No. 6

MAINE 4; TUFTS 0.

Maine defeated Tufts in a well played game Saturday afternoon, Oct. 26, at Medford, Mass., by a score of 4 to 0. Bearce scored for Maine by a place kick from the twenty yard line over the goal.

Maine kicked off to Pickett, who fumbled and Maine got the ball, but soon lost it on downs. Tufts started down the field for several long gains, Green getting one long run of 40 yards on a delayed pass. On the 25-yard line Maine held and Green attempted a goal from the field, but missed by a narrow margin.

Higgins punted from the 25-yard line, and after the ball had changed hands several times on fumbles, Maine started down the field, making long gains through the Tufts line and around right end. On the 25-yard line Tufts steadied down and held for two downs, when Bearce kicked a pretty goal from placement.

This was the only scoring done in the game, and the half ended with the ball in Tufts' possession on Maine's 15-yard line.

In the second half, Tufts made several changes in their lineup, Capt. Green replacing Dittrick at quarterback and Nesmith taking the captain's place at right halfback. At one time Tufts was on Maine's 2-yard line, but was held for downs, while Maine was never dangerous. Both teams made use of the forward pass on several occasions, but met with no great success. One of the bad features of Tuft's playing was their fumbling which frequently cost them the ball.

MAINE 2nd 0; OLD TOWN 0.

The Maine 2nd team played the Old Town eleven Saturday, Oct. 26, on Alumni Field. The game was clean and snappy. Jones, playing left halfback, saved Old Town from being scored on, while Torrey did some good work for the 2nd team. McLellan, an old Colby player, was right tackle on the Old Town team.

The summary:

MILITARY DEPARTMENT.

The military work in the University is well under way. The opportunity to take the companies out of doors while the weather was still mild has been seized by the commandant, in order that the companies could have battalion drill. Since the companies are composed of so

many men, and the area necessary to easily manouvre them in battalion drill is so large, it was thought best to neglect the manual of arms for the time being, and put in this other drilling now instead of in the early spring when the ground is wet.

The companies are taking hold of the work very readily. Recently they were given their first lesson in the capturing of an enemy. Company C was sent into the thick woods on the east side of the Campus, and fifteen minutes later, companies A, B, and D were sent to capture it. The three attacking companies deployed their men as skirmishers, and for half an hour they were forced to search throughout the thick underbrush before the hidden company was located.

It has been decided to change the uniforms of the battalion from the old army blue uniform with caps, to the olive drab service uniforms such as are now used in the regular army. Although these are not quite as dressy as the blue uniforms, still they are much better for the men since many of them wear their uniforms most of the time while at their recitations, and this color is more serviceable than the old light blue. The men are also required to wear tan-colored shoes to match the color of the uniforms. Besides the new uniforms, the battalion will have the new Krag rifles, which were received from the United States government last year. These rifles, being the same as are used in the U. S. army at the present time, give the men every opportunity to familiarize themselves with the modern army weapons and their use.

The same plan which was adopted last year will be followed again this year as far as the competitive drills are concerned. Once each week these drills are held, and the captain of the company whose average for the year is the best, is appointed major for the ensuing year.

This year the battalion is divided into four companies, in each of which there are about 40 men. Each company is officered by a captain, first lieutenant, and two second lieutenants. The officers for this year are as follows: Capt. Walter S. Brown, 25th infantry U. S. A., Commandant; Joseph Jacobs, Major; Co. A, J. S.

Irish, Capt.; K. R. Fox, 1st Lieut.; J. N. Cadwallader and J. N. Philbrook, 2nd. Lieuts.; Co. B, H. M. Bowman, Capt.; G. E. Springer, 1st. Lieut.; H. T. Cole and F. E. Wiley, 2nd. Lieuts; Co. C, B. I. Collins, Capt; Alton, '10, 1st Lieut; G. Norman and H. W. Wright. 2nd Lieuts; Co. D, A. L. Farnham, Capt; Chadwick, 1st Lieut; H. M. Woods and E. Lambe, 2nd Lieuts.

"MAINE NIGHT"

Last Friday evening the University Chapel was packed to the doors and standing room out in the lobby was in demand, when the best annual Maine Night exercises ever held on the Campus rallied students and alumni to the greatest mass-meeting of the year. Dean Hart very ably presided, and the whole student body showed their appreciation of "Janie's" long and faithful service in the interests of the University by the magnificent ovation which he received. Dean Hart introduced as the first speaker, John T. Kendrigan, President of the Athletic Association. President Fellows was the next speaker, representing the faculty, and then came Captain Higgins. John M. Brockie, '06, spoke for the younger alumni and E. B. Davidson for the Law School students. Mr. Davidson said that the attitude of the Law School men was sometimes misconstrued, because there were many graduate students at the School who felt that they owed their loyalty to their Alma Mater rather than to Maine. This, he said, was no more than right and proper. Hon. George Thompson was next introduced to speak for the alumni, and then came the last speaker, Coach McCoy, whom Dean Hart called "the autocrat of the Campus during the football season." Mr. McCoy said that he wanted the student body to realize acutely one thing especially, and that was the thanks they owed the second eleven this fall; the men who, with no thought of reward, went out on the field and stood up to be knocked down to furnish practice for the 'varsity. Regrets were received from Major Phillips, Dean Walz and "Cracker"

Wilson, who were to have been on the list of speakers.

The band, which is the largest and best Maine has ever had, comprising about 30 pieces, made its reputation for the year. The large number of brass instruments available make it especially suited this year to athletics. Several selections, including Maine state songs were given between speeches, and at the close all joined in singing the University Hymn.

After the exercises a dance program of about fifteen numbers was enjoyed in the "gym," music being furnished by the University Orchestra.

Among the alumni back for Maine Night were those known to upper classmen as "Hodie" Burke, Dick Talbot, "P. I." Chase, "Doc" Colcord, Harry Sawyer, "Rachel" Sherman, "Judge" Parker, "Shang" Austin, Lester Howard, "Al" Elliott, F. F. Smith, "Hal" Reynolds, ex-'08, "Sam" Foster, "Nig" Haley, Harry Eveleth, "Tom" Reed, "Whang" Stanford, E. C. Butler, "Hank" Kierstead, and a score of others.

THE HOUSE OF HEART'S DESIRE,

The rehearsals for Mrs. Ralph K. Jones' new comedy, "The House of Heart's Desire," are being pushed rapidly in preparation for its production sometime during the week of November 18. It is Mrs. Jones own dramatization and, her ability in this direction insures a successful play. The cast will include Mrs. R. K. Jones, Miss Anne Snow, Malcolm E. Fassett '10, William H. Gilbert '09, and Robert E. Clayton '07, and others. Mr. Fassett and Mr. Gilbert were prominent characters in the Junior Week play given by the University Dramatic Club last spring, and their well known ability along this line should insure a finished production.

A meeting of the Literati will be held in the library at seven o'clock this evening. Professor Estabrooke will lecture on "The Supernatural Element in Tennyson." Music and recitations will also form a part of the program.

SENIOR SKULL SOCIETY.

The Senior Skull Society is to give an informal dance in the gymnasium, Nov. 22, two weeks from next Friday. This is given by the Senior Society for the special benefit of the Athletic Association and the attendance of every student in the University is earnestly asked. The price of tickets will be one dollar. Pullen's Orchestra will furnish music.

SOPHOMORE CLASS PIPES.

The Sophomore committee on class pipes, composed of sophomores Cruickshank, Wright, Kinney, and Harward, have selected a pipe which is being bought of a small New York concern through A. L. Lewis of Bangor.

The pipe is about five inches in length; the bowl is medium size with a round top, sloping gracefully down to the stem; the stem is square and is about two inches long, but unlike ordinary pipes the flat side is down so that the pipe may be placed on the desk without spilling its contents, making an angle of eighty degrees from the perpendicular bowl; the bit is two and one half inches long and is of clear or clouded amber to suit the smoker. The M on the bowl is a block letter three fourths of an inch high while the numerals are also of the block type but are three eighths of an inch tall.

The case is covered with a light shade of kid and is lined with the class colors, red and white with the numerals printed in red on white ribbon across the trade mark. The pipes are expected to arrive this week.

A meeting of the Dramatic Club was held Tuesday, Oct. 29. A committee consisting of L. R. Lord, pres't., D. S. J. Smith, bus. mgr., Ernest Lambe and W. H. Gilbert was appointed to select a play. The Club will not give a Shakesperian play this year, but will study a farce comedy. One of the plays under consideration is "The Arabian Nights" by Sidney Grundy. The committee will be largely guided in its selection by Mr. Daggett.

THE MAINE CAMPUS

Published on Tuesday of each week during the college year by the students of the University of Maine.

Address all business communications and make all checks payable to W. D. Trask, Business Manager, Orono, Me.

Contributions from undergraduates and alumni are earnestly solicited. They should be addressed to the Managing Editor.

BANGOR CO-OPERATIVE PRINTING COMPANY

EDITORIAL.

THE CAMPUS has recently realized that no mention has been made in its columns of the death of Dorothy, the daughter of President and Mrs. Fellows. No doubt several of the old and many of the new students have not heard of this great sorrow which has come into the home of our President. At the age of ten years she received an injury which resulted in tuberculosis of the spine. After a year or so she seemed to have recovered, but about a year ago there appeared a recurrence of the disease. Her illness was watched with anxiety during the past year, and hope was entertained that the opening of the college year would find her condition much improved. Last winter she was taken to

New Orleans by Mrs. Fellows with the hope that the climate and medical skill there would benefit her. In June she returned to Orono and a little later was taken to Onawa in the hope that the high altitude and the air of the Maine woods might bring relief, but despite all skill known to the medical profession, the progress of the disease could not be stopped, and she died at the latter place August 18th, last. The sympathy of the entire college community goes out to President and Mrs. Fellows and family in their affliction.

Work was begun on the 1909 *Prism* some time ago, and it is time for every student in the University to see in what way

1909 Prism he can help out the *Prism* this year. The *Prism* is the annual representing the University of Maine, and while it is essentially gotten out by the Junior Class, there are certain things in the book for which the editors must depend upon the members of all the classes. These are the grinds, the class histories, and some of the drawings.

The grind section of the *Prism* is one of the most important as well as one of the hardest to make up of any in the book. A large **Grinds** number of grinds must be had to select from, and every man in college is earnestly requested to keep his eyes open for any little things that may happen from day to day, which might find their place in the grind section. Take this opportunity of "slamming" your friends and enemies, and try to help make this grind section one of the best ever published in any *Prism*. As a special inducement, three prizes have been offered to the three persons turning in the best three grinds for the *Prism*. The first prize is a five dollar gold piece; the second, a copy of the 1909 *Prism*; and the third, a dollar bill.

The class histories this year are to be written by competition, and a copy of the 1909 *Prism*

will be given to each person whose history is published for his respective class. Every student in college is eligible to write his own class history, and it is hoped that a large number will compete from each class. This plan is being tried in an endeavor to get better and more original histories than have been published in the past. Every man wants to see his own class history the best in the book, and everyone, who has any literary ability at all, should try to make it the best. The English department has kindly given its consent that one of the subjects for the next Sophomore Theme shall be a class history for the *Prism*. This is to be passed in as a regular Sophomore Theme, and it will also be given credit in the competition for the *Prism*. All those intending to enter the competition for these histories should hand in their names to the editor at once.

A third way in which the book may be helped is by furnishing drawings. If you have any artistic talent, see the artist of the **Drawings** *Prism* as soon as possible, and find out what he needs. Then see what you can do with the subject he gives you. This is a good chance for the men in the lower classes to get in line for artist of their respective *Prisms*.

What has been said above applies to every student in the University, and especially to Juniors. It is the duty of every Junior in college to submit at least one thing for the *Prism*, and here is the opportunity. There is no man in college who cannot turn in something under one of the three above headings, so "get busy," and show what you can do.

THE EDITORS.

UNIVERSITY ASSEMBLIES.

A meeting of the assembly committee was held Wednesday noon, October 30, to start things in motion for the university assemblies which are held every year during the winter months. This committee is composed of one representative from each of the fraternities and from the non-fraternity men. Very little was done at this first meeting except to discuss plans.

P. I. Robinson, '08, was elected chairman of the committee, and a sub-committee, consisting of A. S. Hanson, '08, G. L. Wildes, '08, and B. B. Fogler, '08, was appointed to look up available dates for the assemblies. It was also discussed whether to hold two or three assemblies this year.

These assemblies are formal dances which are given by the Student body each year in the gymnasium. Two of these dances were given last year and as usual they were a marked success.

Another meeting of the committee will be held this week at which preparations will be commenced in earnest.

Y. M. C. A.

At the regular Sunday afternoon meeting of the Y. M. C. A. Nov. 3, the delegates to the Summer Conference at Northfield gave a very interesting report of their experiences while there. The speakers and their subjects were as follows: Dan Chase, '08, Finances; J. A. Gannett, '08, Round Top Meetings; R. H. Fisher, '08, Grub Department and Tent Life; B. A. Chandler, '09, Bible Study Classes; F. D. Knight, '09 and F. F. Fortier, '10, Athletics; C. C. Johnson, '10, Fourth of July Celebrations; I. M. Stone, '10, Platform Address. Directly after the regular meeting a mission study class was organized. This class is the result of Mr. A. W. Staub's address in Chapel last week, and has selected for its work the study of the Uplift of China.

PHI ETA KAPPA HOUSE.

Work on the Phi Eta Kappa House, the illustration of which appears on the next page, is being pushed rapidly. The excavating is finished and the concrete foundation will be done in a few days. Work on the superstructure will be begun immediately and the contract will be let this week. The brick work is started today. A gang of eight men are continually at work on the building and with good luck, it is expected to be practically ready for occupancy by the middle of April.

LOCALS.

The soloist at chapel service tomorrow will be Miss N. E. Eldridge of Brewer.

The Kappa Sigma and Sigma Chi fraternities held their annual initiations and banquets last Saturday night.

Monday, Oct. 28, Mr. Staub, representing the Y. M. C. A. volunteer student movement spoke at Chapel service.

Under the direction of Dr. Reynolds, a class in gymnasium instruction has been started for the co-eds. This class meets on Tuesday evening at 7.15 and on Friday afternoon at 4.30. At present there are fifteen young ladies in the class. The work for the year will probably be with dumb bells and Indian clubs.

The Literary Federation met Monday, Oct. 28, and elected the following officers: President, W. D. Trask; Vice President, L. R. Lord; Secretary and Treasurer, W. L. Emerson.

The customary fall "Peanut Scrap" was held at 11.30 Monday night, Oct. 28. The Freshmen and upper classmen say it was a "Peanut Roast." A small attendance is reported.

Professor Drew's book on "Invertebrate Zoology," published last summer, has been adopted by Columbia and Yale as the authorized text book on the subject.

The Debating Club will hold a meeting Thursday, Nov. 7. The question discussed

will be, Resolved, that the President of the United States should be elected for a term of eight years. Speakers for the affirmative will be Stover, '10, and Goodrich, '10. Those for the negative will be Redman, '10, and Harmon, '10.

At the annual meeting of the Maine Association of Colleges and Preparatory Schools held recently in Bangor, Dean Hart gave an address on "The Rating of English in College Entrance Requirements." Prof. Caroline Colvin and Prof. Segall also took part in discussions.

F. W. Halliday of Sebattus, a graduate of Dartmouth, B. A. in 1901, M. A. '03, is registered at the Law School.

Miss Sarah E. Brown and Irene C. Richardson went to Somerville, Mass., where they attended the annual convention of the Delta Sigma Sorority held last Friday and Saturday.

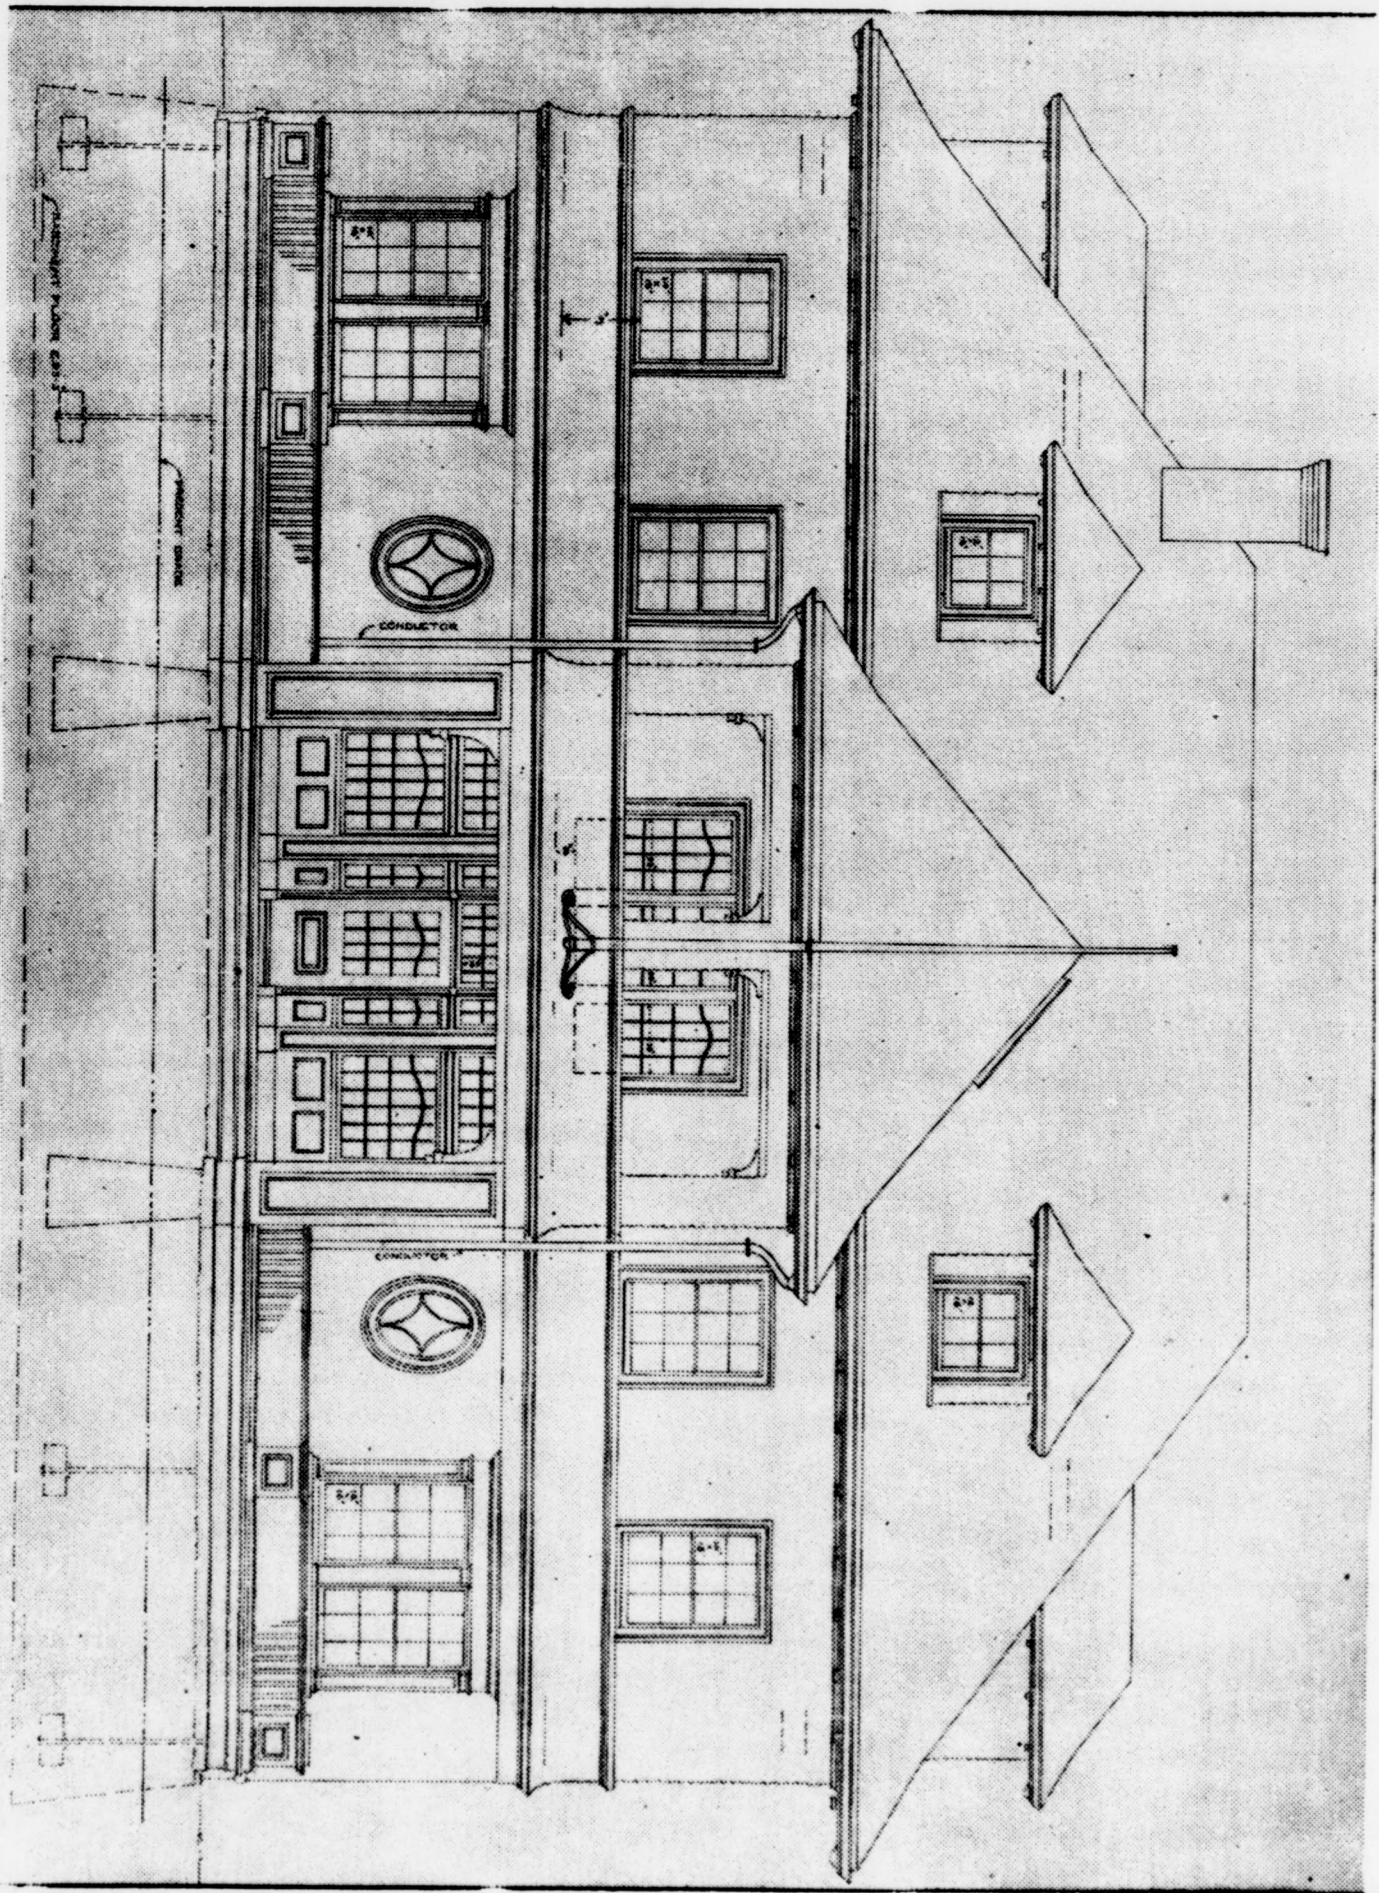

A reception was given by the Omega Lambda Upsilon fraternity to the members of the faculty last Wednesday evening, Oct. 30.

Prof. Aubert has presented the library with ten volumes of "Chemischer and Chemisch—technischer Vortrage," edited by Prof. Dr. Felix B. Ahrens.

The Pharmaceutical Club, which the students in the pharmacy courses have just organized this year, were fortunate enough to secure Mr. Charles B. Davis, President of the Maine Pharmacy Board, for their first lecturer, last Friday, Nov. 1.

The course of University lectures, by professors from different colleges, which have been given in past years, will not be given this winter. The principal reason for omitting them is the lack of attendance by the students.

The many friends of President and Mrs. A. H. Harris of Northwestern University, formerly President of the University of Maine, will be grieved to learn of the critical illness of Mrs. Harris, who is suffering from a cancer, at her old home in Philadelphia. Every means known to modern science has been tried to stay the disease but without avail and it is feared that the end is not far off.

THE NEW CHAPTER HOUSE OF THE PHI ETA KAPPA FRATERNITY

SHORT WINTER COURSES IN AGRICULTURE.

The College of Agriculture has just issued the annual short winter course circular. The course lasts eight weeks, beginning Jan. 7, 1908 and ending Feb. 28. Instruction is given in farm crops, farm management, animal breeding and feeding, fruit growing, veterinary science, carpentry and forge work. Study will be given in the use of fertilizers, improvement of land and proper tillage; also to the raising of crops and to the construction of farm buildings and the use of machinery. Attention will be given to the feeding of stock and to the operation of dairy implements. Fruit and vegetable gardening and methods of combating insects injurious to plants will be taken up, besides diseases of animals. A special course in poultry raising will begin March 16 and last two weeks. It will consist of lectures and practical work on breeding, feeding, incubation, brooding and preparing for market. The equipment for this study is made up of three thousand laying and breeding birds, forty incubators, and one hundred and twenty brooders. Instruction will be given by experienced poultrymen engaged for the purpose.

The second annual Farmer's Week will be held from Monday, March 9, until Friday, March 16. The programme will consist of lectures and demonstrations. Indications point to a large attendance.

These short courses are open to all, as the only necessary expense will be for books and board. Every student probably knows of someone at home who might profit by these courses. Why not leave their names at the office and have these circulars sent to them?

ANOTHER AGRICULTURAL TRIP.

Last Thursday the agricultural students, numbering about forty attended the institute held by the Commissioner of Agriculture, Hon. A. W. Gilman at East Corinth, Maine. They were attended by Professors Hurd, Campbell,

Beckenstrater, Waid and McClintock. The students left early in the morning, attended the convention, which lasted during the day, and returned in the evening.

The principal speakers were Prof. F. W. Card of Sylvania, Penn., and Mr. Andrew Elliott of Galt, Ontario. All subjects pertaining to agriculture were discussed, such as dairying, fruit culture, soil fertilizing, stock raising and general farm management.

AGRICULTURAL CLUB.

Wednesday evening, Oct. 23, the Agricultural Club met in the club room of the library, the meeting being called to order by the President, J. S. Irish. The routine business was taken up and among other things, it was voted to accept the banner which was designed for the Club. I. W. Bates gave a very interesting report on current events. After finishing the regular business, the Club presented to Dean Hurd a travelling bag, in token of their esteem for his efforts in their behalf.

The meeting then adjourned and was transformed into a smoker, and a social hour was spent in story telling and informally discussing matters of general interest.

FOOD INSPECTION IN MAINE.

Director Woods, of the Maine Agricultural Experiment Station is the executive officer of the Maine Food and Drug Law. His deputy has been constantly in the field visiting dealers in all parts of the State, since April, 1907. By this conference with dealers and correspondence which has resulted therefrom, and by the distribution of printed matter, the dealers have become pretty well informed relative to the requirements of the pure food law. They are for the most part in sympathy with the law and express their desire to comply with its mandates.

No prosecutions have been made, as the violations found have been through misunderstand-

ing and apparently with no intention of fraud or evasion.

While samples of many different kinds of goods have been taken, especial attention has been given to molasses, maple goods, vinegars, salt fish and sausage. Bulletin 145, giving the results of the examination of the maple goods collected in the spring of 1907, is now being mailed. This is being sent to all dealers in the state, to newspapers and to libraries.

WOOD STRENGTH.

The Forest Service has just issued a publication entitled *The Strength of Wood as Influenced by Moisture*, which is of value to engineers. In it are shown the strength of representative woods in all the degrees of moisture from the green state to absolute dryness, and the effects of resoaking.

The effect of water in softening organic tissue as in wetting a piece of paper or a sponge, is well known, and so is the stiffening effect of drying. The same law applies to wood. By different methods of seasoning two pieces of the same stick may be given very different degrees of strength.

Wood in its green state contains moisture in the pores of the cells, like honey in a comb, and also in the substance of the cell walls. As seasoning begins, the moisture in the pores is first evaporated. This lessens the weight of the wood, but does not affect its strength.

It is not until the moisture in the substance of the cell walls is drawn upon that the strength of the wood begins to increase. Scientifically, this point is known as the "fibre-saturation point." From this condition to that of absolute dryness the gain in the strength of wood is somewhat remarkable.

In the case of spruce the strength is multiplied four times, indeed, spruce, in small sizes, thoroughly dried in an oven, is as strong, weight for weight, as steel. Even after the re-absorption of moisture, when the wood is again exposed to the air the strength of the

sticks is still from 50 to 150 per cent. greater than when it was green.

When, in drying, the fibre-saturation point is passed, the strength of wood increases as drying progresses, in accordance with a definite law, and this law can be used to calculate from the strength of a stick at one degree of moisture what its strength will be at any other degree.

Manufacturers, engineers and builders need to know not only the strength but the weakness of the materials they use, and for this reason they are quite as much interested in knowing how timbers are affected by moisture as they are in knowing how they are weakened by knots, checks, cross-grain, and other defects.

It is obvious that where timbers are certain to be weakened by excessive moisture they will have to be used in larger sizes, for safety. So far, engineers of timber tests, while showing that small pieces gained greatly in strength, do not advise counting on the same results in the seasoning of large timbers, owing to the fact that the large timbers usually found in the market have defects which are sure to counter-balance the gain from seasoning.

ALUMNI.

'88.

William J. Hancock, teacher of chemistry in Erasmus Hale High School, Brooklyn, N. Y., is joint author of an elementary chemistry recently published by Allyn and Bacon.

Honorary '88.

Maj. Chas. L. Phillips with his family and a party of officers from Fort McKinley occupied seats in the "Maine" grand stand at the Dartmouth game. Maj. Phillips was in charge of the Military Department from '85 to '88, and was given the honorary degree of C. E., in '88.

'92.

J. A. Hayes has been Superintendent of Construction of the new power station building for J. W. Bishop & Co., Contractors, Boston.

'95.

F. H. Damon, who has been in charge of the

Physical and Chemical Departments and Vice-Principal of Bangor High School, has accepted a position as Principal of Powder Point School, Duxbury, Mass. This is a high class private preparatory school for boys and a bright future is warranted from Mr. Damon's success in the past in educational work.

R. J. Arey, is with the Sante Fe R. R. as civil engineer with headquarters at San Bernardino, Cal.

'00.

J. Arthur Haynes and Annie Louise Merrill, a graduate of Bates College, were married Wednesday, Oct. 16, at Gardiner by the Rev. Mr. Gregson of Cambridge, Mass. Mr. Haynes was for two years an instructor of the University and now has a position as chemist in a Philadelphia paper mill. Mr. and Mrs. Haynes will be at home after Jan. 1, at Upland Terrace, Bala, Penn.

'02.

W. H. Caswell, is head draughtsman for the International Paper Co., New York City.

'03.

Robert F. Chandler has recently become a member of the Portland Upholstery and Decorating Co., 27 Free Street, Portland.

'04

H. F. French, who has been employed by the I. W. Bishop Co., of Boston, is now a civil engineer with the Bangor and Aroostook Railroad at Bangor.

'05

A. W. Sprague, who received his M. S. from Harvard last spring, has returned to Harvard this fall to study for the degree of Ph. D. He is one of the 'cellists in the orchestra of the New England Conservatory of Music, and the organization has used some of Mr. Sprague's composition to advantage.

A. W. Collins is superintendent of the construction of a railroad in Hawaii.

F. D. Fenderson was recently on the Campus. He is engaged on extension work with the New England Tel. and Tel. Co., with headquarters at Portland.

'06.

Harry Emery, is with the New York Central Railroad in their New York City office.

F. A. Banks is still in the U. S. Reclamation Service at Glendive, Mont.

Reginald Ridge, is with the Bangor & Aroostook R. R. at Houlton, in the civil engineering department.

Walter O. Frost of Rockland, who is in the employ of the Cleveland-Cliffs Iron Co. in Negaumee, Mich., has just been appointed deputy fish, game, forestry warden of the Munising District, Upper Peninsular. His territory includes three counties, Alger, Luce and Schoolcraft, but his headquarters will be in Munising which is a town of about 2000 population. The other large towns in his district are Ishpeming, about 4000; Negaumee, about 8000, and Marquette, about 12,000. The remainder is practically new country comprising small settlements and lumber camps.

Walter O. Frost will be better remembered as "Jack" Frost, the star pitcher and captain of the University of Maine baseball nine two years ago.

The wedding of H. C. Elliott, of Everett, Mass., and Miss Angie E. Shaw, of Orono, took place in Orono, Saturday evening, Oct. 19. Rev. J. M. Brockie of the Orono Congregational Church officiated. The bride and groom were attended by the bride's sister, Miss Christine Shaw, and William F. Scammon of Berlin Mills, N. H. Mr. Elliott is employed by the New England Bridge Company, at Everett, Mass.

'07.

Ernest D. Bean is at present employed as inspector on the East River tunnels of the Pennsylvania Railroad at New York City.

Erwin A. Hussey has removed from Wilmington and is also employed on the East River Tunnels.

"Butt" Harlow, "Fat" Rounds, and "Cuffy" Philbrook, have congregated at Lynn, New Mexico, on a tunnel project of the Sante Fe Railroad.

INTERCOLLEGIATE ITEMS.

Captain Hetherington from last year's Colby team is coaching Ricker Classical Institute.

The Pennsylvania football management has formed a press bureau to keep the world at large fully informed on the strict eligibility of rules which are being enforced.

The Bowdoin College Dramatic Club will present "Half Back Sandy" this year. Arrangements are being made to stage the play in Brunswick, Augusta, Farmington, Portland and Bangor.

The Colby College Dramatic club has decided to present for a college play this season, The Toastmaster, written by Norman Lee Swartout, the author of Half Back Sandy, the play so successfully staged last year.

The Cornell University board of trustees recently ratified the plans of President Schurman for raising the requirements for engineering degrees from four to five years, with two years work in the college of arts and sciences as preliminary to the technical training.

A PEN IN A CLASS BY ITSELF

There's no pen that gives such all-round satisfaction as Conklin's Self-Filling Fountain Pen. It's in a distinct class by itself. *It's the College Standard.* Doesn't matter where you are—in your room, lecture hall, or on the train—you can fill it instantly by dipping in any ink-well. A slight thumb pressure on the Crescent-Filler does it. Cleaned in the same simple, easy way.

Conklin's Self-Filling Fountain Pen

"THE PEN WITH THE CRESCENT-FILLER"

has won distinction the world over. For student, professor, business man, professional man, and for the man who moves about, it is *the only pen*. No mussy dropper, nothing to screw or unscrew, no tool kit, no inky fingers. Ink flows as smoothly as a prize essay. No stops, no blots, balks or scratches.

Leading dealers handle the Conklin. If yours does not, order direct. Look for the Crescent-Filler and refuse substitutes. Prices, \$3.00, \$4.00, \$5.00 to \$15.00. Send at once for handsome new catalog.

THE CONKLIN PEN CO., 310 Manhattan Building, Toledo, Ohio.

JACOB REED'S SONS

Makers of

"QUALITY"

Uniforms.

Reed "Quality" Uniforms are designed and fashioned by skilled Military Tailors and made throughout by competent work people. They are manufactured on our own premises in light, clean and airy work rooms under perfect sanitary conditions. These factors are important in the production of uniforms of high character.

One of the most satisfactory departments of our Uniform business is that devoted to the outfitting of students of Military Schools and Colleges. The results we obtain are highly creditable and produce renewals of contracts year by year.

In addition to our Uniform business we are Retailers of Clothing, Haberdashery and Headwear. The goods we sell are especially adapted to young men and are noted for their excellence and fair prices.

BOWDOIN COLLEGE

MEDICAL DEPARTMENT

The Eighty-eighth Annual Course of Lectures will begin October 24, 1907, and continue eight months.

Four courses of lectures are required of all who matriculate as first-course students.

The courses are graded and cover Lectures, Recitations, Laboratory Work and Clinical Instruction.

The third and fourth year classes will receive their entire instruction at Portland, where excellent clinical facilities will be afforded at the Maine General Hospital.

Cornell University Medical College,

NEW YORK CITY.

The course covering four years begins during the last week in September and continues until June.

A preliminary training in natural science is of great advantage. All the classes are divided into small sections for recitations, laboratory and clinical bedside instruction.

Students are admitted to advanced standing after passing the requisite examinations.

The successful completion of the first year in any College or University recognized by the Regents of the State of New York as maintaining a satisfactory standard is sufficient to satisfy the requirements for admission which have lately been raised.

The annual announcement giving full particulars will be mailed on application.
