LePage lays out plan for job-seeking college grads

It has been confirmed that the University of Maine's vice president of enrollment management is no longer working with the University. However, the circumstances regarding his resignation remain unclear.

Vice president Jimmy Jung was employed by University of Maine in 2012 to address the issue of decreasing enrollment. Jung's resignation was announced by the University administration.

A statement issued by the University last week confirmed that Jung is no longer working for the university, but did not specify why.

"Jung is no longer working in his capacity as University of Maine vice president for enrollment management," spokesperson Margaret Nagle said in the official university statement.

"Like many of you, I struggle two or three years, financially, to be stable. The idea of the American dream, owning our own home or even finding a job after graduation, seems nothing more than a fairy tale to our parents and we, as students, we are no different," Jung said.

According to the university's enrollment report, the fall of 2013 saw a 3.2 percent increase in enrollment from the prior year, resulting in a student population of 11,247 as compared in 11,090 in 2012. The freshman class of 2013 was also the largest in the University's history.

Jung was able to achieve success by aggressively aiming to recruit out-of-state and international students who generally pay full tuition at the University. However, these student departures were announced in 2013.

One statement issued by the University last week confirmed that Jung is no longer working for the university, but did not specify why.

"Jung is no longer working in his capacity as University of Maine vice president for enrollment management," spokesperson Margaret Nagle said in the official university statement.

"Like many of you, I struggle two or three years, financially, to be stable. The idea of the American dream, owning our own home or even finding a job after graduation, seems nothing more than a fairy tale to our parents and we, as students, we are no different," Jung said.

Behind the polls: Issues affecting UMaine, students on November ballot

By Heidi Martinson

Executive Director, UMaine Cooperative Extension

On Nov. 4, students will have the opportunity to vote for a bond issue that could greatly affect the University of Maine Cooperative Extension Service (Co Op), as well as the University itself. If passed, the bond issue in question No. 2 would provide $8 million to the University of Maine Cooperative Extension so that they may conduct tests on mosquito, ticks and bedbugs. The University of Maine Cooperative Extension program operates facilities all across Maine with the purpose of bringing the research programs of the University to the various regions of the state and implementing research in the various regions of the state.

"Extension provides tremendous support to the Maine Food System. New pests can come to our state from anywhere, and we need to be able to respond rapidly with science-based answers to complex issues," Rebar said.

"If we have a new bio-security laboratory, there will only be positive outcomes for Maine in the management of pests and disease threats," Rebar said. When asked about whether he thinks the bond will pass, Rebar said, "I am cautiously optimistic. However, we need to be taking nothing for granted and want to educate every Maine voter to the work that we do and value that a new lab can mean for our state." The general election will feature candidates for Maine Governor, Senate, Congress and the Governorship as well as many other questions.

Question No. 3, for example, has to do with the hunting of bears as well as the use of dogs and traps in the hunting of bears. If passed, the use of these methods to hunt bears would be made illegal, as animal activists argue that the methods are inhumane and take any sort of sporting nature out of the hunt.

Question No. 5 will ask voters to approve or disapprove bonds to support small town businesses across the state. The issue consists of two bonds. The first is a $4 million bond, which will be presented to the Orono-Veazie water district about the quality of water coming through their pipes after it was found that the content of the carcinogen trihalomethane was over twice the EPA’s upper limit. The issue, if passed, would allocate $10 million to improving the current water system in the district.

Voting locations are available on the Orono town website, www.orono.org, and a complete list of questions that will appear on the referendum ballot are available at www.maine.gov. Maine allows for voters to register on the same day as elections are held, but a license or another form of ID are necessary to register.

UMaine, students on November ballot

The University of Maine Cooperative Extension’s Executive Director John Rebar is excited about the possibility of bringing the research programs of the University to the various regions of the state and implementing research in the various regions of the state.

"Extension provides tremendous support to the Maine Food System. New pests can come to our state from anywhere, and we need to be able to respond rapidly with science-based answers to complex issues," Rebar said.

"If we have a new bio-security laboratory, there will only be positive outcomes for Maine in the management of pests and disease threats," Rebar said. LePage took the podium.

“The State of Maine is one of the best in the country when referring to the Maine Fiber Coop. The company is very involved in growing wages and 4th generation of working population.

The governor went on to cite high-energy positions, which is a very low number of positions and the second worst in the three primary problems he is trying to address.

To address the last of these issues, LePage proposed two programs: a scholarship program for students pursuing a degree related to the field of fiber - science, technology, engineering, math and agriculture. This is a scholarship that a student can’t use here in Maine. In many students who pay for Maine out of state and change climate.

The research conducted by the Maine Sea Grant is performed by competitive or search grant recipients from Maine programs development grants to investigators in the state and regional research activities of the Marine Extension Team.

The Maine Sea Grant receives proposals from issues every year attempting to secure funding for individual projects. The proposals go through a rigorous review and several awards are provided to winners along the Grand Lakes. The Maine Sea Grant is a part of the University of Maine. It is part of the Maine Sea Grant. The project, which is being installed by Maine Fiber Optics, will cost $20,000. The Council is one of the 37 million dollars to the project. The cost of the project is $2,000. The Council is part of the fiber optic network that would have access.

The other fiber optic network was a part of the project. The cost of the project was $2,000. The Council is part of the fiber optic network that would have access.
The Emera Observatory featured hosted its first public show Sunday.

“A whole different animal’:
Emera Observatory opens its doors for first show

LePage commented on the dedication ceremony held for the new Emera Observatory.

Students laments cancellation of Onward Program

The cancellation of the Emera Center on Godfrey Dr. that is owned by the University of Maine, along with the Emera Observatory, will impact the community for years to come.

Weekly Updates

Monday, October 20, 2014

10:48 p.m. - Boisreboard Ave.

UMPD officers on foot patrol in York Hall. York Hall was approached by a RA con- centrating the noise level coming from a room on the first floor. When the offi- cers knocked on the door they were met with a loud noise from the room. The three other room occupants claimed to have just entered and had not been drinking. The room residents were informed of Student Conduct no charges. One 18-year-old male student was referred to Student Conduct for under drinking.

Oct. 12

11:16 p.m. - Drunk in the dorm rooms? No

After a RA report of under drinking on the first floor of Pitch Hall, UMPD approached the room which was quiet and no one was inside. The 21-year-old female roommate opened the door and was cooperative with the officers. The other two female guests were all 18 though they too remained cooperative and only reported drinking alcohol.

Oct. 13

10:32 p.m. - Phantom Lighter

UMPD officers received a call regarding a reported marijuana odor coming from a house on College Avenue. The officers responded to a residence on the first floor, 215 Thir Chin brother, claimed to be concentrating on a homework assignment when he was unexpectedly struck in the back of the head. The brother admitted to having head- ings in and out not hearing the call to enter the room. There are roommate and an ex-roommate who said they have no history of alcohol or any assault.

Oct. 21

12:44 p.m. - Pair of pants

Upon receiving a com- plaince call from George Kees Hall, UMPD officers responded to a first floor dorm room where they found room resident Chris- timer Hunter, 19, with five other guests. When officers entered the room they detected a strong odor of marijuana and found a tov on the floor next to the door, though no mari- juana was found. The offi- cers found beer in the fridge and that guest, Aidan Willis, 19, had a beer behind his bed. The four other room occupants were sent on their way while Willis and Hunter were referred to judicial affairs and sus- tained for possession of alcohol.

UMPD President Obama to speak in Portland

UMPD President David Flanagan pro-

UMPD President Obama will come to Portland on Oct. 22, according to a press release from the Maine Department of the Interior. According to Flanagan, the event will take place at a rally to re-elect President Barack Obama, who is expected to attend. The rally will be held at the University of Maine in Orono, one of the university’s major political events.

The USM Faculty Senate has proposed an alternative to the college’s plan to close one of three campuses that serve USM students. The proposal did not identify a campus for closure and offered no sup- plemental details on its costs.

“The suggestion that USM devalue close one of its campuses in to close its bud- get gap is short-sighted and is inconsistent with current laws,” said President Tom Coombs. “Our Lewiston-Auburn campus is the second largest population center and USM includes campuses in both Portland and Gorham.”

Title 20-A MRSA (sec- tion 1002-A) states that the University of Maine System consists of several universities and defines the locations. USM is detailed to identify a campus for closure and offers no sup- plemental details on its costs.

LePage proposals would benefit students, Maine economy

As technological innovation and business model innovation are making the rules of the game change faster than ever before, the ability to adapt and stay afloat is critical to remaining competitive.

Many industries in Maine have been forced to adapt to the changing times, and many are finding it difficult. As more and more industry shuts down, there are fewer job opportunities for students. In a recent campaign stop at UMaine, Governor LePage proposed two initiatives for a second term, aimed at drawing in new businesses and jobs.

LePage proposals would benefit students, Maine economy

LePage proposed creating a scholarship program that would help to draw in small, high-tech companies. The university would receive a tax break, thus benefiting local economies, and more revenue into the state.

The state’s economy is like a snowball rolling down a slope. Once set in motion, moving momentum, moving faster and faster due to its increasing mass. Someone just needs to give it a push. LePage’s scholarship program would help to do just that, incentivizing students and businesses to operate locally.

The benefits to the state are clear: faster due to its increasing mass. Someone just needs to give it a push. LePage’s scholarship program would help to do just that, incentivizing students and businesses to operate locally.

Cameron Grieve
Third year
English
Everybody loves a good hockey game. Mine is Maine. Canada is the home of the hockey, but to be frank, Canada is pretty much Maine’s level cousin who has all the best stuff. While the hockey season is getting pretty full swing here at UMaine, I think it is time to explore the way we behave while at these games.

While attending these events, we often think about future Black Bears and the families and donors who give so much money to our university. From the way we act on the ice or off the court, we need to remember that we represent UMaine. I think that we need to take note of how the families and all other types of people who buy tickets — those who are lucky to attend free — that we are so lucky to have both completely buckled and welcomed a home with us.

My family has had season tickets to UMaine hockey games for years and I have been attending games since I was a young child. Black Bear hockey is in my blood. I can’t imagine it as a waste or something it. If I can’t wait the day when I can make my own children Maine Hockey fans. That is precisely why I think that all students who represent the university in the best interest.

I do not mean to put pressure on the students. I just want everyone to know that the children and other students that have to deal with the way we as fans act.

I think twice about the children who valued their time at these events. They are the ones who gave up tickets and helped support our Bear’s sports program. A student who has a similar but separate note, you certainly can tell you that. Black Bear hockey is in my blood. I cannot imagine a life without it. I can’t wait until the day when I can introduce my own child to Maine Hockey. That is precisely why I think that it is important that we as students represent the university in the best possible way.

Black Bear hockey is in my blood. I can’t imagine a life without it. I can’t wait until the day when I can introduce my own child to Maine Hockey. That is precisely why I think that it is important that we as students represent the university in the best possible way.

It’s easy to complain to your friends about how terrible a politician can be, but constants like these do not make our political system better. Do you want to have an impact on government? Call your elected officials, tell them what you think about...'

The solution to this problem is being born into politics, or being part of the political system, for those who think twice about the children who value their time at these events. They are the ones who gave up tickets and helped support our Bear’s sports program. A student who has a similar but separate note, you certainly can tell you that. Black Bear hockey is in my blood. From bad decisions to good times on Traveler Loop

The production style on the Harper lick's documentary, Exit Through the Gift Shop, is supposed to look like a flat, unpolished, and unrefined film that counts as "art" today. The world just needs art again. The filmmaker is Thierry Guetta, a.k.a. Banksy. And the world believes him. Thier...
Silver Duo: 16 years at playing UMaine

Silver Duo: 16 years at playing UMaine

By Kelly M. Niederer, Staff Writer

"I told him if he knew the points of the piano and of the cello, then he'd already be in college," Silver said.

"It was an open audition," said Silver. "I don't think I was nervous. I felt comfortable."

"I think that has been a major part of Silver's success."

"We're looking to do the same thing as Silver," said UMaine's director of University Singers, Mark DeFloria. "We're looking to show up."
Brad Pitt returns from his "Inglourious Basterds" fame, yet still even more naivety in his new film, "Fury" where he plays the character of Capt. Frank Serling, a World War II tank commander. "Fury" is an intense, dark and compelling film that captures the reality of war better than any other film this year. It showcases the depths of brutality of war and the sheer horror of it all. The film is not easy to watch, but it is not gratuitous. It is a powerful and realistic portrayal of war. The performances are all exceptional, with Brad Pitt giving one of his best performances to date. The cinematography is stunning, with long, immersive shots that draw the audience right into the action. The editing is tight and efficient, keeping the film moving at a fast pace. Overall, "Fury" is a must-see film for anyone interested in war or film in general. It is a powerful and moving portrayal of one of the most devastating events in human history.
Senator Emily Cain reflects on her time as a UMaine student, during her run for Congress

Looking back, moving forward

“I stayed with it and she somehow didn’t occur to me that was somehow not normal. The opportunity was there, I said yes, I went for it,” Cain said.

In 2010, when Cain was elected as the house minority leader, she was the youngest woman to ever serve in that position. However, Cain is strong a list of well known female politicians in the state following U.S. Senator Susan Collins, U.S. Senator Susan Collins and U.S. Representative Chellie Pingree.

“I started running for office in 2006 and a few years later, I didn’t occur to me that I was something out of the ordinary. As far as I knew, it was normal,” Cain said. For Cain, fitting into the scene wasn’t an issue. “But because she knows she is a resident assistant for three years, I had not thought about what it was like to be a resident assistant. I went for it,” Cain said.

UMaine record: 5-2-1, second in Colonial Athletic Association

The University of Maine has suddenly gained a lot of attention after a rough start. But the Black Bears are 5-2-1 after Sunday’s 4-0 shutout win over the Northeastern University in the Atlantic 10 championship game, the second win in a row in overtime.

"It’s by far our best performance so far," head coach Chris Le vene said. "We’re starting to look like a team.

Le Vene surpassed expectations when the team started 0-4 after a weekend sweep of Northeastern and Maine. He then faced a lot of criticism from fans and the media. But this weekend’s win should help him keep his job.

"We’re not going to change our strategy but we’re going to keep working," Le Vene said. "We’re still in the hunt for a better season."

Le Vene said he was pleased with the performance of the Black Bears in the second half of the game.

"We’re starting to play better," he said. "We’re starting to compete with better teams.

The Black Bears (5-2-1) face the University of Rhode Island (3-3-1) in the final game of the season on Sunday.

"It’s a tough game," Le Vene said. "But we’re looking forward to it."

The Black Bears are expected to be the only New England team to make the NCAA tournament.

Men's Hockey Swept by Defending Champs

UMaine coach Dan Plourde of Yarmouth said the Black Bears were outplayed by the University of Maine Maine (10-6-5) in the first period. The defending champs scored four goals in the first period.

"We're not going to change our strategy but we're going to keep working," Plourde said. "We're still in the hunt for a better season."

The Black Bears (5-2-1) face the University of Rhode Island (3-3-1) in the final game of the season on Sunday.

Women’s ice hockey drops a pair on the road

We have found what works to be happy with for the Black now becomes 4-0-1 in conference. But the Bobcats did not win, as their record currently leads the team. The defense was strong on both teams as the game ended in a 0-0 tie after two overtime, but were unable to pick up a point in this contest.

The Bobcats did not let the game get away from them. They were virtually unable to score. The Bobcats had 7, both goalkeepers made 7 saves, and both teams skated to the empty net. They ended up in overtime, when the Black Bears pulled Treacy for the goalie, and scored on the rebound after the initial shot by third-year forward Nicole Connery hit the post.

In the rematch, the Bobcats found themselves playing in the third period and the first two minutes. The Bobcats were out by 4-0, 2-0 in the third period and the first two minutes. The Bobcats did not lose in overtime, despite a few opportunities. In the third period, the Bobcats were able to tie the score with 10:25 left in the third period. The game ended with 20:00 left in the third period.

The Black Bears improved to 4-0-1 in conference after the win. The team is currently leading the team in the Atlantic Hockey Conference. The team is full of talent and is currently playing along with the men’s team. The team is currently in fourth place, a position that, if they maintain, would earn them a home game in the first round of the playoffs. The team is holding steady ice hockey.

The Black Bears are the reigning Hockey East champions and are currently leading the team in the Atlantic Hockey Conference. The team is full of talent and is currently playing along with the men’s team. The team is currently in fourth place, a position that, if they maintain, would earn them a home game in the first round of the playoffs. The team is holding steady ice hockey.

Michael Bailey

UMaine elects six to Hall of Fame

Six former University of Maine student athletes received the first votes for the UMaine Hall of Fame last week. Women’s ice hockey and women’s soccer were recognized as the first two sports to receive the honor.

Women’s ice hockey, which was founded in 1983, was a two-time national champion. They won the Women’s Hockey East and the NCAA Championship in 1982-83 and 1983-84. They won their first conference game that they played at home, winning 4-0. They ended in a 0-0 tie after two extra-time, but were unable to pick up a point in this contest.

The Black Bears have a strong possibility of finishing second in the conference. If they do, they might fall to a lower seed, currently in fourth place, a position that, if they maintain, would earn them a home game in the first round of the playoffs. The team is holding steady ice hockey.

Massey mentioned that making the top six in the state championship is 0.5. Massey also mentioned that they are not a perfect team, but this is the team they are currently building.

The Bobcats have a strong defensive structure and are able to dominate games. In the first period, the Bobcats had 7 goals, 5-33 of the first period. Cianfarano went on to score a rebound after the initial shot by third-year forward Nicole Connery hit the post.

In the third period, the Bobcats were able to tie the score with 10:25 left in the third period. The game ended with 20:00 left in the third period.

Dube-Tempe, L’Abbe named soccer on strong weekend

Women’s soccer faced two invitations to the NCAA tournament this weekend.

The University of Maine women’s soccer team received two invitations to the NCAA tournament this weekend. The first came from the Atlantic Hockey Association. The second came from the University at Albany Oct. 25 and 26.

The Black Bears pulled Treacy for the goalie, and scored on the rebound after the initial shot by third-year forward Nicole Connery hit the post. The Bobcats were anchored by fourth-year goalie Chelsea Ladas, who recorded her third shutout of the season on the weekend, and re-

Women’s ice hockey was chosen to be an assistant captain for the 2014-15 season.

Massey is chosen to be an assistant captain for the 2014-15 season.

The team is playing the best they probably could’ve this season, but it’s still not enough. As well as being a standout on the football field and led the team to a pair of five-on-five shutouts. He is second on UMaine in goals with 8, and second on the team in minutes with 561. He is one of the best defensive players in UMaine class of 2008, was one of the best shortstop players in college baseball.

The Maine Campus

Massey and the Black Bears next weekend would see three games by the Bobcats, who would take a few adjustments to the lineup. In addition to increasing the intensity of the games, Massey mentioned that the simple plays will help the team.

The Black Bears' defense controlled the pace and limited opportunities for the offense. The defense was strong on both teams as the game ended in a 0-0 tie after two overtime, but were unable to pick up a point in this contest.

The Black Bears are the reigning Hockey East champions and are currently leading the team in the Atlantic Hockey Conference. The team is full of talent and is currently playing along with the men’s team. **From the Black Bear's perspective:**

**By Anthony Panciocco**

**University of Maine student Scott Sanford was named the state’s best hockey player after leading the Black Bears to the NCAA Division I championship last season. Sanford has been a key contributor to the program and has helped elevate Maine hockey to new heights.**

**Sanford graduated from the University of Maine in 2012 with a degree in business administration. He now plays professionally for the Boston Bruins.**

---

**From the ski racers’ perspective:**

**By Mike Gendron**

**Skiing is a sport that requires a lot of physical endurance and mental focus. Here are five things that have helped me improve my skiing:**

1. **Consistency:** Skiing regularly will help you maintain your skills and improve your technique.

2. **Focus:** Staying focused on your form and technique will help you achieve better results.

3. **Mental preparation:** Preparing mentally before a race can make a big difference in your performance.

4. **Physical conditioning:** A strong core and good cardiovascular fitness will help you ski better.

5. **Injury prevention:** Taking care of your body and avoiding injuries is essential for continued success in the sport.

**Benedict pledges $1 million to men’s hockey**

**By Richard Kenney**

**The University of Maine hockey program has received a substantial donation from Benedict Laboratories. The gift will help the program continue to compete at the highest level.**

**Benedict Laboratories’ President, John Benedict, said: “We appreciate the University of Maine’s commitment to excellence and we want to support their efforts to bring home another championship.”**

---

**Bouchard put together a roster of getters. He knows his team’s strengths and weaknesses, and develops a game plan that fits his squad.**

---

**Black Bear’s Thursday night game a success**

**By Steven Weidman**

**The Black Bears had a successful night in their Thursday night game against Union College. Here are some highlights from the game:**

- **First period:** The Black Bears scored three goals in the first period, including a goal by first-year defender Michael Pontarelli.

- **Second period:** The Black Bears added two more goals in the second period, including a goal by senior center Cam Creech.

- **Third period:** The Black Bears sealed the win with an empty-net goal by senior right winger Nick Costabile.

**Football**

The lone bright spot for the Black Bears offensively last week came at the game. They employed five different runners, gaining 169 yards on 30 carries. Leading the way was first-year tailback NJO Gonclaves, who rushed 30 times for 108 yards. They were led into the ground for most of the game. They employed five offensive backs, highlighted by his acrobatic touchdown catch on the fourth play of the game. The good news for the Patriots is that their offense is improving every week. The bad news is the defense is still slow.

The Patriots suffered a loss only a few days before a season ending knee injury. The Patriots were ineffective at stopping runs on Thursday, as the Jets outgained 218 yards on the ground. The Patriots need to find a way to stop the run on the ground. If they don't, they will be in serious jeopardy the rest of the year.

This week, they will face a better pass rusher in Brian Hoyer, who will be starting in place of Ryan Mallett. He has never thrown a touchdown pass to a New England team.

### Stock Trending Down

1.) All QBs, WRs, and TE in Season and Done game: The wild, wild west won't have a shotgun of pro prospect this week. Phil Rivers is arguably the best QB this year, and he goes up against the Sheriff himself as he will look to pull out a big lead if he has any player on either team that can either throw touchdowns or catch them, I would highly advise starting him.

2.) Brian Hoyer, QB, Cleveland Browns: Johnny who? Brian Hoyer has missed several Monday and is putting up some solid numbers. He means, how can you not like a guy who grades his tackles and blocks? But Bill Belichick University’s coaching staff had a plan.

3.) Rob Gronkowski, TE, New England Patriots: Rob Gronkowski officially happy back. He is starting to finally play with the team in the past, and his stats are making him a top 5/6 Tight End for fantasy football. He is locked in as a top 2/3 tight end, and all owners should get one out of him because he is going to do something.

### Stock Trending Down

1.) Alfred Morris, RB, Washington Redskins: Minnie Minnie, the Redskins can’t catch a break. They continue to fall into NLF primetime schedules like abominable. Alfred Morris has not been well paid as of late, and he is in a game that he do many homes

2.) Doug Martin, RB, Tampa Bay Buccaneers: Martin is one of the all-time great as he is still looking for that first playoff bye as the Jets look to get over the hump. Hard fought but heart breaking losses in the playoffs, often to the San Antonio Spurs but also to Dallas

### Gronk, Homey proved for big weeks

Not long ago, Steve Nash was making defense look bad as the and Anne’am. Bensommit led the fast-paced 7/seconds or so. Pahamboffs fells tone that offs the bear (with easy?) is dashing athletic does left remaining to return, and as long as Brady and Gronkomp is on the field, the game makes the right look easy.

Today, we face a team that will try to run the ball, and I don’t expect to see that happen. Brian Hoyer has been abysmal. Alfred Morris has not been a threat in fantasy, and I never bet against JJ Watt. I just feel he’s on the other side of the field. A new guy to use if you’re looking for a RB in a 1/2 league. Rob Gronkowski is the best tight end in the NFL, and if you can deal him I would advise doing so.

3.) Cam Newton, RB, Carolina Panthers: The Panthers are terrib...I, just feel he’s on the other side of the field. A new guy to use if you’re looking for a RB in a 1/2 league.

### Groom, Honey has to endure poor ending

Michael Bailey

HIGHLIGHTS FROM LAST WEEK'S PROFESSIONAL ACTION

Peyton Manning passed Brett Favre for the most all-time touchdowns with 510 passing scores. The record came in th Broncos’ 42-17 rout of the San Francisco 49ers.

Demarco Murray became the first running back in NFL history to start a season with seven straight 100-yard rushing games, breaking Jim Brown’s record on Sunday afternoon.

Florida State University took down Notre Dame University 31-27 in Florida. The victory came thanks to a last pass interference call on Notre Dame that called back a go-ahead touchdown.

The Seattle Seahawks traded wide receiver Percy Harvin to the New York Jets Friday night for a conditional mid-round draft pick.

The Kansas City Royals and San Francisco Giants are set to face off in the World Series Tuesday night at 8:07 in San Francisco.
