This certifies that I have examined the Books and Accounts of the Selectmen and Treasurer, and find them correct.

I would recommend some uniform system of keeping the Town Books, and a standard arrangement for filing the papers of the Town.

ANNUAL REPORT

OF THE

SUPERINTENDING SCHOOL, COMMITTEE,

FOR THE YEAR ENDING FEBRUARY 20, '88.

The Committee on Schools submit the following as their report for the past year:
Amount designated by vote of Town for Support of Schools,\$4.000 00 Amount received from School Fund and Mill Tax,
Total for Support of Schools\$\$6,474 37
Number of Scholars in Town April 1st, 1887,

It is the wish of your Committee to give to the citizens a complete knowledge of the condition of our public schools, but we feel that to do so is not an easy task. If parents and friends would more frequently visit our schools, they could from personal observation, form a more correct estimate of their condition and of the work being done by both teachers and pupils than it is possible for them to receive from us.

The action of the town at its last annual meeting, in abolishing the District and adopting the Town System of Schools, by a large majority, was quite a surprise to us, because we had not supposed our people had given sufficient thought to the subject to feel themselves [prepared to vote understandingly upon the question. However, the matter was quite thoroughly discussed, and the discision was emphatic in favor of the measure. And now having made the change, it should have a thorough trial; and we believe that time and experience will satisfy the most skeptical among us that it was a move in the right direction and will prove highly promotive of our educational interests. We beg our friends not to criticise too closely the work of the year just closed, but rather to withhold judgment until the three full years have expired. Your Committee have had many obstacles to meet and remove, and have tried to exercise all needed patience and forbearance. The school houses are not all properly located for the best good to the largest number of pupils, but it would not be advisable to make any changes in these at present.

We feel like congratulating the Town upon its adoption of free textbooks, whereby uniformity of school books is secured, a thing most desirable, and a large saving made in the cost of the same; yet this has very much increased the work of your Committee. While we have kept within the limits of your appropriation for this object, we recommend that the same amount be granted another year.

We desire especially to call your attention to the fact, that some of the schools in the village have so many pupils in attendance that they can receive very little benefit from the instructions of the teachers, and on account of the crowded condition of these schools, pupils are advanced more rapidly than they otherwise would be. Before these teachers can satisfactorily perform the work expected of them and the pupils receive the good intended for them, we must have additional school buildings; and this, of course, will necessitate an increased number of teachers.

During one of the terms of the past year, one of the teachers registered 112 names, with an average attendance of 84. Another teacher registered 84 names, average attendance 72, What can one teacher do with so many children crowded into a room which has seating capacity for but 56 pupils? There are also many reasons which make it seem desirable to abolish, as soon as possible, the school now occupying the third story of the High School Building. This cannot be done with our present accomodations. We ask that you will consider these matters carefully and decide at once to erect the much needed buildings.

Although the District System is not now in use, yet for convenience the schools will be referred to under the numbers of the Districts as

they have existed in previous years.

We have had in the town the past year 65 terms of school, 32 in the Rural Districts and 33 in the Village District. For these schools we have had 37 different teachers, 4 male and 33 female teachers. All but two of these have had previous experience in teaching, and several have held their positions for many terms. In the most of our schools good and satisfactory work has been done by teachers who have shown themselves well fitted for their positions, and much might be said in commendation of such work. In a few schools, while there has been much to commend and little to complain of, yet they have not reached that standard which we have desired to see. On the whole, we feel that we have had a faithful and efficient corps of teachers who have made lionest

efforts to accomplish the work required of them.

At the close of the school year, having served us faithfully and efficiently for fourteen years, Mr Taylor withdrew from the position of Principal of our High School to accept a similar position in Waterville. The Trustees of the Academy selected four from their number to act with your Committee in filling this vacancy. Mr. Walter H. Davis, who is a graduate from Bates College, and who had had an experience of several years in teaching, was chosen to this position. As Miss Belle Allen resigned at the same time, the position of Assistant was given to Miss Bertha L. Soule, a graduate from Colby University. There have also been a few changes in the lower grades of the village schools, caused by the withdrawal of some of the teachers. These vacancies have been filled by teachers of experience and whose record had been satisfactory. At present the schools and teachers of the Village District are as follows:

High School-Principal, Mr. Walter H. Davis. Assistant, Miss

Bertha L Soule.

First Grammar School-Principal, Miss Dora P. Cleveland. Assistant, Miss Annie B Ward.

Second Grammar School-Miss Alice S. Emery.

Intermediate School—North side, Miss May Pollard. South side, Miss Alice M. Fletcher.

Primary Schools—North side, Miss Zetta A. Pierce, Miss Annie L. Russell, Miss Annie E. Barbeau. South side, Miss Stella M. Foster, Miss Mae Smith, Miss Helen M. Hoxie.
