Onono noise ordinance

Students, town residents clash over proposed ordinances

By John Humphrey

The Orono town council heard comments from students and residents Monday night in a hearing that covered several questions about three proposed noise ordinances aimed at student parties and residential areas.

The most controversial of the three aims at "reducing and controlling loud, offensive, or unusual noises within the town limits of Orono." According to Orono Police Chief Delano Londe, the ordinance would prohibit giving parties in public alleys, across the street, or on private property where the noise gets out of hand.

Under the current system, the police cannot interfere with a party until it gets out of hand. Under the current system, the police cannot interfere with a party until it gets out of hand. Under the current system, the police cannot interfere with a party until it gets out of hand. Under the current system, the police cannot interfere with a party until it gets out of hand.

Several Orono residents supported the proposed ordinance because of personal experiences with student parties.

"We're tired of constantly having to keep the peace," Kruger said. "By the time we can do something it's far too late."

**20,000 farmers try new form of protest against government in India**

BANGALORE, India (AP) — About 2,000 armed policemen did not intervene. "There's no law against laughing," said Police Commissioner R. Ramalingam.

"There's no law against laughing," said Police Commissioner R. Ramalingam.

The farmers' association often holds violent rallies to protest policies it considers anti-rural. Protesters waved green flags and aimed cheap air guns at the Karmata Farmers Association as supporters howled and guffawed outside the state legislature building.

"That's what 20,000 farmers did for two hours Monday in this southern capital to express their scorn for the state government," said K. Shivakumar, president of the Karnataka Farmers Association.

Sex Matters

Q. Do women really fake orgasms? Male, Junior

A. Oh yes, the movie "When Harry Met Sally" certainly has made us aware of this. Actually, we both have to remember that women, like men, are capable of faking orgasms. The pressure is not on the men to perform as sex is considered more important to the women than to the men. Men are not as self-conscious and are not apt to be embarrassed at their sexual performance. Women are held to a higher standard of performance than men are, and this may be the reason they are more hesitant to admit to faking an orgasm.

Q. What is the new birth control method that uses the rods in your arm? Female, Senior

A. Simply put, Norplant is a new way of providing contraceptive protection for five years. It is an implant that consists of four to eight small rods of progesterone that are placed under the skin of the upper arm. These implants slowly release the required amount of hormone to prevent ovulation. This method was recently approved by the Food and Drug Administration and is also protected for the five years.

According to Mark Jackson, Director of Cutler Health Center, Norplant is not currently available through Cutler; however, if the FDA and offers women contraceptive protection for five years.

Q. What do you know about the Grafenberg spot? Male, First-Year

A. The Grafenberg spot is located in the front wall of the vagina, just under the bladder.

Q. Is it actually used in birth control pills for several years? Female, Junior

A. It is used mainly to take the pill for many years. It is a pill that was associated with pregnancy for the first time 20 years ago, and the pill was found to be very effective in preventing pregnancy. The pill and Norplant are, however, a new form of contraception, and the Grafenberg spot is not used in either form of contraception.

You should know that there are no routine medical benefits to using the Grafenberg spot or using a certain amount of birth control pills. Please consult with your physician before using a new contraception method.

Q. How long has the Grafenberg spot been around? Female, Senior

A. The Grafenberg spot was around 20 years ago. It was then introduced for the first time in the United States.

Q. How far can a woman's first reaction be found? Male, Senior

A. A woman's first reaction can be found in the front of the cervix (are you still with me?). When the cervix is stimulated, it stimulates the Grafenberg spot. The Grafenberg spot is the experience among women.

Q. Is there such a thing as a "6-spot" in the vagina? Male, First-Year

A. Yes, there is such a thing as a "6-spot" in the vagina. It is called the Grafenberg spot.

Q. Can you be tested for HIV (the virus causing AIDS) on the Bangor Campus? Female, Senior

A. The Grafenberg spot is located in the front wall of the vagina, just under the bladder. You should know that there are no routine medical benefits to using the Grafenberg spot or using a certain amount of birth control pills. Please consult with your physician before using a new contraception method.

Q. Where do you get the Grafenberg spot on the Bangor Campus? Male, First-Year

A. The Grafenberg spot is located in the front wall of the vagina, just under the bladder. You should know that there are no routine medical benefits to using the Grafenberg spot or using a certain amount of birth control pills. Please consult with your physician before using a new contraception method.

Q. What do you know about the Grafenberg spot? Male, Senior

A. The Grafenberg spot is located in the front wall of the vagina, just under the bladder. You should know that there are no routine medical benefits to using the Grafenberg spot or using a certain amount of birth control pills. Please consult with your physician before using a new contraception method.

Q. Do you know anything about the Grafenberg spot? Male, First-Year

A. Yes, I do. The Grafenberg spot is located in the front wall of the vagina, just under the bladder. You should know that there are no routine medical benefits to using the Grafenberg spot or using a certain amount of birth control pills. Please consult with your physician before using a new contraception method.

Q. Is it unhealthy to use birth control pills for many years? Female, Junior

A. It is not considered unhealthy to use the pill for many years. It is a pill that was associated with pregnancy for the first time 20 years ago, and the pill was found to be very effective in preventing pregnancy. The pill and Norplant are, however, a new form of contraception, and the Grafenberg spot is not used in either form of contraception.

You should know that there are no routine medical benefits to using the Grafenberg spot or using a certain amount of birth control pills. Please consult with your physician before using a new contraception method.

You should know that there are no routine medical benefits to using the Grafenberg spot or using a certain amount of birth control pills. Please consult with your physician before using a new contraception method.

Q. How can you test for the Grafenberg spot? Male, First-Year

A. You can test for the Grafenberg spot by using the Grafenberg spot test. This test is performed by inserting a speculum into the vagina and gently pressing on the cervix. If the Grafenberg spot is present, it will be visible through the speculum. This test is performed only by a trained medical professional.

**Budget deal may fall apart**

By Peter Jackson

Associated Press Writer

AUGUSTA, Maine (AP) — An expected budget gap of nearly $300 million exploded Tuesday, but lawmakers agreed to try further amendments, in an attempt to manage the length of debate with only three scheduled days left in the two-week session.

"We are not up to 105 amendments," said Eagle Lake Democrat Presiding Officer Linda Head, a minority leader. "The stuff is coming in so fast it's just overwhelming." She was referring to changes made in a deal negotiated by the Appropriations Committee.

House Speaker John L. Martin finally ordered a halt to any further amendments, in with only three scheduled days left in the two-week session.

Senators also turn down proposed change to spring break schedule

By William R. Grasso

Last night, the General Student Senate informally voted to change the spring break schedule for spring 1995. The vote was to delay spring break to allow more time for school. The officials voted for the schedule unchanged.

The GSS also elected the new members of the Executive Budgetary Committee: Robert L. Stearns, Bill Reed, and Michael Cheek. The committee plans and organizes the GSS budget for each year.
Brown gets surprise win over Clinton in Connecticut

HARTFORD, Conn. (AP) - Challenger Jerry Brown scored a stunning upset over Bill Clinton in the Connecticut presidential primary Tuesday night, pushing the Democratic front-runner toward his own problems and making the outcome of next week's New York primary a major contest, two weeks away. Clinton can't afford more trouble there.

The Democratic verdict, 38 percent and a 3-point victory for Brown, was a surprise stall in the Clinton campaign despite the Arkansas governor's claim that he'd expected it to be a tight contest.

"With Tsongas out of the race, the选民的意志 is more unified and they were looking for a better candidate. Brown won't make that easy," he joked. "I think next time I won't run." 

Tsongas captured 31 percent, and Buchanan 22 percent. Huckabee 20 percent, and Perot 1 percent.

Brown said he'd won Connecticut because "people want change, I'm a vehicle for that . . ." Brown said he would "keep this campaign moving all the way back to the convention." But Clinton will hold a convincing election victory" and the event was more of a "stunt" than a "serious challenge," according to one Democratic consultant.

"We're in the business of winning," Brown said. "It's not a stunt. We're not going to be satisfied with that. We're going to continue." 

The Connecticut upset instantly raised the stakes in the New York primary, the next major contest, two weeks away. Clinton can't afford the weak showing in Connecticut, a series of setbacks would be more damaging. - This raises the stakes an awful lot - Connecticut, a state that has "no history of a serious challenge," but a state that has a Democratic primary, it was: Brown 60,445 or 38 percent. Clinton, 56,473 or 35 percent.

"They sure don't want it to be taken away from them and I don't either," he said. "I've always experienced high standards in New York and California" in June.

"I think people want change, and this is an unexpected outcome, but the reelection of any presidential campaign is not a foregone pro-

Space shuttle Atlantis takes off to study the environment

Cape Canaveral, Fla. (AP) - Atlantis rose into orbit Wednesday, March 25, on the eighth shuttle mission devoted to Earth's environment. The expedition should provide new insights into Earth's atmosphere and its ability to support life.

The eight-day flight, commanded by Charles Bolden Jr., is the first of 46 shuttle missions to be dedicated to atmospheric research. All but two of the 13 scientific instruments in the cargo bay are designed to probe the atmosphere.

The mission is part of NASA's Mission to Planet Earth, a $15 billion program that continues until the year 2000.

"It's surely on time that we do it now," Charles Bolden Jr., is the first of 46 shuttle missions to be dedicated to atmospheric research. All but two of the 13 scientific instruments in the cargo bay are designed to probe the atmosphere.

Nuclear leak

Russian reactor leaks radioactive gas

MOSCOW (AP) - A Chernobyl-style nuclear power reactor near St. Petersburg leaked radioactive gas Tuesday, but Russian officials said it posed no significant threat to the public.

Yelena Mihaylyukh, spokeswoman for the Russian Ministry of Atomic Energy, told the press the leak is a "third-class incident" on the seven-level International Atomic Energy Agency scale. The explosion and fire at Chernobyl in Ukraine rated seven, she said.

The V audience INSA said later in a statement that Russian authorities rated the incident "inconsequential" on the agency's scale, "because it did not pose an immediate threat to the people and the environment." Yelena Mihaylyukh, spokeswoman for the Russian Ministry of Atomic Energy, told the press the leak is a "third-class incident" on the seven-level International Atomic Energy Agency scale. The explosion and fire at Chernobyl in Ukraine rated seven, she said.

The Bangor Garden show: it's coming up roses

By Mike Werts
Volunteer Writer

The second annual Bangor Garden Show is coming to the Bangor Auditorium April 3-5. Steve Kinney, media representative for the show, said it is more than just a flower convention.

The show was attended by 11,000 people last year, the largest "walk-in" trade show of its kind at the auditorium, according to Kinney. He said 2,000 are expected to attend this year.

This year's show will feature 13 landscape exhibitors, according to Susan Xirinachs, director of the auditorium.

Steve Kinney, media representative for the show, said it is more than just a florist's convention. It is also sponsored by Bangor Beautiful, a division of Bangor 2000 and part of Keep America Beautiful, a national affiliation of more than 2,000 local organizations around the country.

The show was attended by 11,000 people last year, the largest "walk-in" trade show of its kind at the auditorium, according to Kinney. He said 2,000 are expected to attend this year. The money was shared with the Junior League of Bangor, according to Stevens.

The show will run from 9 a.m. to 9 p.m. on Friday, April 3 and Saturday April 4, and 10 a.m. to 5 p.m. Sunday April 5.

The second annual Bangor Garden Show is sponsored by Bangor 2000, a public/private partnership organization begun as a result of the national Keep America Beautiful program. It is intended to bring conventions and visitors to Bangor.

UMaine out of luck?

Because of the state’s budget crisis, the 1991 state Legislature was unable to make its twelfth payment to the UMaine system—a payment totaling $11.6 million.

Earlier this year, UMaine administrators worried that this payment, if not being made to them, would be recorded as a deficit, and later would be added to the already present 5.5 percent budget cut to be taken next year.

Then Governor McKenney and the Appropriations Committee made the decision to defer this payment a year.

The problem: The governor made this decision fully knowing that the state constitution does not find next year’s legislature to pay this amount to the UMaine system.

So what if the Maine legislature can’t—or won’t pay this deficit? State Representative O’Donnell (Maine may be "out of luck" in receiving this $11.6 million payment.

If next year’s state’s budget shortfall is anything like this year’s, O’Donnell may be right.

The governor’s decision to defer this payment to the UMaine system really does not solve anything.

At best, it is a sneaky, short-sighted way to delay paying this impending deficit, and has created a budgetary cloud hanging over the head of the system.

During the past two years, the Orono campus alone has taken five budget cuts, totaling $10.5 million. The system has suffered twice that.

Next year, Orono campus is looking at a 5.5 percent budget cut. If next year’s legislature can’t pay this current 11.6 million, our seventh cut in 1993—1994 could be double that amount (MAH).

Noise ordinance

Can’t touch this

The Keith Anderson Community Center saw yet another financial meeting being held Monday night.

The Orono town council heard arguments for and against the proposed noise ordinance.

Some residents contend this ordinance is necessary to control the noise levels in town. Most residents complain the ordinance is perpetual and unfairly affects the student residents of Orono.

The University of Maine is to be congratulated on a strong showing at the meeting to voice their opposition. Both student government representatives and Orono Campus Board president Chris Strickland presented the off-campus student body.

Students also had support among some residents of Orono, who said the ordinance discriminates against landlords as well as students.

The fact that one resident suggested Orono should just enforce the laws it already has on the books instead of pushing for new legislation illustrates the mixed response among year-round residents.

Admittedly, parties do occasionally get out of hand, however if there were more activities available for student entertainment, the number of parties would dramatically decrease.

By showing strong opposition, the students of UMaine have at least stalled these measures. Now we need to depend on our student leaders to bring about developments during the summer so we don’t return to find this ordinance in effect at the fall.

The solution for controlling parties doesn’t lie in discriminating legislation, but rather cooperation between student and town leaders. Anything short of this and the 9:30 curfew as well as residents and turn this into a battle zone (CIC).

Know what I like?

Melissa Adams

I love how the union is my only love and I don’t lose the trend.

I love it when people stop doing loud on me.

I love it when people have a hard time letting me know how they feel.

I love it when I get warning emails from the Business Office.

I love how the university keeps begging for more space and more land.

I love the fact that the union is hanging on the phone.

I love Student Government.

I love it when the Concert Chair tries their best to get the new music building and orchestra.

I love it when I get warning emails from the Business Office.

I love how the university keeps begging for more space and more land.

I love the fact that the union is hanging on the phone.

I love Student Government.

I love it when the Concert Chair tries their best to get the new music building and orchestra.

I love it when I get warning emails from the Business Office.

The Campus Crier is a service provided by A.S.A.P. to the students at the University of Maine. It is a student-run calendar listing information on artistic, educational, and spiritual programs. It provides free listings of all student-related events and services. We try to publish a complete listing of campus events and student-related activities. When placing a listing please include the following information: name, organization, phone number, time, date, location, cost, and a short description of the event.

Send all submissions through campus mail to: *The Campus Crier*, 16 Chadbourne Hall or call us at 581-4359. Deadline is Friday at 5:00 p.m. each Friday before the listing is to appear.
ResponsePage

Coverage not representative

To the editor:

Due to being an avid reader of The Maine Campus paper, I became concerned that the paper is not representative of the various types of people which constitute the student body. President Littlefield has recently become concerned with the universitY's "alcohol epidemic", and is preparing an action plan regarding the affairs of students while in the university's facilities. However, I consistently notice a white structure which looks different from the usual buildings, as it appears to consist of several trailers shoved together with a red stack on top. Declening attention, I resorted to investigating.

It is true that the university is guilty of not representing the various types of people which constitute the student body. President Littlefield has recently become concerned with the university's "alcohol epidemic", and is preparing an action plan regarding the affairs of students while in the university's facilities. However, I consistently notice a white structure which looks different from the usual buildings, as it appears to consist of several trailers shoved together with a red stack on top. Declining attention, I resorted to investigating.

Your Daily Horoscope

For Wednesday March 25

IP TODAY IS YOUR BIRTHDAY: You have a knack for inspiring loyalty and trust in those you choose to open up to. Friendships are a lifelong commitment to you, and you can help your loved ones lead to the best of their deep desires. You are a leader about whom your friends can always count. Your love could lead you into relationships with self-centered types.

ARIES (March 21 — April 19): A rising sense of peace can easily be offset. Go for a walk, read a good book, or just call an old friend. Things are not as bad as they might seem at this moment.

TAURUS (April 20 — May 20): Spend a relaxing day in the company of the one you love. Keep the activities low-key and make a mutual vow not to mention work. A weight is lifted from your shoulders.

GEMINI (May 21 — June 20): Your creative energy positively sparkles today. Don't be afraid to express your own creativity. The world needs more of those inspiring people who dare to dream.

CANCER (June 21 — July 22): You have a way of bringing out the very best qualities in the people you love. Your unconditional love and support makes it possible for them to reach their dreams.
LEO (July 23—Aug. 22): Keeping your emotions bottled up inside is not healthy. Although the prospect of conflict with your loved one is unpleasant, it remains a dynamic part of a thriving relationship.

CANCER (June 21—July 22): Timing is vital to both. When you feel that a loved one is losing its luster, causing you to doubt responsibility for living up to your potential.

VIRGO (Aug. 23—Sept. 22): Get a jump on the competition by diving into your workload now. The best remedy is a soothing bath followed by a cheerful facade in order to cover up heartfelt deep anguish.

ARIES (March 20—April 19): Sometimes it's best to keep your opinions to yourself, but not now! In his enthusiasm for a project a curious mind and a decidedly offbeat sense of humor. Your fascination with the bizarre and exotic can lead you to brave new worlds, or to petty backbiting.

Taurus (April 20—May 20): Anxiety about finances and doubtful actions have you tied up in knots. Recognize that worrying about things over which you have no control is counterproductive.

SAGITTARIUS (Nov. 22—Dec. 21): Your interest in information should give you the edge to come out on top.

Pain of rape continues for victims, loved ones despite time

By Kathryn Krahn Tulman and Catherine Leombruno

An outstanding student to...
approved the appointment of Ralph Sandler as director of the Maine Center for the Arts. He will begin his tenure July 1.

The Trustees also granted the Mark B. Vitkus distinguished visiting professorship to Theodore Sizer, former dean of the Harvard Graduate School of Education. The UMaine tenure will last a year.

John Alexander, a Civil Engineering professor, was awarded the Malcolm G. Long professorship. President Alfred J. Fogarty "is delighted to accept the trustees' decision for his service as dean of the College of Engineering and Applied Science."

Trash story

"We are also looking at bulky waste, such as dump debris, old tires and stumps," Assistant Scientist Steven Jacobs of UMaine said. "We are now looking at what we can do to deal with this, starting with a policy for the state for the remainder of the year."

Preliminary findings show that food waste has been reduced at 13 percent of all waste by 1993, and have the appropriate facilities and materials to do so. Jacobs also said people need to realize that even if the agency hopes information gathered from the Maine Garbage Project now make a system could create some jobs. Trash collectors make little over $8 an hour, and sort trash year-round.

"It's easy to lose sight of that when you are dealing with high collection costs and operation materials, recycling is not cheap. It's a very real issue that both parties are coming together."

"Ecosystem

The study results will be presented to the state for the remainder of the year."

Orono town council party ordinance hearing

"Let’s enforce the rules we have," Erhardt said. "I’m not saying it’s all the university’s fault, but I think more authority should be coming from there," Alice Smith, an Orono resident said. Chris Smeriglio, Off-Campus Board president, agreed teamwork was needed. "I’m not saying it’s all the university’s fault. They are the ones that talk to the students," she said. The ordinance needed "some clarification." Littlefield said. "I realize there are some problems in Orono, but we can't legislate responsibility."

"There are the challenges of—starting a career, getting settled in a new apartment and doing it all within your budget. It makes things easy when you get out of college."

"I’m not saying it’s all the university’s fault. They are the ones that talk to the students," she said. The ordinance needed "some clarification." Littlefield said. "I realize there are some problems in Orono, but we can’t legislate responsibility."

Sports News

UMaine awaits BU—Michigan St. winner in NCAA's

Syracuse.

The Boston U. hockey team is ranked #2 nationally and a win over Michigan State in the NCAA tournament will put them in the title game against the university of Maine. Paul Walsh, the head coach of the Black Bears, has a team that is ready to make a claim for the championship.

Flutie joins Stampede

Former Boston College quarterback Doug Flutie has signed to join the CFL's Toronto Argonauts for the upcoming season. Flutie, a four-time All-American at BC, will bring his arm strength and leadership skills to the Argonauts, who are hoping to improve on their 10-8 record from last season.

UMaine Hockey

UMaine kicks off their NCAA Tournament against the winner of the Boston University game. The Black Bears have a history of success in the tournament, having won the national championship twice in the last six years. Coach Shawn Walsh and his team are looking to extend their winning streak and bring home the trophy once again.

Column

Just cleaning out the mind

By Chad Finn

Here is a question, one of the players asked before the game, "Will they be wearing their normal uniforms or special uniforms for the tournament?" The answer was yes, as the Black Bears will be wearing their traditional uniforms.

Just sitting watching the Bruins — Sharks game Monday night and, as an avid Boston Globe reader and NESN watcher, I thought it was a thrill to see the Bruins win.

After the game, I read an article in the Globe about the Bruins' playoff prospects. The article stated that the Bruins have won 10 of their last 12 games and are one step away from the Stanley Cup.

I agree with the writer of the article. The Bruins are a great team and deserve to win the Stanley Cup. I hope they can do it.

Sincerely,

[Name]

Sox Gray recovering from stroke

WINTER HAVEN, Fla. (AP) — The Boston Red Sox are hoping for a quick return to health for left-hander Jeff Gray, who was released by the team Tuesday.

Gray, 36, had been serving as the team's No. 1 starter but had been struggling in his last nine starts. He was 2-3 with a 2.34 ERA in 61 2/3 innings and had allowed 10 runs in his last six starts.

Manager Terry Francona said Gray had the option of going on the disabled list, but the team decided to release him instead.

Francona said Gray was not ready to return to the majors and would rather give the starting spot to another pitcher who has performed better.

Gray, a former Cy Young Award winner, had a 3.04 ERA in 183 innings last season but came back from shoulder surgery to make just one start.

He was 2-3 with a 5.67 ERA in 12 starts this season and had allowed 13 runs in his last seven outings.

Gray said he was disappointed with the decision to release him.

"I'm not ready to pitch in a game yet," Gray said. "I can't say for sure that I'm ready, but I think that's my goal."
