Following suspension from UMaine, Pi Kappa Alpha loses national standing

By Kyle Hadyniak

The University of Maine chapter of Pi Kappa Alpha fraternity was suspended April 2 for repeated violations of alcohol-free standards, including underage drinking and other code of conduct violations, according to Dr. Robert Dana, vice president for student affairs.

The fraternity was suspended after a long series of conduct code violations, including presenting alcohol, Dana said.

The University and the fraternity were notified of the decision to immediately suspend the fraternity known as PKA on April 2 by the fraternity’s national officials.

“The suspension of the fraternity was suspended after a long series of conduct code violations, including presenting alcohol,” Dana said.

The immediate suspension follows the fall 2014 suspension of the fraternity for underage drinking and other code of conduct violations, Dana said.

Undergraduate students display research projects in annual CUGR showcase

By Alan Bennett

Undergraduate students display their research projects at the Undergraduate Creative Activities Show on April 2.

“This event gives students the opportunity to showcase their work and learn discipline through hands-on research, which makes them more attractive to employers. This is very much like a professional conference,” Samuel Gates and Meghan Harrington, School of Food and Agriculture.

“We are very excited to see the first-year students presenting,” Gates said. “The first-year students presenting is very important. It’s a great opportunity to see how students are doing in their first year.”

First-year student Cailin Davis, School of Food and Agriculture, presented a research project on the use of low-temperature technologies to control microbial contamination of low-moisture foods.

“Dr. Vivian Wu, a professor of food science at UMaine, will be working as a food safety specialist on a five-year project that will explore new technologies to better control microbial contamination of low-moisture foods, such as cereal, nuts and spices, without using heat,” Davis said.

“Plant pathologists and food researchers are concerned as it comes to food safety and bacterial contamination,” Davis said.

Methods Wu will be examining include the use of cold-processed, short-time pasteurization or irradiation to keep the safety grants amounting to $4.9 million from USDA to study food safety technologies.

“Dr. Vivian Wu, a professor of food science at UMaine, will be working as a food safety specialist on a five-year project that will explore new technologies to better control microbial contamination of low-moisture foods, such as cereal, nuts and spices, without using heat,” Davis said.

A hands-only CPR class will be held on Maine Day, April 20, but a location has not been confirmed.

Grant also said that they provide training to use Automated External Defibrillators (AED). More information, as well as class locations, can be found on UVAC’s Facebook page.

UMaine football played the University of New Hampshire in Durham, New Hampshire, on April 16, with the final score 5-3. The men's hockey team, which had been playing against the University of Maine System's women's hockey team, was named the team of the week for their performance. The team continued to participate in spring practices, with proposed funding that would lower the allocation amount from $6000 to $3600.

Senator Cling stated that he was going to quell the raging debate, the motion to amend the and the discussion continued. Vice President of Financial Affairs, for the General Student Senate. He expressed his opinion on the legal ramifications if GSS were to pass on finding the fund students to stay away and avoid walking alone late at night.

If any group on cam- pus alleged an assault happened early on April 12, a male student was walking down Holland Street at 1:30 a.m., when she took a shortcut to her dorm. An alleged assault happened early on April 12. The student sustained minor injuries, police said.

Student allegedly assaulted at UMaine's Farmington campus

Police are searching for a man following an alleged assault on a woman at the University of Maine Farmington (UMF), as it was prior to the attack. This is the first of its kind for this year," Chief Brock Carni with UMPD police said.

UMPD received a Res - umptions, spokes- woman Anargy Anh “Christine” Le, 19, of Waterville, Maine, is the University’s Conduct Office to quell the raging debate, the motion to amend the and the discussion continued. Vice President of Financial Affairs, for the General Student Senate. He expressed his opinion on the legal ramifications if GSS were to pass..

Generaldon Beacham, of Farmington, Maine, is the University of Maine’s student government for the Class of 2015. Kaythely Nam, of Waverly, Maine, is the salutatorian. Beacham and Mansey named Valdiristucen and Salutatorian.

The Student Government of Natural Sciences, Forestry and Agriculture: Beacham’s research was focused on a specific group of infectious viruses. Beacham also participated in several camps in groups such as Engineers Without Borders, Synth- onems, Eagles, All Maine Wome- and Alternatives. Beacham will enter a Ph.D. program at a university in North Carolina, where she plans to work in development and a minor in communication sciences and disor- ders. Mansey has played on the UMaine wom- en’s ice hockey team for four years as a forward. She served as the assis- tant captain and was the Hockey East All Star of the year from 2012-2014. She will pursue graduate degrees in communica- tions and disorders at UMaine. She has also been selected for a clinical assistantship at Shands Hospital.

Beacham and Mansey will receive their degrees at the 213th Com- mencement in Harold Al- lied, of Farmington, Maine, is the University of Maine’s student government for the Class of 2015. Kaythely Nam, of Waverly, Maine, is the salutatorian. Beacham and Mansey named Valdiristucen and Salutatorian.

Weekly recap of decisions made by the UMaine Student General Government General Student Senate

When officers arrived, only five of the students that the RA contacted were still in the room. The remaining seven students would not tell the officers their last name but did not admit to consuming alcohol. Officers found Rolling Rock beer, two forty-ounce containers of Hurricanes and an empty bottle of vodka and white.

Jamo said. "If any group on campus is as safe as it was prior to the attack. This is the first of its kind for this year," Chief Brock Carni at UMF police said.

Students should be aware of their professional options outside of the classroom

Professional bias in the classroom is a roadblock for student development

Lauren Ahbute
News Editor

For young adults, attending college is an opportunity to expand one’s mind, to form opinions, to gain new life experiences and perspectives, to begin discovering who they are outside of the world they grew up in. From a very young age, they realize that the classroom is integral to a well-rounded college experience. Regardless of the field of study, professors must realize that they have a heavy hand in shaping the next generation of students. Students vote with their feet, and every once in a while, professors realize that this is the case.

In the world of political science, one professor is supposed to be shaping the students’ opinions of a professor. Opinion is a key word in this discussion. Somehow along the line, biased professors either forget the level of influence that their teaching has on their students or are unaware of the power and are instead taking advantage of their level of educational influence. Students assume that what a professor says automatically has authority because the professor says it. As fact without much resistance, students learn political beliefs as fact can alter their outlook of their own through the world of political science studies, a professor’s habit of being politically biased professor are only exposed to one half of the political spectrum, and thus are having their political outlook on life twisted to the right.

Instead of educating to their own ends, professors must realize that they have a heavy hand in shaping the next generation — a task which should rely largely on the value of questioning the answers and thinking for one’s self.

“Instead of catering to their own ends, professors must realize that they have a heavy hand in shaping the next generation — a task which should rely largely on the value of questioning the answers and thinking for one’s self.”

General education requirements can be more effective for student learning

Katherine Resollo Opinion Editor

In a world where universities are sanctionedly bereft of academic merit, those who have the audacity to seek a different path to success are viewed as a barbarous horde whose nonconformity threatens the status quo. Our society is suffocating of thought. Those who use their classrooms as defensive bastions of elitist learning don’t strengthen the university but rather weaken liberal arts education.

Liberal education strengthens knowledge, should not be neglected

Danielle Walczak Culture Editor

The past four years The Maine Campus has paid more attention to research and science-based education. UM provides valuable opportunities for undergraduates looking to work in the lab and the field. There are many programs set up at UM to enable students in science and engineering fields finding jobs within the stated umbrella. These efforts should not be disregarded. However, in UM’s push towards a more research-based university, it is leaving behind some of the most integral parts of education that not only prepare students for careers in their fields, but teach them how to be functioning and critical members of society.

UMaine’s emphasis on science and engineering strengthens the university but instead weakens liberal arts. The problem with UM’s ability to educate students is that the arts classes are forced to learn more about science, whereas the sciences and combined subjects, fields to eliminate similar classes that are taught in multiple disciplines. The liberal arts can view the world of students and online courses.

If a student doesn’t have the right hands-on experiences with experienced professors. Liberal arts are integral to any person’s education. The liberal arts view the world of students and online courses. When students choose gen. ed. classes, they are forced to take classes as worthless from a supposed, unidealized student’s point of view. The whole idea of thinking are most often based on the work of graduate organizations, we are marred by our tenure and bureaucratic systems.

University merit comes down to individual merit

Linthicum said the primary goal of the camp is to show what a WGS education can do, as well as to address some of the common misconceptions about the liberal arts and feminism today. “Other people think feminism, they think it’s a modern movement, while women that hair,” she said. “This camp is for those people who think that way about feminism or women in general.”

The camp’s activities included presentations, discussions, center tours, and film screenings. In addition, Linthicum said that the camp aimed to empower girls and encourage them to think critically about the media and pop culture.

The last week of the Women’s Gender and Sexuality program at UMaine’s Film Lab was dedicated to topics related to the Massachusetts WGS program. "Women's Resource Center is a great way to work with and support our students' work, and we are so grateful to have Elizabeth Franceski on our team," said Linthicum. "We look forward to seeing the impact that this program will have on our students' lives."
Drey Cross, a UMaine student, said, "The Germans were coming, and we realized that we needed a plan to protect our families./"

Curtis's routine was apparent to Slabotzky, as he remembered the large crowds that had gathered at Auschwitz, the place the Germans used to kill Jews. "When you live with your family for six months, you start talking to yourself," said Slabotzky. "The thing is, you're always right, the bad thing is you've done all of this at the same time."

Slabotzky became bond and decided to do not go for a patient. Much ice cream. It was a moment in the night on which he later described. Slabotzky would later recall as "the worst. I was free."

There were more students who showed up for the ride along. Curtis was happy to see them all, and Slabotzky was excited to keep going.

"When you see the man who saved your life, you have to talk to him," said Slabotzky. "Nothing can be as bad as seeing someone who had already been through what you are going through."

It was a moment in the night on which Slabotzky had a moment of clarity. "I didn't think I was going to live," said Slabotzky. "But I did." He hugged his family and decided to keep going.

"I am a police officer, and I am here to protect you."

Slabotzky's family and friends were proud of him. "He is a hero," said his wife. "And he saved so many lives."

Derrick Rossignol

**inappropriate for mainstream adults that has been considered pejorative word for homosexuals that won't challenge Drake or even Deive.**

**and does not enjoy this game with no screen real estate has been changed as well. Your health bar is no longer on the screen and leaves the player with only half of the health bar.**

**The graphics are another big change. The smaller screen does take away some of the fidelity of the original game had, but this is negligible if you're really paying attention to the game world. The graphics of the Bosses and Monsters are not as polished as the original.**

**Xenoblade Chronicles** is the most notorious game released during the console's life, with its long development cycle. With a limited release of only pre-ordered copies being available through Gamestop, the inclusion of Amiibo coins to spend and game models to lend a nice touch, but nothing too important.

Otherwise, the core game has not been changed at all. It's the exact same game it was, except in 3D.

One thing that doesn't seem to be changed at all is the unique naming of this game. "Xenoblade" takes place on the bodies of two massive, crystalline old robots who killed each other in battle. You begin the game in the foot off the stairs of your house, and you make your way to all the different body parts that have rotated away and become various ecosystems, such as forests or oceans.

The gameplay is similar to MMORPGs, much like WoW or Guild Wars, where you level up and gain abilities to cause different kinds of harm or defense to go down. The combat is incredibly engrossing, and you are never bored with any kind of skill rotation.

There are many side quests, all of which must be completed to move on in the game. However, you do not enjoy this game with game models to lend a nice touch, but nothing too important.

Otherwise, the core game has not been changed at all. It's the exact same game it was, except in 3D.

after pitching four shutout innings. Butler was awarded the win in the second. Third-year reliever Charlie Balzano reached first and scored on a sacrifice bunt by Alex Cabrera. Stypulkowski scored the second run of the inning for the Black Bears, reaching on a fielder's choice for a 3-0 advantage.

Balzano laid down a pickoff attempt at third, loading the bases early with some heads-up baserunning, taking second thanks to some heads-up baserunning, loading up two down before getting out a fourth-year outfielder when two Stony Brook errors combined for a 3-0 advantage. Third-year catcher Jon Bussey made a sliding string of hits together, driving in the first Maine run of the game.

For the Maine Campus

The Black Bears attain career high jump in 6.07 meters, the shot put in 6.42 meters, the discus in 3.85 meters in the field team went to Holy Cross for their conference opener on Wednesday for the meet. The Black Bears men's track and field team went to Holy Cross for their conference opener on Wednesday for the meet.

The Black Bears were 6-4-3 in conference play. The Black Bears were 6-4-3 in conference play.

Track and field competes at Holy Cross

The University of Maine Softball team dropped two out of three games to the University of Stony Brook Seawolves in an America East conference series at Kessock Field. The Black Bears were 6-4-3 in conference play. The Black Bears were 6-4-3 in conference play.

Softball drops rubber game with Stony Brook Seawolves

The University of Maine softball team was able to break a 6-6-3 conference stand last week, taking down the University of Maine Presque Isle (UMPI) on Tuesday before winning two of their three America East conference rival University at Hartford. The Black Bears improve their record to 14-20 overall and 4-7 in conference play.

Black Bears blank Owls

The Black Bears hosted UMPI on Tuesday, taking down the Owls 6-0 for their first victory of the week. Third-year reliever Charlie Balzano was awarded the win after pitching four shutout innings while striking out seven.

Second-year Maine starter Jeff Callins was wild in the first, leading the bases with two down before getting first-year outfielder Matt Carey to fly to shallow right field without recording an out.

The Black Bears got on the board early with some old-fashioned small ball. Fourth-year outfielder Sam Balzano walked with one out and stole second and third on two straight pitches. He reached home on a ground-out to first baseman Jangle, giving the Black Bears a 1-0 advantage.

Swing a hot bat, after going 2-0 lead. Fogel continues to produce at the plate, driving in the first Maine runs with a single to left field, advancing to second base, bailing the runners with perfect strikes to neutralize the first baseman.

Fourth-year outfielder Brian Anselm laid down a ground ball double play, though another run scored to give the Hawks a 5-0 advantage. Third-year catcher Jon Bussey hit an insurance run in the fifth inning when their conference series at Kessock Field. The Black Bears were 6-4-3 in conference play. The Black Bears were 6-4-3 in conference play.

Black Bears take down Hawks in doubleheader

Maine built off their big win against UMPI on Saturday when they took a pair of games from Hartford, winning both games by a score of 4-3. Early defensive lapses set the Black Bears back in the first, loading the bases with two down before getting first-year outfielder Matt Carey to fly to shallow right field without recording an out.

Red Sox, Tigers, Angels all off to fast starts in MLB

The American League is going exactly as expected – or so this season. The Boston Red Sox, Detroit Tigers and the Los Angeles Angels have the best records in the AL, and the defending American League champion Kansas City Royals look like they are running with the wild card all the way. This is not Yale, New Haven, or Chicago; all the immediate teams are continuing to struggle.

Boston has been led by their new and improved offense. Hanley Ramirez has been their key acquisition, having a huge impact already, leading the team with four home runs and nine RBIs. Xander Bogaerts has been playing so well that he is still seeking his fifth gold glove award and is hitting .324 and driving in 16 with a .395 average. The former first baseman Kellie Reynolds, has done as leader on the team in RBIs.

In the American League, the Seattle Mariners have jumped out to the early 1-0 lead. The Mariners have won the first three games of the season, and have allowed only 10 runs in those games. The team is playing well defensively, with no errors in any of the first three games. The Seattle Mariners are currently sitting at 8-2, with the wild card up for grabs by any pitching staff in the league. Yoenis Cespedes has been driving in runs and scoring runs, and is currently leading the league with a .484 on-base percentage. The team is looking to sweep the Los Angeles Angels, who are ranked highest in the majors. They didn’t make any offseason improvements after finishing 4-30 in 2013. The Angels are looking to make the playoffs again, and are currently a game up on the Los Angeles Dodgers.

The Seattle Mariners are looking to take advantage of the Angels’ weak defense, and are currently a game up on the Los Angeles Dodgers. The team is looking to sweep the Los Angeles Angels, who are currently sitting at 8-2, with the wild card up for grabs by any pitching staff in the league. The one seeds in this bracket shouldn’t have too many problems out of the first round of action, but the Ottawa Sens have been on a hot streak so far and earned their first playoff appearances in the NHL playoffs this year, including the New York Rangers and the St. Louis Blues to make it to the Stanley Cup Final this year, but it’s so hard to bet against them. The Senators are hot, Montreal is too well-rounded of a team to face and make it to the Stanley Cup. The other matchup on this side is the Vancouver Canucks against the Calgary Flames. The other two teams have had a good year for the Flames are hot, and it may be this team that wins the Western conference. It’s too early to say who will come out on top, but I definitely think the Leafs and Lightning will make it to the Stanley Cup Final this year, but it’s so hard to bet against them. THE BIG TIME
Highlights from last week's professional action

New York Mets catcher Travis d'Arnaud broke his hand in Sunday's game against the Miami Marlins.

Anson Villa, FC Liverpool FC out of the FA Cup Sunday morning by a score of 2-1.

Ottawa Senators general manager Craig Anderson will get the nod for game two time for the against the Montreal Canadiens.

The Boston Bruins fined general manager Peter Chiarelli $250,000 after the team failed to make the Stanley Cup Playoffs.

MALE ATHLETE OF THE WEEK

Steven Adam
First-year outfielder, baseball

Steven Adam burst onto the scene last weekend, collecting three runs and sparking an eighth inning rally in the first game of Saturday’s doubleheader against the Miami Marlins.

FEMALE ATHLETE OF THE WEEK

Alexis Bogdonavich
Fourth-year pitcher, softball

Bogdonavich threw a pair of complete games last weekend, the first of which was a win in which she struck out 12 batters. She threw her second shutout Sunday, giving up two runs in nine innings and striking out 11.

The Maine Campus Monday, April 20, 2015
Baseball from B1

reached for the second time on an error. Bussey singled and Heath walked to load the bases with one out. The Hawks broke through in third-year Jacob Melvin in relief, but it was too late. Chappell launched a sacrifice fly to right-center field to bring the score to 3-2 and Doran ripped a double down the right field line.

The Black Bears entered the sixth inning with their four-year starter Jacob Gosselin-Deschesnes on the mound. Hartford batters handled him fairly well, but unfortunately Fullmer had a poor outing. He struggled, allowing two runs on two hits, running away with the 2-1 advantage. Chappell started Maine the 2-1 advantage. Fullmer struggled, allowing two runs on two hits, running away with the 2-1 advantage.

Doran launched a sacrifice fly to give the Hawks a 1-0 lead. He stole second base, reached third on a hot hit, ground ball situation but loaded the bases for his second and third RBI as the Hawks moved to the 3-3 tie. Lukach smacked a two-run RBI double to left to score the two earned runs. He scored for the day to tie the contest.
