, chosen from the fraternity and non-fraternity ranks.

The contest will be governed by the following rules:

I. The subject of the essay written for this contest shall be "The effect of the Fraternity on American College Life."

II. No essay shall contain more than three thousand words by actual count.

III. Any student pursuing a course of study leading to one of the recognized degrees in an American college or university may enter this contest, whether he be a member of a fraternity or not.

IV. Each contestant shall, on or before the first day of May, 1903, mail to the chairman of the committee three typewritten copies of the competitive essay, signed in a pseudonym. He shall also, at the same time, send to the chairman of the committee a sealed envelope containing his name and address with his pseudonym on the outside.

V. The winner of this prize must, if requested by the committee, give the sources of his information and the grounds of his belief in regard to all matters not stated upon his personal knowledge.

VI. Three judges to be selected by the Association shall pass upon the essays submitted and award the prize.

VII. All essays submitted in this contest shall be the property of the Association and may be used as the Association shall direct.

VIII. As soon as the judges have made their decision, the committee will notify the successful contestant and the result will be announced in the Alpha Tau Omega Palm and other fraternity publications in June.

For further information address:

H. W. PITKIN, Chairman,  
521 West 123rd Street, New York City.

W. T. Haines '76, has been re-elected to the Governor's council.

### WALTER G. MANSUR.

The death of Walter Mansur which occurred Jan. 3rd, was a great surprise to his class-mates and many friends. Mr. Mansur entered the School of Law in the fall of 1901, and had been doing excellent work in his course. He was very popular among the college boys and beloved by all who knew him. Although unable to take part in some features of college life on account of physical inability yet he was

a true son of Maine and was foremost among his college mates in his efforts to further her interest. He was a prominent member of the Gamma Eta Gamma Society.

In the death of Mr. Mansur the students feel that they have lost a true friend and worthy brother whose place will be hard to fill. His genial way had won him many friends, who will miss his pleasant face and jovial manners. The students and friends here sympathize with his relatives in their loss.

The fraternity of Gamma Eta Gamma, at a special meeting, adopted the following resolutions of respect :

By the chastening visitation of inscrutable but omniscient Providence, Death has for the first time invaded the courts of Alpha Chapter of the Legal Fraternity of Gamma Eta Gamma, and called from the fraternal circle of its membership one of its best beloved and most faithful brethren, Walter Granville Mansur, who, in the purity of his life, in the power of his influence for good, and in the inspiration afforded

by his unaffected, sincere and earnest devotion to high ideals of thought and action, not only won the affection and esteem of his associates, but most fittingly exemplified in his character and his conduct the lofty aim of this fraternity, as expressed in its official motto, *Esse quam Videri*, "To be, rather to seem."

*Wherefore*, Alpha Chapter of the Legal Fraternity of Gamma Eta Gamma, cherishing with sacred tenderness the memory of our departed brother's worthy and noble life, and mourning with unfeigned grief his early summons to that highest and most august of Courts where, we feel unfalteringly confident, his appearance has been required simply to receive the appropriate reward of an All Wise and All Loving Father and Judge, places solemnly on record its sorrow at the loss which it has sustained by his decease. And by unanimous vote of the chapter in special session assembled on this the seventh day of January in the year of our Lord one thousand nine hundred and three, it is

*Resolved*, That the sympathy of the chapter be extended to his sorrowing family, that suitable tributes of affection be laid upon his grave, that the chapter be represented by a delegation at his funeral, and that the altar be draped in mourning for the period of this academic term, that this resolution be spread upon the permanent records of the chapter, which he so faithfully served as recorder, and that a copy of hereof suitably framed be transmitted to his stricken parents.

The following resolutions were drawn up by the Sigma Beta Pi society :

Through Divine interposition, Walter G. Mansur having been removed from our midst, and the University of Maine School of Law having lost one of the ablest students, and the State one of its most promising citizens :

*Therefore*, Be it resolved that the members of the Sigma Beta Pi fraternity at the University of Maine School of Law express their sorrow and regret at the loss of a true friend and fellow student.

*Resolved*, That for his sincere life, lofty purpose and rare talent, he commanded the love and respect of all who knew him.

*Resolved*, That this tribute in respect to the memory of our departed friend and school fellow, be spread upon our records and a copy forwarded to the family of the deceased, and also to THE CAMPUS for publication.

E. E. NOBLE,	} Committee on Resolutions.
A. A. LANG,	
W. W. BUCKLEY,	

✻ ✻ ✻ ✻

Prof. Munson and Prof. Drew attended the convention of the American Association for the Advancement of Science, held in Washington during the holidays.

### U. OF M. ALUMNI IN PORTLAND.

The annual meeting and banquet of the Western Maine Alumni Association of the University of Maine was held Saturday evening in Portland at Riverton park casino, some twenty members of the association being in attendance. The party went to the park by special car. A fine banquet was served in the red room of the casino, the following being seated at the tables: Prof. J. N. Hart of Orono; R. W. Eaton, Brunswick; George H. Allan, Solomon W. Bates, Trustee Edwin J. Haskell, Trustee E. B. Winslow, A. C. Wescott, Mr. Black, Mr. Vose, George H. Babb, D. L. Philoon, E. C. Perkins, Mr. Caswell, Philip Dorticos, John A. McDermott, James H. Sawyer, P. H. Mosher, Mr. Sampson.

After the banquet an adjournment was made to the card room where informal speeches were made. President R. W. Eaton of the alumni association presided, and called on Prof. J. N. Hart to respond in the absence of President Fellows of the university.

Professor Hart regretted the inability of President Fellows to attend the banquet, but said that he had been detained on account of illness. Professor Hart then enumerated the pressing needs of the university. He said that first more dormitory room is needed. He said that 152 students entered the university this fall and the increase for several years past has been in excess of one hundred each year. The faculty wanted to see one or more of the fraternities build chapter houses.

Prof. Hart said that more recitation rooms, a new chapel and library, are among the needs of the institution. The trustees declare the most urgent needs to be a central power plant, for power, lighting and heating purposes, an engineering building and a workshop. The estimated cost of these improvements would be as

follows: Power house, \$20,000; engineering building and workshop, \$30,000; additional equipment, \$10,000; a total of \$60,000.

Other speakers were Hon. E. B. Winslow and E. J. Haskell.

The old board of officers, R. W. Eaton of Brunswick as president, and A. C. Wescott of Portland as secretary and treasurer, were re-elected.

'76.

Dr. Arthur M. Farrington has been acting chief of the bureau of animal industry at Washington, D. C., during the absence of Dr. D. E. Salmon, who has been directing the measures for stamping out the foot and mouth disease in the New England states.

This bureau also has charge of the federal meat inspection, employing over twelve hundred persons, and having an annual appropriation of over one and a half millions of dollars.

THE CAMPUS has received a short letter from Samuel M. Jones, class of '76. Mr. Jones is treasurer of the Commonwealth Industrial Company of Springfield, Mass. Address, 35 Wilcox Street.

'78.

Winfield E. Tripp is municipal judge for Bayfield Co., Wisconsin, and has been an attorney-at-law in Iron River, Wisconsin, for over twelve years.

'79.

Chas. W. Gibbs is civil and mining engineer at Tellmide, Colo., and is meeting with fine success in his chosen work.

F. E. Kidder is President of the F. E. Kidder Architect Co., Denver, Colo. The firm is one of the most reliable in the city and makes a specialty of fire proof and concrete construction.

'90.

The many friends of Frank O. Andrews will be pleased to hear of his marriage which took place on Thursday evening, Dec. 25, at Wiloughby, Ohio. The bride was Miss Susie Roscoe Storm the eldest daughter of Mr. and Mrs. Frederick Storm of that place.

The Cleveland Leader in speaking of the affair says: "The bride is one of the leading

society belles of Lake county, and has scores of friends in Willoughby who will all wish her a most happy future. Mr. Andrews is a graduate of the University of Maine where he took the Mechanical engineering course, and upon his graduation he came to Willoughby where he has made many friends and is one of the ablest mechanical designers in this county.

Mr. and Mrs. Andrews will reside at Willoughby for the present and the newly married couple have the best wishes of their large circle of friends.

'96.

The wedding of Miss Charlotte Crowell and Mr. Perley Walker took place at Orono, Monday, Dec. 22nd. Rev. Mr. Atkinson performed the ceremony. The relatives and members of the A. R. Club were present. The house was very prettily decorated with evergreen and holly. The wedding march was played by Mrs. George Hamilton of Bangor. The wedding occurred at 5.30 in the afternoon and after light refreshments were served, the couple left on the 7.10 train for a short tour.

Mr. Walker graduated from the University of Maine in 1896 and was instructor until 1900. He then accepted a position as Calculator in scientific department of the Newport News Ship Building and Dry Dock Co. He returned to Orono as professor of mechanical engineering in the fall of 1902.

'98.

Alfred A. Starbird, First Lieutenant, Artillery Corps, U. S. A., has been transferred from Fort Monroe, Va., where he has been stationed for some time. At present writing THE CAMPUS has been unable to secure his new address.

The marriage of Miss Lydia Lunond Black to Mr. Walter L. Ellis, occurred at the home of the bride's parents in Bath, Me., on Tuesday evening, Dec. 23. The ceremony was performed in the presence of a few relatives and intimate friends by the Rev. Omar W. Folsom of the Winter St. Congregational Church.

The groom is a son of Mr. and Mrs. John Ellis of Waterville and is employed as draughtsman at the Bath Iron Works. The bride is a

well known young lady of Bath and receives the best wishes of a host of friends.

The happy couple left immediately after the ceremony for a brief wedding trip, and upon their return will take up their residence with the bride's parents.

'99.

W. B. Caswell is in the employ of the Eastern Shipbuilding Co., with address at Groton, Conn.

'00.

Clinton L. Cole has been visiting friends on the campus during the past week. He has a position as civil engineer for the government and has recently been employed as foreman on the fortifications at Fort Michie, Long Island Sound.

'02.

W. H. Eldredge visited his home in Bucksport during the Christmas recess. He is in the employ of the B. F. Sturtevant Co., Jamaica Plain, Mass. Address, 5 Oakdale St.

### TRACK COACH.

Thomas F. Keane, who has been engaged by Manager Ralph Hopkins to train the track candidates for the season of 1903, has already arrived at the University and began his work on Tuesday afternoon when several of the members of last year's team were out in their track suits to begin preliminary work in the various departments.

Capt. Harris, as well as all those interested in track athletics, are well pleased with the selection of Coach Keane and with good, hard, conscientious training on the part of the track candidates the University ought to have a team that will be a credit to the institution. Capt. Harris made an appeal to the students after chapel Tuesday morning requesting every student of athletic ability to get out for the preliminary work which is very essential in track athletics.

There can be no question regarding Keane's knowledge of track athletics, for he is one of the greatest sprinters that ever wore a spiked shoe. It was back in the early nineties that Keane

first began to attract attention as an amateur athlete in Boston. He seemed to be a natural sprinter and by careful training and persistent efforts soon worked his way into the very front rank as a crack sprinter at distances from 100 yards to a quarter of a mile.

In 1893 he won the New England amateur championship at 220 and 440 yards, and in the following year at Traverse Island, N. Y., while representing the Boston Athletic Association, he won the A. A. U. championship at a quarter of a mile, defeating such noted sprinters as George

quarter of a mile. The best record that he made abroad was to win three Sheffield handicaps, and he ran second twice in the same event in five successive years.

Keane's success abroad has made him the virtual scratch man in all the big handicaps. In the card issued for the 130-yard handicap run at Powderhall grounds, Edinburg, last Thursday and Friday, he was placed at scratch in a field of 160 entries with a limit of 16 yards.

In 1900 he won the big Newcastle handicap, which is run with an 8-yard limit and in that year he established the English professional record for the long jump on the grass without a take of covering 22 ft. 6 in.

Speaking of English professional games, Keane said that people in America have no idea of the interest that the people take in the large athletic meets in England. He said that it was not uncommon to see 25,000 people at the big meets and that thousands of dollars were wagered on the contests. It generally takes two or three days to finish the big handicaps and he says that it is surprising to see the interest manifested.

The big handicaps generally have a purse of \$500 attached to them which is divided into four prizes, the first man receiving four-fifths of the purse.

Mr. Keane thinks that the English system of training is much more careful and systematic than in this country. It is customary to have at least 20 men train hard and fast before they enter into any of the big events. Each man has a trainer and they are required to go through a prescribed system of training. Coach Keane does not approve of all the English methods of training, but he secured some very good points on training while abroad.

Coach Keane, who is 30 years old, was born in England but came to this country some 20 years ago. He received his athletic training in Boston and during the past ten years has made a proud record both in this country and abroad.

Roy M. Snell '04, has been obliged to leave college on account of sickness.

COACH KEANE, OF THE TRACK TEAM.

Sands, Sanford of Yale, Tom Burke, Lyons of the New York Athletic Club, and Townsend of Michigan. Having won signal honors as an amateur, Keane decided to go into the professional class entering in 1895 and for the next few years took part in all the big professional meetings and Caledonian Club games in this country.

In 1898 Keane decided to go abroad and meet the English cracks. While in England Keane met with some reverses at first, but before he left for America he was the recognized professional champion sprinter of the world up to the

### THE WASHINGTON COUNTY TRIP.

The first trip of the University of Maine Musical Clubs this year, was made through Washington County just before the Christmas recess. Leaving Orono early on the morning of Wednesday, Dec. 17, they arrived in Cherryfield about nine o'clock, where they were entertained, and gave a concert that evening under the auspices of the Cherryfield Academy Athletic Association. They were greeted by a large audience and the concert was very well received. After the concert the College Orchestra furnished music for a dance which was thoroughly enjoyed by all present.

The next evening the same program was given at Machias, and, although the crowd was small the selections received much applause and the quartette was encored several times. A pleasant dance followed the concert.

From Machias the Clubs went to Ellsworth where they were entertained in grand style, and gave a concert Friday evening under the auspices of the Senior Class of the Ellsworth High School. The concert which was exceedingly well received here was followed by the usual dance. The people of Ellsworth always seem to exert themselves to give the boys a good time, and in this instance they certainly succeeded. When the train for Bangor pulled out of Ellsworth Saturday noon it is said that there was much weeping, and many heartfelt sighs fell on the balmy atmosphere.

On reaching Bangor the boys dispersed to spend the holiday vacation. Coming back to College, memories of the Washington County trip still remain with them, and they are loud in praise of the hospitality and generosity of the people by whom they were entertained.

The Prism management is endeavoring to make its "grind" department a special feature of the book this year, and asks the aid of every member of the college in carrying out this idea. All grinds should be mailed or handed to the Editor-in-Chief or E. C. Clifford, Phi Gamma Delta house.

## Athletics

Now for the B. A. A. Meet!

This year, for the first time, we have been invited to send a team to run Tufts at this, the greatest indoor athletic meet held in New England and probably the greatest that is held in America. We can, perhaps, the more readily understand the honor conferred upon us when we know that such colleges as Harvard, Yale, Brown and Dartmouth are always represented there, and that, hitherto, Bowdoin has been the only Maine college favored with an invitation.

This invitation, together with the fact that our field of operation in the other branches is yearly broadening, is a sure proof of our almost phenomenal development in athletics. We have reached that stage where we are maintaining something more than a local reputation, and we must continue to maintain this standing or expose ourselves to the humiliating accusation that our athletics are of the "mushroom" variety. Of course we shall send the best we have against Tufts at Boston, but in the meantime we must work hard to the end that the "best" which we are able to send may be worthy of our entire confidence. While we all know that we have good athletes here, it still remains for us to demonstrate it to the world; and at our first appearance in Boston we should exert ourselves in order that the showing we make may be credible enough to merit a second invitation.

Manager Herbert of the baseball team has completed an agreement with Frank F. Rudderham to coach the team this spring. This will make the third year that Mr. Rudderham has served in this capacity and his success at the University of Maine is well attested by the fact that last year he developed a championship team. Coach Rudderham will arrive in Orono March 1st to take charge of the team but the practice in the cage will begin in a short time.

Last year, Mr. Rudderham started in some-

what earlier in the season on account of the New York trip which was taken along the first of April and was obliged to leave May 8, after the game with Bowdoin. This year, Coach Rudderham will be able to remain with the team until June 1st, when he will return to Albany to assume the management of the Albany team of the New York State league. A. R. Davis who graduated last June, and who, during the four years that he was in college, played 3d base on the 'varsity, has signed an agreement with Albany to play in the field, the coming season.

Mr. Rudderham has the entire confidence of the baseball squad here, and as a number of promising candidates have been ushered in with the advent of the freshman class, a prosperous season for 1903 is being looked forward to.

The first trip that the team will take will be along the 1st of April, and games will be played with Harvard, April 4, Holy Cross, Wesleyan and Exeter. A trip to New York state will not be undertaken this year.

Although it is now early in the season to be considering football, nevertheless, Manager Chase has been far from idle in attempting to arrange a schedule that will eclipse the attempts of previous years. Already a number of dates have been secured, among which is a game with Harvard, scheduled for Oct. 3, at Cambridge, one week earlier than the Harvard—U. of M. game of last fall.

An application has been forwarded to the Yale management for a game, and the prospects of a favorable reply are quite encouraging.

#### Maine 41; Taconnet Club 18.

The first basket ball game of the season occurred Saturday night, January 10, in the gymnasium and considering that both teams had not had much practice it was an exceptionally good game. The visitors were handicapped on account of the slippery floor, being used to playing on canvas. The game was clean throughout and promises good results for the future for both teams. The features of the game was the goals from fouls by Phelan and the different goals from the field by Ellstrom.

The line-up of the teams was as follows:

#### MAINE.

Soderstrom, r f..... l f, Murray  
Huntington, l f..... r f, Hurd  
Ellstrom (Capt.), c..... c, (Capt.) Phelan  
Aborn, r b..... l b, Newenham, Grindall  
Haley, l b..... r b, Suttie

#### TACONNET CLUB.

Goals from field, Ellstrom 9, Huntington 5, Soderstrom 4, Aborn 2, Phelan 5, Murray 1; Goals from fouls, Ellstrom 2, Phelan 6. Referee, Dorticos; Umpire, Grover; Timer, Kendrick. Attendance, 200.

## LOCALS.

Now is the time to prepare your grind for the 1904 Prism.

Nathan A. Chase, ex-'02, has returned to college to complete his course.

Invitations are out for the president's reception to the faculty for January 16.

Prof. Huddilston will return from a nine months' trip abroad for the beginning of the Spring term.

Miss Calvin attended a meeting of the American Historical Association at Philadelphia, during the Christmas recess.

Dr. Fellows attended the meeting of the Presidents of the State Universities held at Washington, January 3rd and 5th.

Pres. Fellows was elected a member of the executive committee of the National Association of State University at its meeting at Washington, Jan. 3rd.

Manager Herbert of the base ball team has obtained Mr. Rudderham as coach for another year. This will make Mr. Rudderham's third year here and his return will be a source of strength to the team and gratification to all interested in the college. He will be here until the first of June.

The endeavor to create a disturbance during chapel exercises Wednesday was not a great

success. The owner of the alarm clock may obtain it by calling at the college office.

The Phi Gamma Delta fraternity gave a most successful dancing party at their chapter house on Friday, January 9. The decorations were particularly elaborate and all report a very pleasant occasion.

University of Maine men in the Legislature: Geo. H. Allan '84, was re-elected to the House from Portland. Mr. Allen is chairman of the House committee on Legal Affairs.

Geo. A. Thompson '92, of Orono, is on the Committee of Education to which the bill for an appropriation for U. of M. will be referred.

Howard Pierce of Fort Kent, graduate of the U. of M. Law School in class of 1900, L. A. Barker of Bangor, graduate of the U. of M. Law School in class of 1900, V. A. Putnam of Danforth a former student at the U. of M. Law School.

At the college meeting Dec. 19th, it was voted to accept the rules in regard to eligibility of athletes with the exception of the fourth. The objection to this was in regard to the date and was laid on the table for further consideration. It is probable that it will be accepted practically as it reads.

When Prof. Huddilston left here last spring, he went to Berlin where he attended the University lectures for a short time. He then went to Italy by the way of Dresden, Munich and Vienna. Here he spent a few weeks at Florence, Rome and Naples, devoting a shorter period to the smaller cities of central and northern Italy, especially connected with Italian art, such as Assisi, Perugia, Siena, Bologna, Manchuria and Milan. He also took a trip to Sicily and Greece for the especial purpose of studying the architecture in these places.

Dr. Hadyitzs who has been taking his place during his absence, is to do graduate work at Harvard for the remainder of the year.

C. R. Williams '05, was seriously injured just before the close of the Christmas recess. A heavy two-horse express team ran away and crashed into the sleigh that Williams was driv-

ing and threw him against a trolley pole. His left arm was broken and he was injured internally. He is now in the hospital and at the present time it is impossible to say just how badly he is injured.

The third regular meeting of the "Deutscher Verein" formerly known as the "German Club" of the University of Maine, was held at the Mt. Vernon House on the evening of Dec. 18, 1902. A program was carried out, consisting of an informal talk on "German Music" by Prof. Harrington, and two solos by Miss Bartlett of Bangor. Light refreshments were served and the remainder of the evening spent in German games and conversation. The affair was a most enjoyable one.

The following games have been scheduled for the basket ball team up to date: January 17, Taconnet at Waterville; January 31, Colby at Orono; February 6, C. C. I. at Orono; February 28, Colby at Waterville. Plans are on foot for Mass. trip in Feb. Other games will be scheduled later.

The committees to whom the appropriation for the much needed power plant and mechanical laboratory for the University are as follows:

Committee on Education—Senators, C. C. Libby, E. K. Wilson, H. Pierce; Representatives, Mead, Irving, Perkins, Stearns, Randal, Thomas, Thompson.

Committee on Appropriation and Financial Affairs—Senators, Burns, Rankin, Bryant; Representatives, Pettingill, Page, Bodwell, Eaton, Dudley, Small, Swett.

On the evening of January 9th a very enjoyable reception and dance was given by the members of the Phi Gamma Delta Fraternity at their house on the campus, with about thirty couples present.

The rooms were tastefully decorated with evergreen and flags, and streamers of purple and white presenting a very pretty appearance.

On the reception committee were Mrs. Hart, Mrs. Belcher and Miss Hilliard, and Messrs. Goodwin and Clifford of the fraternity. The music was furnished by Pullen with three pieces.

During the evening, light refreshments were served and the dancing continued till a late hour, when the party broke up, in time for the special cars which were on hand at the door.

## AMONG THE COLLEGES.

Carleton College, Minnesota, has a "Flunkers' Club."

There are, at the present time, 101 men in the Harvard fencing squad.

The University of Michigan is to have a new medical building which is to cost \$175,000.

At Carlisle University there are 1,073 Indians, representing eighty-eight different tribes.

The Bates Catalogue gives 321 students of which 188 are young men and 133 young ladies.

The ninth annual Harvard-Princeton debate which occurred Dec. 12, was won by Princeton.

The Phi Beta Kappa society at Yale celebrated its 126th anniversary the middle of December.

Dr. W. H. Murphy, Yale '93, has been engaged by the base ball management of Yale as coach for the next season.

At Chicago, in the law examinations the students are not allowed to take books, papers, or blotters into the examination room.

The students of the University of Chicago have been testing a voting machine which is soon to be inspected by the election officers and politicians.

President Elliot of Harvard does not approve of giving Harvard graduates places in the teaching corps of Harvard, if graduates of other institutions of learning are available.

Much trouble has been caused at Albion College by a certain rule of the faculty, prohibiting dancing, card playing and smoking. The charters have also been taken away from three fraternities.

After two months of discussion the Athletic Committee at Harvard has consented to allow the members of the second foot ball team to wear H 2nd on a black sweater; formally only the 2d was allowed.

The Western colleges are making telling attacks on the present system of ruling an athlete, amateur or professional. They hold that the

present distinction came from English snobbery and is out of place in America.

A jaded and worn tramp recently applied to a Colorado dispensary for treatment and was identified as Prof. W. A. Wyckoff, of Princeton University, who is studying social conditions in that state. He resumed his travels after treatment.

The enrollment at M. I. T. this year is 1600. William's has 138 freshmen, the largest class in its history. Wesleyan has 312 students this year. Amherst has an enrollment of 383. Lehigh has 1600 students. Syracuse has 1900 students this year.

The presence of a fifteen-year-old boy at the University of Michigan, has excited much comment. Though he is under the age limit, he insisted that he be given examinations, and not only did he succeed in entering, but had thirty-two hours' advance credit, which is equivalent to one year's work. The boy's home is in Indianapolis, and both his parents are Michigan graduates.

Football captains for next fall: Harvard, Marshall, q. b.; Annapolis, Soule, r. e.; West Point, Farnsworth, l. e.; University of Pennsylvania, Metzger, r. e.; Williams, Peabody, f. b.; Dartmouth, Witham, q. b.; New York University, Tuthill, h. b.; Lafayette, Ernst; Princeton, De Witt, g.; Amherst, Biram; Colby, Cowing, l. t.; Bowdoin, Beane, r. e.; Bates, Reed, l. t.; University of Maine, Bailey, q. b.

Bowdoin's new library is one of the finest in the country. It is the gift of General Thomas Hamlin Hubbard of the class of 1857. The cost of the building is estimated to be between \$300,000 and \$350,000. The library building will afford convenient and adequate accommodations for the college library and for its prospective growth, with reading and consulting rooms, lecture and conference rooms, administrative offices, etc.

Harper of Chicago is a linguist; Hadley of Yale is a political economist; Eliot of Harvard used to be a mathematician and a chemist before he took to administering a university;

Butler of Columbia was a student of philosophy and pedagogy; Draper of Illinois was a lawyer; James of Northwestern, a political economist; Schurmann of Cornell is a publicist; Angell of Michigan is a specialist in modern Europe literature; Northrop of Minnesota, a lawyer; Jordan of Leland Stanford, a zoologist; Wheeler of California, a Grecian; Remsen of John Hopkins, a chemist; Hall of Clark, a psychologist; Wilson of Princeton is an economist; Faunce of Brown, Tucker of Dartmouth, Hyde of Bowdoin, Warren of Boston University, Capen of Tufts, Hopkins of Williams, Harris of Amherst, Thompson of Ohio, Thwing of Western Reserve, Andrews of Nebraska, and Benton of Miami, are all clergymen.

—*Journal of Education.*

The following enrollment for the various colleges is taken from the *Boston Congregationalist*:

	Total No. Students.	Gain over last year.
Amherst,	391	13
Bowdoin,	279	25
Brown,	925	5
Bryn Mawr,	424	—
Chicago University,	2200	—
Cornell,	2900	200
Dartmouth,	704	18
Harvard,	4194	50
Johns Hopkins	670	11
M. I. T.	1620	105
Smith,	1016	—
Tufts,	950	50
Vassar,	860	64
Wellesley,	881	65
Wesleyan,	320	10
Williams,	418	28
Yale,	2785	100

PLEASE MENTION THE CAMPUS WHEN PATRONIZING OUR ADVERTISERS.

## To Young Men...

Young men think more about style than anyone else—but often they are not particular enough about fit—fact is the fit is the most important element of the style.

## Military Back with Padded Shoulders

is the great thing this year. We knew the young men would take to it and you can't embarrass us then for a minute. We've got them and are ready for the young man who wants the proper thing—

**Rough Fabrics, Cheviots, Serges, Worsteds  
in all the New and Snappy Patterns.**

*You are sure to find what you want here and we are  
always happy to serve the U. of M. Boys.*

## Standard Clothing Co.

14 West Market Square,  
J. F. CROWLEY, Manager. BANGOR, MAINE.

Vol. IV

ORONO, ME., FEBRUARY 2, 1903

No. 8

## AWARDING OF THE "M"

**A**T A recent meeting of the athletic association of the University of Maine the following rules concerning the wearing of the 'varsity initial were passed :

Art. I. — In football, for playing two entire college games, or four halves, or any part thereof, it being understood that any player beginning a game and being taken out on account of injuries shall receive credit for a full game.

Art. II. — In baseball, those playing three entire college games, except the pitcher, who shall pitch two entire games or at least 16 innings, it being understood that any player being taken out of a game on account of injuries shall receive credit for a full game.

Art. III. — In track athletics, to those men winning a point or fraction thereof at the N. E. I. A. A. meet, to those winning a point at the M. I. A. A. meet, to those breaking college records and to members of winning relay teams contesting with other colleges.

Art. IV. — In tennis, to those winning singles or doubles in intercollegiate contests.

Art. V. — To managers of 'varsity football, baseball, and track team, with the distinction that the "M" shall be underlined.

Art. VI. — To men on second eleven and second baseball team a "2nd" shall be awarded, men to be selected by the sub-committees on the respective sports.

Art. VII. — To men competing on 'varsity track or relay teams in intercollegiate contests shall be awarded a "TMT," the men to be chosen by the sub-committee on track athletics.

Art. VIII. — An (M) encircled "M" shall be awarded to men who have played three intercollegiate games of basket ball.

Art. X. — The football sweater shall be navy blue with white letter. Baseball, basketball, track and tennis sweater, to be pure white with navy blue letter. Basket ball jersey shall be navy blue, neckless, with white letters. Track suits shall consist of white cotton pants with navy blue stripe down outside seam, shirt to be white woolen with navy blue letter.

The two following articles were read and after a long discussion were laid upon the table for more careful consideration :

Art. IX. — The 'varsity initial may be worn on sweater, jersey, cap or hat and on track men's running shirt. The "M" on sweater, jersey, and running shirt shall be 5 x 6 inches in size and that on hat or cap shall be 1 x 1 1-4 inches in size. The baseball shirts shall bear across the breast the word "Maine" in plain navy blue letters not exceeding four inches in height. The basketball jersey shall bear across the breast the word "Maine" in plain white letters not to exceed 2 1-2 inches in height. The caps and hats on which the 'varsity initial shall be worn shall be as follows: A hat of navy blue flannel or 'varsity style and of navy blue material.

Art. XI. — The different letters to be of the following size: 'Varsity "M" 5 x 6 inches; "2nd," the 2 to be five inches in height and "nd" to be two inches in height. Design to be 2nd "TMT" and the "M" shall be 4 x 5 inches and "T's" two inches in height and

placed on opposite sides and midway of "M." The encircled "M" shall be 4 x 5 inches with a circle outside, "2nd" on cap, the "2" to be 1 inch in height and the "nd" to be one-half inch. "TMT," "M" shall be one inch and "T's" one-half inch. All letters on hat or cap shall be white.

Art. XII. — No class numerals or any other unauthorized emblems shall be worn on any 'varsity sweater or jersey.

As will be seen from the above rules, the football sweater has been changed from white with blue "M" to navy blue with white "M." This action was taken largely upon the suggestion of the football men. The baseball sweater will be plain white with navy blue "M" thus doing away with the blue points. This also holds with track team sweaters and jerseys.

The question of changing the style of the "M" from a plain to a block letter was discussed and will be submitted at later meeting for consideration.

### BANQUET OF MASSACHUSETTS CLUB.

The first annual banquet of the Massachusetts Club of the University of Maine was held at the American House, Boston, on Saturday evening, Jan. 3rd.

Shortly after 6 o'clock the members gathered in one of the parlors of the hotel where an hour was spent pleasantly. At seven o'clock the members sat down to an excellent dinner which was thoroughly appreciated, many of the boys having traveled all day. It was about ten o'clock before the dinner was disposed of, chairs tipped back and cigars lighted. E. R. Berry acted as toastmaster and after complimenting the members of the club, and especially the banquet committee, on the success of the occasion, several letters of regret were read from absent members and invited guests. Dr. Lewis of the faculty was unable to be present owing to sudden change of plans and his absence was universally regretted.

Hon. L. C. Southard, representing the alumni, was then introduced and delighted everyon

with one of his characteristic after-dinner talks. Among other things he spoke of the great opportunities of the members of the organization to be a force in the college and to advance the interests of their Alma Mater in the Bay State. In regard to the interest of the college, he spoke of the tendency of fraternities to push their men into prominent places regardless of their fitness for the position and said that although our college was troubled but little in that way at the present time, other colleges had been so troubled and that we should keep constantly on the lookout for such a tendency. In closing his remarks, he urged each one to see to it that absolute fairness prevailed in choosing the athletic teams and that the interest of the college and not of the fraternities, should be considered first.

A representative of the senior class, Chester Everett, was called upon for a few remarks which were well given and warmly applauded. Albert D. Case was then called upon to speak concerning the musical clubs of which he is manager. He gave a clear idea of the functions of the several clubs, especially as advertising mediums, and expressed his firm conviction that in time the musical clubs would become nearly as important a factor in our college as athletics. Following his remarks several of the other club members responded to appropriate toasts.

The following menu was enjoyed :

Oysters on the Half Shell		
Mock Turtle	Consomme a la Royal	
Olives	Celery	Radishes
Boiled Salmon a la Petit Pois.		
Duchess Potatoes		
Roman Punch		
Roast Vermont Turkey, Cranberry Sauce		
Roast Sirloin of Beef au jus		
Delmonico Potatoes		
Macaroni au Grautin		
Ice Cream	Charlotte Russe	
Crackers	Cheese	Cafe Noir

### THE 1904 PRISM.

Work on the 1904 *Prism* is now well under way. The drawings are nearly all out and the members of the board are striving hard to make this book the best that has yet been issued. They are determined to make the grind department a special feature and earnestly request the co-operation of every student in college in carrying out this idea.

A college annual should receive not only the financial support of the students but their intellectual help as well. It is a book in which every man in the college is interested and whom its success or failure should most affect. It is the custom at the University of Maine for the junior class to issue the book, and after the selection of the board, the matter usually rests. The remainder of the students fail to consider that it is a college publication and one that should receive the support of every student.

If all would appreciate this fact and each one do as much as he could to assist the board of editors, a much larger and more complete book could be issued. This is especially true concerning the grind and literary departments which need the help of every student who has the least particle of ability along these lines.

Too often students, not directly concerned in the getting out of *The Prism*, are prone to lay back and let others do the work, and then, when the book appears, to act the part of the critic. This attitude will never bring out the best book, either in quality or completeness. If you have a grind, sit down and write it out at once, don't wait for tomorrow, it will be forgotten.

It was necessary to make some changes in the board by reason of unforeseen circumstances that have arisen, and at present the board is complete with the exception of a representative of the junior class of the Law School. The late Walter Mansur was elected to represent his class on the board in this department of the university and his death was a severe loss. A meeting of the class will be held soon and a representative chosen.

Fred W. Talbot who was originally chosen as artist was unable to return to college and L. C. Bradford will serve in that capacity.

The printing will be done by the Kennebec Journal Company of Augusta, and the Suffolk Engraving Company of Boston will furnish the engravings.

At a meeting of the junior class it was voted to have the photographic work done at Chalmers, Bangor. L. I. Johnstone has been selected by Mr. Sawyer as assistant manager. The departments of *The Prism* will be in the hands of the following members: T. F. Taylor, Schools and Colleges; Miss Copeland, Literary; C. I. Day, Classes; R. M. Snell, Fraternities; C. I. Giles, C. G. Chase, Athletics; Phillip Dorticos, Musical Clubs; E. C. Clifford, Grinds.

\* \* \*

### NOTICE.

With the change of the college paper from the Cadet to THE CAMPUS, the present method of electing the members from those doing the best work was adopted. There are only five more copies for the present board to publish and it is necessary that those wishing positions on the board should begin at once to get their material ready for publication.

The work on the board is not very strenuous, but affords a good training along editorial or reporting lines. There will probably be three men chosen, one from each of the three classes and one man from the Law School. Without doubt, there are a number in college who have done work on their school papers, and who could help very much in publishing a creditable paper here.

The object of this article is to bring to the minds of those who are willing to work, the need of good men on the board and the positions open. Any student wishing to compete for a position, should leave his name with the editor and receive something to do.

There is still a chance for more men to try for the position of assistant manager. This position is given to that student doing the most work. It affords an excellent business training and if properly conducted a small sum can be realized when the assistant becomes manager. Any wishing to compete should confer with Mr. Treworgy at the Kappa Sigma house.

## THE CAMPUS

Published on the first and fifteenth of each month during the college year by the students of the University of Maine.

### MANAGING EDITOR.

RALPH M. CONNER, 1903.

### LAW SCHOOL.

CHAS. H. REID, 1903.

### ATHLETIC EDITOR.

Business Mgr.

ROY M. SNELL, 1904,

Asst. Business Mgr.

Terms: \$1.50 per year, strictly in advance; single copies 10 cents.

Address all business communications and make all checks payable to Isaac E. Treworgy, Business Manager, Orono, Me.

Contributions from undergraduates and alumni are earnestly solicited. They should be addressed to the Managing Editor.

Entered at the Post Office at Orono, Me., as second-class matter.

PRINTED BY BANGOR CO-OPERATIVE PRINTING CO.

## STUDENTS' DIRECTORY.

TRAINS—Leave Orono for Bangor at 6.46, 8.57, 9.57, 10.52, A. M.; 12.45, 1.42, 2.46, 4.02, 7.12, 11.49 P. M.

Leave Orono for points north of Old Town at 4.05, 7.06, A. M.; 3.35, 5.14, 6.43, P. M.

Leave Bangor for Orono at 3.45, 6.45, 8.30, 11.32 A. M.; 1.15, 2.20, 3.15, 4.50, 5.30, 6.20, 11.00 P. M.

Leave Bangor for the south and west at 7.15 A. M.; 1.35, 4.40, 8.00, 12.25 P. M.

Leave Bangor for Bar Harbor at 6.00, 10.00 A. M.; 4.55 6.00, P. M.

ELECTRICS—Cars leave Bangor at 5.30 A. M. and each half hour until 9.00 P. M.; after 9.00 P. M. on the hour until 11.00 P. M. Cars arrive at U. of M. fifty minutes after leaving Bangor. Cars pass the campus going north, 10m. of and 20m. past the hour; going south, 20m. of and 10m. past the hour.

The college library is open from 8.00 to 12.00 A. M. and from 1.30 to 5.30 P. M. but only matters of special importance should be submitted during the latter hours.

## EDITORIALS.

**W**E ARE glad to note the beginning of the short courses in agriculture, the first of which began January 27th and will continue for six weeks. These courses are designed to meet the needs of young men and women who intend to follow agriculture as a business and cannot take the longer courses. The usefulness of such a course is apparent to every intellectual agriculturalist and the fact that more students are availing themselves of the opportunities offered is a testimonial of their growing popularity.

This year has seen an increase in the number of students taking the courses in agriculture as well as nearly all the other branches taught here. Many would-be enemies of the University of Maine have thought it a mark of disgrace to term the institution as the "Cow College" or the students as "farmers," but without the desired effect. As a matter of fact those students who have followed the agricultural courses at the university are to-day among the most successful and influential graduates that the State of Maine has ever sent out.

The young man or woman who pursues an agricultural course is by no means unwise. When we consider the vast importance that agriculture forms in our country's growth and the enormous strides that the country has made in becoming the great food center of the world, we gain some idea of the opening available to young men in this line of business.

It is hoped that the number of students in the two remaining courses which begin on March 10th and March 31st will be even larger than those of former years.

**T**HERE is an old adage, "A stitch in 'time saves nine," which may apply at this time. There does not seem to be any immediate cause for alarm but as there has been a few cases of mumps on the campus, it is not out of place to remind all the students to be careful, and if there is any danger of anyone coming down with them for the patient to remain at home and, as far as possible, check the spread of the disease. The mumps have been very troublesome in many schools and colleges and care should be taken that they do not get a foothold in the university.

Another matter ought to be seen to by those who have not as yet done so. This winter promises to be a record breaker in the spread of smallpox. In a few weeks the lumbermen will be coming from those districts of Aroostook where the smallpox is raging and it will be almost a miracle if it does not break out in this vicinity. If it should once get into college no one can foresee the results. These are only suppositions but ought to be taken into consideration. Every student should get vaccinated at the earliest possible date. Do it the first of the term so if you are sick you can afford to be out better than later in the term.

This word of advice should be taken for these two diseases and all other contagious diseases which may break out in our midst.

**T**HERE is quite a degree of dissatisfaction among many of the students at Oak Hall, with the deplorable lack of all janitor service in that building. There is scarcely a time, from one week's end to another, when the corridors are in what could be called a passable condition of cleanliness. This is not, by any means, entirely the fault of the students, who leave the rubbish in the corridors, either for a great part of the time the dust chute is

completely filled up, and there is no way of disposing of the waste.

Now we all realize fully that the university stands in great need of money; but it would seem that with the seventy-five inmates of the Hall, each paying his dollar per term, for cleaning, outside of all light, heat and repair bills, it might be expected that enough of this hundred and fifty dollars would be expended, as it ought to be, to keep the corridors in presentable condition. It is evident that the janitor has more work than he can properly attend to, outside of Oak Hall; but are there not students, right in the building, who, for the sum which is paid out each term, would be glad to agree to keep the floor swept and even wash it occasionally, not to mention the performance of some few other small tasks, the need of which has probably suggested itself to the inmates of Oak Hall, ere this?

#### ANOTHER DORMITORY AT MAINE.

In the present condition of affairs, and while our petition for new buildings is still before the legislature, it may not be out of place to mention briefly in the columns of THE CAMPUS, a few facts in connection with another pressing need of the university. Probably the shops and heating plant are the things *most* needed just now, but another thing which is almost as urgently needed is a new dormitory.

No one who has been here any length of time and has seen the crowd of students walking up from the town twice a day, can deny the fact that a new dormitory is essential to our future prosperity. Probably there are a hundred and fifty students living in the village at the present time and this is undoubtedly a great inconvenience to them. They cannot spend their spare moments in the gymnasium or reading room as they could if they lived on the campus. Many of them are *obliged* to walk up to college, regardless of temperature or weather; for no one car will carry them all at once. They are scattered

about the town in private families, enjoying scarcely the semblance of a college life.

The question arises: How long will students continue to come here under the present condition of affairs? It is well known that several have left college this fall on account of insufficient living accommodations. We have good courses and there are many attractive features in the life here at Maine, but there is nothing very attractive about walking three or four miles a day when the mercury stands at zero. It is almost useless to try to increase the number of students at the university until suitable accommodations are provided for those already here.

We can safely prophecy that whenever another dormitory is built it will be done by the alumni, students and friends of the university, in the same way that Alumni Hall was built. Each of us has a personal responsibility in this matter and it is the privilege and duty of each of us to discuss and agitate the question at every opportunity. A new dormitory, larger and better equipped than Oak Hall, could be built for forty thousand dollars or less; and now that we are asking the state for one or two much needed improvements, would it not be a fitting time for us to do something ourselves toward making another improvement which is scarcely less necessary. The situation is waiting for a man of energy and brains to master it. At all events, something must be done in the near future or we may wake up sometime to find our student body growing beautifully less.

#### Y. M. C. A. CONFERENCE.

The first annual conference of the Young Men's Christian Associations of the four Maine colleges was held at Waterville, January 15-18, inclusive, at the invitation of the Colby association. Representative delegations of all four colleges met to discuss the progress of the student movement and to lay plans for future activity. In order that the members of the several delegations become acquainted as promptly as possible, an informal reception was held in one of the college buildings on Thursday evening. The short programme was well rendered and thoroughly enjoyed by all present. Both Friday

and Saturday were devoted to a prolonged discussion of the present condition of Y. M. C. A. work in our Maine colleges and as to the means of bettering that condition.

The principal speakers and leaders of the conference were Mr. A. B. Williams, secretary for the eastern colleges; Mr. Chas. F. Park, secretary for the preparatory schools, and Mr. Jayes. All three men have had a wide experience in student work and their suggestions were eminently practical. Mr. Jayes emphasized in particular the value of mission study among students and his talks were intensely interesting in view of his experience as a missionary to the west coast of Africa. The conference was also addressed by President Chas. F. White of Colby college.

On Sunday evening came the final meeting of the conference. It was voted to hold the conference annually in the future and the president of the Bowdoin association immediately rose and extended the hearty invitation of Bowdoin to hold the next conference at Brunswick. The invitation was accepted and the meeting adjourned after stirring addresses by Mr. Williams and Mr. Park.

The hospitality extended by the Colby association was of the best and each member of the visiting delegations was provided with excellent entertainment.

Following are the delegations from the various colleges and preparatory schools:

University of Maine.....	13
Bowdoin .....	10
Bates.....	10
Colby .....	20
M. C. I.....	3
E. M. C. S.....	1
Total.....	57

#### HISTORY AND DEVELOPMENT OF THE DRAMA.

A course in comparative literature, entitled as above, will be given by Prof. Lewis on Tuesday and Thursday afternoons at 3.30, open as elective to all students and also without registration fee to outsiders.

The course will treat the development of the Greek, Roman, English, French and German drama historically and critically as a prominent phenomenon in the progress of civilization.

The course will consist mainly of lectures, collateral reading by the class, and occasional themes on subjects connected with the course. For further information consult Prof. Lewis. The course is entitled At 5.

## LAW SCHOOL DEPARTMENT

C. Vey Holman, Esq., has commenced his course of most interesting lectures on mining law.

Hon. Louis Carver Southard of Boston, one of Maine's dearest alumni, has just obtained a decree affirming the verdict in the case of B. R. Clark, also an alumnus, vs. a Massachusetts Railroad Company, the particulars of which case have more fully appeared in a previous edition of THE CAMPUS.

Oscar Hall Dunbar and Ormand L. Keyes, both members of the freshman class, were initiated into the local chapter of Gamma Eta Gamma recently. The initiations for the year will close next Wednesday night.

A new set of Moot Court cases will be tried this term, and a jury trial, State vs. Hamlet, comes off during the spring term.

---

### IN MEMORIAM.

Walter Granville Mansur was born in Plymouth, Me., October 13, 1877. His first school work was done in Boston, Mass., to which place his parents removed when he was about six years old. In 1887 the family came to Pittsfield and not very long after he was attacked with disease of the hip, which left him with a deformed and crippled body that was never free from discomfort and suffering. For the next six years he was unable to attend school, but in the midst of all this bodily weakness he showed that same keenness of intellect that was so marked a characteristic of his later years. During this period he carried on his own independent investigations along chosen lines, until in many ways his mental equipment came to be

greatly superior to that of most young men of his age.

After a time he was able to do something in the way of study under private instruction, and at length to enter upon work at the Maine Central Institute, increasing the amount that he undertook, as his strength permitted. From this school he was graduated in 1900, having maintained a very high standing in all of his work. Few pupils have impressed themselves upon the school to such an extent as he. He was foremost in maintaining the boy's debating society, the Amicinian. No one worked so hard as he to make the school paper a success, and in public debate he easily distanced all competitors. This was not altogether due to his superior mental endowment. Much of it was owing to his indomitable energy and his strong desire to excel in whatever he undertook. He was never content with a moderate success.

During the year after he left this school he underwent a difficult surgical operation, in the hope that it might cure his deformity and enable him to stand erect as a man among men. The operation was successful, and how much its success meant to him no one can fully appreciate, but surely the next two years were to him the best part of his life. He saw before him a prospect such as in earlier years he had not dared to dream of as his own.

In the fall of 1901 he entered upon his course of study at the University of Maine Law School, which was interrupted by the brief illness that terminated in his death. While pursuing this course with his customary faithfulness, he found time to attend to other matters. The Young Men's Christian Association found in him an active supporter, and he became one of the most prominent and enthusiastic members of the Progressive Debating Society, organized by members of that association. In the Law School

fraternity, the Gamma Eta Gamma, to which he belonged, he was a worthy member and an efficient officer. He spared not himself when work was to be done.

His was a true and a noble life. The interest shown in him by those who knew him and their universal grief at his loss show how worthy of esteem and of love they found him. His life cannot fail to be an inspiration toward nobler living for all who came in contact with it.

'83.

Mr. Truman Patten of Glasgow, Montana, has been visiting his father, Mr. William Patten, of Hermon, during the past month. Mr. Patten was a student at the University of Maine in the class of 1883 and has been in the west since graduation. He is a large ranch owner, county surveyor and a citizen of great influence.

'88.

Mr. and Mrs. Fred L. Eastman of East Braintree, Mass., are receiving congratulations on the birth of a son, Arthur Fessenden Eastman, which occurred on January 22, 1903.

'89.

B. R. Clark and wife have recently received judgment for \$4,000 from the courts of Massachusetts for injuries received on the Lowell, Lawrence & Haverhill Electric Railway. Mr. Clark was represented in the case by L. C. Southard, class of 1875.

'90.

Albert Brown, manager of the Oldtown branch of the Eastern Trust & Banking Co., has retired from that position and accepted a position as manager of the Ounegan Woolen Co.

'95.

Melville F. Rollins of the engineering force of the Chicago, Milwaukee & St. Paul Railroad, is spending a two weeks' vacation with his parents, Mr. and Mrs. Roscoe G. Rollins of Third street, Bangor. Mr. Rollins is one of the engineers superintending the construction of the new railroad grade at West Milwaukee, work on which has been suspended owing to the cold weather.

'96.

The many friends and classmates of Frank J. Libby will be sorry to learn that he has been obliged to give up his position at Beverly, Mass., on account of illness. He is spending the time at present at his home in Richmond, Me., and owing to the serious nature of his illness will probably be there for several months. Address, Box 462.

'97.

Charles Henry Farnham, formerly assistant engineer on the Isthmian Canal Commission, has accepted a position as chief engineer on an important engineering project in China.

'98.

Elmer D. Merrill has recently made an extended tour of the Philippines. He has also visited a number of points on the mainland and neighboring islands, including Java and Singapore. Mr. Merrill is in the service of the United States Department of Agriculture with headquarters at Manila.

*The American Telephone Journal* is publishing a series of articles written jointly by Messrs. A. D. T. Libby and R. H. Manson of the University of Maine, and Mr. C. C. Simpson of Purdue University. These papers are based on a telephone thesis, the original text of which has been entirely revised and amplified, resulting in a detailed demonstration of modern common battery telephone practice.

'00.

W. C. Clark has a position in Texas on a survey conducted by the department of forestry.

'01.

Mowry Ross has given up his position at

Providence, R. I., and is now at his home in Woodstock, Conn.

Wales R. Bartlett has accepted a position as principal of the high school at Essex, Mass.

'02.

Edwin B. Ross has left the employ of the Katahdin Pulp & Paper Co. at Lincoln and accepted a position in the construction department of the General Electric Co.

Henry W. Kneeland has accepted a position with the Employees' Liability Assurance Corporation of London, with office in Dorchester, Mass. Address, 114 Erie street.

#### NEW BOOKS.

There were 295 volumes added to the library between November 24 and December 10. A considerable portion of these were historical, but engineering, pharmacy, mathematics, chemistry, civics, education, forestry, agriculture and literature, come in for a considerable number.

A partial list is as follows:

- |   |   |
|---|---|
| <p>Harc—Florence.<br/>         " Days Near Rome.<br/>         " Cities of Southern Italy and Sicily.<br/>         Charlevoix—History of New France, Vol. 5.<br/>         Am. Soc. Mech. ## LOCALS.

Be sure and remember that joke for *The Prism*.

E. W. Delano, '02, was on the campus January 25.

Pres. Fellows addressed the Cumberland County Teachers' Association at Portland, January 23. The subject of his address was, "The Responsibility of the Teacher."

Pres. Fellows was in Boston last week to attend the meeting of college presidents of Vermont, New Hampshire and Maine. This meeting was held at the University Club and its object was to devise some means of awarding the Rhodes scholarships at Oxford. George R. Parkin, agent of the trustees of the Rhodes will, was present.

The Women's Clubs of the State have petitioned the legislature to establish a chair of forestry at this institution. Dr. Fellows addressed a meeting of these clubs at Waterville, January 28, on the subject of Forestry. Prof. Munson also attended the meeting.

Upon recommendation of the student council the faculty have voted to punish certain stu-

dents for a first offense of cheating in preliminary examination, by excluding them from the final examination in that study.

Ira M. Bearce has been elected assistant business manager of THE CAMPUS in place of Roy M. Snell, who has been obliged to leave college on account of illness.

A large number of students are attending the dancing school conducted by Miss Ella Parker in the Town Hall, Orono.

Several new courses in Civics are offered by Prof. Rogers during the spring. Public Finance is one of the most interesting and valuable courses and it is expected that a large number will register for it.

Several members of the Law School have been taking advantage of the gym. during the past few weeks for a little baseball practice.

The physical department has received a great deal of new apparatus since last year and the laboratory course for sophomores during the spring term promises to be especially interesting.

Invitations are out for an informal dance to be given by Maine Alpha chapter of the Sigma Alpha Epsilon fraternity in the gymnasium on Friday evening, Feb. 20.

One of the most brilliant social events of the present season was held at the home of Pres. Fellows on Friday night, Jan. 16th, when a reception was tendered to the faculty of the University of Maine School of Law, and representatives from Orono and Bangor society. The rooms were very prettily decorated with palms, ferns and other green stuff. In the large dining hall refreshments were served by Miss Gladys's Fellows, Mrs. J. N. Hart, Miss Lord, and Mrs. Drew. Miss Rachael Jordan of Bangor, presided at the punch bowl. Among those present in addition to the members of the faculty were: Mr. and Mrs. C. Vey Holman, Mr. and Mrs. Abel Hunt, Rev. and Mrs. Ernest Hunt, Mr. and Mrs. Wilson Crosby, Dean and Mrs. W. E. Walz, Harry Ross, Mr. and Mrs. Charles Hamlin, Miss Rachael Jordan, Robert H. Jordan, Mr. and Mrs. Henry Lord, Miss Lord, Miss Hunt, Bangor; Mr. Eben Webster, Orono.

## Athletics

Your finals are over and whether you got "stuck" or passed, that feeling of uncertainty is over and you can breathe a little freer for a while, until Easter perhaps. Now the best way to enjoy good health, is to get out and exercise a little in the gymnasium. It will clear up that foggy feeling around the eyes and top of the head and make you think faster and better.

Now while you are getting a little exercise, why not try for some one thing in particular? The B. A. A. meet is soon coming off and it is still a question who will go to Boston. By the last paper, Tufts had out about thirty men. Who knows but what you might make the team if you worked hard and it will do you good to try.

There ought to be a number of good men out for basketball. We ought to have two good teams and give the first team lots of hard practice. Why not have some inter-class games and make some money for the athletic association? If the freshmen should challenge the sophomores, what a condition the sophomores would be in!

Already the other colleges are beginning to train for the track team for next spring, and we ought not to be behind. A good number are now out in the gymnasium but there ought to be thirty more. We have got to work if we win that meet this year, and we must put up a good fight for it. The time is past when the meet will be all in favor of one college or even two. Bates and Colby are going to come in for a bigger score this year and there will be more interest than ever before manifest. Come, get to work. The coach is in the gymnasium every afternoon, and is anxious to have a lot more at work. There are about a hundred more freshmen that ought to be doing something toward this work.

The men for the relay team are getting down to hard work under Coach Keane. Among the promising candidates that are trying, are Harris, Conner, '03; Perkin, Parker, Smith, '04; Thatcher, '05; Porter, Currier, Bailey, '06. Captain Harris is running even faster than last year and when he gets his strength back will move around in fast style. Thatcher and Smith are surprises this year, both men have speed and endurance without any limit apparently. Parker, who won the broad jump last year, is running very fast this year and will not be behind the best of them. The whole nine are very closely matched and the question as to who will go to Boston is still in doubt.

W. E. P. Fullam, '05, has left college.

The next basketball game on the campus will be Feb. 6th, C. C. I. vs. Maine.

Do the other fellow as he'll do you, and get your grinds into *The Prism* early.

The regular meeting of the executive committee of the athletic association will be held Monday evening, Feb. 9.

### The Fisk Teachers' Agencies.

EVERETT O. FISK & CO., Proprietors.

4 Ashburton Place, Boston, Mass.

156 Fifth Ave., New York, N. Y.

1505 Penn. Ave., Washington D. C.

203 Michigan Blvd., Chicago, Ill.

414 Century Building, Minneapolis, Minn.

533 Cooper Building, Denver, Colo.

622 Hyde Block, Spokane, Wash.

94 Seventh St., Portland, Ore.

518 Parrott Building, San Francisco, Cal.

525 Stimson Block, Los Angeles, Cal.

Send to any of the above agencies for Agency Manual. Correspondence with employers is invited. Registration forms sent to teachers on application.

## COTRELL & LEONARD

472 to 478 Broadway, Albany, N. Y.

MAKERS OF

### Caps, Gowns and Hoods

to Yale, Harvard, Princeton, Columbia, University of New York, Wellesley, University of Chicago, University of Michigan, University of Minn., University of Wis., Williams, Dartmouth, Amherst, Tufts, Trinity, University of Vermont, Johns Hopkins, Mt. Holyoke College, Bates, Colby, Bowdoin and others.

Illustrated Treatise, Samples, Measure Blanks, Etc., on Application.

Makers Under the New Inter-Collegiate Cap, Gown and Hood System.

GOWNS FOR THE PULPIT AND BENCH.

### To Young Men...

Young men think more about style than anyone else—but often they are not particular enough about fit—fact is the fit is the most important element of the style.

### Military Back with Padded Shoulders

is the great thing this year. We knew the young men would take to it and you can't embarrass us then for a minute. We've got them and are ready for the young man who wants the proper thing—

**Rough Fabrics, Cheviots, Serges, Worstedes in all the New and Snappy Patterns.**

*You are sure to find what you want here and we are always happy to serve the U. of M. Boys.*

## Standard Clothing Co.

14 West Market Square,

J. F. CROWLEY, Manager.

BANGOR, MAINE.
