2-STATE AID CONSTRUCTION

The last year's account showed due from the State in 1942 \$911 89

This was transferred to Accounts Receivable, and has been paid during the year.

- -

It also showed available for further construction, As the State assumed the tar bill of \$309.76, and paid it from another appropriation, the amount available to us for further construction is thereby increased by that amount; so that the present amount available for construction under this account is

3 - THIRD CLASS CONSTRUCTION

As no money was available to the State in 1942 for Third Class Construction, none was apportioned, and the amount of \$502.25 will be due from the State when, and if, apportionments of that amount or more are made available from the State for Third Class Construction.

Report of Superintendent of Schools

To the Superintending School Committee and Citizens of the Town of Kingfield:

LADIES AND GENTLEMEN:

This is the tenth annual report submitted to you by the present Superintendent of Schools.

This year all over this school union we have attempted to maintain the standard and efficiency of our schools under circumstances and conditions that have made it very difficult both from the viewpoint of personnel and finances. Here in Kingfield we have been very fortunate in securing an excellent corps of teachers. More than one thousand Maine teachers left our schools between July 1 and October 1, 1942. The schools have in every way attempted to cooperate with the war effort. Teachers have gladly and efficiently given of their time and work in carrying on three ration programs and are at present facing another. They have promoted the sale of War Stamps, the organization of Victory Corps and have responded to the request for help that they have had from organizations.

We have, at the request of the Government, added three periods a week of physical training courses for both boys and girls. During this second semester we will add a pre-induction course recommended by the Government.

INSTRUCTION. In the high school we have an entirely new corps of teachers. Mr. Bernard Johnstone resigned to enter the Army and Mrs. Johnstone resigned to accept a position in Bath. Miss Christine Tufts resigned at the end of the Spring Term. E. S. Kitchin, who had formerly taught in Kingfield, was secured as Principal, to teach Mathematics and Science, and Mrs. Kitchin as an assistant. Miss Constance Withington, a graduate of Bates College, was secured for the second assistant's position.

In the elementary schools we had only one change. Miss Eine Vainio resigned and Wallace Cunningham, a graduate of Farmington Normal School, was secured for this position. HIGH SCHOOL. We have continued our courses in high school in about the same manner as in preceding years, only now we are finding it necessary under pressure of the War Department and State Department of Education, to add the so-called "Pre-Induction Course" in an attempt to give our boys preparation in subjects that they will use when they are inducted into the Service.

We have given scholastic attainment tests in the three high schools of this district during the past year, and from a state-wide comparison find them satisfactory although we are aware that improvements can be made.

We feel that the quality of instruction that is now being given in the high school is of a satisfactory grade.

Following is a report submitted by Mr. Kitchin:

Report of High School Principal

To the Superintendent and School Committee of Kingfield:

ENROLLMENT OF HIGH SCHOOL

Seniors	Juniors	Sophor	nores	Freshn	nen
Boys Girls	 Boys Girls	Boys Girls	6 10	Boys Girls	10 13

The enrollment is somewhat larger than last year on account of a large entering class. If the war continues, there will likely be a decrease in the number of boys, as those who become eighteen years old soon will be called into the branches of the armed services.

The State Department of Education has requested that we stress the fundamentals of English, Mathematics, and Science, especially Physics. Therefore, every boy in the senior class is taking at least one mathematics subject; several boys are taking two. In keeping with the belief of the Army that a physical fitness program should be offered in every educational institution, we are having a physical training period three times a week for both girls and boys.

Apparently the financial condition of the student government has been excellent for some time. Although it is more difficult in some ways to raise funds now, there is considerably more money in the treasury than last fall. The students and faculty wish to express deep thanks to all who have helped us directly or indirectly to maintain a sound financial status.

Although it is the intention of the principal and teachers of the high school to confer with parents from time to time about the scholastic standing of their sons and daughters, it may not be possible for us, due to the many additional duties of school authorities in a wartime economy, to call at your homes. We hope that you will not hesitate to visit school or come to our homes to talk to us.

Respectfully submitted,

E. S. KITCHIN, Principal.

ENROLLMENT. The enrollment in the high school is larger than last year and I can see no reason why it will not be about the same next year. We are graduating a class of 10 this spring. We have 17 in the eighth grade and nearly all of these will enter high school.

With the addition of the new room, taking care of the sixth grade, we have had adequate space. The sixth grade of the coming year will be as large as that of this year and this will fill this room to its capacity. However, if our enrollment keeps as it is now, year after next we will again have a small grade in this room. It is impossible to foresee any different arrangement in the location of grades in rooms for some time to come.

23

ACTIVITIES. While transportation difficulties have made it necessary for us to curtail many of our extracurricular activities, it is the policy of the school officials to continue as many as possible, feeling that they all have an influence for good in the educational development of our boys and girls.

We had to eliminate the inter-town competition in spelling but we hope that we can continue the speaking competition both in the high school and in the grades.

REPAIRS. This year under this department we have expended the sum of \$179.61 for necessary repairs. Many unforeseen repairs were made. We have laid a floor in the attic of the high school and this has made it possible for us to have a storage place that was badly needed. We, however, have a matter facing us in the way of repairs that I believe should be brought to the attention of the citizens. The desks in the high school building are in very poor condition. No new ones have been purchased during the last thirty years. Of course many of them have worn out and now it is impossible to purchase new castings for their repair as these castings are no longer made. We have had to use chairs from the Webster Building to replace broken seats, and this has been far from satisfactory as these chairs were not intended for this purpose and make far from comfortable or healthful seats.

It seems that it would be a wise plan to buy a small number of new desks and seats during each year, to replace the useless ones that we now have. To equip one grade a year would cost about \$300. Replacing at the same rate each year it would only be a comparatively few years before we would have all of the seats in good repair; they would be of a type that could be adjusted to fit the individual student, and from a view of sanitation, health and posture would be well worth the money that would have to be spent.

The school officials have asked the budget committee to recommend the raising of \$500 for school repairs for the coming year; \$200 of it to be used for general repairs and \$300 to be used in making a start in replacing the worn-out and unhealthful seats that our boys and girls now have to use.

CONCLUSION. Our schools have had to adjust themselves to war conditions, and I feel that the patriotism that has prompted a greater amount and more intensive work on the part of all of the teachers is a demonstration of the part that the schools are taking in carrying on this war and in educating our boys and girls to be capable of directing the affairs of our democracy after the war has been won. We have a war to win and a peace to formulate and enjoy. Nothing else matters, and the public schools all over the country are directing their efforts with these things being made of greatest importance in setting up their curricula and outlining their work.

Respectfully submitted,

T. A. DECOSTA,

Superintendent of Schools.

Report of School Physician

To the Citizens of the Town of Kingfield:

I herewith submit my report as School Physician for the past year. A physical examination of each pupil was made. The following table gives a comparison of this year's findings with those of a year ago and also those of two years ago.

	1942	1941	1940
Number of pupils examined	234	220	244
Pupils with below normal vision	14	14	21
Pupils with below normal hearing	5	2	2
Pupils with carious teeth	121	115 .	137
Pupils with enlarged and cryptic tonsils	63	. 72	81
Pupils more than 10% underweight	.22	26	21
Pupils more than 20% overweight	11	13	13

The number of pupils with defective vision was the same as last year. This does not mean that no corrections were made during the year but that while most of those who had trouble saw an oculist and got needed glasses others developed defects which were not apparent a year ago. In regard to those with decayed teeth I report even one cavity in a temporary tooth. It will be noted from the table below that much the larger number with defective teeth are in the lower grades. Most of these are temporary teeth. Some of the dentists consulted do not advise filling temporary teeth and have signed the cards signifying that the dental condition meets with their approval. It is not my province to overrule the opinion of the dentist and such pupils who have no other defects noted are entitled to their 7 point pins. However, the best dental hygienists are quite unanimous in their statements that temporary teeth should have as careful attention as permanent teeth and that proper care of the temporary teeth will result in better permanent teeth.

The number with diseased tonsils and those 10% underweight or 20% overweight are all less than a year ago.

A distribution of the defects by grades is shown below.

						10%	20%	7
				Defecti	ve		Over-	Point
Grade	No.	Exam.	Eyes	Teeth	Throat	weight	weight	Pupils
S. P.		23	0	16	6	0	0	4

2		17	2	13	7	0	0	2
3		16	3	13	6	0	0	2
4		16	1	10	4	2	0	1
5		23	2	14	6	2	1	1

Senior		13	1	4	3	1	2	4
					_	_	_	
		234	14	121	63	22	11	50

I would urge parents to have as many corrections made as possible for the health of the children will be improved thereby. Recognition of a defect is of no value unless it be remedied.

Respectfully submitted,

C. J. DUNLAP

Report of the Fire Chief

To the Selectmen and Citizens of the Town of Kingfield:

LADIES AND GENTLEMEN:

This is the second annual report submitted to you by the present Fire Chief.

FINANCES. This year we have available in our Fire Department Fund the sum of \$1,000. This report shows expenditures for a period of 52 weeks. Our expenditures have not been quite as great this year, but our training of men has been carried on the same as last year, and we have added some new equipment. In some detail our expenditures will have to be about as follows.

Expenditures: 500 ft. 1½ in. single jacket "Roy-Tex" Treated

Cotton Rubber Lined Fire Hose coupled	\$300	00
1 All-Out Fire Extinguisher	44	25
Justin A. McCarthy Co.	101	50

\$783 82

ACTIVITIES. The Fire Department has an enrollment of eighteen active members and our fourteen auxiliary men have been put on the active list because our force has been hard hit by draft and men leaving for defense work in other parts of the State. We have had our regular drills during the summer and fall months and the new men have become acquainted with their position and the means of being efficient at the time when needed. We have been out on duty during the trial blackouts and the men have performed well and been very efficient in handling their equipment in the blackout period. The men have responded well to the practice calls and also taken interest in their work. We realize that there is a lot of chance for improvement and hope this year to get our men more efficient. Our pumper crew has been out several times this summer to different places and have shown that they are well trained and each man did his job well. This year we have got to train a new crew for we have only one regular left on at present. We are planning to put on some High School boys this year and have them ready for fire work in the future.

CONCLUSION. We have made a lot of progress in two years by having extra good equipment and still we do not want to stop functioning as a Fire Department. We realize the value of an efficient Department. We are not asking for more money this, year but we as a Fire Department feel that we need a building for our equipment and a place where our men may gather and have social times and a chance to have classes for the purpose of becoming more efficient in fire fighting. The Fire Chief has been in most of the small towns around and each one have a fine place for their equipment and a truck to go with, a place for the men to gather and hold their regular monthly meetings. This is our aim for the coming year and would like the co-operation of our citizens in gaining this goal.

In closing this report, I want to express in the way of a personal note, the appreciation of the members and the Fire Chief, for the interest that the Selectmen and the Citizens of the Town of Kingfield have shown in providing the means for the organization of a Fire Department.

Respectfully submitted,

J. M. BEANE, Fire Chief.
