THE MAINE CAMPUS

Vol. VIII

ORONO, MAINE, FEBRUARY 12, 1907

No. 16

MAINE-BATES DEBATING ASSOCIATION.

In the last issue of the CAMPUS there was published an account of the convention of delegates from the University of Maine and Bates College Debating Clubs, for the purpose of drawing up an agreement between the two associations whereby an annual debate shall be held between the sophomore classes of the two institutions. After careful consideration of the existing conditions, a set of rules was draughted which will govern the debates between the sophomore classes of Bates and Maine as long as such agreement shall remain in effect. We are pleased to publish the agreement, which is as follows:

ARTICLE I.

SEC. 1. The purpose of this agreement is to conduct debates between the Sophomore Class of Bates College and the Sophomore Class of the University of Maine.

ARTICLE II.

TIME AND PLACE.

SEC. 1. A debate shall be held annually, as long as this agreement shall be in effect.

SEC. 2. The first debate shall be held in Lewiston during the month of April, 1907; the day of the month to be determined by agreement between the two competing institutions; successive debates shall be held alternately at Orono and Lewiston, the month and day to be decided upon by the two institutions.

ARTICLE III.

THE QUESTION.

SEC. 1. The question shall be submitted by the institution where the debate is to be held.

SEC. 2. The question shall be sent at such a time that it shall be received by the institution to which the question is being submitted at least ten weeks before the date of the debate.

SEC. 3. The institution to which the question is submitted shall make a return of its choice of sides so that the same shall be received within ten days of the receipt of the question.

SEC. 4. The question shall not be similar to one that has been debated by either institution during

the period that the participants have been in college.

ARTICLE IV.

THE JUDGES.

SEC. 1. The institution submitting the question shall submit at the same time, therewith, a list of not less than twenty men proposed as judges.

SEC. 2. This list shall not contain the names of men who are graduates of, or in any way connected with either two of the competing institutions.

SEC. 3. The institution receiving this list, shall return therefrom the list of all names of men who are acceptable, and the order in which such are returned is the order in which they shall be asked to serve.

SEC. 4. The names shall be returned at the earliest possible date, and in any event, not later than that date on which is returned the choice of sides.

SEC. 5. It shall be the duty of the institution at which the debate is to be held to place the following set of instructions in the hands of each judge before the debate.

INSTRUCTION TO JUDGES.

DEAR SIR:—As you have kindly consented to act as one of the judges in the coming debate, the Intercollegiate Debating Association begs leave to submit to your consideration (1) the following statement of facts relative to these debates, and (2) the following instructions as to the basis on which the award ought, in the judgment of the Association, to be rendered.

1. Each college with its competitor, selects alternately, the question to be debated and sends the formulated question to its opponent, leaving to its opponent the choice of sides. The side which either college team need not, therefore, represent the prevalent trend of opinion in that college, nor even the individual opinion of the debators.

2. The Intercollegiate Debating Association is agreed upon the general principle that the award should not be made upon the merits of the question, but upon the merits of the debate; that is to say, consideration as to what may seem to a judge the intrinsic merit of either side of a question should not enter into or determine the award; but the award ought to be made to that college team which evinces in general, greater argumentative ability, and better form as speakers.

3. The Association is agreed that in determin-

ing argumentative ability, the judges should take into consideration through knowledge of the subject, logical sequence, skill in selecting and presenting evidence, and power in rebuttal; and that in considering the form of the speakers as distinguished from their arguments, they should regard bearing, quality of the voice, correct pronunciation, clear enunciation, ease and appropriateness of gesture, and directness, variety and emphasis in delivery. Without attempting to assign exact valuation of these various elements, the Association is agreed that between the two, matter is more important than form; and that should one team excel in matter, and another to an equal degree in form, the award should go to the former.

Lastly, the Association ventures to suggest to the judges that upon withdrawing after the debate to make their decision, they cast a written ballot (before consultation) in order thereby to obtain a working basis from which a final decision may be reached. Should there be doubt in the mind of any judge as to the purport and intent of these instructions, the Association suggests that the judges meet just before the debate with a representative of each college, and that in this conference an attempt be made to overcome any difficulty connected with the interpretation of these instructions.

ARTICLE V.

SEC. 1. The use in debate of private correspondence is debarred.

ARTICLE VI.

TIME OF SPEECHES.

SEC. 1. Each speaker shall have twelve (12) minutes for his main speech and each speaker shall have five (5) minutes for his rebuttal.

SEC. 2. The negative shall lead in rebuttal.

SEC. 3. The two alternates shall act as time-keepers.

ARTICLE VII.

EXPENSES.

SEC. 1. The expenses of the debate shall be borne equally by the two competing institutions.

SEC. 2. The following items shall be considered as expenses: Railroad mileage, board and lodging of three debaters, one alternate and one coach, the expenses of three judges and the cost of printed programmes.

ARTICLE VIII.

SEC. 1. This agreement shall go into effect as soon as it is ratified by the debating associations of the two institutions.

SEC. 2. This agreement shall be properly ratified when the presidents of the debating associations, the presidents of the sophomore classes and the in-

structor in argumentation in the above named institutions have subscribed their names thereto.

SEC. 3. This agreement shall continue in effect as long as relations between the two institutions are mutually satisfactory.

ARTICLE IX.

SEC. 1. In case of disagreement in regard to the carrying out of this agreement, the presidents of the two classes concerned shall act as a board of conciliation, and they shall devise the methods and means of settling the controversy.

ARTICLE X.

SEC. 1. The instructor of argumentation in each of the the above named institutions shall hold this agreement, and each year bring it to the attention of Sophomore Class.

ARTICLE XI.

SEC. 1. These rules may be amended by mutual agreement.

R. L. MITCHELL, Pres. Debating Society.

J. W. GERRITY, Pres. Sophomore Class.

W. E. PRINCE, M. A., Inst. in Argumentation.

(U. of M.) Signed.

H. M. DAVIS, Pres. Debating Society.

R. G. PAIGE, Pres. Sophomore Class.

A. K. SPOFFORD, Inst. in Argumentation.

(Bates) Signed.

The question which has been proposed by the Bates Debating Association as a subject for the first debate is: "Resolved, That the annexation of Cuba to the United States is desirable, provided it represents the general wish of the Cuban people."

The list of judges proposed for the debate is:

Prof. R. C. McCrea, Bowdoin College.

Supt. H. C. Morrison, Supt. of Schools of New Hampshire.

President White, Colby College.

Rev. Smith M. Baker, Portland.

Rev. David N. Beach, Pres. Bangor Theol. Sem.

Ex-Gov. Henry B. Cleaves, Portland.

Mayor Nathan Clifford, Portland.

Hon. C. A. Hight, Portland.

Hon. L. L. Hight, Portland.

Hon. W. J. Knowlton, Portland.

Hon. J. W. Symonds, Portland.

Hon. Geo. M. Seiders, Portland.

Hon. Richard Webb, Portland.

Hon. W. L. Putnam, Portland.
Hon. C. F. Woodward, Bangor.
Hon. F. J. Martin, Bangor.
Hon. O. D. Baker, Augusta.
Hon. L. C. Cornish, Augusta.
Hon. Herbert Heath, Augusta.

NEW BOOKS BY MAINE GRADUATES.

The first two numbers of *The Publishers' Weekly* for 1907 record the publication of new books or new editions of books by four University of Maine men. Professor C. B. Benjamin, '78, is the author of two, *Machine Design*, published by Henry Holt & Company, and *Modern Machine Tools*, published by E. P. Dutton & Co. Professor Benjamin was a Patten boy, and after he completed his work at the University was Instructor and then Professor of Mechanical Engineering here, but resigned in order to go into practical engineering work. For some years he has been Professor of Mechanical Engineering at the Case School of Applied Science in Cleveland, where he has an opportunity to combine professional work with his teaching. He is among the leading engineers of the country, and is regarded as standing above all others in matters relating to smoke consumption and prevention. He is author of a number of other books on engineering subjects, several of which are popular as text books in engineering institutions, and is a frequent contributor to leading technical journals.

Building Construction and Superintendence, by the late Frank E. Kidder, '78, a Bangor boy, has gone into an eighth edition, showing a continuing demand. This is a two volume work published by William T. Comstock. Dr. Kidder was one of the leading architects of the country, living in Denver for some years before his death. He wrote a number of other books, among which are the *Architects and Builders' Pocket Book*, now in its fourteenth edition, by far the most popular handbook for architects, and *Churches and Chapels*, a most valuable work on the topics it covers.

The Feeding of Animals, by Whitman H. Jordan, '76, published by The Macmillan Company, has gone into a fourth edition. Dr. Jordan was a native

of New Gloucester. He became Professor of Agricultural Chemistry in the Pennsylvania State College and upon the establishment of the Maine Agricultural Experiment Station in 1888 was chosen its director. Upon the death of Professor Balentine, he became Professor of Agriculture also. When the New York State Experiment Station, the largest and most important Agricultural Experiment Station in the country, found it necessary to select a successor to Dr. Sturtevant, ten years ago, the choice fell upon Dr. Jordan. He is one of the most sought for speakers upon scientific agriculture.

The Macmillan Company have issued a second revised edition of *Rocks, Rock Weathering, and Soils*, by George P. Merrill, '79, curator of the department of geology of the U. S. National Museum. Dr. Merrill is regarded as the leading authority of the country upon building stones. He was a native of Auburn, and is a brother of Professor L. H. Merrill, chemist in the Maine Agricultural Experiment Station. He has a son who is a member of the senior class at the University of Maine who is taking biology for a major subject, and a daughter in the junior class. Dr. Merrill has written other important books on stones, and gems, and allied subjects. He was an editor of the *American Geologist* for some years.

The coincidence of the publication of these books by so many University of Maine men at practically the same time, with the character of the books themselves, and the various lines of practical value upon which their authors are engaged, is a striking commentary upon the work the University has done and is doing through the graduates who have gone forth from it in ever increasing numbers.

The movement emanating from the University of Maine, and looking to the formation of a State Forestry Association, is a step in the right direction and should have the active encouragement of business men and citizens generally. Of supreme importance it is that our forests be preserved, and all who have at heart the welfare of the state should enroll themselves among the membership of the organization soon to be perfected.—*Industrial Journal*.

Contributions from undergraduates and alumni are earnestly solicited. They should be addressed to the Managing Editor.

BANGOR CO-OPERATIVE PRINTING COMPANY

EDITORIALS

The CAMPUS wishes to announce that H. L. Farwell, '09 and F. D. Knight, '09, have been elected to serve on the editorial board as associate editors.

The CAMPUS calls the attention of the students to the fact that Prof. Jones has placed the exchanges received by the CAMPUS, in one of the small rooms on the second floor of the Library. From now on, the exchanges will be placed in this room every day, and it is hoped that the student

body may take an interest in the publications received from other institutions.

Now that examinations are over, let us consider. It is now, perhaps, more than at any other time, that we realize what

Examinations failure or success really means.

If we have met success through luck, let us take warning; if success comes as the result of faithful work, there is surely reason for personal satisfaction.

In the case of failure, we must not become discouraged, but let this failure be the incentive for greater efforts. Those who receive the highest marks are not always the most successful after graduation. It is the student who learns to apply and think for himself while in college that the business man seeks.

The student body as a whole, deserves to be congratulated on the fact, that during the entire examination period, no student has been obliged to leave on account of "cheating." This is much better than if every student had passed all his examinations but at the cost of losing several on account of dishonest work.

There seems to be considerable misunderstanding among the members of the Junior and Sophomore classes concerning the **Physical Exercise** physical exercises required of these two classes this term. The CAMPUS does not intend to assume a stand either with the students or faculty but it seems well to offer just a warning.

We must realize that as students, we are bound to follow the rules instituted by the faculty and for that reason, must be careful not to take any hasty steps. In many instances, it is difficult for the students to return at 4.30 in the afternoon, and it seems as if the same con-

ditions are again presented, as was the case when military drill came at 4.30 in the afternoon.

There seems to be another feature which makes the work seem a hardship for some. Those who live in Orono maintain that they receive sufficient exercise by walking back and forth to college twice every day.

If there is a decided feeling among the fellows that there is an unjust requirement placed on the two classes in question, we would advise that a committee be selected to meet a similar committee from the faculty, and then if there seems to be reasons for a change, no doubt one can be made.

Possibly those living away from the Campus might certify to a certain amount of walking done each day, and in this way lessen the amount of required drill.

SUPPORT OF COLLEGE ACTIVITIES.

In other issues will be found appeals for both the moral and financial support of some of our many college activities. It seems advisable here to say a few words of a general nature which can be applied to all our organizations, athletic, social, musical, etc.

There seems to be at present a lack of co-operation on the part of the entire college in many of our undertakings. Requests of one kind or another requiring attendance at meetings are not responded to as they should. Our Y. M. C. A. membership numbers sixty out of a student body of 700; and of these sixty, only ten or fifteen turn out to meetings. Our publications are not supported as they should be.

Men prominent in their respective professions are brought here to lecture to us on all that is new and important in their business, by the different professional societies, and a meagre attendance is often the result.

These circumstances are not due to an entire disregard on the part of some, but rather because

all except a few do not realize the amount of work necessary to keep things going. We do not believe that there is a man in college who condemns any organization. On the other hand they all commend such as are for the advancement and good of Maine. But everyone should realize that he is one of those who make Maine a University, and that everything done for his college is incidentally for his own good. Surely a man should not hesitate to work for anything which is for his own good.

The few who realize the amount of work necessary to keep a thing alive or to institute some new activity, are those who are behind it and working for it. It is a regrettable circumstance that a few are behind all the activities. These few have all they can do and more too.

To you, reader, we would say that there is work for you along some of our many lines. Do not wait for the next man but put your superfluous energy into doing your Alma Mater good in one line or the other. Remember that the successful college man is the one that not only does justice to his studies but who does something besides. However small that may be it will all help.

The following clipping from the *Bangor Daily News* is an excellent argument why the University ought to receive the support of the State, and we ask every reader to give the article careful thought.—ED.

THE STATE AND THE SCHOOL.

Until men shall become as gods and "know good from evil" the duty which the civic corporation called the State owes to the public in giving an advanced education will never be known, or if known, it cannot be fixed accurately by enactment. At times there seems to be an undue amount of prejudice against the University of Maine on the part of certain men who have graduated from the older and more wealthy literary schools and colleges. In no case is this adverse feeling so strong that it cannot be overcome by reason. In the mind of the average man there exists a feeling that whenever an idea is advanced that shall be for the greatest good of the greatest number—as soon as this idea is recognized, it will prevail.

Not until after the close of the Civil war has a college education been within the reach of the masses. Before that date the young men who went

to college were either the sons of well-to-do-parents, or they were backed by ample financial help or they went in debt so deeply that their future careers were hampered greatly. These early days of the twentieth century hold out greater hopes for the poor boy than any previous time. More than this, the tendencies of the times are toward specialization in studies. Instead of bestowing a vague and unnegotiable asset called culture upon its graduates, the modern college gives the power of earning money and of wresting secrets from nature.

The modern tendency is toward technical education, toward the acquirement of abilities to win in the fight for existence. The old-time literary colleges keep right on teaching the classics, and are finding greater encouragement than previously; and while Bowdoin and Harvard are producing lawyers and clergymen and educated gentlemen for every profession, the more youthful technical schools are moulding the raw material from the farm, the workshop and the factory into a shape that fits the graduates for earning money and for fighting battles for overcoming the adverse influences of nature. Instead of crippling the literary colleges, the new technical schools are no more than widening the field of usefulness and extending the boundaries of liberal education beyond the exclusive reach of the very rich or the very fortunate.

It is a fact that we must admit with shame that our own country is far behind the nations of Europe in matters of technical education. Until within the past 20 years, when the graduate of an American college wished to fit himself for a technical occupation—if he desired to learn chemistry or engineering or forestry or mining—he was compelled to spend three years or more in some German or French university. Even now, under national encouragement to technical education, American students spend something like a million dollars a year in foreign universities. But the liberal courses which have been added to Cornell and Yale and Columbia and similar colleges, are tending to diminish this drain upon American capital, and by so doing are enabling more students to avail themselves of courses that were hitherto beyond their reach.

The question for the Maine legislature to decide is whether the people of Maine can afford to let the useful and energetic and promising school at Orono languish and fall behind in the gallant struggle it is making. For there is no shame in confessing that the University of Maine is poor—distressingly poor, when compared with other higher institutions of learning. And though poverty is no crime, it is often very annoying. Unless Maine aids this deserving school with substantial support for several years to come, the University will be made to suffer

greatly, and for no sin of its own. Maine has donated wild lands and made valuable concessions to the older colleges; and having set the precedent, there is no reason why the Orono school should be made an exception. The fact that the older railroads of Maine had received grants of wild lands to enable them to finance their lines led the Maine legislature to grant ample and continuous subsidies to the newer railroads after the wild lands were all gone. And, shall our State be less liberal to its colleges than to its railroads?—*Bangor News*.

MEN UNDERGRADUATES OF MAINE COLLEGES.

Of the 871 men undergraduates in the University of Maine and the three colleges of the State, the University has 384, Bowdoin 229, Bates 166, and Colby 92. This means that the University has 44.1 per cent., Bowdoin 26.3 per cent., Bates 19 per cent., and Colby 10.6 per cent.

The University has more men undergraduates than the three colleges together in six counties—Hancock, Penobscot, Piscataquis, Waldo, Washington and York. It leads in the number from four other counties—Kennebec, Lincoln, Oxford and Somerset. It stands second in five—Androscoggin, the home county of Bates, Aroostook, Cumberland, the home county of Bowdoin, Franklin, and Knox. It stands third in one—Sagadahoc, and fourth in none.

The four counties in which the University and the colleges are located—Androscoggin, Cumberland, Kennebec, and Penobscot—have together 417 men undergraduates, or about 48 per cent. of the total. Of this number, Maine has 43.9 per cent., Bowdoin 28.3 per cent., Bates 19.9 per cent., and Colby 7.9 per cent. If the home county is omitted and the other three added together, Maine has 112, Bowdoin 49, Bates 30, and Colby 13, showing that Maine has more than the others together.

Of the 107 men undergraduates from Penobscot, Maine has 71, or 66.4 per cent. Of the 86 from Androscoggin, Bates has 53, or 61.6 per cent. Of the 139 from Cumberland, Bowdoin has 69, or 49.6 per cent. Of the 76 from Kennebec, Colby has 21, or 27.6 per cent. Maine has over four-fifths as many students from Cumberland as Bowdoin,

almost two-thirds as many from Androscoggin as Bates, and more from Kennebec than Colby. Bowdoin has less than a third as many from Penobscot as Maine, Bates less than a tenth, and Colby a bare twelfth.

Of its 384 men undergraduates from Maine, the University has 71 from Penobscot, or 18.4 per cent. Of its 229, Bowdoin had 69 from Cumberland, or 20.1 per cent. Of its 166, Bates has 53 from Androscoggin, or 31.9 per cent. Of its 92, Colby has 21 from Kennebec, or 22.8 per cent.

These comparisons show that the University has an attendance of men undergraduates from Maine almost equal to the three colleges together; that it has more students than the three together in six counties and more than any other in four more, while it stands second in five of the remaining six; that it holds the students from its home county better than any of the others, while at the same time the percentage from outside the home county is larger than that of any of the others.

Maine has 94 men undergraduates from outside the State, Bowdoin 59, Bates 54, and Colby 23. The University has 80.3 of its men undergraduates from Maine, Colby has 80 per cent., Bowdoin has 79.5 per cent., and Bates has 75.5 per cent.

BOSTON ALUMNI BANQUET.

The Boston alumni of the University of Maine held its 16th annual banquet at the hotel Bellevue, Saturday evening, Feb. 2. Dr. George E. Fellows, president of the University, Hon. Louis C. Southard, '75, of Brookline, Hon. William T. Haines, '76, of Waterville, Me., Prof. H. S. Boardman, '95, a member of the faculty committee on athletics and Prof. George E. Gardiner, formerly dean of the Law School, but now at Boston University, were the guests of the occasion.

From 6.30 until 7 o'clock, the members and and guests held an informal reception. This was followed by a brief business meeting, at which the following officers were elected: W. N. Cargill of Lynn, president; W. B. Pierce of Beverly, Vice President; E. R. Berry of

Lincoln, Secretary-Treasurer; L. C. Southard of Brookline, E. O. Goodridge of Melrose, and J. H. Steward of Boston, executive committee.

Dr. Fellows and Mr. Southard spoke in regard to the new appropriation. Dr. Fellows said in part:

"I have thought of nothing, dreamt of nothing and fought for nothing but this appropriation during the last three months. On December 30 of last year, the University was absolutely without funds to pay the bills until the State appropriated something. This has been the condition year after year, and the \$20,000 allowed annually for the institution is ridiculously inadequate.

"It is not the other colleges, Bates, Bowdoin and Colby, that are opposed to the University getting the appropriation, but men who represent themselves as being from these colleges.

"If we agreed to drop giving the degree of bachelor of arts we would get our appropriation, but we will not give up this custom."

Dr. Fellows said that the enemies of college wished to make it an agricultural college alone, but that since the State had founded the college, it was bound to stick by it and maintain it properly. He told of the poor condition of the buildings and said that the facilities were extremely inadequate. Figures were read which showed that Maine was far behind other states of the Union in the support of the University which bears its name.

Among those present were:

Dr. Geo. E. Fellows, C. L. Howes, H. S. French, Fred L. Eastman, W. R. Howard, Wm. C. Holden, A. L. Grover, Louis C. Southard, W. F. Robinson, A. W. Sprague, Harvey A. Davis, E. J. Haskell, S. D. Thompson, Edward R. Berry, E. E. Palmer, Elmer O. Goodridge, E. A. Sturgis, Frank H. Bowman, Eugene I. Folsom, James W. Elms, Shirley P. Graves, W. N. Cargill, Walter Herbert Foster, Frederick D. Southard, B. H. Chatto, Wales R. Bartlett, J. A. Tyler, W. H. Atkinson, I. G. Calderwood, E. W. Danforth, William Nelson, Gothard W. Carson, E. E. Small, Wm. B. Pierce, A. R. Saunders, John W. Owen, L. E. Fessenden, Leon E. Ryther, C. L. Foubert, W. C. Elliott, Dr. Ralph K. Smith, J. A. Tyler, Geo. I. Bouden, B. M. Thomas, W. B. Alexander, Merton R. Lovett, Ames Bertram, Geo. H. Steward, Pease Irving, H. P. Downing.

MAINE WINS FROM COLBY.

In the basketball game played in Orono, Jan. 26, between University of Maine and Colby, Maine pulled off rather an easy victory by the score of 39 to 13. It was a great satisfaction to Maine enthusiasts, and especially to those who witnessed the game, for a cleaner, more lively contest was never seen in Maine's gymnasium. It was the most important home game of the season, and one whose result the Maine supporters were none too confident. The players themselves were determined to win, and throughout the game they put up an exhibition of basketball that was a delight to witness.

Colby also put up a good game and perhaps on her own floor she will be able to give a better account of herself than she did here. On the whole, however, it looks as if Maine has a better team. Coach Phelan is certainly handling the men in good shape, and an improvement in general team work can be seen at every game.

The line-up:

MAINE.	COLBY.
Scales, rf.....	rf, Dodge
	Peterson
Wadsworth, lf.....	lf, Libby, (Cp)
Black, c.....	c, Goode
Stobie, rg.....	rg, Tribou
Stuart, lg.....	lg, Tilton

Final score: Maine, 39, Colby, 13. Goals made by Scales, 10; Wadsworth, 4; Black, Stobie, 4; Libby, Dodge, 2; Tilton. Goals from fouls: Wadsworth, Tilton, 5. Referee: Gilbert. Scorers: Torrey, U. of M; Peterson, Colby. Timers: Quint and Totman, U. of M. 20 min. halves.

A dance followed the game and music was furnished by the University of Maine orchestra. Both game and dance were much better attended than usual, and this was very gratifying to the management.

MAINE VS. BREWSTER ACADEMY.

Quite a large crowd of people saw the University of Maine defeat Brewster Academy here in the gym, Saturday evening, Feb. 2, by the large score of 40 to 11. Brewster came down here

from Wolfboro, N. H., with the reputation of having one of the fastest prep. school teams in New England and there is no doubt but that she has when the team is in good condition. But two games on Friday, one with Colby and the other with Coburn Classical Institute, had lamed the Brewster boys to such an extent that the game with Maine was not what could be called a fast one. The academy boys evidently know the game pretty well. Especially as it is played under the Y. M. C. A. rules, for those were used in this game. But they failed to throw baskets at critical moments, and therein is the secret of the rather large score.

Maine was weakened somewhat by the loss of Wadsworth, but his place was filled efficiently by Morton in the first half, and French in the second half. It was one of the cleanest games ever played here, and the Brewster boys spoke highly of the good treatment and courtesy that they received from the collegians.

The line-up:

MAINE.	BREWSTER ACADEMY.
Scales, rf.....	rf, Horne
Morton, lf.....	lf, Richardson, (Cp)
French	
Black, c.....	c, Foote
Stobie, rg.....	rg, Sanborn
Stuart, (Cp) lg.....	lg, Tabor
	Marden

Score: Maine, 40; Brewster, 11. Goals made by Scales, 0; Morton, 2; Stobie, 4; Stuart, French, 2; Horne, 3; Richardson Tabor. Goals from fouls: Scales, 2, Horne. Referee: Gilbert, U. of M. Timers: Farrell, U. of M; Harthorne, Brewster. Scorer: Torrey, U. of M. 20 minute halves.

This was the first game this season that the Maine boys played under Y. M. C. A. rules.

After the game, the members of the Senior Skulls entertained the Brewster team in the new Library, and after showing the visitors about the new building, light refreshments were served.

CUMBERLAND COUNTY CLUB.

At a meeting of the Cumberland County Club, the following officers were elected: President, J. H. Gannett, '08; Vice President, E. L. Towle, '09; Secretary, C. Meserve, '08; Treasurer, M. E. Merriman, '09.

Graduates of

1909 CLASS PIPES

The Sophomore Class Pipes have come and are certainly a fine piece of workmanship. The shape of the pipe is similar to that of the '04 class, a small pipe with a "Quarter-drop" stem. The numerals are a little different than the usual style here at the University. The "M" is a "Block" letter instead of the "Full Block" which has been on most of the pipes. The cases are lined with the class colors and have 1909 on a white band across the bowl of the case. Taken as a whole, the pipes are very good, and they are very satisfactory to the class. Any members of the class who have not ordered pipes already will have a chance to do so if they will see some member of the pipe committee before the 13th of February.

NEW ELECTIONS OF CAMPUS BOARD.

At a meeting of the CAMPUS Board held last Thursday, H. L. Farwell, '09, Dorchester, Mass. and F. D. Knight, '09, Limerick, Me., were elected to serve on the CAMPUS Board as associate editors. These two new members were selected from a list of several candidates, and their election was based on the quality and promptness of work submitted.

Another election will be held in April, and so far the leading candidates are: H. O. Dow, '08 and W. W. Harmon, '10, and others desiring to try for the Board are requested to communicate with the managing editor.

The announcement has been made of the engagement of Miss Marion B. Wentworth, '05, to Mr. Charles Oliver Perkins of 215 Seventh St., Jersey City, N. J.

'09 CLASS MEETING.

At the meeting of the class of 1909, Mr. Harold P. Marsh was elected to the Executive Committee to fill the vacancy left by Mr. H. W. Hall. The Sophomore Hop was talked over, and a committee of three was elected, Mr. Harry Sutton, Mr. Frederick Knight and Mr. Lewis Pike. The report of the Calendar Committee was read and accepted. This report showed a net profit of one hundred and sixty-seven dollars. Mr. Joe Gerrity, Mr. P. H. Littlefield and Mr. James Scales were appointed to confer with the committee from the Juniors and with Dr. Reynolds to see about improving the conditions in gymnasium work.

LOCALS.

The Band is holding frequent rehearsals in preparation for the concert to be given in Orono Town Hall, Feb. 22.

The next basketball game in Orono is the game with Hebron, Friday, Feb. 15.

Several members of the legislature and their friends have been on the Campus during the past week inspecting the University and noting the condition of the crowded buildings and other facts which ought to give a good basis for a favorable vote on the requested appropriation.

**Cornell University
Medical College,**

NEW YORK CITY.

The course covering four years begins during the last week in September and continues until June.

A preliminary training in natural science is of great advantage. All the classes are divided into small sections for recitations, laboratory and clinical bedside instruction.

Students are admitted to advanced standing after passing the requisite examinations.

The successful completion of the first year in any College or University recognized by the Regents of the State of New York as maintaining a satisfactory standard is sufficient to satisfy the requirements for admission which have lately been raised.

The annual announcement giving full particulars will be mailed on application.
