THE MAINE CAMPUS

Vol. VII

ORONO, MAINE, FEBRUARY 13, 1906

No. 16

HYDROGRAPHIC BRANCH OF THE U. S. GEOLOGICAL SURVEY.

Owing to the rush and worry attendant upon approaching examinations, the report of the lecture delivered by Prof. Boardman before the Junior Civil Engineering Society, which appeared in the last issue, was not submitted for correction. For this reason several mistakes and mis-statements appeared, and THE CAMPUS takes this occasion to print a revised report of the lecture.

BEFORE the Junior Civil Engineering Society on Wednesday evening, January 24, Prof. Boardman delivered a lecture on various branches of government service which employ civil engineers, touching particularly the divisions of Hydrography, and Reclamation Service, of the Hydrographic Branch of the Geological Survey.

This service has been brought to the attention of Maine students during the last few years from the fact that it has offered employment to a considerable number both graduates and undergraduates.

Prof. Boardman spoke in part as follows:

The Geological Survey is divided into five branches: Administrative, Publication, Geologic, Topographic and Hydrographic. These branches are subdivided into different divisions, those of the Hydrographic being the divisions of Hydrography, Hydrology, Hydro-economics, and the Reclamation Service.

The division of Hydrography "measures the surface streams, studies their fluctuations, and determines the quantity of the water supply of

the United States. It is divided into two sections, eastern and western, the latter including the thirteen states and territories within which work is being done under the reclamation law."

The Reclamation Service originated under an act of Congress dated June 17th, 1902, providing for a fund "to be used in the examination and survey for and the construction and maintenance of irrigation works for the storage, diversion and development of waters for the reclamation of arid and semi-arid lands" in Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, N. Dakota, Oklahoma, Oregon, S. Dakota, Utah, Washington and Wyoming.

The Reclamation Service, although under the control of the Director of the Geological Survey, is not strictly a part of the survey. To carry into effect the objects of the law, an engineering corps, known as the Reclamation Service, was organized as a portion of the hydrographic branch of the Geological Survey in order to receive the benefit of the regulations and methods of that bureau.

By arid lands are meant the lands which are so dry and parched as to be totally unfit for the raising of crops. If this land could receive the rainfall of the semi-humid regions it would perhaps become fit for tillage and the raising of crops. Irrigation does for the land in these arid regions, what the rainfall does in the semi-humid regions. If we have such land together

with the ability to irrigate the same, we probably have a paying investment, for the warm dry climate, provided that enough water is at hand for irrigation purposes, is conducive to excellent crops.

The engineering corps which has been generally created to meet the needs of the service consists of well-trained and experienced men, selected through the Civil Service Commission.

In each of the thirteen states and three territories named in the reclamation law there are one or more district engineers. This district engineer has charge of the work in his district, and is directly under the chief engineer, or his deputies. Other engineers are assigned to the district engineer to take charge of various parts of the work, and under these come the assistant engineers and aids. The results and reports of investigations are carefully collected and digested by the district engineer, after which he makes up his report and recommendations concerning the "project" and sends the same to the chief engineer, who refers the question to a board of consulting engineers for their approval or disapproval. There are then three stages in the development of the project: first, that of exploration and location; second, that of designing, and third, that of construction.

In the second stage, provided the project passes the first, the district engineer has the help of engineers who are well versed in this particular line, and on the completion of the design it is approved by another board of engineers, after which, if it is approved by the Secretary of the Interior, it passes to the stage of construction. In general the work of the reclamation service consists of the investigation, design, and construction of storage reservoirs, dams, canals, ditches, tunnels, bridges, etc., with all attendant details.

During the past three years a number of our recent graduates, as well as some of the older alumni, have received appointment in this service and are scattered over the country. Structural and hydraulic engineering offer excellent opportunities to the young man on completion of his college course, and it would seem that, to the young man with "push" and the

determination to succeed, the reclamation service also offers opportunities fully as desirable. The principle under which appointments and promotions are made is "of getting the best men possible for the different positions, and of giving them every opportunity and encouragement to do good work. It must not be supposed that a man who passes the examination and is appointed has met the only requirement. This is but the beginning, and no man is kept in the service who fails to keep up to the standard set."

"All of the work in hand, especially that of reconnaissance and preliminary surveys, is, to a certain extent, full of emergencies. Countries partly explored or almost unknown are examined and unexpected contingencies are constantly arising. Opportunities must be seized and personal convenience must not be regarded. When floods occur they must be measured, and when the sky is clear signals must be observed even at personal sacrifice. For this reason heat or cold and times or hours of work can not be considered, and if any man in the regular service begins to complain of irregularities of hours of employment he is recommended for private occupation."

Hydrographic investigations by the Geological Survey were begun in 1888, the first appropriations for the work being made in 1894.

At the present time measurements of flow are being taken upon most of the principal rivers of the United States. There are six hydrographic districts, New England, New York, with the Great Lakes, Middle Atlantic States, Southern States, Central States, and the State of Texas.

The water powers of this State are counted among the finest in the United States, but until recently no systematic methods have been applied to the measurements of available power, except, perhaps, in isolated cases. The real work of measuring the stream flow began during the summer of 1901, and in 1903 the Legislature appropriated a definite amount for hydrographic investigation in Maine.

Besides the maintenance of about twenty gaging stations in Maine, where a study of the flow of the various rivers is carried on, the

United States Geological Survey is also carrying on other investigations in the State. These include the procuring of river plans and profiles, the investigation of storage possibilities, and experiments on the question of evaporation. The work of the Topographic Branch in making the topographic maps of the country should also be mentioned, although this branch of the Survey has not been discussed.

After the speaker had concluded his remarks, maps showing river profiles, plans, the topography of the country, etc., were passed around and a general discussion of the subject was carried on.

DR. HARRIS CHOSEN

Dr. Abram W. Harris, former president of the University of Maine, and present head of the Jacob Tome Institute at Port Deposit, Md., was elected president of Northwestern University on Friday, Feb. 2.

Northwestern university is one of the leading institutions of learning in the country. To be tendered the presidency of such an institution is a magnificent compliment to Dr. Harris, who has long ranked as one of the foremost educators of the east.

Dr. Harris was president of the University of Maine from September, 1893, to December, 1901, and during his administration that institution made rapid progress. After he severed his connection with the University, Dr. Harris went to Port Deposit, Md., where he assumed the directorship of the Jacob Tome institute, one of the most heavily endowed and prominent secondary schools in the country. This school has flourished under Dr. Harris' direction and general regret, both among the students and governing officials will be felt at Dr. Harris' departure to Northwestern University.

As president of the university, it is understood that Dr. Harris will receive a salary of \$10,000 a year. While at Jacob Tome he has received about the same amount, but it has long been understood that he has been desirous of entering university work, preferring it to a secondary education.

ABOUT DR. HARRIS

Dr. Abram Winegardner Harris was born in Philadelphia, Nov. 7, 1858, being the son of James Russell and Susan (Reed) Harris. He was graduated from Wesleyan University, Middletown, Conn., in the class of 1880. For several years afterwards he was director of experimental statistics in the office of the department of agriculture at Washington and he has prepared many scientific and administrative documents for the United States government.

In 1890, Dr. Harris married Miss Clara V. Bainbridge of Philadelphia and they have one son, Abram W. Harris, Jr.

Dr. Harris has received the honorary degree of Sc. D. from Bowdoin college, and LL. D. from the University of New Brunswick and the University of Maine.

NORTHWESTERN UNIVERSITY

Northwestern University is located at Evanston, Ill., although several of the graduate departments, including law and medicine are in the city of Chicago. The institution was organized in 1851 and is under the control of the Methodist Episcopal church. The university has 302 instructors and a total enrollment of 4007 students in all departments. The graduates number 9819, not including last June's class.

COLLEGE MEETING

At a college meeting held in the chapel Tuesday morning the conditions and the prospects for a successful season in baseball were clearly set before the students.

President Banks of the athletic association spoke a few words concerning the baseball season soon to open. Other speakers were Prof. Jones, captain Frost and manager Haywood of the baseball team. In a few words they told what was expected of the students, and the necessity for having a large squad of men out for practice. Captain Frost made a call for men to begin light "gym" work preparatory to cage work which began Feb. 12, when coach Butman arrived.

Contributions from undergraduates and alumni are earnestly solicited. They should be addressed to the Managing Editor.

EDITORIALS

We regret to announce the resignation of R. S. Sherman, '06, from THE CAMPUS board.

A few years ago an attempt was made to establish an honor system at the University.

The movement was made by a few **Cribbing.** right minded students who were anxious to see the idea adopted. The plan was placed before the student body and after consideration the majority of the students decided not to adopt the honor system.

"Cribbing" is a detestable practice. It is not only plain stealing, it is worse than that. A

man who deliberately steals anything generally involves only himself. It is vastly different when a man steals his rank in college. He involves not only himself but his professors; he gives them a false idea of his worth and when he is sent out into the world with a falsely earned diploma and recommendations that he has no right to have from his professors and is shown to be deficient, he then throws discredit upon his University.

Few of us look at "Cribbing" in this light, some have come to regard it as rather a smart trick, provided a man is not caught and simply as hard luck if he is. Honor in certain things among a part of the students at this University has fallen away below par and the simple reason is that they have become lax in their ideas. When a man enters college he does not come with the idea of stealing his way through by the use of another man's brains; as a general thing he has never done any "cribbing" in preparatory school. He has not been here long however, before he realizes the attitude of a part of the student body toward "cribbing" and he is very liable to fall into the habit of receiving and giving help in his examinations, especially if the subject be a difficult one. In fact he has sacrificed his honor, the one thing that he should hold most dear.

We are no longer children, nor are we hardened criminals that we must be watched by a police force in the guise of the faculty during our "prelims" and examinations. We are men striving for an education, striving to gain something by which we may lift ourselves a little above the ordinary. We will soon be out in the world. People will look up to us as college graduates and will expect more from us. How are we going to win this respect? Surely not by stealing our way through college.

We have come to the time when the student

body must take some definite action in regard to "cribbing." We cannot go on from year to year, sacrificing our honor, having a few men expelled who happen to get caught, and others going free who are as badly involved as the men who were punished. It is giving the University a black eye and we, her loyal supporters, must take some immediate action to prevent her further disgrace.

The first issue of the *Blue Book* has appeared and has proved itself most satisfactory in every department. The University needs such a publication and we sincerely hope that it has come to stay. When the idea of a literary paper was first suggested many of the prime movers thought it would be very difficult to procure sufficient advertising matter to insure its publication. This idea was advanced on account of the numerous University publications, and the constant call upon the merchants in the vicinity, for advertising matter. This difficulty, however, has been overcome, and the business manager has demonstrated his ability in that line.

It was taken for granted that the students would give it their financial support and when a canvass was made nearly three hundred agreed to subscribe. Arrangements were made to place the subscription of one dollar upon the term bill. Imagine the surprise of the business manager when he found that only one hundred students had paid for their subscriptions, the others that had agreed to take the *Blue Book* had refused to pay when it appeared on their term bill.

Evidently there is some misunderstanding among the majority of the students. In order for the *Blue Book* to continue its existence it must have better financial support from the

student body and now is the proper time to rectify this error. Those who have not already paid in their subscriptions should do so at an early date.

The editors of the 1907 *Prism* certainly deserve a word of praise for the excellent work that they have done on this year's publication. Several times during past years the book has been issued so late in the spring term that money has been lost, and the only way to clear up the debt has been by assessing the members of the class that published the book. Last spring term when the present editors were elected it was decided that the book must be issued during Junior week. Work was commenced on the book immediately and it has not lagged for an instant.

At the present time all of the half tones and the greater part of the copy to be used in the publication are at the office of the printer who is doing the work on the book. At this time last year only a part of the half tones were in a condition to be used and the long wait for them caused the delay on the 1906 *Prism*. In fact this year's *Prism* is much farther advanced than the book of last year was at this time. It is perfectly safe to say that the 1907 *Prism* will make its appearance during the coming Junior week.

The chemistry department of Harvard has recently installed one of the latest types of liquid air machines.

One hundred colored students at Talladega College left college recently, because a southern white man was employed as superintendent of the college farm. Among the strikers were several females. Talladega is a co-educational institution for negroes and has an enrollment of over 1000.

THE BOSTON ALUMNI MEETING

A REPLY TO A RECENT NEWSPAPER ARTICLE

THE annual meeting of the Boston Alumni Association was held at the State of Maine Club, Feb. 3rd, and was a particularly pleasant occasion. About fifty alumni were present, and the speakers were Hon. L. C. Southard, '75; W. F. Garcelon, Esq., an alumnus of Bates; J. Colby Bassett, Esq., an alumnus of Colby; President Fellows, Professor Woods, Professor Jones and F. J. McCoy.

The first three speakers are the alumni representatives of Maine, Bates and Colby, on the Maine Intercollegiate Athletic Board, and by agreement between themselves they spoke in regard to Bowdoin's continued refusal to become a member of the Board. This topic seemed to strike the newspaper men present as good stuff, for somewhat sensational stories with lurid headlines appeared in the Sunday papers, although the extracts from the speeches which they quoted were fairly accurate. These extracts are published in another column.

Not one of the speakers threw any mud at Bowdoin, but each of them is convinced that Bowdoin's attitude in regard to the Board is unfortunate for the athletic situation in the State, and each of them hopes that in some way the older alumni of Bowdoin and those who live far enough away from Brunswick and the coterie which administers its athletic affairs will be aroused to see the advantages that would be brought by a change of policy.

It is an instructive fact that since the Board was organized, in 1902, no one of the institutions belonging to it has questioned the eligibility of any player on the teams of the other members of the Board, while during this period all of them have had sufficient evidence to convince them that at least three men whom Bowdoin has allowed to play were ineligible under the rules which the Bowdoin Athletic Associa-

tion has itself adopted. The success of at least two Bowdoin teams was in large part due to the presence of these men. Success may be worth such a price to Bowdoin, but it must not complain at having to pay the bill.

The screed in the *Kennebec Journal* of Feb. 6th, in the guise of a "special" from Bowdoin served its purpose of permitting some sufferer from wounded feelings to relieve his lacerated susceptibilities, but it is really more humorous to anybody who knows the facts than its writer intended. While THE CAMPUS has no desire to engage in any controversy or to say anything to cause irritation between undergraduates at Maine and Bowdoin, we do feel that some of the implications of the communication referred to, when given the publicity that appearance in the columns of the *Journal* permits, call for some reply even at the risk of adding to an irritation whose existence every right feeling student should deplore, whether he be at Maine or Bowdoin. The sooner the students at Bowdoin can get it through their heads that the Maine Intercollegiate Athletic Board is not a combine or an attempt at a combine, but an organization to promote friendly athletic relations, the better it will be for athletics at Bowdoin.

Bowdoin College is entitled to the reputation it has for age and the prominence many of its alumni have attained, as well as to the feeling of satisfaction these pieces of good fortune carry with them, but Bowdoin men should not fail to recognize the fact that when those men in whose reputation they take such pride were undergraduates, Bowdoin College was very much inferior in endowment, equipment and the training of its faculty to any of the other Maine colleges as they are to-day. This little oversight by Bowdoin men never fails to produce a quiet smile from alumni of the other colleges, when the enthusiastic Bowdoin man allows him-

self to revel so luxuriantly in the glories of the past.

That Bowdoin has eligibility rules of its own is not questioned by anybody, and that most of them are enforced is not denied, but it is certainly true that when Cox and McGraw were allowed to represent Bowdoin in athletics, it was against the spirit if not the letter of a rule which was in the constitution of the Bowdoin Athletic Association, and it is also true that neither of these men would have been allowed to represent either of the other three colleges of the State. However unpalatable this may be to Bowdoin men, they must take the medicine they prepared for themselves. The Bowdoin correspondent of the *Journal* forgot (?) to mention this rule among the others to which he pointed with such pride, and all of the others, except the scholarship requirement, are identical with those proposed by the Maine Intercollegiate Athletic Board, adopted by all the colleges belonging to it, and finally, after considerable hesitation, by Bowdoin.

The scholarship requirement at Bowdoin was not adopted until several years after the University of Maine faculty had made pretty rigid scholastic rules, and Bowdoin is to be congratulated upon its wisdom in finally recognizing the necessity for this action on its part.

The "higher requirements" myth ought to be relegated to the place where exploded traditions go. For many years Bowdoin prided itself on its refusal to admit by certificate, but it now accepts certificates from exactly the same institutions as Maine, and is certainly understood by preparatory school students generally, to be no more rigid in accepting them. It is also thoroughly understood by the fellows preparing for college that the entrance examinations to Bowdoin are no more difficult to pass than those of Maine. Every year sees some men entering Bowdoin by transfer from other colleges, with full credit for their entrance requirements and for their advanced work, and it has been suspected occasionally that the Bowdoin students themselves were glad to receive them there, either these requirements and work are fairly equivalent to those of Bow-

doin, or, — but any alternative is wholly incompatible with the high standard Bowdoin so strenuously waves aloft.

Any man who says the other three Maine colleges have ever combined against Bowdoin in any agreement or league is ignorant of facts or deliberately falsifies. The truth is simply that after allowing Bowdoin to dictate to them for a period of years, each of the others decided to issue a declaration of independence. After waiting years for Bowdoin to take the lead in clearing up the athletic situation, which on account of its prestige it might naturally be expected to do, they finally decided to go ahead by themselves, and let Bowdoin, if she would, trail along behind the rest of the procession. If Bowdoin is willing to continue in this position, it must of course be permitted to do so.

That wonderful athletic record which is never allowed to be forgotten through any false modesty of Bowdoin men ought to be a great consolation to them, for the record of the years during which the present generation of undergraduates was in college is not one about which so much is heard. But ancient history will be recalled for some years longer, probably, until Maine or some other college has the audacity to win victories enough to balance those won in the way back days when Bowdoin had everything its own way.

The *Journal* correspondent says Bowdoin is entitled to fair play. So it is, but it is also under obligations to play fair. It makes a difference in which way the words are arranged. All that the other Maine colleges want is clean athletic contests by men who are fairly entitled to play. The Maine Intercollegiate Athletic Board has demonstrated its usefulness in promoting this. Bowdoin's refusal to become a member is a refusal to meet the other colleges on this plane, and no spacious argument to the contrary can alter this fact.

Ten Harvard student patrons of the Harvard Dining Association are in the hospital sick with diphtheria. The authorities do not fear an epidemic.

BOSTON ALUMNI MEETING

(Boston Sunday Globe.)

The athletic relations of Maine colleges was the chief topic of the after-dinner speakers at the annual banquet of the University of Maine Alumni Association of Boston, held last evening at the State of Maine club on Ashburton place.

Bowdoin college, which is not represented on the Maine intercollegiate board of arbitration, was referred to several times, and was criticised for her attitude, although nothing but praise for Bowdoin's high standing was uttered by the speakers.

Will R. Howard, '82, presided and seated at the head table with him were these principal guests: William F. Garcelon, a graduate of Bates and Harvard and graduate director of athletics at Harvard; J. Colby Bassett, a graduate of Colby; Louis C. Southard, an alumnus of the University of Maine; Frank J. McCoy, a Yale graduate, and a former member of the Yale 'varsity' football team; Dr. George E. Fellows, president of the University of Maine; Prof. Ralph K. Jones, representative of the faculty of the University of Maine on the athletic association and Prof. Charles D. Woods, director of the Maine experimental station and a member of the faculty of the University of Maine.

Messrs. Garcelon, Bassett and Southard constitute the arbitration board of the Maine Intercollegiate Athletic Association.

Mr. Southard was the first speaker and during the course of his remarks said:

"As an out-growth of this idea of promoting friendship among the colleges, Bates, Colby and Maine in 1902 established the existing 'Maine intercollegiate athletic board,' its purposes being to promote friendly competition in athletics between the various Maine colleges, and to adjudicate any controversies between them which may be referred to it for settlement.

"Much to their regret, Bowdoin college declined to be bound by any eligibility rules, or to refer her athletic differences to the board of arbitration, and this position she has maintained up to the present time.

"Games with Bowdoin are not played under intercollegiate rules and are not therefore, strictly speaking, championship games. Neither does a protest against the eligibility of Bowdoin's players have any binding effect, for the reason that she is not legally subject to any agreement which would prevent her playing the rankest of time servers on any team; and there is no tribunal before which she can be brought, whatever the offence. Protest, therefore, serves only as notice that her breach of amateur college etiquette is observed although no advantage can be taken of it.

"This condition of things has become widely known in the college world, and there is no question but what Bowdoin college and its reputation has and is suffering from what is looked upon as unsportsmanlike conduct.

"It is a harsh, but unfortunately true criticism to say that the only college in Maine to which 'ringers' can safely go and be permitted to play on its 'varsity' teams is 'good old Bowdoin,' one of the oldest institutions and one for which we have the highest veneration and respect. Colleges, however, like men, cannot live on the reputations of their forefathers, and the very admiration which we have for Bowdoin's past, makes our present regret more keen."

Mr. Garcelon, the next speaker, said:

"Mr. Southard has referred to Bowdoin's unwillingness to join us in our agreements regarding eligibility of players and settlement of disputed points.

"Although we partisans do not admit it, Bowdoin is looked on by the public as the best college in Maine. At least it is the oldest and boasts of a line of most illustrious graduates. No one denies Bowdoin authorities the right to determine themselves who shall play on their teams and the right to insist on having their way when disputes arise with the other Maine colleges. It may not, however, always be fair.

"When all is said, we must all admit that we'd rather win from Bowdoin than from any one else, and frequently we are willing to waive our rights for the sake of taking a whack at her. There, at least, she has the advantage of us in negotiations.

"It being her privilege to stand by herself and to determine who shall play on her teams, the question arises whether in dealing with the other Maine colleges she should meet them on equal terms.

"Any definition of true sport which attempts to classify players is not a fair one. You have had and we have had professional baseball players on our teams who have exercised as true sportsmanship as any one could.

"When a man goes into a game because he likes it and loves it, and is not paid for it, he is a true sportsman, even if he did last summer or the year before play for money.

"The spirit of true sportsmanship does not, however, allow one to take an unfair advantage of another. Without saying that Bowdoin may not have good reason for her attitude, toward this intercollegiate association, I do say that in her contests with Maine colleges she should conform to the same rules that govern them as to eligibility of players.

"Maine, Colby and Bates have joined forces to eliminate disputes between the colleges and to encourage the spirit of cordiality and friendly rivalry among them. The attitude of Bowdoin, whether it be the 'holier-than-thou' kind or an indifferent one, should be changed."

The third speaker was Mr. Bassett, who said:

"Professionalism is a disease. In the atmosphere of professionalism true athletics cannot live. When a college man goes into professional athletics he not only prostitutes himself, but brings back an element which is bound to prove fatal in the end.

"Another thing we should be careful of is excesses excessive indulgence and excessive interest in the games.

"Then there is the financial question. However, we may laugh at good tainting anything it does have a disastrous effect which throws its shadows across the athletic field.

"The alumni can play a strong hand, which will remedy those evils should they arise. The only thing that will make contests successful is to cultivate the spirit of fair play. In my opinion the Bowdoin question is going to work out its own salvation. Bowdoin, if she continues

those conditions which we think prevent fair play is bound to suffer to such an extent which will bring her around and make her see our ideas."

Dr. Fellows was next called upon and said:

"I believe most firmly in the future of Maine as an industrial, commercial and educational proposition.

"Nothing can be accomplished except by co-operation. Entrance requirements have been agreed upon by a getting together of the four colleges of the State. That would seem to have worked a disadvantage to the University of Maine. It did for one year. The effect, however, has been so good on the whole State that every college, so I am informed, had larger freshmen classes than ever. We last year had the largest entering class in the history of the University of Maine.

"Conditions now exist in Maine which are going to make that state develop in the next 25 years as rapidly as any of the western states, and the University of Maine must do its share.

"Interest in the agricultural college seems significant, as it shows that the people who are working on soil are anxious for its development and the future of the State.

"Student life is becoming richer. Clubs which enter into the intellectual life are as active as though representing social life. There is promised a development of the literary side of the college such as was never seen before."

At a business meeting preceding the dinner these officers were elected: Samuel D. Thompson, '01, president; Frank H. Bowerman, '00, vice president; Walter N. Cargill, '00, secretary and treasurer; Hon. L. C. Southard, '76, Will R. Howard, '82, and William B. Pierce, '90, executive committee.

Joseph Hunter will be the first graduate coach at Northwestern University next fall, to replace Walker E. McCormack, the former Dartmouth and Exeter coach, who coached Northwestern last season. Authorities at the Methodist institution say that they will probably never have a professional coach again.

MUSICAL INTERESTS

BANGOR CONCERT.

For a number of years past the University has held high rank by reason of the excellence of its musical clubs which represent it. This year is no exception, but seems to add to the already high reputation. The concert given in Bangor City Hall, Friday evening, Feb. 2, under the auspices of the Universalist Young People's Society, was one of the great successes that have been achieved by the clubs, and as far as attendance was concerned, it was the greatest. The correspondent of the *Bangor Commercial* has the following to say:

"The annual concert by the University of Maine Musical clubs, under the auspices of the Universalist Young People's Society, in City Hall, Friday night, was a distinct success, being attended by the largest crowd on any similar occasion for a long time. More than 1000 people attended the concert and applauded the good work of the clubs. The concert was followed by the usual dance for which Pullen furnished music, the floor being covered with dancers until midnight, when the last waltz was played."

This was the program:

PART FIRST

Marching Song—Up and Away! *Geibel*
 With a readiness, a steadiness, we march our way
 along,
 While for liberty, fraternity, we sing a happy song.
 On to victory! our battle-cry shall ever, ever be,
 For we love the land, our native land, the home of
 brave and free.
 The trumpet sounds at break of day;
 We hear the call, yes, we obey;
 For here no longer may we stay,
 When duty calls we march with galliant tread,
 We march on to the fray.
 Up and away, up, away!
 Ah! peacefully resting, when the wrong is righted,
 Thankful to heaven for the victory;
 Soon with our loved ones we'll be reunited,
 And ever grateful be for glorious liberty.

Hab you heard de story ob de Sandman tole a-right?
 How he bring his bucket full ob sand on eb'ry night?
 When de little pickaninnies safely am in bed,
 He do come an pat you on de head;
 An' when you look up at him full ob great surprise,
 He frow the sand into your eyes,
 An' den he go erway until an udder day;
 An' bless you, honey, you am sound asleep!
 De Sandman, when de hour am late,
 He will come, as sure as fate,
 An' will frow de sand from out his hand;
 So doan you make a fuss or cry,
 Else he pass you by.

Fill Your Steins.....*Mittell*

There's a cure for all manner of ill, lads,
 And it never was known to fail;
 'Tis a flagon filled up to the brim, lads,
 Of home-brewed ale!
 Fill your steins! 'Tis a boon to a fellow,
 For a thirst, to be sure, is no sin,
 And this ale, with old age good and mellow
 Is a-waiting for us to begin.
 Heigho! Heigho! then put aside your sorrow,
 'Tis time for that tomorrow,
 And take a cup, and drink it up,
 Of good old home-brewed ale!
 To the health of wives and sweethearts,
 We'll quaff 'till break of day,
 And homage do, to old home-brew,
 And drink our cares away!

Stein Song *Colcord, '07*

Fill the steins to dear old Maine!
 Fill as the rafters ring!
 Stand and drink the toast once again!
 Let every loyal Maine man sing.

Then

Drink to all the happy hours,—
 Drink to the careless days!
 Drink to Maine, our Alma Mater,—
 The college of our hearts always!
 GLEE CLUB

Especial note should be made of the excellent work of the instrumental clubs; also of the play-

MUSICAL CLUBS, SEASON 1905-6.

ing of James Maxwell. Mr. Maxwell is a Bangor boy, and in the place of Mr. Sprague, the former 'cello soloist of the clubs, delighted his many Bangor friends by his excellent playing, which was one of the most pleasing features of the concert program.

UNIVERSITY ORCHESTRA.

Never was the time when the musical organizations of the University flourished as they do at present. By constant and conscientious work on the part of the members of the orchestra, they have reached a point of perfection where they can supply a demand for any class of work.

They have played at several dances during the past few weeks, and nothing but praise can be said of their work, and it is safe to say they will improve rapidly in places where this improvement is necessary.

On the other hand, those in charge of affairs where the services of an orchestra is required, should not be slow in recognizing the value of the orchestra, and should encourage it by their increased patronage.

SPECIAL CHAPEL MUSIC.

Seldom is a more pleasing solo given in the Chapel than that of Mr. Frank Lane of Bangor, who sang, "My Redeemer and My Lord," by D. Buck. Mr. Lane has a rich and powerful voice, and he had no difficulty in filling the entire Chapel, a thing which many of the Chapel soloists seem unable to do with ease.

Y. M. C. A.

The topic of the meeting on Wednesday evening was "What the Y. M. C. A. Stands For," reference Rom. 12, 1-21. R. S. Sherman '06, led the meeting. The topic for Feb. 14 is "Our General Orders," reference John 12, 7 and 17; M. R. Lovett '06, will be the leader. The topic for Feb. 21 is "What Bible Study Does for a Man," reference Ps. 19; L. J. Reed '07, will lead the meeting. The topic for Feb. 28 is "Purity," reference Prov. 7, 6-27; H. L. Churchill, '06; the president of the association will lead the meeting.

MAINE 27, COLBY 18

In a lively and exciting game of basketball, Maine won her first college victory from Colby, Saturday evening, Feb. 3. The game started in with a rush, and was clean and fast from beginning to end. The Maine supporters were surprised at the great improvement which the team made in the last few weeks, for at times their team work and passing were so excellent that they fairly took the Colby five off their feet. Colby sent over a snappy team but their weak point was in basket shooting.

Immediately after the game started, Libby of Colby threw a basket, and was awarded a third point for interference in the attempt. However, Colby fouled twice in succession and Burke threw both baskets for Maine. Then Maine took a spurt and Elliott threw two baskets, making the score Maine 6, Colby 3.

Soon after Libby scored the last point for Colby in the first half, and then Owen and Elliott proceeded to get in some good work, scoring one basket each. Colby fouled, but Burke missed the goal. By some clever signal work, Owen succeeded in caging the ball and immediately after, Scales followed his example. Colby fouled again, but Burke failed at goal and the half ended with the score in Maine's favor, 14 to 5.

In the second half the honors were about even, partly because two new Maine men played a portion of the half, and partly because Colby made a remarkable spurt. By some quick passing, Burke scored and Scales followed with another. About this time Colby got busy, and Willey increased Colby's score by two points. Both sides fouled, but neither threw the goal; and then, with the aid of good team work, Burke scored two points for Maine. It was then Colby's turn to do a little scoring, and two baskets by Willey and McClellan brought up Colby's score four points, making the standing Maine 20, Colby 11.

At this point Stuart took Burke's place. Owen and Scales kept up the good work for Maine, adding one basket each. Then Morrison replaced Capt. Owen and immediately

after Willey tossed one in for Colby. In a short time Black succeeded in making a long throw for a goal, which was followed by another basket by Libby. Two double fouls gave each side a point and Colby scored one more point on a foul by Elliott just as time was called.

There was a large attendance at the game and many enjoyed the dancing afterwards.

The lineup and summary :

MAINE	COLBY
Scales, r f	1 g, Libby
Owen (Morrison), 1 f.....	r g, Willey
Black, c	c, MacClellan
Burke (Stuart), r g.....	1 f, Hammond
Elliott, 1 g.....	r f, DeWitt

Score—Maine 27, Colby 18. Goals from floor—Owen 3, Scales 3, Burke 2, Elliott 3, Black, Willey 3, Libby 3, MacClellan. Goals from fouls—Willey, Scales, Burke, 2. Referee—Bliven of Bangor. Scorer, Cram. Timer, Emerson. Time 20-minute halves.

MAINE 3, O. T. H. S. 2

On Saturday evening, Jan. 27, the girls basketball team of the University of Maine played their first game with the Old Town High school girls in the University gymnasium. Considering that this is the first time that the "Maine" girls have had a team, and also that it was their first game, they did very well. The two teams were evenly matched and their honors were about even. At times the old Town girls showed themselves more skillful in passing, but they usually lost the ball before they got near enough to the goal to shoot; while the Maine girls kept the ball in Old Town's territory the most of the time, and made several close shots at the basket.

During the first half, no baskets were thrown, but Old Town threw two goals from fouls, while Maine threw only one, leaving the score at the end of the half: Old Town 2, Maine 1. In the second half, the Old Town girls fouled several times, but Maine failed to throw the goals. About the middle of the half, Miss Balentine threw a pretty basket—the only one thrown during this game—which won the game for the Maine team. Miss Wakefield played the best game for Maine and ran the team well.

The lineup and summary :

MAINE	OLD TOWN
Aiken, r f }	1 b, Hinckley
Mansfield, r f }	
Webber, 1 f }	r b, Mishou
Chase, 1 f, }	
Wakefield, c.....	c, Keith
Jones, r g.....	1 f, Davenport
Balentine, 1 g	r f, Brown

U. of M. 3, Old Town High 2. Referee, Howell. Umpire, Marshall. Time-keeper, Stevens. Scorer, Elliott.

BASKETBALL NOTES

At the first part of the season there was some doubt about the standing of our basketball team. Only Capt. Owen remained from last year's 'Varsity and prospects were very slim for a winning team; but by hard and constant work Capt. Owen has now got a team which we are not ashamed to put against any college and which is one of the best in the history of the University. That the team is constantly improving, was shown by the excellent exhibition of passing and team work shown at the Colby game at Orono.

There was an article in the last issue concerning the need of men out to rub down the basketball players after practice. Notwithstanding this there has been no noticeable increase in the number of men. It should be taken into consideration by the sophomores especially that the assistant manager for next year is picked from these men and is usually the one who shows the most interest. Here is the chance for prospective candidates.

It might be said at this time that there is yet a need of more men for the second team, and besides two substitutes are still to be picked for the Massachusetts trip. In order for the first team to get in good practice, there must be fast men to play against. There is a chance for men to get in line for next year and also an excellent opportunity for the freshmen and Sophomores to start in training for their respective class teams.

SECOND ASSEMBLY

The second in the course of University assemblies was held in the University gymnasium on Friday evening, Feb. 9. The affair was one of the most successful events of the college year and served as a grateful relief after the hard toil of examination week and registration.

The hall was very prettily decorated by the fraternities with couches and Maine flags. The reception committee consisted of Mrs. Belcher, Mrs. Lieb, A. G. Bennett, '06, and G. C. de Colligny, '06.

The committee in charge of the assemblies certainly deserve a word of praise for their excellent management of these affairs. Special cars have been provided both to and from the University, and everything connected with the assemblies has gone off with a certain smoothness that has shown perfect management.

THE MECHANICAL AND ELECTRICAL SOCIETY

The regular meeting of the Mechanical and Electrical Engineering Society was held on last Wednesday evening at half past seven in Room 1, Alumni hall. The speaker of the meeting was Mr. A. B. Larcher, one of the chemical engineers with the paper mills at Great Works. Mr. Larcher graduated from Worcester Polytechnic Institute in 1890, and has devoted much of his time since then to the subject of electrolysis, and particularly to the perfection of the Diaphragm Cell, an electrolysis cell used to obtain chlorine from brine.

In a very interesting talk, Mr. Larcher told of the many methods in use at the present time for the electrolysis of brine, and then gave a detailed description on the construction and operation of the new Diaphragm Cell. He claims for this cell, which he has only recently brought to a stage of commercial practicability, several very great advantages over the cells in use at the present time. Perhaps the greatest of these is the fact that it will utilize to advantage a

current varying in strength from 1500 to 3000 amperes, while those in use at present cannot utilize over 500 amperes. This means a greatly increased capacity of a plant, with regard both to floor space and time. The construction of the cell is simple, a wood containing vessel with a cement bottom, in which a graphite anode is separated from a steel cathode by a curtain composed of several thicknesses of asbestos. The operation of the cell is such that all corrosive products are automatically disposed of, making the deterioration of the cell a minimum. This, with the low cost of manufacture, and the ease with which broken parts may be replaced are other advantages urged in favor of the Diaphragm Cell.

In addition to a large majority of the members of the Mechanical and Electrical Society present, the meeting was also attended by many from the Civil and Chemical Societies.

NEW CATALOGUE OF UNIVERSITY OF MAINE OUT

The annual catalogue of the University arrived Monday, Jan. 29, and is now being circulated. The general appearance of the book is somewhat altered this year by a change in cover and cover design which gives it an added appearance of neatness and durability. The text of the catalogue is of much the same nature and arranged in the same order as that of the last edition with several minor improvements, additions and changes.

A much larger section than hitherto has been devoted to the summer term and the experiment station work and equipment is outlined more fully than in former editions of the catalogue. Some interesting points are gathered together in the summary at the end which show rather forcibly the strong rapid growth of the force of students and faculty. The faculty statistics show the number of professors, instructors, lecturers and assistants to be 71. These are divided up in the following manner: College of Arts and Sciences, 34; College of Agriculture, 34; College of Technology, 39; College

treas

of Pharmacy, 28; Agricultural Experiment Station, 11; College of Law, 14.

The total number of students is shown to be 611. These are divided up in the following manner: Graduate students, 12; seniors, 74; juniors, 113; sophomores, 81; freshmen, 131; short pharmacy, first year, nine, second year, four; special students, 49; school of agriculture, first year, seven, second year, five; summer term, 60; short agriculture, 82.

In the classification by counties several interesting points are developed. Androscoggin, Aroostook, Hancock, Kennebec, Piscataquis, Somerset and York counties sent nearly the same number of students, their standing being 27, 25, 24, 26, 24, 27, 28, respectively. Penobscot naturally leads with a big majority there being 133 students registered from this county. The next in number of students is Cumberland with 47.

DATE FOR JUNIOR WEEK

The week of May 21-26 has been chosen for Junior Week. It is hoped to give an informal dance in the gymnasium on Monday night. Tuesday will be devoted to the Junior Exhibition and Ivy Day exercises. Three baseball games and the tennis tournament will be held the latter part of the week. It is the idea of the committee to hold a spread after the Bowdoin game. Of course there will be the Junior Promenade and the Junior spread, the crowning events of the week. Then there is the concert by the Glee Club, held indoors and the outdoor band concert.

DEBATING CLUB OFFICERS.

At a meeting of the Debating Club held on Feb. 8, the following officers for the year were elected: president, A. P. Rounds, '07; vice-president, R. L. Mitchell, '08; secretary and treasurer, H. M. Ellis, '08.

LOCALS

At chapel to-morrow (Feb. 14), Professor Lentz and J. D. Maxwell will play a 'cello duet.

A dancing party was given on Tuesday evening, Feb. 6, by the Sigma Alpha Epsilon fraternity.

A. W. Gilbert gave a talk on "Agricultural Research at the Present Time," before the Agricultural Society on Wednesday evening, Feb. 7.

The members of Rho Rho Chapter of Sigma Chi Fraternity, will be at home to their friends on Wednesday evening, Feb. 14, from eight till ten.

Prof. Tower of the department of Forestry, is confined at the home of Instructor Davis in Orono, with an attack of scarlet fever. Mr. Davis and his family are also quarantined.

The town of Orono may have a Carnegie library. Correspondence has been held with Mr. Carnegie's secretary and if the proper conditions can be obtained in Orono the library will follow.

At the beginning of this spring term the drill hour was changed from 4.30 P. M. to 11 A. M. This time is much more agreeable to all concerned, as it gives the entire afternoon to be devoted to laboratory work or drawing.

Prof. Woods gave a very interesting lecture before the Twentieth Century Club in Bangor on Feb. 6. His subject, Food and Nutrition. The lecture has caused a great deal of favorable comment and has been copied into several of the state papers.

There was a large attendance of students at the minstrel show given in the town hall on Feb. 5. Music was furnished by the college orchestra. Among the students participating were C. W. Reynolds, P. A. Drew, W. M. Hinkley, J. N. Jewett, W. H. Burke and N. H. Mayo.

An offer has been received from the Bowker Fertilizer company by the college of agriculture of a prize to students in the school course in

agriculture. The prize consists of one-half a ton of Stockbridge fertilizer and is awarded to the student writing the best essay on fertilizer.

As the CAMPUS went to press on Saturday morning, we were unable to give an account of the B. A. A. meet, the Colby game and several other events of importance that happened on Saturday night. A full account of these events will be given in the next issue.

President Fellows is a very busy man at this particular season. During the past two weeks he has attended alumni meetings in Boston, Pittsburg, New York City and Schenectady. Last week he addressed the Normal School in Farmington and spoke before the Twentieth Century Club in Bangor:

Students are reminded of the next lecture which comes on Thursday, Feb. 15. It is given by Professor Chase on the "Home of Our Pre-historic Ancestors." The lecture after this, coming on Feb. 23, by Mrs. A. W. McGee on "A Woman's Experience in the Japanese Army," will end the series of lectures for the year.

On Feb. 20, a meeting will be held in Orono to discuss plans for a good roads rally in the town. Several of the faculty and students are interested in this movement. This will mean a great deal to the University and will give the town of Orono an opportunity to start in a great industrial movement that has been so successfully carried out in several of the states.

BATES BASEBALL SCHEDULE

April 24. Boston College at Boston.
 April 25. Harvard University at Cambridge.
 April 26. Tufts College at Medford.
 May 5. Bowdoin College at Brunswick.
 May 9. University of Maine at Lewiston.
 May 23. Open.
 May 30. (Exchange game) Bowdoin at Lewiston.
 June 2. Boston College at Lewiston.
 June 6. Colby at Waterville.
 June 9. Colby at Lewiston.

A trip is being planned for April 18 and 19, as follows:

April 18. Phillips-Exeter.
 April 19. Phillips-Andover.

LAW SCHOOL NOTES

Justice Emery of the Supreme Judicial Court of Maine has just finished a very interesting and instructive course of lectures at the Law school on "What to do in Court and How." The applause which the Justice received from the students on his appearance and especially at the end of his last lecture, shows the high esteem in which he is held by the whole student body. A stenographer was employed to take Justice Emery's lectures, and it is planned at present to have them typewritten. Among those attending the lectures were President Fellows, Dean W. E. Walz, Prof. A. E. Rogers, Messrs. Simpson and Fletcher of the faculty; F. H. Purrinton of Yale, W. V. McLean, '05, A. S. Crawford, '05, and many of the practicing attorneys of Bangor.

At a meeting of the students last Thursday, Mr. J. P. Dudley was elected manager of the baseball team for the present year, and a fine schedule is promised.

PRESS CLUB WORK.

Some may wonder, when they hear the notice read in chapel of the meeting of the Press Club every Saturday morning, what this club really is and what it is doing.

The Press Club is composed of those students who write for newspapers and keep the people of the State informed of the news of the University. On every Saturday morning there is a meeting in Coburn Hall, in which all the news items are given out, and the members work them up into articles for the papers. This offers a very good opportunity for correspondents to get hold of the news. Arrangements have been made by which students can get credit for this work in their course.

The work of this club is of great importance to the University. It is keeping the people of the State interested in the students and their work, and constantly in touch with the institution. It is a very effective means of advertising and a great many more students are needed to write for the different papers of the State.

CHANGES IN FOOTBALL.

The new football rules committee held a very important meeting in New York on Saturday, Jan. 27. Below are given the recommendations adopted. It is expected that further changes in the game will be made at the next meeting of the committee, to be held Feb. 10.

Any man back of the snapper-back shall be allowed to make a forward pass provided the ball is not passed beyond the line of scrimmage or to a player who is in the line of scrimmage when the ball is put in play. Six men shall always be on the line of scrimmage. The five centre men shall always be in the line except that one of the centre men may drop back at least five yards. In this case another man shall take his place on the rush line. Not more than six men shall be on the line of scrimmage on the defence, the balance to be clearly behind the feet of all the linemen and inside the men on the end of the rush line. There shall be no tackling below the knees except by the men on the line of scrimmage for the defence. Of these, the men occupying the positions on the ends of the line of scrimmage cannot tackle below the knees. Hurdling the line is prohibited. Definitions of what shall constitute hurdling will be formulated later.

Players shall be disqualified for striking with fists or elbows, for kneeling and kicking. Any deliberate injury of an opponent shall be punished by disqualification for the remainder of the game. A substitute shall be allowed at once. It is further recommended to the colleges and universities that their faculties pass rules that shall provide that any player upon being disqualified the second time in a season shall be declared ineligible to play football again within a year. In addition to the penalty on a player for deliberately injuring another player his team shall lose half the distance to its own goal line. Unnecessary roughness shall include: (a) Striking the runner with the ball in the face, with heel or hand on the defence. (b) Meeting with the knee. (c) Striking the runner with the locked hands by linemen breaking through. (d) Tripping. (e) Tackling

the runner when out of bounds, and all other acts of unnecessary roughness. The penalty of these acts of unnecessary roughness shall be the loss of fifteen yards. Unsportsmanlike conduct shall include the use of abusive or insulting language to opponents or officials. The penalty for such offence shall be suspension for the remainder of the game. This is different from disqualification, and such punishment does not affect the standing of the player regarding any future game. It shall be the duty of all officials to observe and penalize for the above offences.

This much was done regarding the definition of holding. Players on the team having possession of the ball shall not hold, block or otherwise obstruct opponents, except with the body, but the player running with the ball may ward off an opponent with the hand. Holding, warding off or obstructing shall include: (a) Grappling with the opponet with the hands. (b) Placing hands upon an opponet to push him away from the play. (This rule will be further defined at the next meeting.)

Neutral—In a scrimmage the holder of the ball shall place it flat upon the ground and put it in play with its long axis at right angles to the line of scrimmage, and until the ball is put in play, no part of any player except the man who puts the ball in play, shall be ahead of the point of the ball nearer his own goal. The ten-yard rule was passed, without, however, any action as to the number of downs that shall be allowed a team to make the distance in. The matter of the number of downs will be taken up subsequently. It shall be the duty of the referee to impose penalties for violating any rule enforced by any official. There shall be four officials— one referee, two umpires and a linesman for each important game. In games of minor importance the second umpire may be dispensed with by mutual consent.

As a result of Columbia's returning to the old Intercollegiate Fencing Association the schedule of this organization has been thrown into disorder. In the fall Columbia withdrew and the schedule was arranged without her.

ALUMNI

'82

Dr. J. H. Patten, of Amherst, Me., is mentioned as a Republican candidate for State senator from Hancock county.

'89

Dr. Jerry Ferguson represented his Alma Mater at a recent Immigration Conference held in New York City.

'78

J. C. Patterson of St. Paul, Minn., has recently been appointed assistant chief engineer of the Great Northern Railroad. Mr. Patterson has been with the Great Northern for several years, and his promotion to this office, which was created for him, came as a recognition of his valuable services to the company.

'96

F. E. Weymouth has an important position in the United States Reclamation Service, and is located at present at Glendive, Mont.

LAW SCHOOL, '02

Hon. V. A. Putnam of Danforth, Me., is slated as the Republican candidate for State senator from Washington county in the next election. Mr. Putnam is a young lawyer of great ability, and has been very active in county politics since his graduation.

'03

R. M. Connor is at Glendive, Montana, in the government Reclamation Service.

'05

The Reclamation Service seems to be a popular field with '05 men. The following members of that class are now in the Service at Glendive, Mont.: C. W. Bowles, A. J. Hayes, L. H. Mitchell, F. W. Talbot and F. T. Crowe, ex-'05.

Harvard's prospect for lacrosse the coming season is very good. The candidates will begin indoor practice soon. There is some prospect of a trip for the team to the South.

MILITARY HOP

Upon the sixteenth of this month comes the military hop, one of the big dances of the college year. All arrangements for it have not been completed as yet, but one is safe in saying that it will be one of the best if not the best military ball ever given at the University.

The full college band will furnish the music, and only those who have danced to band music can realize how much this means. The chapel and gymnasium will be decorated as never before. During the intermission refreshments will be served.

The freshmen in the battalion have done better than usual in purchasing tickets for the hop, but so far the upper classes have not responded very well. As only a limited number of tickets are to be sold outside of the battalion any non-military man who desires to secure a ticket had better do so as soon as possible.

On the committee having charge of the hop are Major Wallace, Capts. Worcester and Glover, Lieuts. H. G. Philbrook and Erskine.

THE DEBATING CLUB.

At the last regular meeting of the Debating Club, Daniel Chase '08, was elected manager of the club. As it is impossible to have a debate with Bates this year, Mr. Chase has written to Boston University in regard to an intercollegiate debate, but they also will not be able to meet us this year. Letters have also been written to Bowdoin and Colby, but no reply has yet been received from either.

The election of officers for the rest of the year took place at the meeting of the club Thursday evening. The following question was discussed, Resolved: that the present system of excluding a man from examinations on account of absences should be abolished. The speakers for the affirmative were A. P. Rounds '07, and A. E. Tremaine; and for the negative, C. N. Garland '07, and F. J. Simmons.

MONDAY, FEB. 19.

- 2.30-4.30 P. M. Track practice in gym.
7.00 Basketball practice in gym.

We are unable to publish the musical rehearsals for the week, as they had not been made out when THE CAMPUS went to press.

BASEBALL SCHEDULE FOR 1906

Manager Hayward announced the baseball schedule on Feb. 5. It is one of the most attractive schedules of recent seasons. Two trips are arranged for out of the State and the usual games will be played with the Maine colleges. No game could be arranged with Yale this year.

Maine has not played Wesleyan for three years, when she defeated them badly. The return game with the Massachusetts Agricultural College is new to the Maine list.

THE SCHEDULE.

- April 11. Harvard at Cambridge.
April 12. Mass. Aggies at Amherst.
April 14. Phillips-Exeter at Exeter, N. H.
April 16. Norwich University at Northfield, Vt.
April 17. University of Vermont at Burlington, Vt.
April 18. University of Vermont at Burlington, Vt.
April 21. Coburn Classical at Orono.
April 26. Ricker Classical at Orono.
April 28. Bowdoin at Brunswick.
April 30. Tufts at Medford.
May 1. Harvard 2nd at Cambridge.
May 2. Wesleyan at Middletown, Ct.
May 5. Maine Wesleyan at Orono.
May 9. Bates at Lewiston.
May 10. Tufts at Orono.
May 16. Colby at Orono.
May 19. M. I. A. A. meet at Lewiston.
May 23. Bowdoin at Orono.
May 24. Mass. Aggies at Orono.
May 26. Bates at Orono.
June 2. Colby at Orono.

AMONG THE COLLEGES

Harvard and Cornell will row on the Charles river May 26.

Ralph Glaze of Dartmouth, will probably play with the Boston Americans this season.

Trinity has received the sum of \$6000, the income of which is to form a scholarship.

Amherst takes a western trip the coming baseball season, playing Illinois, Chicago and Wisconsin.

Harvard has played only one intercollegiate game of hockey on the Stadium rink this winter, that being with Brown during the past week.

Rev. Thomas E. Murphy was recently installed in the presidency of Holy Cross. He succeeds Rev. Fr. Joseph F. Hanselman, who held the position for five years.

The president of the intercollegiate golf asso-

ciation is this year a Chicago man. This shows how the association is expanding especially toward the West.

In the interclass fencing tournament at Harvard, the Juniors came off the victors. The captain of the Junior team won the individual championship.

A new game has been invented at the North Adams, Mass. Y. M. C. A. Association. Football is played indoors on the gym floor without any modifications in the rules.

Among the changes in football proposed by the "big nine" of the West, the coaches must be a member of the faculty and no student who has ever received an academic degree is eligible to play on the teams.

There is much discussion over abolishing professional coaches at Yale and other questions pertaining to the present condition of athletics. This present controversy has extended over quite a period of time.

Michigan University Senate decided unanimously to retain "Hurry Up" Yost as football coach despite the results of the Chicago conference. Also the suggestion to drop the game for two years met with a decisive defeat.

"Tom" McCarthy, for the past two years Holy Cross baseball coach, has been engaged to coach the Dartmouth team the coming season. McCarthy played for fifteen years on the Boston Nationals. Candidates will be called out about March 15.

A STUDENT DIRECTORY

Football—Manager, E. W. Philbrook; captain, J. H. Burleigh.

Baseball—Manager, G. E. Hayward; captain, W. O. Frost.

Basketball—Manager, H. H. Hoxie; captain, G. S. Owen.
