No. 21

SENATE ACTS AGAINST U. OF M.

AFTER the recent vote of the Representatives, by which it was hoped the B. H. degree was to remain at the University, the most astonishing action to be taken by either body of the present session of the legislature was that of last Thursday afternoon when the senate by the close vote of 16 to 14 accepted the report of the majority of the committee on education to grant an appropriation of \$40,000 a year for 1907 and 1908 to the University of Maine together with \$90,000 during the two years for the construction of new buildings on condition that the B. A. degree be abolished. This action coming as it did after the house had rejected the abolishment of the B. A. degree proposition by an overwhelming vote seems strange indeed.

It was feared that the senate might seek to cut down the size of the appropriation but it was not believed for a moment that the upper body would consider the proposition of making that appropriation conditional upon the abolition of the B. A. degree.

The bill as introduced by the Representatives was taken from the table by Sen. Philoon, who spoke in favor of the majority report. He said he did not think the committee is put on its defense by reason of the attacks upon it. He argued that the liberal arts course was started without the consent of the legislature and that this course was introduced and is maintained without warrant and at great expense.

Sen. Stearns then made strong appeal in favor

of the university, speaking vigorously and at length. He said that it is for this legislature to determine whether the state shall take a step backward to its everlasting disgrace or whether it shall continue its liberality towards the university which has done so much to develop the state of Maine.

The university comes to us with certain needs and upon your granting these, depends the very life of the institution. Sen. Stearns said that if the senate should agree to grant the \$65,000 for maintenance as did the house, the university would then have none too much money as it would be \$11,000 short of what has been estimated as absolutely necessary.

Sen. Stearns then read a list of salaries paid in other colleges showing that those paid at the University of Maine are very low in comparison. "That is a simple proposition," said he. "Either the friends of the University of Maine are wrong, or the contrary. If the liberal arts course has done so much for the other colleges in this state, why should not its advantages be granted to the University of Maine as well."

Sen. Rice of Franklin spoke in opposition to the granting of the B. A. degree and was followed by Sen. Mills of Hancock, who took the opposite view. He paid a high tribute to Pres. Fellows saying that he thought the state should be proud that the university has so strong a man at its head. He had thought this matter of the B. A. degree was definitely settled ten years ago.

Sen. Parkhurst spoke briefly, saying that he had hoped the senate would defeat the amendment

offered by Sen. Philoon which was for eliminating the B. A. degree.

A yea and nay vote was then taken, resulting 16 to 14 in favor of the amendment offered by the senator from Androscoggin which grants to the university \$40,000 a year for maintenance for two years and \$90,000 a year for two years for new buildings, conditional upon the dropping of the B. A. courses at the university, allowing however, the students who have entered upon these courses to continue them.

The yea and nay vote follows :

Yea : Brown, Clark, Curtis, Eaton, Foss, Garcelon, Hastings, Heselton, Libby, Merrill, Page, Philoon, Proctor, Rice, Sewall, Staples, 16.

Nay : Ayer, Bailey, Barrows, Deasy, Houston, Irving, Mills, Parkhurst Putnam, Simpson, Stearns, Tartre, Theriault, Wyman, 14.

Sen. Hastings then moved the reconsideration of the vote which was lost.

Sen. Parkhurst then moved that the senate concur with the house in adopting House Amendment E. This was objected to by Sen. Rice which was voted by a vote of 28 to 1.

This amendment provides that there be granted to the university for maintenance the sum of \$65,000 a year for the next two years.

CLASS OF 1879.

Friends and relatives of Loomis Farrington Goodale, formerly of Bangor and until recently engineer of the maintenance of way of the Burlington and Quincy railroad with headquarters at St. Louis, are pleased to hear of his acceptance of a position in the government service in the Philippines. He and his family left St. Louis Friday on their way to Manilla.

Mr. Goodale, who attended the Bangor schools and entered the University of Maine with the class of 1879, is to be supervising engineer of railroad construction in the Philippines for the United States Insular commission at a salary of \$12,000 per year with \$4000 for an assistant.

The following from the St. Louis Republic of Tuesday, March 12, will be read with interest:

"Loomis F. Goodale, engineer of maintenance

of way of the Burlington, with headquarters in St. Louis, has been appointed supervising engineer of railroad construction in the Philippines for the United States Insular Commission. Mr. Goodale will leave St. Louis on Thursday with his family for Manilla."

The position to which Mr. Goodale has been appointed was sought for by many well-known railroad officials. Mr. Goodale, as representative of the United States government, will have supervision over all railroad construction in the Philippines. The office was tendered to the St. Louis engineer, and he was rather surprised when summoned to Washington for interviews with members of the commission.

Mr. Goodale has been engineer of maintenance of way of the Burlington lines east of the Missouri river since July, 1904. He entered the railroad service 26 years ago with the Burlington as assistant engineer at Burlington, Ia.

Subsequently he held the following positions: 1881, rodman on the Wabash, at Peoria; 1882, transitman and leveler on the Indiana, Illinois & Iowa; 1882 to 1885, assistant construction engineer on the Canadian Pacific, at Manitoba and in the Northwest Territory; 1885 to 1886, resident construction engineer of the Burlington at Prairie du Chien, Wis.; 1886 to 1887, transitman on the Colorado & Utah; 1887, division engineer of the Denver & Santa Fe at Monument, Col.; 1887 to 1890, assistant engineer of the Burlington at St. Joseph, Mo.; 1890 to 1894 chief engineer on divisions of the Burlington, and since 1894, engineer of maintenance of way of the Burlington lines east of the Missouri river, with headquarters at St. Louis.

The Burlington has not appointed a successor to Mr. Goodale at St. Louis. Mr. Goodale succeeds at Manilla another St. Louis railroad official, F. A. Molitor, formerly chief engineer of the Midland Valley railroad.

Mr. Goodale is a brother of George B. Goodale of the First National bank and his Bangor, was wife Annie M. Gould, formerly of Orono and a graduate of the university in the same class as her husband. Mr. Goodale was born in Lincoln 47 years ago. His many friends will learn with pleasure of his fine position.

CLASS 1906.

In the February number of the *Physical Review* there appeared a very interesting and well-written article on "The Elastic Modulus for Small Loads at the Elastic Limit," by Henry W. Bearce. The paper describes a series of experiments relating to the application of Young's Modulus, when small loads are applied to rods which had been previously weighted so as to bring them to their elastic limit. Mr. Bearce after graduation was engaged as assistant to Prof. Stevens here at the University where he is at present employed.

DEATH OF MRS. LYDIA S. MERRILL.

The many friends of Mrs. Lydia S. Merrill, wife of Prof. Lucius H. Merrill of the University of Maine, were shocked to learn of her death which occurred Tuesday morning, Feb. 12, after a long continued illness.

The deceased had been confined to her home for several weeks, and it was hoped that she might recover, although at times she was very weak.

Mrs. Merrill's death will be sincerely and deeply regretted by a wide circle of friends in the university and elsewhere. She was an admirable woman and a member of the Orono Universalist church, and actively identified with the social, club and church life of Orono.

The friends of Mr. and Mrs. Merrill unite in extending their sincere sympathy to Mr. Merrill and members of the family. The funeral was held Thursday afternoon. College exercises were omitted during the afternoon, and many of the students and faculty attended the services.

ANNUAL MEET MAY 18.

A meeting of the Maine intercollegiate athletic association was held in Lewiston, March 9, with delegates from the four Maine colleges present.

The date of the annual field meeting of the association was fixed for May 18, with Colby college at Waterville. An attempt was made to have the meet held after the New England intercollegiate meet at Worcester, which comes on May 25, but on account of the baseball schedules of the colleges and some other reasons it was decided to be inexpedient.

The following officers were elected: M. A. Sturtevant, University of Maine, pres.; Ira B. Hull, Bates, vice pres.; R. A. Lee, Bowdoin, sec.; Mr. Condon, Colby, treas.

MEETING OF EXECUTIVE COMMITTEE.

The meeting of the Executive Committee of the Athletic Association that was held Monday noon, March 11th, was adjourned until Wednesday evening, March 13th. At this meeting G. E. Torrey, '09, was elected manager of the tennis team for the season. Manager Miner of the baseball team reported that he had engaged Mr. Fitzmaurice as baseball coach.

A large part of the meeting was taken up with a discussion of the wearing of class numerals. Although no action was taken on the question, still the majority of the committee were in favor of wearing the numerals on a blue jersey and not on jerseys of the various class colors. The chief objection that was found to wearing jerseys of the different class colors with the numerals on them, was that they are very misleading. Thus the Sophomore jersey of green would give an outsider the impression of a Dartmouth jersey while the Senior jersey of black and white, resembles that of Bowdoin. No action was taken on the question but it was laid on the table until next meeting, when a definite vote will be taken.

BANGOR CO-OPERATIVE PRINTING COMPANY

EDITORIALS

While talking with a business man last week, the following definition was given for "initiative."

Worth

Remembering

"When a person does a thing correctly without being told or after being told only once," he is called an initiative person.

As it is the initiative person who finds his future a greater success after graduation, than if he depends upon others, we would advise all who care for the future to try and remember the above definition—and then apply it.

The series of lectures given under the auspices of the Agricultural department during the past week has caused much favorable

Farmers' Week

comment and praise from the many visitors present. To say the week was a success is a mild form of expression. We had better say, "It was a great week," and by that we mean, the results will be far-reaching in their help to the state at large. Such work shows that the University is alive to the needs of the citizens of the State, and that instead of spending the money appropriated for our needs by the Legislature, in furnishing courses for students in "white ties and patent leather shoes," the money is being applied to courses for men, the majority of whom are proud to say that their fathers own farms.

To Prof. Hurd, and members of the faculty under whose direction these lectures were conducted, we hope another year will find you in a building of your own, and there is but little doubt that such is the minds of the visitors whom you had as guests last week.

As for the students, they appreciate your work and sincerely hope it may continue.

FARMERS' WEEK.

The first Farmers' Week given under the direction of the College of Agriculture came to a most successful close on Friday afternoon, March 15. The purpose of this week especially set aside for the progressive agricultural man of the State, was to enable those who could not attend the short winter courses to receive four days of practical instruction in those lines of agriculture, in which the farmers of the state are usually interested.

The week opened on Monday evening, March 11. At this time the visitors gathered in the lecture room of the library, and listened to the address of welcome. This was to have been

delivered by President Fellows, but owing to circumstances necessitating his presence in Augusta, Dean Stevens officiated. Mr. S. C. Thompson of the State Department of Agriculture replied to the address of welcome. Following this, Prof. Hurd gave an illustrated talk on the work of the University.

On Tuesday the real work of the week began. The lecture and demonstrations were essentially those in the program published in the last issue of the CAMPUS, with the exception that in place of the lecture on the "Orchard Management for Maine," by Prof. Munson, Prof. Davidson gave a talk on "The Rural School" and Prof. Sprague spoke on "Taxation."

The question box was an important feature of the programme. Questions of all sorts were received and answered by the corps of instruction.

The demonstrations were of the most practical kind. Pruning and grafting were illustrated in the orchards. On Thursday, the home mixing of fertilizers was illustrated by compounding two tons of fertilizer in one of the farm buildings, showing the men how to save ten dollars a ton by this home mixing. Friday afternoon demonstration of practical dairy work was given in the dairy. This ended the work of the week.

To state that the week was successful is to put it mildly. Those who attended were very enthusiastic for its repetition next year. The Hon. C. L. Jones of Corinna expressed the idea that its repetition was a necessity. Dean Hurd and Prof. Gilbert expressed themselves as highly satisfied with the results.

The total registration for the week numbered 114. Thirteen counties were represented, and many of the granges sent representatives. The largest session numbered 122. Many of the students attended the lectures. Credit should be given to the university musical clubs who furnished music on two evenings.

Just at this time it was interesting to note the feeling in regard to the University needs and the appropriation. Almost to a man these well-to-do agricultural men from thirteen counties in the state believed that the legislature could not do too much for us. They also expressed them-

selves as well satisfied with the spirit of the student body.

It is expected that the week will be repeated next year. At that time it is hoped to obtain some experts from outside the state.

In closing the CAMPUS wishes to congratulate the entire faculty of the College of Agriculture for the success in thus putting the advantages to be obtained from the university, before the citizens of the State in this practical form.

FITZMAURICE WILL COACH MAINE.

The University of Maine athletic managers have closed a contract with Fitzmaurice, the well known professional baseball player, to coach the team this spring and he held the first practice last Friday afternoon in the cage.

Fitzmaurice is well known here, as he played in Bangor in the old New England league days, and has been in the business a long time. He has for several years been in the Connecticut league. He is an outfielder, a good batter and knows all the ins and outs of the game, and having coached University of Vermont, is perfectly familiar with college teams.

From now on, work will be the watchword of the baseball candidates.

The two big cages are crowded with candidates for the infield and outfield, with plenty of promising material, but when it comes to twirlers there's a shortage which is causing considerable anxiety in the athletic circles of the university.

Only one member of the 1906 'varsity team was graduated, but he was Capt. Jack Frost, one of the best pitchers Maine ever had. His first understudy, "Rip" Hall, has left college, and Adams, the colored phenomenon who promised well last fall, has also disappeared.

At present, Quint '07, seems to be the only hope. Quint comes from the same town as Freddy Parent, and is a good all-round man. He is showing good form, has plenty of steam and some fairly good curves.

There are half a dozen other candidates out,

and it is the earnest hope of the student body that there may be a diamond in the rough in the bunch. It must be admitted, however, that U. of M. is badly off for box material.

But in other respects the team will be strong. Capt. Harry Gordon who did the most of the backstop work last season, expects to play second base.

Manager Harry L. Miner of Haverhill, Mass. has arranged a schedule of 16 games, as follows:

April 20—Ricker Classical at Orono.

April 25—Colby at Waterville (exhibition).

April 26—New Hampshire Saate at Durham, N. H.

April 27—Exeter at Exeter.

April 29—Harvard at Cambridge.

April 30—Tufts at Medford.

May 1—Brown at Providence.

May 2—Wesleyan at Middletown.

May 8—Bates at Orono.

May 15—Colby at Waterville.

May 18—Bowdoin at Brunswick.

May 22—Bowdoin at Orono.

May 23—Tufts at Orono.

May 25—Colby at Orono.

May 29—Amherst "Aggies" at Orono.

June 1—Bates at Lewiston.

SENIORS WIN.

The annual indoor class meet of the University was held in the gymnasium last Friday evening, March 15. It was one of the most successful meets ever held under the auspices of the University and the general results reflect much credit upon Coach Farrell and Capt. St. Onge. Walter St. Onge is one of the most popular captains ever placed in charge of a track team, and the team bids fair to be up to last year's standard, under the watchful eye of Steve Farrell, the "man who knows how to develop athletes."

The gymnasium was crowded with students and friends, and at times, when the events were close, great excitement prevailed, especially among the 1909 and 1910 classes.

No records were broken and in general were

about average as regards time and distances. Without doubt, the basketball game and relay races were the most interesting events of the evening although the results were not as close as in former years.

The seniors won the meet by a large margin, scoring 25.5 points; the sophomores came second with 17 points; the freshmen third with 12.5; and the juniors last with 12 points.

The first event of the evening was the shot put. Farwell, '08, won easily, distance 35.5 feet. Albee, '09, got second, 33 feet, 2 inches and Harlow, '07, third, 32 feet, 8 inches.

The next event, the 25-yard dash, was close and after several trials, the winners were, St. Onge, '07, first, W. A. Sawyer, '08, second; and N. H. Sawyer, '10, third; time, 3 2-5 seconds.

There were only a small number entered in the 25-yard high hurdles; and first place was won by Clayton, '07; Skolfield, '10, second; Miner, '08, third; time, 4 1-5 seconds.

The high jump was easily won by Meserve, '08, who showed his old time form of last year, and ought to be found among the point winners this spring. Knowlton, '07, and A. A. Chase, '10, were tied for second.

In the 25-yard low hurdles, Clayton, '07, added another first to the seniors score: W. A. Sawyer, was second; and Richardson, '09, was third.

Probably the most exciting and interesting events of the evening were the interclass relay races. The first two-lap race between '09 and '10 was won by '09, after a close finish. The next trial was between '07 and '08. This race was won by the seniors by nearly a lap. The final between '07 and '09, resulted in a victory for the seniors by a lap. Without doubt, the present senior class relay team is one of the fastest ever representing a class here at the University.

The tug of war between '09 and '10, was won by the freshmen by three inches. The pull lasted one minute.

The second set of relay races, each man running 8 laps, four men to a team, was substituted for the mile race of past years. These races were very close, and some excellent running was necessary for the winning teams. In the first race '10, defeated '09, and in the second race '07, defeated '08.

Chase, '10, and Towle, '09, were tied for first place in the place of Albee, '09, second.

The meet was concluded by a basketball game between '09 and '10 in which the former team won 33 to 15. At no time during the game was the freshman team dangerous, and the playing of J. Scales, for the '09, team was the feature of the game, he getting 19 of the points for his team. Both teams had 'Varsity players, and while the sophomores had no trouble in winning yet the freshmen played a hard and fast game, making the '09, players work for every point. The passing and shooting of the '09, team was excellent, and by reason of this, they won the game.

The line-up and summary:

1909	1910
J. Scales, (Capt.) 19, F. G. Wadsworth, (Capt.) 8	
Black, 6, Dow	
French, 4, Chase	
Pettigrew, Russell, 2	
Penny, 4, Parsons	
Morgan, Stoddard, 5	
Hardy, Stobie	

Score, 1909-33, 1910-15. Goals from field, J. Scales, 7, Black, 3, French 2, Penny, 2, Wadsworth, 3, Stoddard, 2, Russell, 1. Goals from fouls—Scales, 5, Wadsworth, 2, Stoddard, 1. Referee, Gilbert. Timers, H. W. Bearce, W. R. Ham.

The following is the summary by events:

SCORE BY CLASSES.

Points—First counts five, second three, third one.

EVENTS	1907	1908	1909	1910
Shot Put.....	1	0	8	0
25-Yard Dash	5	3	0	1
25-Yard High Hurdles	5	1	0	3
High Jump.....	2	5	0	2
Low Hurdles.....	5	3	1	0
2-Lap Relay.....	5	0	3	0
Pole Vault	0	0	5	4
8-Lap Relay.....	2.5	0		2.5
Totals	25.5	12	17	12.5

Points in the 2-lap Relay Race count 5 and 3.

In the 8-lap Relay Race $2\frac{1}{2}$ points will be allowed each winning team.

Points in the Basketball game and the Tug of War do not count.

Referee—S. J. Farrell.

Judges—P. L. Reynolds, A. D. Holmes, C. P. Westcott.

Timers—H. W. Bearce, W. R. Ham.

Scorer—B. F. Williams.

Measurers—N. M. Rockwood, S. F. Thomas, H. A. White.

Announcer—J. K. Goodrich.

Ushers—C. C. Johnson, G. S. Richards, W. H. Stanley, S. M. Wheeler, M. E. Fassett, W. H. Andrews.

CIVIL THESIS SUBJECTS.

Now is the time when the seniors in civil engineering, having had a few of their doubts removed by the recent mid-years, begin to think seriously of graduating, and to buckle down to hard work on their thesis—those unpleasant but necessary pre-requisites of graduation. All of the senior civils have their thesis well under way and the variety of subjects is unusually large.

A. T. Barrows is designing a bridge of the Warren type.

Purington and Nickels, have a cement test.

Williams, Philbrook, Kierstead, Rounds, and Witham are working together on the establishment of a triangulation system and base line.

Maddocks is designing a railroad bridge of the Camel Back type.

Brown and Martin are testing some reinforced concrete beams.

E. D. Bean has an investigation of macadamized roads.

L. D. Barrows, Hussey, Packard, and Wyman are engaged in a geological survey in the vicinity of Sebec Lake.

Brann and Wilson are planning an improved drainage system for the Soldiers' National Home.

P. A. Bean and Cummings are testing cements.

Lord and Lisherness are designing a modern reinforced concrete dormitory.

E. H. Stetson and Ridge are engaged on the location of a power plant on the Sebec River.

Harlow and Malloy have the abolition of a grade Crossing on the Maine Central Railroad.

Davis and Pierce are designing a sewerage system for the town of Bridgton.

Tebbets is designing a railroad bridge of the Camel Back Type.

Hooper and Hutchins are designing a draw span railroad bridge.

Galland and Devereux have the Design of a Coal Pocket.

Holbrook has the Design of a railroad bridge of the Parabolic type.

H. C. Stetson is designing a bridge of the Baltimore type.

Hodgkins is engaged in a test of various cements.

Many of these thesis are in whole or in part composed of actual work within the state on which the students are or have been engaged.

MUSICAL CLUB NOTES.

At a meeting of the Musical Club men held Wednesday, March 13th, it was decided that if a trip can be arranged, and enough are desirous of going, the clubs will spend the Easter vacation in the western part of the state. This trip would probably include Auburn, Norway, Rumford Falls, Portland and possibly Skowhegan.

LOCALS.

H. Palmer, ex-'07, has been visiting friends on the Campus during the week.

Mrs. Huddilston sang in the chapel last Wednesday for special music.

Mr. F. Bennis, Treasurer of the Western Electric Co., was on the Campus during the past week for the purpose of obtaining a few members of the Senior class for the company which he represents.

The Junior Week committee held their first meeting last week, and many new ideas for this year were suggested. It is planned to make the Week the event of the college year.

The date for the sophomore Hop is announced as April 12, which is the Friday following the recess.

Plans are being made by members of the senior and junior classes to take a trip to New York during the week following the recess.

A. Hutchinson, '09, has resigned as manager of the *Blue Book*.

The Ladies of the Round Table have postponed their monthly Tea until further notice on account of the death of Mrs. Merrill.

Beginning to-morrow, and every Wednesday until further notice Mr. Mudgett, of the firm of Mudgett Bros., of Bangor, will be at the college store for the purpose of taking measurements for clothing.

Mrs. Brown, wife of Capt. Brown, who has been ill during the last few weeks has returned to Orono and is expected to be out in a short time.

The following members of the senior class took the Civil Service examinations last Wednesday and Thursday: H. C. Stetson, A. T. Barrows, F. E. Maddox, F. P. Holbrook, and C. E. Davis.

The Cumberland County Club held a smoker in the club room of the Library last Saturday evening.

Many of the societies and clubs postponed their meetings during the past week owing to the death of Mrs. Merrill.

A limited number of tickets for the second assembly, Friday evening, may be obtained from Geo. P. Goodwin, Phi Gamma Delta House.

Trials for the 'Varsity Debating Team will be held Thursday, March 21. The Question: Resolved, that the present influx of foreigners is detrimental to the United States. Colby has selected the affirmative.

The Literati postponed their regular meeting last Tuesday, and will hold the meeting this evening. The play by the Dramatic Club, as already announced, will be given.

AMONG THE COLLEGES

The University of Minnesota students are petitioning the faculty to compel the "co-eds" to attend lectures without hats, which have caused much trouble, as they prevent one from seeing the lecturer.

About a year ago, Chancellor E. Benjamin Andrews, of Nebraska State University, issued an order prohibiting smoking on the campus. He now declares that all students hereafter found guilty of chewing tobacco will be expelled from the university.

Amherst college has re-opened for the rest of the second semester. There will be no spring recess in April, the past two weeks when the college has been closed because of scarlet fever, taking the place of the regular recess.

Columbia and Yale universities have concluded an arrangement to carry on in co-operation, a series of courses in preparation for the consular service. Columbia offers the larger share of the language work, while Yale does the greater part on the economic side. Students who complete the course will receive certificates issued by both universities jointly, and higher degrees will be awarded when the requirements are fulfilled by the university at which the major part of the work is done.

AN INTERESTING INNOVATION AT WILLIAMS.

On Wednesday, Jan. 16, the first news bulletin of the Williams College press bureau was sent out to about seventy-five newspapers in the leading cities of the United States, from St. Paul and Boston to Washington and Buffalo. The work of this bureau will correspond in a small way for Williams news, to the work of the Associated Press for the news of the country, with the only difference that this news will be sent out to the different newspapers absolutely free of charge. A similar plan has worked with much success at Amherst and Brown, which suffered from the same inattention of news-

papers to college affairs which Williams is now experiencing.

News items will be sent out by the bureau twice a week in condensed form, about four hundred words in length, to the various papers. The items may be sent out three times a week in the spring if results warrant. The greatest emphasis will be laid on the administration and general news of the college. The minor athletic news will be sent out separated from the other news for the convenience of the sporting editors. No attempt will be made to cover the more important athletic events, as all papers would prefer for these such telegraphic reports as the Associated Press would send out. No news will be sent to papers that receive an adequate amount of Williams news from local correspondents.

An absolute record will be kept of the amount of news printed by each paper and papers which will not use the news will be cut after due trial and new papers added. The list, which is thus seen to be elastic, has been so made out as to include in each city, wherever thought practical, a Republican and Democratic, a morning and evening paper, that all possible readers may be reached.—*Williams Record*.
