COUNTY NURSE REPORT

To the Citizens of the Town of Kingfield:

Two days in February, 1935, were spent in school work and assisting with a social service problem.

I hereby submit my report as the Public Health Nurse from February 1, 1935 to February 1, 1936.

Several visits were made to interested individuals in regard to a child welfare clinic which was held with an attendance of twenty-two. Dr. Dunlap's help at this clinic was very much appreciated.

One child was taken to three orthopedic clinics at the Farmington Memorial Hospital and six to the dental clinic held there.

Routine school inspections were made in the schools and notices of defects found sent to the parents.

Respectfully submitted,

Maine Public Health Association Nursing Service

Report of Superintendent of Schools

To the Superintending Committee and Citizens of the Town of
Kingfield,

Ladies and Gentlemen:

It is a pleasure to present to you my third annual report of the condition and improvement of the schools for the fiscal year ending February 15, 1936.

During the last school year there was in our schools a total enrollment of 224 boys and girls. Of this number there were 65 in the high school and 159 in the grades. Necessarily this report has to take the general form of others that have gone before, although I wish that it might be possible to make it interesting enough to insure its perusal by every voter in the town. Education of the youth of the community is one of our greatest obligations and the more interest aroused among our parents and taxpayers in the affairs of the school, the greater will be our improvements and the fewer our mistakes.

CONDITION OF BUILDINGS. Our high school building is at present in very excellent condition. The exterior was painted during the summer vacation and previously the interior had been painted and repaired, putting the building in a condition that will insure it against the need of further repairs for some years to come. Here it does not seem out of place to mention the fact that our school property is well taken care of by an efficient and conscientious janitor. Few people realize the responsibility that such a man must carry, but if we consider that he has to keep house for a family of 224 boys and girls, as well as be responsible for the safety of the school property, it is readily seen that it is not a small task.

During the year preceding this, the toilets in the Primary Building were repaired. They are now in an excellent condition, being clean, light and sanitary. The rest of the building is in need of repair. The walls of the interior are at present covered with paper that in many places is becoming detached. This paper should be removed and the walls painted, both from the viewpoint of misused light and a more sanitary condition. The expense of such a job would be small and while this report is being written, efforts are being made to secure funds from the W. P. A. to pay men who are now on the relief rolls of the town to do this work. The expense to the town will be only that of materials. From a viewpoint of economy, the exterior of the building should be painted.

This year, through the very generous co-operation of the Parent Teachers' Association, it was possible for us to wire the Primary Building for the installation of electric lights. The P. T. A. contributed toward this project the sum of \$50, which shows the efficient leadership and spirit behind this excellent organization which does so much to promote the welfare of our schools.

Through the generosity of another friend of the schools, Dr. C. J. Dunlap, it has been possible for us to have constructed an excellent tennis court. The Doctor contributed of his time and no small amount of money to the project and the boys and girls have shown their appreciation in the almost constant use of the court since its construction. Also the Doctor has made possible two indoor table tennis outfits.

The shower baths that are in Webster Hall are in an unsatisfactory condition. In fact, they are not at present in condition to be used. Of course, baths are necessary for the use of boys and girls taking part in athletics and it seems to me to be very poor economy to allow them to remain in their present state for a much longer period of time.

The fence that now encloses the yard of the Primary Building is in a very poor state of repair. In fact, there is very little of the original wire left. Some of the owners of property adjacent to the school complain of the trespass of the boys and girls and they seem to be justified in such complaint. To fence this yard properly and with wire that will be durable, it will mean an expense of approximately \$50.

INSTRUCTION. This year we have had more than the usual number of changes in the teaching force. At the end of the Spring Term Miss Julia Small resigned as teacher in the fifth and sixth grades, Miss Eleanor Rowell resigned to accept a position in Massachusetts, and this Fall, Miss Gertrude Snowden resigned to accept a position in Concord, N. H. Mrs. Louisa Abbott was secured to fill the position in the fifth and sixth grades, and Miss Bernice Green was hired to take up the work of teaching Latin and French in the High School. Miss Dorothy Wills has been secured to teach English and History. Both of these last two mentioned positions require a great deal of extra-curricular work such as Music, Debating, Prize Speaking, One-Act Plays, Girls' Athletics, etc.

Fortunately our work has not been interrupted because of contagious diseases and the severe weather, with the exception of a few minor diseases, has been the only cause of the lack of school attendance. As a whole, the average attendance during the past year has been exceptionally good and the school officials note the fact that tardiness has decreased to such an extent that there is now only an exceptional case.

The Course of Study that was adopted last year for the use of elementary schools has been faithfully followed and in most instances the outlined work has been accomplished. Longer periods, taking the form of a so-called "Revolving Schedule", have been adopted in the High School with the result of showing a greater amount of work accomplished.

Because of the crowded condition in the two rooms in the Primary Building it was felt advisable to secure the services of a helping teacher. In the first two grades, primary and first grades, we had an enrollment of over 50 pupils and in the second, third, and fourth an equal number. Of course this teacher's load was much too heavy and the required work could not be accomplished. Miss Glennys Cross was secured to serve as helping teacher and has been of great assistance to the two teachers and the results obtained have justified the creating of this position.

ACTIVITIES. Five teachers' meetings have been held during the year and all of these have been attended by all of our teachers. An attempt has been made to make these meetings helpful by having a discussion of our own local problem by experts in their field of work. The teachers have many times expressed themselves as having been helped.

An evening session of school was held on the evening of October 17 and was well attended by parents and citizens interested in the school. These evening sessions are worthwhile if only for the reason that we have more visitors in one night of school than we have in all the other 180 days of the school year combined.

Under the direction of Miss Green a School Exhibition was held during the evening of December 13. This was well attended and each school putting on an entertainment of their own preparation did a very creditable job.

An attempt has been made to continue the band instruction started last year but because of lack of interest or funds it has been impossible to continue this.

To motivate the work of spelling in our school a spelling match was conducted and it certainly accomplished the purpose of its instigation.

HIGH SCHOOL. While it has been necessary for us to make several changes in the personnel of the teaching force in the high school, the work as now being carried on is very satisfactory. Very few small schools require a greater amount of work from the teachers in promoting and carrying out extra-curricular activities than does Kingfield High School. Few outside of the school are aware of the effort and time that is expended by the teachers and principal in organizing and promoting plays and entertainments that will provide funds for the carrying on of these activities. With this in mind Principal Rhuland has been asked to make a statement in regard to these funds. Following is his report:

REPORT OF PRINCIPAL OF KINGFIELD HIGH SCHOOL

Mr. T. A. DeCosta, Superintendent of Kingfield Schools:

I am pleased to submit to you my fourth annual report as Principal of Kingfield High School.

The High School opened for the current year on September 3, 1935, with a total registration of 75 pupils, a gain of four over last year, distributed as follows: 2 post-graduates, 9 seniors, 25 juniors, 18 sophomores, and 21 freshmen. Our school continues to grow in number as has been anticipated, and justifies our extra needs. The present enrollment in the three lower classes totals 64 pupils and at present there are 22 pupils in the eighth grade as possible freshmen for next

year, which forecasts an even larger school of approximately 85 pupils or more for next fall, if other tuition students come from surrounding towns.

The registration by classes follows:

CURRICULUM AND SCHEDULE OF CLASSES CHANGED

What may perhaps be considered the outstanding contribution of this high school to the pupils and communities which this school serves, has been the changes in the course of study offered, and the daily schedule of classes within the limitation of our school equipment at hand. There has been a need for expanding and broadening our curriculum and schedule along certain lines to better serve the pupils of this school in the general course. Such a program was worked out this past summer while at study at the Bates College Summer Session, and has the approval of the State Department of Education at Augusta. It is most gratifying to report the complete success of these changes as exemplified by the cordiality with which they were received by the Superintendent of Schools, the School Board, and the teachers and students of this school. The entire program seems to be fitting advantageously the needs of the pupils.

It is a pleasure to report what is perhaps the greatest single benefit resulting from the schedule changes of this new program. This year each class of the day holds a recitation period over the subject matter and also a supervised study period with the teacher present to help the student if needed, in her own subject which she is teaching. This eliminates, to some degree, the need of the pupil studying at home without aid in the problems of the next day's lesson, and if the time in school is properly used by the student, it eliminates the home study to some amount. Such changes and benefits fit the changes of the times, for students of today have many more outside attractions than in former years.

This year our faculty has added two new teachers to replace those who resigned. Miss Bernice Green, Colby College, is teaching French, Latin, and English classes, and is coaching girls' track, prize

speaking, and the orchestra. Miss Dorothy Wills, Bates College, is teaching English and History classes, and is coach of dramatics, debating and commencement exercises.

Our high school continues to be accepted by the Maine State Department of Education and the New England College Certificate Board as a class A school. Such a rating enables our graduates who maintain certificate grades in their high school work to enter college without examinations.

Our number of library books has been increased again this year by a fine book on: The American Government, by Haskin, a gift from Abbie W. Simmons, Chapter Chairman Patriotic Education, Colonel Asa Whitcomb Chapter, Daughters of the American Revolution, Kingfield, Maine. Also from our library fees we have been able to purchase several books from the library of Rev. W. Barton Watson.

It might be interesting to townspeople to know that through the High School Fund a considerable amount of equipment for school use has been purchased.

HIGH SCHOOL FUND

The following is a complete statement of the High School Fund up to February 15, 1936. This fund is money raised by the students of our school from plays, carnival, dues, and other activities which the townspeople attend each year. Activities such as track, basketball, baseball, debating, and speaking contests, require money from this fund in order to carry them on in our program during the school year.

Since the report of last year, we have won high honors at Bates College in debating, and we won the girls' and boys' speaking cups at Phillips in the N. F. C. League. At the present time our basketball teams, both boys' and girls', have won many games this season in this section of the county.

I should like to recommend a no-school signal to be given by the H. G. Winter & Sons' Mill at 7:15 A. M. on stormy days such as we have had once or twice this year.

In closing may I state that any success in the administration of our high school comes from kindly advice and cooperation of the Superintendent, teachers, and members of the School Board, students, parents, and citizens of Kingfield. I wish to thank all who have shown a helpful interest in our school.

Respectfully submitted,

M. MAURICE RHULAND,

Principal, Kingfield High School.

TEXTBOOKS. The expenditures under this item have been larger during the past year than during some of the preceding years. We were informed by the State Department of Education that in order to retain our rating of Class A High School it would be necessary for us to expend \$75 per year for books to be added to the school library. With our present method of instruction of reading in the lower grades a large amount of supplementary material is needed and new books are constantly required. However, the improvement shown in the instruction of this subject certainly justifies any added expense that we have had to incur. The following is quoted from Dr. Packard's foreword in the Maine State School Bulletin of November, 1935: "It seems to me to be the duty and responsibility of school officials to take the lead in convincing the citizens that it is more or less a waste of money to expect to secure the best results on the part of the teacher when she lacks the proper textbooks and equipment with which to work. It requires an exceedingly small expenditure of money to secure these needed things in the schoolroom and once the people are convinced of the necessity, I believe they cheerfully make arrangements to see that the necessary tools of the schoolroom are provided."

SUPPLIES. In this department a total of \$378.05 was expended. Of this amount \$62.35 was spent for lights and a comparatively small amount for laboratory equipment—an amount that will have to be increased during the coming year because the State Department of Education is making a rule that from this fund at least \$75 will have to be expended for laboratory materials, such as supplies and apparatus. From this fund we have to attempt to furnish 240 boys and girls with paper, pencils, pens, ink and rulers required for a year's work. It can readily be seen that this means a sum of no small figure. These things have to be considered as do the textbooks and while every attempt is made to be as economical as possible, still an adequate supply is necessary for the accomplishment of the best work.

RECOMMENDATIONS. Our schools can undoubtedly be carried on for the coming year if an appropriation of \$6,000 is made for our school fund. If repairs are to be attempted at the Primary Building, an appropriation of at least \$400 should be made. It does not seem that we can reduce salaries and in some instances they

should be increased. Of course this matter of appropriation is settled by the voters at their annual meeting after the budget committee and the school committee have gone over the figures and made an estimate that they believe is justified. To the knowledge of the school officials there are no so-called "frills" or "fads" connected with the schools of the town and extravagance is not practiced. Only the essentials are supplied to our boys and girls.

If the repairs are made to the primary school the physical condition of our school plant will be second to none in the county, and we certainly owe it to our children to provide them with a clean, safe, and healthful place in which to receive the good instruction that our schools are now giving to them.

CONCLUSION. To add a personal note to this report may I state that as Superintendent of Schools of your town during the last three years I have always been appreciative of the excellent cooperation and help that I have received from parents and school officials.

Respectfully submitted,

T. A. DECOSTA.

REPORT OF THE SCHOOL NURSE

218 pupils in the Kingfield schools were given the routine physical inspection.

6 had symptoms of defective vision	4 were corrected
144 had symptoms of defective teeth	13 were corrected
41 had symptoms of defective throats	
40 were 10% under average weight	
9 were 20% over average weight	
16 home visits were made to discuss with the parents the correction of these defects.
