NOTICE TO TAXPAYERS

IMPORTANT

**ALL TAXPAYERS SHOULD READ THE FOLLOWING
REQUIREMENTS AND COMPLY WITH THEM**

Section 70, Chapter 13, Revised Statutes of Maine, 1930

“Before making an assessment, the Assessors shall give seasonable notice in writing to the Inhabitants, by posting notifications in some public place in Town, or shall notify them, in such other ways as the Town at its Annual Meeting directs, to make and bring in to them true and perfect lists of their polls and all their estates, real and personal, not by law exempt from taxation, of which they were possessed on the first day of April of the same year. If any resident owner after such notice, does not bring in such lists, he is thereby barred of his right to make application to the Assessors or the County Commissioners for any abatement of his taxes, unless he offers such lists with his application and satisfies them that he was unable to offer it at the time appointed.”

At our last annual town meeting held March 1, 1937, the following was voted under Article 40:

"That the town authorize its assessors to consider the lists of delinquent taxes for the years 1926, 1928, 1931, 1932, 1933, 1934, and abate to the respective collectors such items as in their judgment should be abated; that of the remaining items

unabated the collector of the town place with a competent attorney for collection, the town to pay a reasonable and minimum commission or charge for attorney's services. The amount collected to be accepted by the town as a full settlement with the several collectors."

After careful consideration for the town and the circumstances of many of the delinquents, we feel that the following abatements should be made:

SCHOOL REPORT

REPORT OF THE SUPERINTENDING SCHOOL COMMITTEE

To the Citizens of Cranberry Isles:

We have examined the report of the superintendent of schools, and approve the same.

We make the following recommendations for appropriations:

Common Schools	\$2,100
High School Tuition	300
Janitors	456
Text-books and Supplies	200
Fuel	550
Repairs	300

Respectfully submitted,

A. J. BRYANT, Chairman,

ALVAH BUNKER,

LESLIE M. RICE,

Superintending School Committee.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee and Citizens of Cranberry Isles:

I herewith submit for your consideration my first annual report of the schools, for the year ending January, 1938.

The financial statement which follows requires but little explanation. The major portion of school appropriations, used for teachers' and janitors' wages, is not subject to much fluctuation from year to year. The text-book and supply account, of course, may vary somewhat, but we note that the expenditure this year has been consistent with that of other years. Tuition charges, an item which cannot be controlled by the paying town, show variations, also, from year to year.

The repairs account shows an overdraft of approximately twenty-five dollars. The same account last year carried an overdraft of slightly over one hundred dollars. These expenditures were unavoidable, and should be provided for in the appropriations for the new year. The recommendations of the Superintending School Committee include an increased repair budget, intended to take care of the overdraft, and permit also the purchase and installation of some new windows for the Islesford school. These windows are in bad condition, and replacement is truly advisable. The G. C. I. school, thoroughly renovated during the past summer, is in fine condition, and, after the replacement of windows at the Islesford school, the town will have excellent buildings, facilities of which the citizens may well be proud.

The following tabulation will show, at a glance, the distribution of the school dollar in this town, a normal one as compared with that of other towns:

Teachers594
Janitors086
Tuition090
Text-books and Supplies081
Fuel122
Repairs027

\$1.00

You will note that the budget calls for a reduced appropriation for common schools. This is made possible by the balance carried in the account at present, and the reduction will help to offset the necessary increase for repairs.

We believe that the schools of this town have done and are doing a good grade of work. Your teachers are working conscientiously and thoughtfully, and they have proved willing and eager to cooperate in accepting suggestions of different methods. With their cooperation, it has been possible to make some changes which are in line with modern school practice, and which will prove their value in each succeeding year.

We feel, very definitely, that the primary grades are a most important unit. The tendency, not only in this town but in many others during past years, has been to expect too much of children entering school at five years of age. Experience has proved the truth of this statement in school systems throughout the State and throughout the country; and most towns have been adopting plans for the control of this problem. We believe that less crowding in the first two years of school will bring a resultant higher level of achievement in these grades, and that, as a result, a higher level will be maintained throughout the elementary grades and the high school years as well.

Physical and mental development should proceed together at a normal rate. Attempt to force the mental process unduly, and to set grade objectives too high for the average pupil, and the natural result can only be an unsatisfactory achievement which will prove an increasingly acute problem in each succeeding grade. The proof of this statement may be easily found in some of the grades of these schools. When boys and girls of good average mental ability fail to attain the standards set for a grade, there is a definite reason for such failure, and the reason is not altogether that of poor teaching, nor is it entirely due to lack of study on the part of the pupil. In many cases it is only too evident that lower grade foundations, and especially reading skill, have not been completed, due to the necessary crowding of the beginning grades.

We are attempting to lay special emphasis, then, upon these lower grades. A new system of reading has been introduced in the primary, a system which is thoroughly modern, and yet one which has been widely used throughout this State, and with excellent success. The experience of other school systems has clearly proved that, with an extra sub-primary grade, which will permit the beginner to develop and learn at a normal rate of speed, we can make better readers, and better fit these boys and girls for the work of the succeeding grades.

We do sincerely urge the necessity of a grade adjustment and the elimination of the ninth grade, to be replaced by a sub-primary grade. This plan would still provide a nine-grade system, requiring the same number of years to be spent in elementary schools. It would lay stress equally upon achievements of all grades, and would, we feel confident, result in greatly increased values to all pupils. This is not a retardation, but rather a readjustment program. It is not a new theory nor an untried experiment. It is, very definitely, a move toward standardization, and it is entirely in line with what other towns within the State and elsewhere have found advisable. If it has given satisfactory results elsewhere, it will do the same for the boys and girls of these schools.

We respectfully urge that parents and citizens who are interested in the welfare of the schools give serious consideration to this recommendation. We welcome the interest of any citizen in any problem relative to the school, and we stand ready to discuss all such problems at any time, or to provide information on school matters.

In closing this report, I take this opportunity to thank the teachers for their cooperation during the past year, and to the members of the School Committee I would express my appreciation of their friendly counsel and loyal support.

Respectfully submitted,

I. E. ADAMS,

Superintendent of Schools.
