We’ve conducted tests and inspections of the wells [in Orono]. We’ve taken a series of action steps in response to the contamination, but not entirely eliminated. Chloramine or THM — a combination of chlorination and methanes — can be reduced significantly by flushing the system to mix with the organics in the water. It takes time to get the chlorine and chlorine byproducts. “We’ve immediately set forth as well as a step for the future (with the wells) in Orono. We need to find ways to make the THM levels low while we work to have this other risk that we have. We’re trying to get a THM level of 76 parts-per-billion in the Memorial Union as well as the main road side on School Street. Veazie has opened action from the public. Veazie said, "Veazie has raised water prices with organics in the pipes. The latest reports from Veazie suggest that they are in compliance, with a THM level of 40 parts-per-billion. About two-thirds of the people in the town are experiencing the concern of the THM levels.

In November 2011, it was found that the content of the district’s water has exceeded the maximum limit for trihalomethane. An increase in THM levels was due to the contamination of the water supply. In response, the town and Veazie have taken action to control the THM levels and maintain compliance. Veazie has raised water prices to cover the costs of THM control and maintenance.

The THM levels in the Memorial Union as well as the main road side on School Street have faced challenges that other districts have faced, stressing the need for more funding and government intervention. There was little that the state of Maine could do, according to Dana Slepian, assistant professor of EET at UMaine. According to Slepian, "It’s the circle of dining. It’s the circle of the community, and that despite these issues, we’ve got a seemingly infinite supply of pasta. Our staff has been up to the task with the help of our suppliers and the efforts of the team at SGC Engineering.

Then, you grow up and realize that the dishes are served in the dining facilities. There’s been a change in the way that the customers are served, and the restaurant’s menu has been expanded to include more options. The staff has been re-trained to provide better service, and the restaurant’s reputation has improved. In the past few years, the restaurant has been recognized for its attention to detail and the quality of its food. It has been voted as one of the best restaurants in the state. In high school, you’ve got the lunch line, says and pigs in a blanket inside dining halls. Now, you grow up and the facilities and employees become the desti- nation to splash. It’s the circle of dining. But what if the situation con- tinues for the next two years? Now you can.

Last week, UMaine Dining began serving students, guests, and visitors in the Bear’s Den Café & Pub. The new restaurant-style estab- lishment of the dining facilities Director of Dining Operations Kathy Kerl said that it will offer something different.

“We don’t have this option before, where students can be warmed in, we thought it would be a nice option to offer,” Kerl said. “It’s something that we should have on the menu for students.” McEvoy said, “We made sure to be treated as adults just as well as students, and that moves them even further away from the high school days which is a shock to them.” Kerl said the Bear’s Den Café & Pub has added a chicken tender basket to its menu. Although for lunch, which is new, it will have more prominence in the minds of students.

“We offered this quite a few years ago and some of the students really liked it because it was a special type of service,” Kerl said, “So we thought it would be a good idea to re-introduce it.” The new table service option in the Bear’s Den Café & Pub is part of the district’s efforts to improve customer service and expand menu options within the Bear’s Den Café & Pub. It is expected to have a positive impact on customer satisfaction and the overall dining experience. A signature strength” of the University of Maine Dining Service is for providing the highest-quality experience to support Maine’s occupa- tional production, according to Dana Slepian, dean of the College of Engineering. The students learn about the latest technology, the students learn about the latest technology from Emera Maine, Maine Power Systems Laboratory, and the students learn about the latest technology from Emera Maine Power Systems Laboratory.

“Bear’s Den aims to offer full dining experience

A bank account, $1,000 in excess, and $5,555 from the group’s membership dues.

There is $6,900 in other sources of funding, comprising of $3,000 from “various sources,” $1,000 from the theater department, $1,500 from the group’s motor pool, and $500 in small fundraisers.

The group plans to bring 10 members.

The trip is $5,655, and other costs include: $3,000 from “various sources,” $1,000 from the theater department and $500 in small fundraisers.

The club, whose record was 5-15, had 12 freshmen, but still managed to keep the season afloat.

Brian Thibault during the Feb. 11 meeting. He spoke on their recent hockey tournament.

One of the challenges with developing veggies it takes many takes. It takes really serious effort to develop funding that takes 10 to 12 years process from start to finish," Porter said.

The collaboration is one that Maine is happy to see the fruits of. “We’re glad to be in partnership with the university, potato breeding program. It is a long-term partnership, it is nice to have that investment pay off," Hobbs said.

The Maine Potato Board is constantly trying to improve their veggies, according to Hobbs. He said you can never perfect a variety but, “you can count on getting better and better as we go.”

Potato breeders also work to come up with new vegetables that are different, like lighter colored potatoes and purple potatoes without skin.

The breeding program has many potential pipeline including smaller fingerling and organic varieties.

Proposals for licensing options should be decided in the near future, he said. Five growers and retailers will make the decision.

K e e p i n g up with trends is a real challenge for Porter, “To be able to identify [new vegetables] out of the thousands we produce each year. To try to track the ones with the strongest characteristics requires a lot of quality tests and effort, to keep that knowledge up and growing,” Porter said.

The University of Maine is a national center for university-based potato breeding research. The university has a team of 10 researchers who work on vegetables in the State Institute for Theatre. The club’s president, Robert Dana plans to introduce new potatoes to the GSS at full chamber vote during the Feb. 11 meeting.

President UMSG, Inc. Aaron Ortiz

“People are really excited about seeing the new varieties. One of the challenges with developing veggies it takes many takes. It takes really serious effort to develop funding that takes 10 to 12 years process from start to finish," Porter said.

Workshop on the Future of Power Engineering Workforce” report in 2016. It highlighted the need for new power engineers to meet the needs of upgrading and modernizing the grid and developing new technology.

There are not enough students in the pipeline who are excited and prepared for a post-high school education in power engineering,” the report stated. With the growing need for power engineers across the industry in Maine, UMaine students have an advantageous com- peting for jobs. A growing energy export industry in Maine provides other op- portunities for EET stu- dents trained in the Em- era Maine Power Systems Laboratory.

Dining’s new table service is “fine dining,” even around the time of its opening, says McAvoy. To get people to experience a relaxing meal within walking distance. If they want to look at a menu, pick things out and have a quiet conversation,” McAvoy said. “It’s the only place on campus you can go and have someone wait on you where you can sit back, re- lax, look at a menu, pick things out and have a quiet conversation.”

“The Bear’s Den Café [with table service] menu holds up just about anywhere — even around New York quite frequently, says. “My wife and I travel because of the trends in food,” says. “I have an eye for the trends in food,” he knows about table service.”

Chef Challenge, held in March at EMCC. “Cheminot has a good eye for the trends at food,” McAvoy says. “He knows how the operation goes, he knows how the flow goes and he knows about table service.”

University of Maine Briefs

Casella cancels plans for pipeline

On Thursday, Feb. 7, it was announced that the construction of a proposed methane gas pipeline stretching from Old Town to the University of Maine has been canceled due to financial issues.

In November 2013, the university reached a deal with Casella Waste Systems, Inc. to build a pipeline from Juniper Ridge Landfill in Old Town to the university. According to engineers from Casella, the landfill has the equivalent of 5,000 gallons of heating oil on a daily basis. The university was keen to harness this potential source of energy, which would in turn dramatically reduce its carbon footprint.

The projected cost of the pipeline was between $11 million and $13.5 million and would have cost the university $15 million over the course of the 20-year deal.

The pipeline would have run from the landfill due south to Route 43 to the College Avenue Extension and then to the UMaine Steam Plant, crossing several right of ways. Because of this, Casella filed an application with the Maine Public Utilities Commission in 2013 to become a utility under the name EcoGas, a Casella subsidiary. This move was opposed by Bangor Gas Company, LLC, who claimed this would hurt business and was more difficult to operate and can cost up to $10,000. According to the researchers, the device could also be modified to detect other organisms and an Android app is currently in development to enable smartphone integration.

The device is currently being used in fresh and marine water testing in the Republic of Korea. The researchers will also give several devices to state officials for field testing in Maine.

Opinion

W ith an incredibly persuasive element of day-
by-day life. People shower in, cook and drink
water. Water is like a basic need. No one can
live without it. Water is the only source of the
fundamental rules of local government is to
provide a good and safe water service. Since the
Orono/Veazie Water District has recently moved
into public backyards over levels of trihalomethane, a
carcinogen created when organic particulates found in
pipes meet with chlorine as a treating agent, in the water it disperses in
to the pipes. Since the pipes are old, and some argue that the rust in them
endangers consumers. All of this is a lot of pressure. If the board were to rush
through the decision of placing the pipes. This could be incredibly expensive and
disruptive to service. The board is also considering digging a new well.

So, while residents certainly have a right to voice their un-
happy with the quality of water they’re receiving. If a job is rushed, the
erstwhile projects as other less sheltered industries. This means enacting
change requires time in order to ensure it is executed prop-
erly. If a job is rushed, shoddy workmanship may result in the
endangers consumers.

So, those who are unhappy with the quality of water
have a right to voice their unhappines

Bowed down, on others. The right to participate and the right to not be discriminated against has been the subject of heated debate in many countries. Differences of opinion have become apparent, and the issue is far from being settled.

The problem of tolerance at all, but of right to non-discrimination is a complex issue that belongs to the very core of individual freedom. What is the solution of this problem? What is the nature of tolerance? How can we achieve it?

The phenomenon of tolerance is not new. It has been observed in many societies throughout history. The question is, however, how can we achieve and maintain tolerance in today’s society?

Firstly, it is important to acknowledge that there can be no universal standard of tolerance. Each society has its own unique approach to the issue of non-discrimination. The right to non-discrimination is a fundamental human right that is enshrined in the Universal Declaration of Human Rights. It is a right that must be respected by all individuals and institutions.

Secondly, it is necessary to recognize that the right to non-discrimination is not absolute. There are situations where it may be necessary to limit this right, such as in the case of national security or public order. However, such limitations must be proportional and justified.

Thirdly, it is crucial to foster a culture of respect and understanding. This can be achieved through education, dialogue, and the promotion of diversity. By engaging in these activities, we can create a society where tolerance is not only respected but also celebrated.

In conclusion, the right to non-discrimination is a fundamental human right that must be respected by all individuals and institutions. However, this right is not absolute and must be balanced with other considerations. By fostering a culture of respect and understanding, we can create a society where tolerance is valued and celebrated.

The question of non-discrimination is a complex one, and it requires a nuanced approach. By recognizing the importance of this issue, we can work towards creating a more just and equitable society for all.

Knowledge is a desirous entity that is both salutary and endures its impact. As such, the ethos of the religious is an iniquitous concept. As such, the ethos of the religious is an iniquitous concept. Thence, the ethos of the religious is an iniquitous concept. As such, the ethos of the religious is an iniquitous concept. Thence, the ethos of the religious is an iniquitous concept. As such, the ethos of the religious is an iniquitous concept. Thence, the ethos of the religious is an iniquitous concept. As such, the ethos of the religious is an iniquitous concept.

Tolerance is the ability to respect and to accept the diversity of others, even when it conflicts with one's own beliefs. Tolerance is a value that is essential for a functioning democratic society. It allows for the free exchange of ideas and opinions, and it is a cornerstone of a peaceful and prosperous future.

Unfortunately, a nation that is divided against itself will never stand on strong foundation. The strength of a nation comes from the unity of its people, not from the divisions that seek to tear it apart.

The reality of baseless superiority is a misconception that is often perpetuated in society. The idea that one group is inherently superior to another is not only false, but it is also harmful. It creates a sense of entitlement and allows for the exploitation of others.

For example, Brett Salter, a student at the University of Maine, has written an article about the concept of tolerance. Salter argues that tolerance is not only an important value, but it is also essential for the functioning of a democratic society.

In conclusion, tolerance is a vital value that is essential for the functioning of a democratic society. It allows for the free exchange of ideas and opinions, and it is a cornerstone of a peaceful and prosperous future.

The Tolerance is not the question; morality is the answer.

Academic elites don’t possess monopoly over knowledge.

**Album Review:**

**Frank Sinatra, With Love**

Classic reissued back hard to a bygone era

Kyle Hadyniak

For The Maine Campus

"With Love" is a compilation of his most romantic tunes that were once a shock to the listeners when released in the 1950’s. This album is a testament to the timelessness of Sinatra’s music. It is filled with songs that defy the test of time. The tracks may be relatively new to some fans, but for Sinatra enthusiasts, it is a journey through the history of his music. The album consists of tracks that are a perfect blend of vocal and instrument-led melodies. It is a showcase of the range of Sinatra’s talent and the depth of his artistry.

The album opens with "Love Is Here to Stay," a song that has been recorded and sung by many artists over the years. This version of the song is a beautiful interpolation of Sinatra’s iconic style. The arrangement features a lush orchestra and piano introduction, setting the tone for the rest of the album. The vocals are crisp and clear, with Sinatra’s distinctive tone and phrasing. The arrangements are well-crafted and enhance the emotional impact of the songs. The album progresses with songs like "I’ve Got You Under My Skin," a song that has become synonymous with Sinatra. The arrangement features a jazzy and upbeat rhythm section, with Sinatra’s vocals perfectly complementing the mood.

"We’ll Meet Again" is another standout track on the album. The arrangement features a haunting piano melody, with Sinatra’s vocals perfectly capturing the melancholy and nostalgia of the song. The song is a perfect example of Sinatra’s ability to deliver an emotional performance. The album concludes with "Lush Life," a beautiful and jazz-influenced arrangement. The vocals are supported by a soulful rhythm section, with the piano playing a prominent role. The album ends on a high note, with a final track that is a fitting tribute to Sinatra’s legacy.

Overall, "With Love" is a stunning album that showcases the timeless appeal of Frank Sinatra’s music. It is a perfect listening experience for fans of the iconic singer, and is sure to enchant anyone with a love for classic music. The album is a reminder of the enduring power of music, and the impact that it can have on our emotions and memories. It is a testament to the lasting legacy of Frank Sinatra, a true icon of American music.
Taking music and dinner, and the next thing you know…

Brian Eno, "The Pearl" (1984)

A majority of his listeners are not aware of the fact in the 1980s he asked a group of 10 tracks of Radiohead's

Grease was performed Friday evening in Hauck Auditorium.

Joshua Quint • The Maine Campus

As haughty Auditionists, students and community members gave great approval to a recital in the waning moments of the 9th and humbled along to memorable songs performed by students at the University of Maine School of Performing Arts spring production of "Grease" last Friday night.

"Grease"已是 was premiered by John Travolta and Olivia Newton-John in 1978, the era of cool cars and greased back hair. The play shows the highs and lows of students in the "Underclassmen" group and the "Pink Ladies" group. The musical also follows the love story between main characters Sandy and Danny.

"Grease" is a musical that explores the darker side of adolescent life. The musical touches on issues from violence to teen pregnancy. It shows the truth, less about side of teenage struggles.

It is popular because of the 1978 film adaptation, starring John Travolta and Olivia Newton-John. The production followed the original musical service, some of the songs and the order of soap did differ slightly from the film version. The story line was still familiar to viewers who had only seen the film version.

"Grease" director Sandy Hardy, associate professor of theatre at UMaine, said she was 'amazed at the musical and working with so many talented students.'

According to Hardy, in "Grease," there remains an undercurrent of young people struggling to find themselves, and where they belong. Some search for acceptance, some for true love, others for hope of creating a more provocative and meaningful existence.

"It's important to realize how little these topics really do affect people's lives, and it's great to see how emotions for audiences are generated," Weed said. "But the Vagina Monologues is one of the bigger events that we do during the year."

"Women have come a long way, but we still have a long way to go in terms of achieving equality in our society," Weed said. "Also, I think the show does a good job of comparing views of women in different countries and different walks of life. It's important to realize that every woman is different and has their own story to tell."

Over 140 countries are represented in V-Day's campaigns. This global movement hopes to allow women to thrive and live without having to recover or suffer from violence.

"Our favorite part is watching the audience react, especially those who have never been to a V-Day show," Weed said. "It raises many different emotions for audiences; it's a way to see how we affect people's lives and give them hope in a world of violence against women."

"We had more trouble than usual trying to find chocolate boxes of chocolate, Valentine's Day is around the corner."

The color red does not mean more than a mark of day love on a date or represents the V-Day campaign. The V-Day campaign, inspired 16 years ago by Eve Ensler's play "The Vagina Monologues," is a global activist movement to end violence against females.

"I've always been interested in playing the role of Sandy," Milne said. "UMaine's performing arts department has a really high standard of directing. I love knowing and working with new directors."

"I love the film [of Grease]." Milne continued. "The bigger dream for me is the musical."

"Second-year music student Ira Kramer played Danny, Sandy's love interest, and fourth-year music student Andrew Coatney played Kenickie, one of the main characters. Sandy's love interest, and fourth-year music student Andrew Coatney played Kenickie, one of the main characters. Kenickie, one of the main characters."
Men’s hockey sweeps Merrimack

Black Bears earn tough four points, take sole possession of third in America East

Jon Orlattice
Sports Editor

ORONO — The University of Maine hockey team earned a much-needed four points this past weekend when they swept Merrimack College in the final games of both teams’ regular seasons.

The Black Bears, who clinched a spot in the America East Hockey East Tournament by winning their last two games of the regular season, will host Merrimack on February 21-22. The teams will square off in the conference finals for the first time in their history.

“Winning those two really helped us,” said head coach Chad Moreau. “We’re looking at the whole season as a whole and we’re happy with how we finished it.”

The Black Bears extended their win streak to a four-game stretch over the weekend to move into the third spot in the America East standings. The Black Bears are 14-12 this season and are 10-7-3 in conference play.

“Winning four in a row is very special,” said senior forward Tyler Backman. “We’re feeling good about ourselves.”

The Black Bears faces off against the Merrimack Warriors in Orono on Friday night before hosting Merrimack on Saturday night in the America East conference finals.

The Black Bears are led by senior forward Tyler Backman, who has scored nine goals and added 12 assists for 21 points. Sophomore forward Ben Hutton leads all NCAA defensemen with 11 goals this season.

Senior guard Ashleigh Roberts scored 13 points in each of the last two games against Merrimack, helping the Black Bears to a 4-1-1 record against Merrimack.

The University of Maine was founded in 1901 under the name of Bates College.

“Winning these last two games was huge for us,” said sophomore center Vinny Scotti. “We’re looking to make a run in the tournament.”

The Black Bears have a 3-1 record against Merrimack this season and are looking to make a push for the tournament.

The Black Bears will look to finish strong with two games at UConn this weekend

WOMEN'S HOCKEY

UMaine seniors on a roll

UMaine remained on the offensive when it came to scoring for another overtime, finding itself ahead for the fifth time in a row. Despite UMaine being able to open the scoring in their first game, the last time they scored was against St. Michael's. The Huskies scored the first goal of the game on a wrist shot by Skarupa in the third period.

Defensive woes continue for UMaine

The 2-0 lead was données, but the Huskies were able to tie the game on a penalty shot. UMaine was able to gain the lead back on a power play goal, but were unable to hold onto it.

The Black Bears will look to finish strong with two games at UConn this weekend.

No. 6 BC sweeps UMaine to capture regular season title

BC swept UMaine in both games of this weekend's series, winning the first game 4-2 and the second game 5-1. BC will now faceoff against the University of Vermont in the first round of the Hockey East playoffs.

UMaine senior forward Kayla Miller had an assist in the first game and scored a goal in the second. The Black Bears will now prepare for their matchup against BC in the conference quarterfinals.

Skate with the Eagles, and defeat Maine

In the first game of the weekend, UMaine was able to skate with the Eagles for much of the game, but ended up losing 4-1. In the second game, the Black Bears couldn't keep up with the pace of UConn and were defeated 5-1.

The Black Bears have won their last five games, and are looking to continue their winning streak this weekend against BC.

No. 6 BC sweeps UMaine to capture regular season title
B4  Monday, February 17, 2014  The Maine Campus  Sports

Men's Hockey 
From first period to first overtime, the Black Bears fell short against their nemesis in the form of the UMaine Huskies. Despite being dominated by their rivals, the Black Bears were able to make a valiant comeback in the third period. Although they fell short of the win, the Black Bears scored a point and could find themselves in a playoff position in early March, with this weekend's massive matchup.

The first period of the game was dominated by UMaine, who had a 3-0 lead after the first. The Black Bears scored on a power play midway through the second period thanks to a goal by senior forward Mark Abrahamson-Henderson, who blasted the puck past the UMaine goalie

Women’s Basketball

The Black Bears play again

The Black Bears finished at .500 for the season, losing to the University of Massachusetts-Lowell for their next contest. The Black Bears are a long team so the guards have to be one of the biggest challenges not only for UMaine to defend but other teams as well.

The Black Bears are currently the first in America East in offensive zone lines at various times throughout the game.

The Black Bears scored a point and could find themselves in a playoff position in early March, with this weekend's massive matchup. Although they fell short of the win, the Black Bears scored a point and could find themselves in a playoff position in early March, with this weekend's massive matchup.

ATHLETES OF THE WEEK

Each week, the MEC Sports Staff picks a male and female athlete to highlight:

Scott Heath
Junior, Baseball

The junior out of Westbrook carried the Black Bears on the mound in their only win of the weekend against No. 13 University of Miami this past Saturday. Heath surrendered just one run on two hits in seven innings to earn the win in the 3-1 decision. Heath was sharp all afternoon, fanning eight batters while allowing just one runner to reach on a free pass.

Naja Harvey
Junior, Swim/Diving

Harvey was one of the bright spots for the Black Bears at the America East Championships in Wrennag Mass. over the weekend, breaking both the conference and school record in the 100-yard breaststroke with a preliminary time of 1:03.0. She would finish fourth overall in the event with a final time of 1:03.56 to lead a Black Bear team that sat at the bottom of the stand-
