Vol. VIII

ORONO, MAINE, MAY 7, 1907

No. 26

THE MASSACHUSETTS TRIP

The baseball team left Orono, Friday noon, April 26, for its annual Massachusetts trip, during which games were played with Exeter, Saturday, April 27; Harvard, Monday, April 29; Tufts, Tuesday, April 30; Brown, Wednesday, May 1; and Wesleyan, Thursday, May 2. The results of the games were not altogether promising to look upon, as Maine only nailed one victory out of a possible five. However, the team had had almost no practice before the trip, especially in batting, which on the whole was the weakest point. The coach was satisfied with the trip for the reason that it showed him what he had to depend upon, and the men from whom he might pick a winning team.

Twelve men were taken including, besides the regular men, two extra pitchers, Kyes '10 and Dow '10 and a sub catcher, Blossom. The players returned Friday, May 3.

PHILLIPS-EXETER 8, MAINE 7

The first game of the trip was lost to Exeter, Saturday, April 27, by the close score of 8 to 7. Maine led, and the score was 7 to 0 at the end of the seventh inning. Then Exeter took a brace, and with sharp hitting and the help of two errors, managed to pull out a victory.

Stolen bases, Vaughan 2, Cooney, Grattan 2, Connelly, P. Cooney 2, S. B. White, Goodrich. Base on balls, off White 5. Struck out, by White 4, by Dow 3. Double plays, S. V. White, Leddy and Vaughan; Goodrich and Gordon. Hit by pitched ball, Goodrich, Gordon, Smith. Passed ball, Gordon. Umpire, Ryan. Time, 1 h, 45 m.

HARVARD 3, MAINE 1

The game with Harvard, Monday, April 29, was somewhat of a surprise and gratification after Saturday's work. Both teams played an almost perfect fielding game. Slater, who pitched for Harvard, was a puzzle and was only found once during the game; while Quint acquitted himself in excellent shape for Maine, allowing only six hits to the wearers of the crimson.

TUFTS 10, MAINE 4

The next proposition that Maine tried to solve was Tufts, which was played Tuesday, April 30. Kyes '10 started the game for Maine in the box; but Higgins was substituted in his place after the first few innings. Atwood pitched seven innings for Tufts; but he hurt his knee sliding second. Bates, who replaced him, was nervous and had poor control and allowed Maine's four scores in the eighth.

BROWN 10, MAINE 0

Maine received a shut out from Brown on Wednesday, May 1, to the tune of 10 to 0. The game was slow and uninteresting, Maine getting a man second only twice in the game. The game was full of good plays on both sides, and Brown's hitting was at a maximum.

MASS MEETING

MAINE 9, WESLEYAN 6
 The last game of the trip, at Middletown, May 2, proved to be the most fortunate of the five. In a game characterized by hard hitting on both sides, Maine pulled out a victory by shutting Wesleyan out after the fourth inning. Wesleyan's first pitcher, Hull, was batted out of the box; and Connelly, who took his place, fared but little better. Quint looked like an easy proposition at first, but the longer he pitched the more puzzling were his curves, and he allowed no runs after the fourth.

The most enthusiastic mass meeting of the year was held in the chapel last Friday morning from half past nine to quarter past ten. Music was furnished by the band. In a series of short, snappy speeches by different fellows the enthusiasm was worked up to the highest pitch, and when the athletic subscription papers were passed around a total of three hundred and seventy-five names, the largest subscription yet taken at a single time, was counted. The speakers were C. H. Lekberg, E. J. Wilson, J. T. Kendrigan and A. W. Totman. They set forth the present stringency of affairs very clearly and forcibly, and when the alternative was presented, of either cutting out football next fall or coming up with the customary student subscriptions, the students responded with enthusiasm.

Subscription papers were afterward passed around for a special train to the Maine Meet at Waterville on May 18, and two hundred names were received, more than enough to secure the special rate of \$1.50 per ticket. A sufficient collection was also taken up to defray the expenses of taking the band to Waterville. In all it was the most successful mass meeting held since George Carle and Rudder Emery used to instill enthusiasm into the student body.

AGRICULTURAL CLUB

Thursday evening, May 2, the Agricultural Club held a meeting in Lord Hall at which the revision of the constitution and by-laws of the society occupied the whole evening. It was planned to hold weekly meetings in the future instead of every two weeks as formerly.

President Fellows, Professor Gilbert and Instructors Dorsey and Campbell were taken in as honorary members. At the next meeting, which will be held tomorrow evening, May 8, election of officers will take place.

EDITORIAL

Remember the first championship game on Alumni Field, Wednesday, May 8.

A full record of the M. I. T. Meet will be given in the next issue of the CAMPUS.

MR. BARROWS, '07, is to be congratulated on his short but pithy speech in the mass meeting of last Friday morning.

But, on the other hand, let us consider this. The student body has through the Council re-

quested the faculty to allow monthly mass meetings to be held in the chapel. The meeting on Friday morning was a trial of this plan and it is unfortunate that the thoughtlessness of the previous night should have entered in to mar the concord of the occasion. It is at least politic, and even polite, to show some consideration toward those from whom one is asking privileges. But, leaving this aside, it is hardly customary to destroy college property to celebrate athletic victories.

IN the present stress of circumstances which surround the Athletic Association many and varied suggestions are heard flying around on all sides for avoiding a like condition of affairs in the future. There is no doubt in the minds of anyone that student support of athletics should be put upon as stable a basis as possible, that is, the unanimous support of the students should be made as certain as possible without having the payment of dues made absolutely compulsory. As it is now, the subscriptions depend either upon a fit of momentary enthusiasm induced in a mass meeting, or upon the student's sense of duty, which in certain cases is very hard to bring home to him.

Among the many suggestions offered one in particular appears to be perfectly feasible and devoid of many of the objections to the method pursued heretofore. That is, to have the athletic dues for the term or year, as may be deemed best, placed upon the term bill of each student by vote of the student body, the vote to be taken in a mass meeting held for the purpose. If he then did not wish to pay the dues, notification of the proper authorities would remove them from the bill. This plan would necessitate a vote being taken periodically. In this way any element of compulsion would be

obviated and still each student, whether Senior or Freshman, would be forcibly reminded that athletic dues were a foregone conclusion at the University of Maine, as in other colleges of the same class. This would also avoid the necessity of subscription papers being passed in chapel, which is objectionable because attendance at chapel is compulsory, and in connection with the usual mass meeting should prove more efficient than the plan followed before.

UNIVERSITY OF MAINE FOREST EXPERIMENT STATION

Professor Tower will soon, through the University of Maine, put before the Forest Service in the United States Department of Agriculture, a plan whereby the University of Maine will have a Forest Experiment Station. This station is to be managed and maintained co-operatively by the University and the Forest Service in the United States Department of Agriculture, and it is to consist of not less than five acres of ground, which is to be fenced off and used exclusively for experimental work. The University bearing the expense of the tools and fencing, other expenses such as labor and plant material, shall be divided equally between the co-operating parties.

This station is to be under the supervision of the Forest Service, and it shall assist in the preparation of all technical plans, approve all actions, and make suggestions from time to time as necessity demands. Records are to be kept of all operations and of all bills paid and vouchers shall be taken, as are necessary, for the payment of accounts charged to the Forest Service. Plans, specimens, samples, models, drawings, photographic prints, notes and manuscripts shall whenever practicable be prepared in duplicate and copies filed at Orono and Washington. The publication of the results shall be subject to the approval of the University and the Forest Service, and all such results shall be their joint property.

The object of this experimental work is to determine by a systematic experimental planting, what

species and cultural methods are best suited to Maine. Those experiments will cover the trial of new species, trees that are not indigenous to the state, the relation of the soil and climate to the selection of the species, and the so-called silviculture methods, nursery practice, the raising of trees from the seed, planting, spacing, mixtures, different ways of cultivating these species, thinning and pruning, are the most important. Of course the thinning and pruning experimental work would not begin for several years or at least until the trees have obtained sufficient growth. Much of this experimental work such as planting, spacing and cultivating will be done by students in the forestry course, and since the planting will run through a series of years it is estimated that the total annual expense will not exceed ten or fifteen dollars. This plan, which Professor Tower has drawn up, has met the approval of Mr. Henry Lord, President of the Board of Trustees of the University and awaits only the signature of the Forester of the Forest Service, to be put into operation.

OF INTEREST TO FORESTERS

The official bulletin of the Massachusetts Forestry association—Woodland and Roadside—expresses not only profound, but reasonable, regret because of the failure of Congress to pass the pending bills providing for the establishment of two Appalachian forest reservations—a measure that recognizes valuable attainments of science and of civilization. Here is an instance where the federal government may well interpose for the purpose of improving conditions in several adjoining states.

The cutting down of the forest trees in one of these proposed reservations is now costing several southern states losses of property averaging from \$6,000,000 to \$7,000,000 annually. For an expenditure now of \$15,000,000 the United States may save this loss for all time to come.

In the end it will be obliged to take this land at a higher cost and spend much more for reforestation, or see valuable farmlands go to ruin for lack of water. The example of France, which

has paid enormously for her procrastination in protecting her irrigation, should be sufficient warning against this reckless slaughter of the trees.—*Harper's Weekly*.

THESES

Almost all of the electrical and mechanical seniors are now working upon, or have, finished their theses, the subjects of which are given below.

MECHANICAL

Construction of a polishing machine for preparing specimens for micrographic study—J. T. Bates.

A strength test of ball bearings—W. W. Black and R. R. Lambe.

Study of the costs of heat distribution—E. D. Brann and Karl McDonald.

Design of a cable crane system—J. P. Harvell.

Study and test of the epyrite process—C. H. Lekberg.

Design of a high speed engine—H. E. McKenzie.

Design of an electric micrometer—S. B. Orne.

Design for a dynamic laboratory—N. M. Rockwood.

Study of the manufacturing costs and operating efficiency of the Norway Electric Company.—W. E. Stone and P. L. Swift.

ELECTRICAL

Study and test of the mercury arc rectifier—E. J. Wilson and F. O. Alton.

Design of an automatic bell striker for Wingate Hall—B. R. Connell.

Complete test of incandescent lamps—H. P. Eveleth.

Study of the readjustment of a three phase power plant—L. J. Reed and R. G. Hamlin.

Design and construction of an electric micrometer—E. P. Lambe and S. B. Orne.

Design and construction of a special laboratory resistance—E. L. Judkins.

Design and construction of an electro-magnet—H. A. Knowlton and T. B. Perry.

Design and construction of a variable inductance—W. J. St. Onge and J. C. Matthieu.

Investigation of a thermo-pile for practical purposes—M. G. Newman.

Test of the Stillwater power plant—R. A. Quint and A. W. Stevens.

Investigation of the static ore separator—A. J. Pennell.

Description and construction of a special electric furnace for ash determination—C. A. Reed.

Design of a three phase power transmission plant—A. E. Tremaine.

Investigation of the power problem at the University of Maine—V. J. Yorke.

EIGHTH SOPHOMORE THEME

Subjects for the eighth sophomore theme, which is to be an argument, have been posted as follows:

1. Resolved, that armed intervention is not justifiable on the part of any nation to collect, on behalf of private individuals, financial claims against American nations.

2. Resolved, that the policy of excluding the Chinese from all territory over which the United States may exercise jurisdiction should be rigidly maintained.

3. Resolved, that the white citizens of the Southern States are justified in taking all peaceable measures to insure their political supremacy.

4. Resolved, that a nation advanced in civilization is justified, in the interests of humanity at large, in enforcing its authority upon an inferior people.

5. Resolved, that municipalities should own and operate public plants for the furnishing of light.

6. Resolved, that the college course leading to the degree of Bachelor of Arts should be reduced to three years.

7. Resolved, that the execution of Major Andre was justifiable.

8. Resolved, that the "coup d'etat" of Napoleon in 1799 was justifiable.

9. Resolved, that an eight hour working day

should be adopted in the United States by federal law.

10. Resolved, that military tactics should be taught in the public schools.

11. Resolved, that three-fourths of a jury should be competent to convict or acquit in all criminal cases.

12. Resolved, that the "honor system" should prevail in all college examinations.

13. Resolved, that labor unions are detrimental to the industrial welfare of the United States.

14. Resolved, that Freshmen should be excluded from participating in intercollegiate athletic contests.

These arguments should be from 1000 to 1200 words in length and are due Friday, May 17.

1910 PROTESTS INDOOR MEET.

At the next meeting of the Executive Committee of the Athletic Association the class of 1910 will present through a committee the following protest:

The class of 1910 hereby protests the decision rendered at the indoor Interclass Meet, held March 15, 1907, giving the class of 1909 second place.

This protest is based on the ineligibility of Mr. Guy E. Albee, who was not registered in any department of the University at that time, and who competed for the class of 1909. Mr. Albee scored seven points for his class.

With Mr. Albee's points subtracted from the score of 1909, they would be distributed as follows:

Three points taken in the shot put in the class of 1907.

Three points taken in the two lap relay to the class of 1910.

One point in the pole vault not counting as there were only three men entered in that event. This arrangement would give the class of 1910 second place and the class of 1909 fourth, making the final scores as follows:

Class of 1907.....	28.5 points
Class of 1910.....	15.5 points
Class of 1908.....	12 points
Class of 1909.....	10 points

DEUTSCHER VEREIN

The regular meeting of the Deutscher Verein was held Wednesday evening, May 1, at the Sigma Chi House. Plans for the annual banquet this spring were discussed and detailed arrangements were left to the discretion of a committee.

After the business of the evening was transacted, Mr. G. F. Whittig gave a lecture on the music of Wagner's "Die Walkure." He explained several of the motifs and their significance, being assisted by Miss Merrill who illustrated them on the piano, and briefly explained the plot of the opera. His talk showed careful study of the music and was well presented for the short time allotted him. Lectures such as this, which show the less superficial side of music, have more than ordinary value at this time when the rage is for "ragtime" and something which "has a tune to it." After the lecture refreshments and German songs closed the program of the evening.

Y. M. C. A.

At the mid-week meeting of the Y. M. C. A. held Wednesday evening, April 24, Redman, '10, led the discussion, his subject being "Practical Living." After the meeting a business session ensued at which the matter of sending delegates to the Y. M. C. A. State Convention, at Augusta was discussed. It is probable that several men will represent Maine there and it is hoped that many unauthorized delegates will attend as the speakers are the best to be found in the country. This convention occurs May 17, 18, and 19th and many who find themselves in Waterville at the State Meet on May 18 will find it convenient to make the short trip from Waterville to Augusta and be present at the meetings Saturday evening and Sunday.

The regular mid-week meeting was held in the library, Wednesday evening, May 1. B. A. Chandler, '09, led and the subject "Developing Your Talents" was fully considered to the advantage of all present.

Y. W. C. A.

The young women instrumental in the recent organization of the Young Women's Christian Association should be heartily congratulated on the success of their efforts toward the formation of the society. It is gratifying to all interested in Christian work to see our co-eds inaugurating a move which is certain to grow in success.

At present the Association is actively engaged in formulating plans for the future, among which is the sending of a delegate to the Y. W. C. A. national convention held at Silver Bay.

The greater part of the funds secured through the candy sales held during the year will be used for this purpose, and it is the intention to have at least two more sales before the end of the year, one of which will come Junior Week. If the past patronage is kept up at these sales, two delegates instead of one may be sent to Silver Bay.

The present membership includes a large majority of the women in college, there being ten active and twelve associate members. With the active officers now leading the Y. W. C. A. a bright future is assured.

DRAMATIC CLUB

The Dramatic Club has recently adopted the following constitution:—

Art. I. This organization shall be known as the University of Maine Dramatic Club.

Art. II. The object of this organization shall be to promote interest in, and the production of, the drama at the University of Maine.

Art. III. Regular membership in this organization shall consist of the male members of the University actually employed in the production of any play by the organization, and of the officers thereof.

Art. IV. The officers of the organization shall consist of President, Vice-President, Secretary, Treasurer and Business Manager.

Art. V. The President shall call and preside at all meetings of the organization, and shall promote the general welfare of the organization to the best of his ability.

Art. VI. The Vice-President shall have all the power and duties of the President, in the absence of that officer.

Art. VII. The Secretary shall keep all records of business meetings and shall be the custodian of a copy of these rules and regulations.

Art. VIII. The Treasurer shall receive and deposit all money belonging to the organization and shall pay all bills against it, bearing the written approval of the President and Business Manager, and shall issue a written financial report as early as possible in the month of June of each year, and such other reports as may be called for.

Art. IX. The Executive Committee shall consist of the regular officers of the organization.

Art. X. The Business Manager shall have charge of all financial business connected with the presentation of plays.

Art. XI. There shall be at least one entertainment each year, probably during Junior Week. The proceeds shall be used to pay all legitimate expenses of the organization and the surplus, if any, to be disposed of as the organization sees fit.

Art. XII. Those trying for a part in any play shall pay an entrance fee, sufficient to cover the cost of the book used.

Art. XIII. The officers of the organization shall be elected during the last week in May of each year, and shall begin their term of office at the beginning of the following college year.

Art. XIV. These rules and regulations may be amended by posting a notice of these amendments at least one week before the meeting is called, and by a vote of two-thirds of the regular members present at this meeting.

Plans are now being made for the first annual play which is to be given in the gymnasium during Junior Week, and judging from the rehearsals, the success of this play is assured.

It is now planned to present the play in Brewer, and possibly at one other place before Junior Week so that the cast will be perfectly familiar with their parts before the play is given on the campus.

LOCALS

B. L. Roberts has been appointed assistant manager of the 1909 *Prism*.

At a meeting of the Oxford County Club, held Monday, April 29, officers were elected as follows: president, S. B. Locke, '08; vice president, W. A. Kimball, '09; secretary and treasurer, R. H. Morrison, '09; executive committee, the above officers and M. A. Sturtevant, '08, D. G. Brown, '10, and M. E. Reed, '10.

Miss Christine Shaw, '09, has left college for the remainder of the term and has accepted a position as teacher in the Orono High School.

A meeting of the 1910 track team was held Monday, April 29. H. L. Barker resigned as captain and H. J. Cook was elected in his place. S. F. Berry was also elected manager.

Dean W. D. Hurd left Wednesday, April 24, on a lecture tour to farmer's institutes through Knox and Lincoln counties. He also gave addresses at Jefferson and Warren.

The mechanical engineering department has recently placed an order for a 150,000 pound Riehle Testing Machine for the mechanical laboratory. This machine will be large enough to take a beam sixteen feet long, twelve inches wide, and of any practical depth. It will exert force enough to tear apart a solid bar of steel two inches in diameter.

H. A. Emery, '06, has recently passed the civil service examinations and will go west next fall to accept a position in the United States Reclamation Service.

Neat folders containing the season's baseball schedule, tabulated for scores, were given out after chapel service on Monday of last week.

At the Methodist Conference held recently in Bar Harbor, C. N. Garland was appointed pastor of the Methodist church of Bar Harbor.

An informal dancing party was given by the Delta Sigma Sorority and their friends at the Mt. Vernon House on Friday evening, May 3.

At a meeting of the Mechanical and Electrical Society held Thursday evening, May 2, Joseph Jacobs, '08, gave a talk on "Wireless Telegraphy." Mr. Jacobs has investigated the subject practically himself and has set up the complete apparatus. His talk was very entertaining.

Efforts are being made to effect an arrangement of time work in all courses whereby the schedule can be kept constant for a number of years, and fewer conflicts will occur in the engineering courses. To do this it is planned to

have Saturday mornings devoted to several laboratory courses which are now given on other days of the week. This will also obviate the crowding of so much time work into five days of the week as at present.

Next year Forestry will be listed in the College of Agriculture instead of in the College of Technology as at present.

ALUMNI.

'77

Thomas J. Stevens was recently on the campus. He is making an effort to have a reunion of the class here at Commencement this year.

'88

At the East Maine Conference of Methodist Churches held recently, Reverend J. N. Hatch was made presiding elder of the Bangor District.

'94

Mr. Edward H. Cowan of Orono, has resigned his position as superintendent of the Water Works Company of Marion, Ohio, to become a member of the France Dredging and Construction Company of Mansfield, Ohio, a very large concern. The company have lately been awarded a contract in southern Minnesota which consists of thirty-three miles of drainage canals which will drain a large marsh and two shallow lakes, and all work will be done with dredges. The contract calls for the completion of the work in the autumn of 1909. Mr. Cowan has sole charge of the work and will move his family to Albert Lea, a city in southern Minnesota, and near the work to be done.

'98

F. W. Sawtelle, for some years a roadmaster of the Maine Central Railroad at Bangor, has gone to Missouri where he has obtained a railroad position as roadmaster.

'02

H. W. Sewall is superintendent of the switchboard sales department of the Western Electric Company at Chicago.

E. W. Delano is on the engineering staff of the Bangor & Aroostook Railroad at Bangor.

'03

Fred Holmes is roadmaster with the Eastern Division of the Maine Central Railroad at Bangor.

'05

G. K. Huntington has been transferred from the Indianapolis branch of the Western Electric Company to their Chicago house.

'06

Victor B. Jordan and Miss E. C. Libby were married at Hartland, Me., on April 24.

BOWDOIN COLLEGE

MEDICAL DEPARTMENT

The Eighty-sixth Annual Course of Lectures will begin October 25, 1905, and continue eight months.

Four courses of lectures are required of all who matriculate as first-course students.

The courses are graded and cover Lectures, Recitations, Laboratory Work and Clinical Instruction.

The third and fourth year classes will receive their entire instruction at Portland, where excellent clinical facilities will be afforded at the Maine General Hospital.
