# THE MAINE CAMPUS

Vol. IX

ORONO, MAINE, NOVEMBER 19, 1907

No. 8

## SUMMARY OF THE GAMES.

MAINE, 0; HEBRON, 0.

The season began with the Hebron Academy game. Although Maine was held to a 0-0 score the students were not dissatisfied with the teams' showing. Hebron had a strong, heavy team, while Coach McCoy had not then found the men he wished for the several positions. Nineteen men in all were tried out, many of whom had never before played in a college game.

MAINE, 0; HARVARD, 27.

Harvard, in the second game rolled up a score of 27-0. Maine's offense in this game was much better than on the previous Saturday, but the difference in weight of the two teams prevented any consistent gains by the visiting team. Maine's backfield in this game did remarkably well, considering the difficulties under which they were played. Captain Higgins was a bright star, both on offense and defense. Although a large score was made by Harvard the Maine team showed improvement.

MAINE, 0; BROWN, 40.

Brown had the largest score made against the team during the season. The Providence eleven played hard and snappy, and with such men as Mayhew, Regnier and McDonald in the backfield gained at will. Maine still had nearly an entirely new team, and was in an unorganized condition, owing to the numerous shifts, Coach McCoy was making in an endeavor to pick the best men. The boys returned badly battered, but not discouraged.

MAINE, 0; DARTMOUTH, 27

The game with Dartmouth in Portland proved a big disappointment both to McCoy and to the student body. The team however was not as well developed as was thought, and Dartmouth played an extra good game, which resulted in a

score of 27-0. There were nevertheless many bright spots in Maine's play, which kept hope burning in the breasts of her adherents. The three hundred students who followed the team to Portland, remained on the bleachers for fifteen minutes after the game cheering, thus exhibiting the true blue spirit behind the team.

MAINE, 4; TUFTS, 0.

The confidence felt in the team was shown to be well founded, when, October 26, Maine defeated the strong Tufts team. Bearce the big freshman tackle won the game by a pretty goal from placement from the 25 yard line. This game established the fact that the University of Maine was still a factor in the championship series of the State. The team was beginning to get settled down due to some wise shifts by Coach McCoy. The development of the eleven was now pushed rapidly forward in preparation for the Bates game.

MAINE, 6; BATES, 6.

For the third time in as many years, the University of Maine and Bates College played a tie game, each team scoring one touchdown and kicking the goal. Maine clearly outplayed her opponents in all stages of the game, but were unable to score until the second half. A few minutes after the half began, Higgins cleverly anticipated a forward pass by Bates and dodged his way through the opposing team for a 50 yard run and a touchdown. Bearce kicked the goal. Later in the game, when it was too dark to distinguish the players, Bates got around Maine's end for a touchdown. The goal was kicked, tying the score. The game then had to be called on account of darkness.

MAINE, 8; COLBY, 0.

The following Saturday, Nov. 9, Maine defeated Colby on Alumni Field by two place kicks, in one of the cleanest and most interesting contests played by Maine this fall. The

two goals were kicked by Bearce, one from the twenty yard line and one from the thirty yard line. Colby contested every inch gained till the whistle blew, but after the first three or four minutes of play it was evident that Colby could not hold the Maine backs and they went through time after time for long gains. Both sides worked the forward pass with some success. The onside kick was also tried, and the Maine team worked it three times for good gains. The Maine men went into the game with a snap and vigor, and their playing was especially characterized by their ability to follow the ball. The Maine players all distinguished themselves in getting possession of the ball after punts, forward passes, onside kicks, and fumbles in a way that brought cheer after cheer from the Maine bleachers and the grand stand. The Colby team did some excellent work especially in the second half. The best work done by Colby at all during the game, was when it held Maine for downs on the one-yard line.

Maine made first down 18 times, during the game, while Colby only made the required distance five times. The total distance aggregated by Maine was about 350 yards, while Colby netted about 105 yards. Maine made a total of 145 yards, in running back kick-offs and punts, to 40 yards made by Colby. Maine punted four times, and Colby punted three times. Maine tried the forward pass six times, three of which worked successfully. Colby attempted the same thing seven times, and were successful but twice. These two passes were the cleanest and best forward passes, however, that have been ever worked on Alumni Field. Both sides were penalized twice. Maine for 30 yards, and Colby for a total of 20 yards.

Higgins and Chase played fine games, both being especially good in carrying the ball and on the forward pass. Bearce also added to his already enviable reputation as a place kicker.

For Colby, Goode and Dyer excelled. They were in every play and were responsible for most of the gains made by the visiting team.

MAINE, 5; BOWDOIN, 34.

It took nine passenger coaches to convey the six hundred Maine supporters to Brunswick last Saturday. So intense was the interest in the game with Bowdoin that almost every student in the University attended. Never had Maine sent such a delegation to an athletic contest out of town, and, although the team was defeated, every man feels that he did his best to support the players.

The special train left Orono promptly at eight o'clock. A car attached for the ladies was well filled. When the train reached Bangor several members of the Tarantine Club, for whom there was a special car, got aboard, besides many others. At Waterville a large number of Colby men joined us. At Bangor, Waterville and Augusta the students left the train and while the band played, the fellows took the opportunity to get in some cheering practice. The train arrived in Brunswick at 11.50. Because of the poor accommodations there, a large part of the Maine crowd obtained lunches at the lunch room in the special car run by Fox and Adams, the Bangor caterers.

The game which was called at two o'clock, was seen by the largest crowd that ever attended a Maine football exhibition, the attendance being nearly 4000. The Hubbard grand stand was filled to a seat, as were the bleachers which had been erected on the opposite side of the field, and the crowd thronged the ropes which marked off the two ends of the field.

There were three bands which made things lively, the Bowdoin and Maine bands, and a third which was with the business and professional men of Brunswick who occupied a section together.

Maine occupied a reserved section of the bleachers just opposite the grand stand. Bowdoin's cheering was exceptionally good, while Maine kept constantly at it, even in some of the worst parts of the game.

Miner received the kickoff for Maine, and was downed on his 25 yard line. Maine by steady gains advanced the ball to Bowdoin's 25 yard line where Bearce's attempt at a place kick failed. On the punt out, Maine again advanced the ball to the 25 yard line, where she was held for downs. Bowdoin fumbled, losing the ball, and at this point Capt. Crowley of Bowdoin was called out of the game for rough work.

Maine by a series of gains, rushed the ball over for a touchdown. Bearce missed the goal. Up to this time the game had been all Maine's, but from that point the advantage changed. After a series of gains by Bowdoin, during which Capt. Higgins of Maine was called out for alleged rough work, she made her first touchdown, and Newhall kicked the goal, putting Bowdoin in the lead, 6 to 5.

After Higgins was taken out of the game it seemed to completely demoralize the Maine team. Higgins' playing has hitherto been above reproach, and it undoubtedly took strong provocation to make such an experienced player forget himself.

Maine kicked off, and after an exchange of punts and some steady gains by Bowdoin, Commins went over for the second touchdown. Time was called soon after for the first half, score, Bowdoin, 11, Maine, 5.

Bowdoin's third touchdown came after two minutes of play in the second half, on Lee's 50 yard run, and gains by Wandtke and Newman, who carried the ball over and kicked the goal. Score, 17 to 5. The next touchdown was made on a delayed pass to Lee, who went around the right end. There was no goal, the ball striking the goal-post. Score, 22 to 5. The fifth touchdown was made easily, Phipps running the kick-

off back 40 yards, Burton, Newman and Commins, who made the touchdown, following with long gains. Newman kicked the goal. Score, 28 to 5.

Here Maine rallied, carrying the ball on gains by Chase, Metcalf and Hammond to Bowdoin's three yard line, but Bowdoin held, and it was her ball on downs. Bowdoin punted, secured the ball further down the field on a forward pass to Wandtke, gained 20 yards, then Phipps gained ten yards, and Newman by a 35 yard run brought the ball to Maine's two yard line, where Commins scored the sixth touchdown. Newman kicked the goal. Score, 34 to 5.

#### The lineup:

BOWDOIN	MAINE
Crowley, Smith, r. e, .....	l. e., H. Cook
Commings, r. t, .....	l. t., Houghton
Sewall, r. g, .....	l. g., Bearce

Phipps, Wakefield, l. h. b, .....	h. b., Higgins, Metcalf, Gilpatrick
Files, r. h. b, .....	r. h. b., D. Chase
Lee, f. b, .....	f. b., Hammond, Loring

Score, Bowdoin, 34, Maine, 5. Umpire, Stephenson, Exeter. Referee, Dadmun, Worcester Polytechnic. Field judge, Knight, Michigan. Head linesman and timer, Macreadie, Portland. Time, 35 minute halves. Touchdowns, Commings, 3, Lee, 2, Newman, Hammond. Goals, Newman, 4.

After the game the Maine supporters remained in the bleachers and cheered heartily for fifteen minutes, under the leadership of P. I. Robinson, '08. The return train was ready to start at five o'clock but was delayed nearly an hour, while the sight-seers strolled about the campus. The conduct and bearing of the two rival student bodies was all that could be desired, Maine accepting the defeat easily, while Bowdoin was magnanimous in her attitude as the victor.

Everyone was wearied by the trip and the excitement of the day and many slept all the way back. Some bought stop-over tickets and went to their homes over Sunday. The train arrived in Orono at 9.45 P. M.

The first game to be played between the two

institutions was won by Bowdoin in 1893 by a score of 12 to 10. At that time Bowdoin and Bates had been playing with each other for about five years.

The score for all the Bowdoin-Maine games is as follows :

1893—Maine 10, Bowdoin 12.  
 1896—Maine 6, Bowdoin 12.  
 1898—Maine 0, Bowdoin 29.  
 1899—Maine 0, Bowdoin 10.  
 1900—Maine 0, Bowdoin 38.  
 1901—Maine 22, Bowdoin 5.  
 1902—Maine 11, Bowdoin 0.  
 1903—Maine 16, Bowdoin 0.  
 1904—Maine 5, Bowdoin 22.  
 1905—Maine 18, Bowdoin 0.  
 1906—Maine 0, Bowdoin 6.  
 1907—Maine 5, Bowdoin 34.

#### ATHLETIC ASSOCIATION.

The regular meeting of the Executive Committee of the Athletic Association was held in the library, Tuesday, Nov. 12th. Capt. Brown reported that at the end of this season the Athletic Association will have a surplus of \$500, and that in the near future a copy of the treasurer's report would be issued to every member of the Association.

The petition from the Hockey Club asking that hockey be recognized as a branch of the University athletics was rejected, and on the motion of Capt. Brown it was voted to appropriate for the Hockey Club an amount not exceeding \$25.00.

The treasurer, Capt. Brown, requested that all expenditures of managers and captains of the University teams be put in, in the form of requisitions on the standard requisition blank and that the treasurer may refuse to pay any bills not presented in this manner. On the motion of Prof. Jones it was voted to approve the recommendation.

W. M. Black's name was recommended by the sub-committee on basketball as captain, and Mr. Black was approved by the Executive Committee.

It was voted to appoint a committee to have a revised edition of the regulations of the Athletic Association printed. This committee is to get out a sufficient number of pamphlets and is limited to \$25.00 expenditures.

The matter of underdraining the athletic field was brought up and the matter was referred to the Committee on Grounds.

The University has agreed to furnish the tiling for drainage and teams to do the hauling if the Association will furnish the labor. The field is covered at present with a layer of clay which holds the water on top and which keeps it in poor condition for some time after a storm. The new plan is to dig a trench the length of the field and at about every 25 feet along this trench dig other trenches going to the sides of the field. These trenches will all be about a foot deep and on a slope, so that the water will drain off. In the trenches the tiling will be placed and then rocks thrown on. During the winter sand and gravel will be hauled and placed on the field so that it may be spread out in the spring and rolled down hard for baseball.

This will probably make the field about two feet higher than it now is.

#### COACHES AND CAPTAINS OF MAINE TEAMS.

Maine : Frank J. McCoy, Yale, coach ; Harrison P. Higgins '09, captain.

Bowdoin : Ross McClave, Princeton, coach ; "Bill" Crowley, captain.

Bates : Thomas F. Keady, Dartmouth '06, coach ; Schumacher, captain.

Colby : George Bankhart, Dartmouth '06, coach ; "Bill" Sherburne, '08 captain.

S. M. Bird was on the campus last week.

John Bates is instructor in mechanical engineering in Iowa State College. He has taken the place formerly occupied by R. H. Porter '06 who has been advanced.

### THE HOCKEY OUTLOOK.

The prospects for a winning hockey team are exceptionally bright. Eighteen were reported to Capt. Chase for the initial practice and since then several more have been elected to the number. The material is excellent as the majority are men of experience.

A good schedule of games is looked for as Mgr. Milliken has received good inducements from Dartmouth, Springfield Training School, and a few other colleges of good standing. A Washington county trip is also being arranged.

The exact location of the rink has not been decided upon, but in all probability it will be situated in the rear of the Commons.

The following men are out for the team: Bagg, '10, Barker, '11, Lamb, '10, Cook, '10, Parsons, '11, Gooch, '11, Hosmer, '11, Pray, '09, Brulin, '11, Miner, '08, Casey, '11, Chase, '08, Clifford, '11, Clark, '11, Ryan, '11, Cole, '11, LeBarron, '11, Davis, '11, Wood, '11, Milliken, '09.

### LAW SCHOOL NOTES.

Friday Evening, Nov. 15th, the Assembly met and the following question, was argued, Resolved; That the statute requiring three years study of law should be amended by striking out the word "three" and inserting in its place the word "two." Mr. Higgins and Mr. Snow were the affirmative speakers and Mr. Mitchell and Mr. May argued for the negative. Mr. May and Mr. Mitchell did especially well and received the unanimous decision of the judges. After the debate Mr. Grady gave a reading and Mr. Cartier gave a very interesting talk on Current Events. Mr. Anderson was appointed Critic and gave some pointed and appropriate criticisms.

Mr. R. L. Mitchell, A. B. '07, and A. C. Anderson, A. B. '07, have been pledged to the Lex Club.

Last Tuesday a notice was put on the bulletin board purporting to be signed by the Dean, excusing the classes in Municipal Corporations

and Torts, so as to enable those interested to attend the Municipal Court. The case was State vs. Curran, Professor Simpson for the prosecution and Professor Martin for the defendant. The arguments for both the prosecution and the defense were very able and well worth attending. Later, however the notice supposed to be signed by the Dean was discovered to be a forgery.

Dean Walz gave a very interesting talk in International Law Wednesday morning on "The Evolution of the Beard." Among other things the Dean said that in olden days the beard was the sign of the free-man but in the days of Alexander the Great an edict was issued compelling every man to shave. After Alexander's death, however, the beard gradually came into vogue again and distinguished the freeman from the slave and surf who were compelled to shave. In the time of Louis XIV, shaving again came into style for the reason that Louis was unable to grow a beard.

### COLBY COMMENT.

#### ON THE MAINE-COLBY GAME.

"So far as Colby is concerned the race for the football championship for 1907 is over. Although defeated in the final game at Orono last Saturday, yet the sense of defeat was greatly lessened by the spirit shown by the University of Maine boys. There was no such feeling after the game as followed the Bowdoin contest two weeks ago. Saturday's game showed football as it should be played. Every man did his best, and dealt fairly and squarely with his opponent throughout the game. This is the kind of football Colby has played all the season. It is the sort Coach Bankhart teaches. While Colby has no motto painted on her grandstand, yet the words of President White, which he has so often repeated to the students, have been carried out in practice by our football men this fall: 'Play your game well and win if you can, but never sacrifice your honor for the sake of winning; always be willing to prefer noble defeat to ignoble victory.'"—*Colby Echo*.

## EDITORIAL.

THE defeat of last Saturday came as a complete surprise not only to Maine men, but to football enthusiasts in all quarters. Bowdoin played a very rough, but hard and fast game, and Maine, deprived of her guiding spirit, was suddenly paralyzed both in offense and defense. But Maine can take a "licking" and grin in anticipation of future triumphs on the track and diamond next spring. Here's hoping the best man may win!

THE college spirit this fall has been the most genuine and spontaneous ever felt at Maine. Not only have the students cheered

themselves hoarse, but they have gone down into their pockets better than ever before.

Subscriptions to the Athletic Association have flowed in to such an extent that the Association is now financially ahead. Ninety-two per cent. of the Seniors subscribed, ninety-one per cent. of the Juniors, eighty-five per cent. of the Sophomores, and seventy-three per cent. of the Freshmen. This is by far the largest subscription ever paid into athletics.

Two special trains were run, one to Portland and one to Brunswick. These were both crowded to the limit. The special to Brunswick was especially large. The crowd was as enthusiastic as it was large, and would have done credit to a much larger institution.

The cheering has been hearty and prolonged. After the Dartmouth and Bowdoin games, Maine cheered for fifteen minutes after the teams had left the field. Now that the football season is over this spirit will be diverted with just as much enthusiasm into the numerous other branches of college activity.

Basket ball is next on the list.

The seventh annual convention of the Delta Sigma Sorority was held in Boston, Friday and Saturday, November 1 and 2. The features of the Friday evening meeting were readings by Prof. Whittemore of Tufts, and music. Miss Sarah E. Brown and Miss Lida K. Smith, were delegates from Maine Gamma Chapter, and Miss Brown responded to a toast at the luncheon following the Saturday session.

The University of Maine Forestry Association was organized Wednesday evening at a meeting of the students in the forestry course called by Prof. Tower. S. B. Locke, '08, was elected temporary chairman and committees for perfecting the organization were appointed. The object of the Association is to make the course more complete and to secure lectures from men prominent in forestry work.

## COACHES AND TEAM.

In the coach, in the trainer, the captain, manager, the backs, and in the line itself, Maine football interests have been fortunate in securing a most efficient combination this year.

Coach Frank J. McCoy has had charge of coaching the University of Maine football teams

FRANK J. MCCOY, Coach.

for three years. His ability has been shown by the success, which has attended the teams under his direction.

Mr. McCoy has had wide experience in football circles, and was famous during his college career. Entering Amherst in 1900, he played fullback the first year, and right halfback, the following season. He then entered the Yale Law School, but was ineligible to play during the fall of 1902. In 1903 he played right half, and in 1904, full back on the Yale team. Here, he distinguished himself through his kicking ability.

The following year, he began his connection with the University of Maine. That season was most successful, Bowdoin being defeated in the deciding game for the championship by a score of 18-0. Although the 1906 team did not win the championship, they played some close hard games with the leading teams of New England. His work this season is recognized

by every student in the institution. He is a big favorite with all and it is with pleasure and confidence that the student body hears of his return next year.

S. J. Farrell, "Steve," our hard working but ever genial and modest trainer holds a big place

S. J. FARRELL, Trainer.

in the heart of every Maine man. He deserves and receives a great deal of credit for the success of our track and football team, during the last five years.

"Steve" has an athletic record to be proud of. He was for three years the recognized champion of America in the quarter and half mile races. He was an all-round athlete, taking part in the sprints, the jumps and in pole vaulting. At one time he was champion in a standing back jump. Mr. Farrell has worked with "Mike" Murphy at Yale, in connection with the track and football teams. He has had a great deal of experience all over America in training and coaching. Last summer, he coached the Montreal Amateur A. A., which won more points than any Canadian team ever won before in a championship meet. He has been retained by them for next summer.

The University of Maine engaged Mr. Farrell in 1903. Since then he has had charge of training throughout the year. The track team has won three championships in four years. In plain words, "Steve" is "the goods" and it is hoped that his connection with the University will be prolonged indefinitely.

The manager of the team is John T. Kendrigan, '08, of Rockland, Mass. While in high

school he played football two years and managed the team two years. He entered Maine with the class of 1908, and has since engaged in numerous college activities. He managed the '08 football team during the first two years and was on the varsity track team during the same

J. T. KENDRIGAN  
Manager of Football

years. He was president of the Junior Class, and is now president of the Athletic Association. The team has been managed in a very efficient and commendable manner, and great credit is due Mr. Kendrigan for the season's successes.

Harrison P. Higgins, the captain of the 1907 team, graduated from Somerville (Mass.) High School in 1905. While in high school he played half-back on the football team. Mr. Higgins entered Maine with the class of 1909, and has been very prominent in college athletics. During his freshman year, he won his M, in four branches of athletics. This is his third year as left-half back on the football team and he was given that position on the All-Maine team of 1906. "Hig" is a hard and heady player, both on offense and defense, and has won the praise and confidence of his team-mates and the students by his brilliant and consistent work. Besides football, Mr. Higgins has made the varsity baseball team two years, track team two years, and basketball team one year. He was on his class baseball, football and track teams during his first two

years, being captain of the baseball team in his freshman year. He was president of the freshman class—and is now on the Student Council. "Hig" is also an exceptional athlete in that, during his whole college course he has kept free from any conditions in scholarship, which would hamper him in athletic work.

With only Captain Higgins, Miner and Metcalf of last years regular team back in college, the prospects for the season of 1907 were anything but encouraging. However a large squad reported to Coach McCoy, in fact the largest ever seen at Maine, and he began the difficult process of weeding out the men. In all, about 55 candidates appeared in uniform, which were numbered by classes as follows, Seniors 4, Juniors 11, Sophomores 15, Freshmen 25. This shows what an enormous task the coach had in developing a representative team. The Freshmen brought in some big men however and several have made good. The possession of a place on the team had to be fought hard for, and it was not until many experiments and changes had been tried, that Coach McCoy was able to pick his eleven for the Maine games. The struggle for center position resulted in

H. P. HIGGINS, '09.  
Captain and Left Half-back.

Metca  
11, wi  
end p  
ly un  
Bean,

Cavanaugh '11 being shifted from end, and Mason being second string man. Black '09 and Houghton '11 were finally chosen to the guard positions, with Wright '10 a close third.

Bearce, the big freshman star, was shifted to tackle from fullback to fill a weak spot. White, '09, had a chance on the other tackle. Ham, '09, and Bigney, '10, were the second

G. D. BEARCE  
Maine's Freshman Place-Kicker  
(Courtesy Bangor Commercial.)

string men. During the first of the season, Metcalf '10, and Cavanaugh, '11, were on the wings, but Cavanaugh was shifted to center and Metcalf to sub left-half. Cook, '10, and King, '11, with Clifford, '10, as sub were given the end positions. These men all developed rapidly under the coaching of McCoy and "Pete" Bean, and were putting up a magnificent game

during the closing battles of the season. Miner, '08, and Cook, '11, outclassed the other aspirants for the quarter back position, and have played consistently throughout the fall. In left-half back Capt. Higgins, '09, was easily the best man. Cobb, '11, played right-half during the first games but gave way to Chase, '08. Cobb, and Gilpatrick, '11, held down the substitute position. After Bearce had been changed to the tackle position, several candidates were tried out at full. Toole, '08, and Hammond, '11, finally being given the position. These men made Maine's backfield the best in the State. They have played brilliantly in the State games.

Other men who have played in parts of games are Vickery, '08, Torrey, '09, Duran, '11, Loring, '11, Wakefield, '11, Elliot, '11, and Gerrish, '11.

The second team this year has been the best the University has ever had. The games they played against the varsity were hard and fast. Coach McCoy attributes the success of the first team largely to the practice given them by the fellows, who went out simply to help the varsity develop itself. Some of the men who have played on it are Torrey, '09, (captain,) French, '09, Bigney, '10, Chase, '10, Pratt, '10, Cruikshank, '10, Cook, '11, Duran, '11, Gerrish, '11, Gilpatrick '11, King '11, Loring, '11, McCarthy, '11, Tarbell, '11, Wakefield, '11, Emery, '08.

The following table gives the weight and height of the varsity men:

	H't.	W't.
H. J. Cook, '10, l. e., Waterville.....	5.8½	152
G. D. Bearce, '11, l. t., Auburn.....	6.0	177
A. C. Houghton, '11, l. g., Marlborough....	5.10	181
C. A. Cavanaugh, '11, c., Portland.....	5.6	149
W. M. Black, '09, r. g., Belfast.....	6.1	205
H. A. White, '09, r. t., Lynn, Mass. ....	5.6	165
J. P. King, '11, r. e., Peabody, Mass.....	5.8	154
H. P. Higgins, '09, l. h. b., Somerville, Mass.	5.11	163
D. Chase, '08, r. h. b., Baring .....	5.10	165
A. C. Hammond, '11, f. b., Orono .....	5.11	168
H. L. Miner, '08, q. b., Haverhill, Mass. ...	5.9	148
A. S. Cook, '11, sub. q. b., Bangor.....	5.7	132
D. C. Metcalf, '10, sub. l. h. b., Augusta....	5.10	156
E. N. Vickery, '08, sub. r. h. b., Pittsfield..	5.8	148

The team averaged 168 pounds and the backfield 167. What they lacked in weight was more than balanced by their speed. There is

so much material in the two lower classes that the prospects for winning teams here are very bright for the next few years at least.

Owing to the change in the by-laws of the Athletic Association, regarding the awarding of the M, comparatively few men will receive that honor this fall. They are Captain H. P. Higgins '09, A. C. Hammond '11, D. Chase '08, H. L. Miner '08, H. J. Cook '10, G. D. Bearce '11, W. M. Black '09, C. A. Cavanaugh '11, A. C. Houghton '11, H. A. White '09, J. P. King '11,

Summary of scores : —

U. of Maine .....	3	1	1	1
Colby .....	3		1	2
Bates.....	3	1	0	2

### SOPHOMORE-FRESHMEN DEBATE.

Plans for the annual Sophomore-Freshmen class debate are at present being looked after by the respective managers, Wadsworth, '10 and Phillips, '11. The question is: "Resolved, That the free sale of Government inspected liquors, containing no more than five per cent. alcohol, would be preferable to the present system in this State."

Among those who are to contest for the Sophomores at the trials, which are to be held Tuesday evening, November 26, at the Library, may be mentioned Johnson, Redman, Harmon, Goodrich and Stover.

At the recent meeting of the Freshmen debating team, Bailey, Richardson, Southard, Maxey, Eastman and Jones manifested their intention of trying for the team. The Freshmen trials will

be held the same evening as the Sophomores, at the Library.

Neither of the classes have a sufficient number of men out yet, and it is urged that any one, especially Freshmen, who are interested in this work try for the debating team. As the class debate does not take place until the latter part of the semester, before the Christmas vacation, there is sufficient time to work up the subject.

### DRAMATIC CLUB.

The committee on selection of a play, for the Dramatic Club, held a meeting Tuesday, Nov. 13, and discussed several plays, including modern plays and farce comedies. "When We were Twenty-One" by Henry Esmond, was finally decided upon. This play has met with success everywhere and is a \$50 royalty play, and by special arrangement with the publishers the Dramatic Club will be able to reproduce it this season. The committee consisted of Ernest Lamb, L. R. Lord, Dexter S. J. Smith and W. H. Gilbert. Rehearsals will begin immediately.

### AGRICULTURAL CLUB.

The regular meeting of the Agricultural Club was held in Lord Hall Wednesday evening, Nov. 13. After the approval of the records, report of the committee on cheers was accepted.

Professor Wade gave a very interesting talk on agricultural conditions in the South. He took up at length situations as they were found after the War, and traced the gradual bringing back to a fertile and productive state the vast farms devastated as the result of the Civil War. He showed how the South, in view of the great progress now being made, must, in the course of a few years, become the great garden of the United States.

Mr. Sidney Bird, '07, gave a short talk on his summer's experiences, and told many interesting facts regarding squab raising.

## Y. M. C. A. NOTES.

During the last week much interest has been shown by the students of the University in the Bible study classes, and to date over 325 have enrolled. Eight of the nine fraternity houses have formed classes and of the 325 enrolled, 168 are fraternity men. Besides there are ten classes in Orono, two in Oak Hall, one in Stillwater, and two at the Mt. Vernon House, making a total of twenty-three classes. Eight leaders of these classes hold prominent positions in the University activities and four have faculty positions.

The beginners course, in charge of Professor Stevens, will take up the life of Christ as outlined by Edward I. Bosworth which is based principally on the Book of Mark with side references from the other Gospels. The advanced course under Professor Sprague includes a careful study of the last week of Christ's life and later will take up a course edited by Professor Jerks of Cornell on the Social Significance of Christ's Teachings.

The mission study class which was formed during the recent visit of Mr. A. W. Staub of the Student Volunteer movement, is now well under way and is proving a very interesting study. Dan Chase, '08 is leader and the text book used is Arthur H. Smith's "The Uplift of China." The study is not confined entirely to the text book but a number of reference books are used and special topics are assigned to different members of the class. Maps are freely used, thus helping to fix the geographical matters in mind.

The value and instructiveness of the course is greatly enhanced by having among its members Mr. Tse Sheng Lin. Mr. Lin has had a varied experience in different parts of China and in the class has demonstrated his ability to bring out the needs of his country in a very striking way.

There are at present about ten men enrolled in the class and it is hoped that this number may be doubled in a short time.

## W. S. BOLTON ON "PUMP INSTALLATION."

W. S. Bolton, formerly with the National Pump Company, addressed a meeting of the "Electrical and Mechanical Society" last Wednesday evening on the Installation of Steam Pumps. By special request he told a few things about the thermostat problem.

He said in brief that any man would meet with difficulties at times, if not with a big Corliss, with a small steam feed pump. As illustrations of this he cited several instances in his own career. At one time he saw a pump connected up so that the steam was going into the exhaust pipe thus giving no motion; at another time he found a suction loose so that the pump was drawing air; again he found a man trying to pump water with a thirty-five foot suction; at another time he sold a pump to a man who tried to use it with a hundred foot suction.

He next told of the different kinds of pumps, their duty,—the so-called duty of a pump is the amount of water it will pump one foot with one hundred pounds of coal—and where the different kinds of pumps could be used to the best advantage.

He said that centrifugal pumps are the best for low lifts and that they are used in series for high lifts working best under a small head of water, although they will work very well with a fair length suction and a high lift. Turbine pumps are very good for high lifts but rotary pumps have, in general, proved unsuccessful. All suction pumps work better with about a thirty foot suction than a foot head because a head serves as a hammer. At one town there was a five foot head that broke five cylinder heads; then the pump was raised. Centrifugal and reciprocal pumps are the most used. All kinds of pumps are now being run by electricity in mines and other places where steam is difficult to use.

He next spoke of the working of pumps, saying in part that all large pumps have fly wheels to make them run steadily; there is less wear in vertical pumps than in the horizontal. There is a loss in efficiency if pistons are made to travel more than one hundred feet per second for the

reason that it takes an appreciable time for the valves to seal and they will ram if the speed is too great. The "duty" has not increased to any great extent since James Watt made his first steam pump. He said that the size head varied to suit conditions, a common pinion being better than the worm gear pinion. The gear is the ideal way to lift water for low heads, and with a twenty-inch run there should be about six hundred revolutions per minute.

He next spoke briefly on thermostats, saying in part they were used in the different ducts to control the temperature. A thermostat consists essentially of a long tongue suspended between two points so that when the heat expands the tongue it connects with one point, which being wired to a magnet, closes the draft or damper and when the air gets a little cooler the tongue contracts, thus making the magnet open the damper.

#### PHARMACEUTICAL CLUB.

Last Friday afternoon at 3.30 the Pharmaceutical Club held its third regular meeting in No. 13, Fernald Hall. A large number were present. There was no regular speaker, but a discussion was taken up by the whole club on the subject of "Identification." Under the supervision of Prof. Jackman, the Club identified some twenty-five drugs of various kinds. This work proved very interesting and instructive to all present. The meeting lasted about an hour. It is planned to have regular meetings of the Club every two weeks, and many good speakers have been secured for these occasions.

The ladies of the Round Table gave a reception and tea to the students on Tuesday afternoon Nov. 13, from 4.30 to 6 o'clock in the club rooms of the library. Many of the students were present and coffee and fancy crackers were served. The committee in charge included Mrs. Woods, Mrs. Jackman, Mrs. Sprague, Mrs. Pearl, Mrs. Russell and Miss Colvin.

#### ALUMNI.

At one of the cafe's in Chicago about a week ago a little party of Maine alumni met one evening to exchange reminiscences over an informal dinner of the sort that are most enjoyed after a strenuous day in the office. Around the table were gathered the following faces familiar on the campus: William Webber, '84; F. M. Davis, '01; P. R. Keller, '01; Rodney Davis, '03; George K. Huntington, '05; Albert J. Butterworth, '06; Joe Goodrich, '07; Arnold W. Totman, '07;

'76.

A recent issue of the Brunswick Record devotes much space to the qualification of Hon. W. T. Haines for the governorship of the State, the election for which takes place next September. Mr. Haines is a graduate of Maine in the class of 1876, and has been a member of the University Board of Trustees for many years.

"Growing interest throughout the state in the candidacy of William T. Haines for the Republican nomination for Governor, is due not only to the attractive personality of the man himself, but also to the ideas for which he stands. There is much in the character of Mr. Haines that commends him to popular favor; there is even more in his direct straightforward, unqualified utterances, to justify his position as a candidate for the nomination for Governor."

"Few men in Maine have had wider opportunity to understand the needs of the State than Mr. Haines. As a boy he learned farming in his native town of Levant, and ever since has been an enthusiastic student of agriculture. He was educated in East Corinth Academy and the University of Maine, read law in Bangor and was graduated from the Albany (N. Y.) School. His first appearance in politics was in 1882 when he was elected county attorney of Kennebec. He served in that office for two terms, making a record that gave him great prestige with the people of that county. After serving two terms in the Maine Senate and one in the House of Representatives, he was elected as Attorney General of Maine. During the four

years that he held this important office he served the State with distinguished success.

Notwithstanding his notable work in the law and in politics, Mr. Haines has also gained unusual prominence in the fields of industry and of business. Largely through his efforts, water systems were constructed at Oakland, Machias and Searsport, a woolen mill industry was established at Oakland and the Somerset railroad was extended to Moosehead Lake. He has been particularly successful as a lumber operator and is said to cut more logs and pay for more stumpage than any other individual in the State. He has thus been able to learn from practical experience much of the needs of the State from a business and industrial standpoint."

'94.

Mr. E. H. Cowan has charge of the civil engineering work in connection with the drainage of a large area of swamps in Minnesota. He is in the employ of the France Dredging and Construction Co., and is located in Albert Lea, Minn. The object of the work is to make a section in that vicinity available for farming purposes.

Ex-'94.

A. N. Smith who was formerly a member of the firm Smith & Neally of Portland and designer of the Casco gas engine, has retired from business and has settled in South Harpswell.

'95.

H. A. Hall is Treasurer of the Kennebunk Electric Co.

The University of Maine has a very sizable colony of alumni in the employ of the General Electric Company at the Schenectady works. The following are among the old grads there: H. H. Clark, '99 is electrical engineer in the Mining and Power Department. H. A. Dolley Ex-'95 is assistant foreman of the turbine drafting room. J. G. Lurvey, '00, is in charge of the complaint department. W. L. Merrill '00 is an engineer in the Power and Mining Department. Carlos Dorticos '03 is in the Supply Dep't on Commercial Engineering. R. E. Strickland '04 is in the Power and Mining Department. J. E. Crowe '05 is in the same department.

Ralph H. Alton '05 is employed in the Construction Department and is now in charge of a series of experiments at Bloomingdale Ohio. H. A. Stanley '04 is also in the Construction Dep't. and is at present installing a large plant in the heart of the Adirondacks. C. E. Prince, '06, is first assistant on the night transformer test. W. D. Bearce, '06, is engaged in electrical inspection in the Testing Department. Ralph W. E. Kingsbury, '05, after two years in the Testing Department is now employed in the New York office of the same firm. M. G. Newman, '07, is in the Testing Dep't.

'98.

Ralph Rockwood was in Bangor last week. Mr. Rockwood returned recently to Waterville from Boston, having completed his work on the valuation of the New York, New Haven and Hartford railroad, which was begun last spring, by John F. Stevens, formerly chief engineer of the Panama canal—now one of the vice-presidents of the New Haven system. This valuation of the New Haven & Hartford railroad was the first ever made by any railroad in the world to ascertain the present value of its property. Mr. Rockwood was one of the first engineers engaged for this work and personally inspected much of the line.

'03.

John H. Hilliard, has taken a position with the Richard B. Aldcroft firm on Broadway, New York. Mr. Hilliard was recently in Old Town visiting relatives.

Harold V. Sheehan is with the Chandler E. Collins Company, Philadelphia.

'05

Percival R. Moodey, formerly in the Testing Dep't. of the General Electric Co. at Schenectady is now with the General Storage Battery Co. of New York.

'06.

"Shorty" Southard, who was recently on the campus, has gone to Boiestown, New Brunswick as assistant scaler with a lumber company. He will be engaged there about two years.

'07.

R. F. Talbot is spent a few days on the campus recently. He is running a farm with his father in Andover.

A. B. Brown is in the United States Reclamation Service at Glendive, Montana.

Sidney B. Orne of Boothbay Harbor has just received notice from the Secretary of the Treasury that he has successfully passed the examination before the Naval Board at New York for the U. S. Revenue Cutter service and expects his appointment within a few days. It is thought he is the first U. of M. man to receive such an appointment. There were eighty-eight, only seven of whom could pass a satisfactory examination physically and otherwise. These were sifted down to four who finally passed, Mr. Orne being one of them.

### UNDERGRADUATE DIRECTORY.

Athletic Association—President, J. T. Kendrigan; secretary, E. L. Towle.

## A PEN IN A CLASS BY ITSELF

There's no pen that gives such all-round satisfaction as Conklin's Self-Filling Fountain Pen. It's in a distinct class by itself. *It's the College Standard.* Doesn't matter where you are—in your room, lecture hall, or on the train—you can fill it instantly by dipping in any ink-well. A slight thumb pressure on the Crescent-Filler does it. Cleaned in the same simple, easy way.

## Conklin's Self-Filling Fountain Pen

"THE PEN WITH THE CRESCENT-FILLER"

has won distinction the world over. For student, professor, business man, professional man, and for the man who moves about, it is *the only pen.* No mussy dropper, nothing to screw or unscrew, no tool kit, no inky fingers. Ink flows as smoothly as a prize essay. No stops, no blots, balks or scratches.

Leading dealers handle the Conklin. If yours does not, order direct. Look for the Crescent-Filler and refuse substitutes. Prices, \$3.00, \$4.00, \$5.00 to \$15.00. Send at once for handsome new catalog.
