New club looks to push neuroscience program

Historic Chambers said former "The brain is the most important organ in the entire body and we haven't even scratched the surface about what we know about it." Currie Curtis, president of the University of Maine's new Neuroscience Club, said. At UMaine, there are various students and faculty interested in neuroscience. However, they're spread across a variety of disciplines, such as biology and psychology. Kristy Townsend, assistant professor of neuroanatomy, formed the club with three goals in mind to bring people across disciplines interested in neuroscience to help students develop professionally and to become involved in outreach events.

"We're all interested in how the brain works," Thoma Van Cleve, professor of physics and astronomy at UMaine, is a major breakthrough in how the brain works. Comins also received his Ph.D. in general relativity from Cornell University in 1970. Comins received his Ph.D. in general relativity and was too weak.

"It's so much easier to learn from peers than to learn in class," Wood said. "At one point, the meeting's conversation drifted to outreach where people could obtain a brain for dissection. "I'd like to see this become what people want to become." Curtis, who urged members to email her with any topics of interest, said. Curtis has been working in the Townsend Lab as a work-study employee for over a year, which is how she learned the opportunity to become the club's president. She's currently in a four plus one program that is now to the biology department, in which she'll begin working on her master's degree for her senior year.

"If anyone is even slightly interested in neuroscience or how the brain works, I want this to be a place where they can discuss and learn about what they want about the brain," Curtis said. "There are so many things that people are just like, 'I don't know how to do this,' and I want us to be able to find out about that."
Bush drops out following Trump win; Clinton also wins

According to Democratic presidential candidate Hillary Clinton, Sen. Bernie Sanders, I-Vt., is going to be a very frustrating opponent. Clinton went into South Carolina with a staggering lead in total delegates and was expected to win in three primaries after the first three primaries and caucuses. Clinton has a 52.7 percent of the vote, Sanders is at 47.2 percent, and Ted Cruz is at 22.5 percent of the vote. According to Dill, the star of the video, he has been approached by people seeking his input on bed bug problems.

Trump wins Iowa

Donald Trump posted an important victory over his Republican opponents at the South Carolina primary held on Feb. 20 giving him all 50 of the state’s delegates.

Trump’s 33.2 percent beat Marco Rubio’s second place 22.5 and Ted Cruz’s 22.3 percent. Bringing up the rear were Jeb Bush, John Kasich and Ben Carson receiving under 10 percent of the vote.

Trump’s second consecutive win perhaps shows some stabilizing power in a campaign that many predicted to have a very short lifespan.

After only receiving 7.8 percent of the vote, Jeb Bush decided to suspend his campaign.

As reported by the New York Times, Bush received a substantial amount of funding from a political action committee, or super PAC, but was seeing very little results from the money.

Meanwhile in Nevada, Hillary Clinton got a second win in primaries after Bernie Sanders’ win in New Hampshire. Clinton amassed 52.7 percent of the vote, gaining 19 more delegates. Sanders, finished with 47.2 percent and 15 delegates. Despite Sanders having times after being shared by Lifehacker, the university has luckily avoided any large scale incidents to ticks and he has been approached by people from England to California seeking his input on bed bug problems.

The Maine Campus

The Maine Campus Monday, February 22, 2016

In the past year, scientists have made great gains on the problem of ticks, which have caused more than 200,000 cases in hotel rooms. According to Dill, “The process of ticks can be very long and presentations become frequent but it’s mind boggling.”

“Over 2 million people have now seen me and I know what I sound like,” Dill said. “I’ve done over 100 talks and presentations because there’s not much happening.”

Since the video has gained popularity the UMaine University has doubled in subscribers, gaining over 5,000. While Dill is happy for the attention the video has brought to UMaine and the work of Cooperative Extension office, he is still a bit flustered.

The fact that the video’s general relativity made it being confirmed gives us more confidence that the information to learn how things in space work. This discovery can help scientists learn more about the universe which began with a bang and the universe became a big bang.

“It’s important to scientists because it proves Einstein’s general relativity and it can help explain the big bang,” Comins said.

Starting in January, the Bangor and University of Maine police departments restarted a program called Kids ‘n’ Kops to send anti-bullying and anti-drug messages to kids in the Greater Bangor area.

The Kids ‘n’ Kops program, started around 20 years ago, was revived this year in hopes to repeat the success it had in the past.

The initial run of the program lasted from 1986 to 1988 and was attributed to former UMaine men’s basketball coach and alum Skip Chappelle. It involved many surrounding law enforcement agencies and trading cards from UMaine athletes that went on to have professional careers.

This session of Kids ‘n’ Kops features a series of 13 trading cards that use UMaine athletes. The front is a picture of an athlete, and on the back is a simple message against drug use and bullying.

The latest card, which features Black Bear’s softball player Janelle Bouchard, reads “it isn’t big to make others feel small.”

“Our hope is that the kids will get a chance to speak to an officer,” Robert Welch of University of Maine Police Department (UMPD) said. “It’s the interaction with the officers, the prizes and the messages with the athlete’s support.”

When kids collect five cards, they receive a free t-shirt and two tickets to a UMaine basketball game. If they collect all 13 cards, they are entered into a giveaway from UMaine branded gear.

The program ends for UMPD at the end of the hockey season. Welch said that this program is successful, because it gives children positive images of officers.

“Even if one kid spoke to one officer, the program is a success,” Welch said.

Welch said the program will be revamped for the next session.
Weekly Updates

The World This Week

Feb. 17 - American novelist Harper Lee, best known for writing To Kill A Mockingbird, has died. Media attention on Lee was met with resistance from the author, as she declined most requests for interviews. She was 89.

Feb. 20 - Six are dead and three are wounded after a gunman went on a shooting rampage in Kalamazoo, Michigan. The suspected killer is a 45 year old Uber driver named Jason Dalton. Dalton has been arrested, but not formally charged.

Feb. 20 - 10 are dead after a cyclone ripped through Fiji. Schools in the island nation will be closed for one week, and the Nadi International Airport reopened on Monday after being closed for two days.

**Take the EMERGENCY out of emergency contraception!**

Did you know? You can get emergency contraception pills (ECPs) over the counter. Why wait? Carry emergency contraception in your purse, have it on hand in your medicine cabinet, and plan ahead for one less emergency.

Emergency contraception (ECP) is a safe and effective back-up method that can prevent pregnancy if taken within 120 hours (5 days) from unprotected sex.

ECPs are under the brand name Plan B. It does not prevent HIV (the virus causing AIDS) or other sexually transmitted infections (STIs).

announced professorship named after Stephen King.

The Harold Alfond Foundation has awarded $1 million to establish an endowed chaired professorship in Literature in honor of University of Maine alumnus Stephen King.

The Stephen E. King Chair in Literature will be filled in the fall of 2016 after a search. This is the first endowed chair in the English Department.

Stephen and Tabitha King have been generous supporters of their alma mater for many years.”

UMaine Newsmaker San san Hunter told UMaine News. “They have partic-

cularly rewarding to have a prestigious gift such as this that will inspire and influence current and fu-

tures generations of read-

ers and writers.”

An event is being planned to celebrate the professorship later this year.

**New Business**

The Presidential Cabinet proposed a motion to change the existing policy of join-

ing the Student Government. With elections each spring, the current policy states that a senator must be at least a second semester freshman to join. With the passing of the new motion this week, now any full-time UMaine student can join. The sooner we can get people in our doors, the sooner we can start teaching.

fic and city life, but it can be boring and predictable. It is just that: an opinion from a

Dear Editor,

I am writing to express my opinions on the election of the 2016 presidential candidates. While many students are involved in politics, some are not. This is unfortunate because young people should have a say in the government and its decisions.

The election of Donald Trump has raised many concerns among young people. His policies and statements have been widely criticized, and many fear for the future of our country under his leadership.

On the other hand, Hillary Clinton's campaign has brought up important issues such as healthcare, education, and climate change. While some young people supported her, others were unsure of her policies and her ability to lead the country.

As a college student, I believe it is important for young people to participate in the political process. By voting, we have a voice in determining the future of our country.

I encourage my fellow students to register to vote and make informed decisions on election day. Our voices matter, and we have the power to shape the direction of our nation.

Thank you for considering my opinion.

Sincerely,

I spoke out about my struggles with anorexia and body dysmorphic disorder in October to everyone I care about. It is a battle that light daily, between balancing eating with exercise and maintaining my obligations to school, work and a social life. But daily struggles with these diseases go beyond what many people might realize. An anorexia is not only to deal with both internal and societal pressures to be thin, but with the commonplace language surrounding appearance and body image.

Constantly anorexics are reassured by friends, family and others that they aren’t skinny and they shouldn’t be happy with their bodies, and love themselves. Body positivity is great; it’s what we should strive for. But body positivity does not come from reassuring people they are skinny. Doing so leads to reassuring people they are skinny. It’s a sentiment that has become glorified and we should never reward this behavior.

Every year in the country suffering from eating disorders, it is not enough to dismiss their cries for help by reassuring them that they are “skinny.” For those people, the best you can do is offer support on their terms. The best you can do is just be there. How to properly support the eating disordered

For the 30 million people in the United States who suffer from eating disorders, it is not enough to even tell someone that “it’s okay, you’re skinny.” I argue it’s not enough to even tell someone that they are beautiful. Being told these things doesn’t matter to those with eating disorders; these phrases make the eating disorder feel worse. So what should you do?

Listen. As an eating disorder is a telephone call from the brain that there is something wrong. Pick up the phone. For the 30 million people in the United States who suffer from eating disorders, it is not enough to dismiss their cries for help by reassuring them that they are “skinny.” For those people, the best you can do is offer support on their terms. The best you can do is just be there.

WINE!

Granate 2014 Malbec, Argentina $5.99

I must preface this review by mentioning that I am a massive wine lover, and probably my favorite wine is Argentinian malbec. I like it for its complex flavors and its ability to pair well with food. It is no surprise that I was thrilled to find Granate 2014 malbec at $5.99 per bottle. I was not about to pass up a chance to try a new wine at a great price. After countless times reviewing wine labels, I was excited to finally make a purchase based on the name alone. I chose this wine because I had heard of the malbec grape, but had never tried it. I was curious to see how it would be. I opened the bottle and poured a glass. I was not disappointed. The wine was full-bodied and had a rich, fruity flavor. It had a nice balance of sweetness and acidity, with a deep purple color in the glass. This wine was definitely a great find.

The Chinese New Year is a time of celebration and family gathering. It is a time to set aside the worries of the previous year and look forward to the new one. It is a time to reconnect with family and friends. For many, it is also a time to enjoy a special treat - malbec.

As I held the glass up to the light, I noticed its deep red color. The wine had a rich, full-bodied flavor that was balanced with a hint of sweetness. It was a perfect complement to the food that I was enjoying. As I sipped the wine, I was impressed with the way it enhanced the flavors of the food.

The Chinese New Year is a time to reflect on the past year and to set goals for the new one. It is a time to reflect on the good things that have happened and to plan for the future. It is a time to be grateful for what we have and to look forward to what is to come.

As the year draws to a close, I am looking forward to the Chinese New Year. It is a time of celebration and joy. It is a time to connect with family and friends. It is a time to drink malbec. And, for me, it is a time to savor the flavors of the new year.
ad to these dances from his home country. Hashemi explains other countries’ traditional dances with an an

International Dance Festival

FEBRUARY 19, 2016

Piano from the event accompany the story.
Bears fourth-year forward Matt Morris said the Black Bears netted four goals in the final two periods to pull away for the win. "We really picked it up after the second period, and our way back by the third period, and Gauthier made the decision to pull first-year goaltender Bobbi Mcgovern with just over a minute remaining in the contest. On the ensuing faceoff, first-year defender Rob McGovern mishandled a puck at the point, and fourth-year forward Justin Hussar brought it to the length of the ice for an empty net goal to seal the 6-4 victory.

"When you look at the year as a whole, you look back and say, ‘What a season!’" Hussar said. "The key to our season was that we were competitive, we were hard to beat and we had good goals. Our goalie was brilliant," Hussar said. "Most of the time, our goalie was brilliant and our goalie was a game."

The team was one of the best teams in the nation this season, finishing 6-4 in the nation. The Black Bears have been hard to beat for the past few years, and this year was no different. The team’s depth and strength were the keys to their success. They were able to put four goals on the board in the second period, and they were able to outscore the opposing team in the final two periods, winning 6-4.

"We’ve been hard to beat. Our goalie has been brilliant," Hussar said. "We’ve been competitive, we’ve been hard to beat and we’ve had good goals. Most of the time, our goalie was brilliant, and our goalie was a game."
Baseball opens season with victory, drops two in loss to close out series

The Black Bears won 4-3 on Friday before dropping doubleheader 9-1 and 4-2.

By Evan Stypulkowski

On Friday, fourth-year infielder Jack Murphy led the way at the plate as the Black Bears defeated the Blue Jays 9-1 and 4-2 in the first two games of a three-game series against the Clemson University Tigers.

In game one, second baseman Chase Chappell and first-year righty Jonah Casals put together a solid outing to give the Black Bears the win.

Chappell collected a double down the first base line to score his first run in the third on the plate. Just one out later, the fourth-year second baseman Danny Casals and junior catcher Danza had a sacrifice ground out to second base from Chappell.

In the sixth inning, Maine scored back to back to keep their lead at 3-2. Maine started the inning with a sacrifice bunt. Fullmer then singled to right field to get runners on base. For the third out, Maine would be able to tie the game back up at 3-3.

In the bottom of the first inning, Casals made a one-out sacrifice fly ball in the first inning but was able to be thrown out at the plate by three batters. Fullmer then walked the next two.

The Black Bears would be led on offense by fourth-year left fielder Brett Chappell and fourth-year designated hitter Kevin Stypulkowski, who each had a double in the game. Chappell and Stypulkowski were the only two gamers for the Black Bears that had a triple. Stypulkowski scored the first run for the Black Bears and was added a double.

Maine entered the game as the favorite to come out on top. However, the Tigers were able to take advantage and scored three runs to lead off the game.

Though Maine got off to a slow start, the Black Bears were able to come out on top after Chappell hit the first batter of the inning for a base hit. The Black Bears would add on three runs for the first lead of the game as they extended the Clemson lead to 9-1.

Despite trailing by eight runs in the final game of the series, the Black Bears would continue to battle to make a comeback. Fourth-year Shane Bussey would get the Black Bears on the board with a single to right field and advance Danza to third base. After being first-year designated hitter Victor Diaz, Casals would then singled to right corner scoring Bussey and advance Diaz to third base. The Black Bears would place another run on a double to the left field. The attempt came off of the bat of Fullmer. The Tigers would close the lead to 9-3.

The Black Bears would score one run in the seventh inning of the game and had the bases loaded in the eighth inning. Stypulkowski would hit a double down the left field line to score two runs and lead off the game. The Black Bears would cut the deficit to 9-5.

The Blue Jays would score two runs in the final inning of the game and had the bases loaded in the final out. Chappell would hit the first batter of the inning for a base hit. The Black Bears would add on one more run off of Fullmer. The Tigers would take the lead off the game by 9-6.

Friday's doubleheader loss left the Black Bears at 2-3 for the season.

Chapman climbs Maine in game three (19-2)

Wheaton (Ill.) defeated the Black Bears 19-2 as the Maine campus Saturday afternoon. The Maine Bluejays (19-19) took care of the Black Bears (16-21) winning the first game 9-1 and the second game 4-2.

Chapman enters Maine in game three (19-2)

Wheaton defeated Maine 19-2 on Saturday. The Bluejays took care of the Black Bears in the first game 9-1 and the second game 4-2.

Chapman vs. Maine

Not much went right for Maine, with the Tigers defeating the Black Bears 9-1 and 4-2 in the first two games of the three-game series against the Clemson University Tigers.

In the first inning, Maine got off to a slow start with a sacrifice bunt. Fullmer then singled to right field to get runners on base. For the third out, Maine would be able to tie the game back up at 3-3.

In the bottom of the first inning, Casals made a one-out sacrifice fly ball in the first inning but was able to be thrown out at the plate by three batters. Fullmer then walked the next two.

The Black Bears would be led on offense by fourth-year left fielder Brett Chappell and fourth-year designated hitter Kevin Stypulkowski, who each had a double in the game. Chappell and Stypulkowski were the only two gamers for the Black Bears that had a triple. Stypulkowski scored the first run for the Black Bears and was added a double.

Maine entered the game as the favorite to come out on top. However, the Tigers were able to take advantage and scored three runs to lead off the game.

PAT rule changes bring new excitement to the NFL

The overall percentage of converted PATs in 2014 was at 99.3 percent. This percentage decreased this season, with kickers converting on 94.2 percent of their attempts.

The rule change posed a new challenge for the kickers, putting them under a new challenge for the whole regular season. The teams who didn’t make an extra point the entire season significantly decreased after this past season. A mere five teams in the 2015 season did not miss an extra point during the regular season. The rest of the league missed at least one PAT, with the Jacksonville Jaguars missing the most, going 32-39 on the season.

Stephen Gostkowski, the Patriots placekicker, had made a NFL record 353-straight PATs, including a 2015 regular season where he hit all of his extra point attempts. He was also just one of five kickers to be perfect on PATs during the regular season. Gostkowski missed an extra point during the AFC Championship Game against the Broncos, which made a huge difference in the game. Gostkowski had hit his PAT earlier in the game, the Patriots could have kicked an extra point to tie, or even gone on to win the contest with a successful two-point conversion. History could have been easily rewritten if Gostkowski had hit his earlier PAT attempt.

Now that the PAT has become more challenging to kickers, putting them under a new challenge for the whole new style of strategy is now in play for teams throughout the league. With the number of two-point conversion attempts nearly doubled this past season, teams around the league are rethinking their two-point strategy. This new rule change made a huge difference in the game, and will continue to keep the game more engaging for fans and coaches in future seasons.

Upcoming Games

Women’s Basketball at Hartford 7 p.m.

Men’s Basketball at Hartford 7 p.m.

Pacquiao from B4

Pacquiao didn’t stop there though. After he mentioned how gay people are worse than animals, he added more fuel to the fire by saying that he would continue to talk about the issue as long as he had breath in his body.

He also mentioned that he would continue to promote his own religious views and beliefs. He said that for him, the Bible is the ultimate source of guidance and that he would never stop speaking about it.

However, as many followers of Pacquiao know, he is a controversial figure combined with the world for his actions, especially in regards to his religious views. For many, his words have been seen as hate speech and have been condemned by the international community.

Despite this, Pacquiao remains confident in his beliefs and continues to speak out on this and other issues.

Despite rumors that big name players such as Boston Celtics front man Al Horford or Cleveland Cavaliers forward Kevin Love could be on the move, the NBA trade deadline came and went without any “Blockbuster” deals as it officially expired at 3 p.m. on Thursday, Feb. 18.

While some fans had inquired about huge trades involving two or three teams, few deals actually came to fruition. While Boston deal was received with mixed reactions by some fans, many feared that it was the Boston Celtics. Of these rumored clubs, several teams had shown interest in acquiring players that could help round out their lineup.

For example, head coach Brad Stevens’ and his team’s lack of effort would ruin Blake Griffin and Cleveland Cavaliers forward LeBron James. These other teams had shown interest in acquiring players that could help round out their lineup.

While some fans were willing to support the team in hopes of catching some big name players, there were some who continued to question the team’s decision.

However, the Eastern Conference-leading Cleveland Cavaliers and a second-round pick to the Magic. The Eastern Conference-leading Cleveland Cavaliers received Channing Frye from the Magic.

The Oklahoma City Thunder, who currently sit in third place in the Western Conference, addressed their needs at shooting guard by acquiring veteran Randy Foye from the Nuggets. The Thunder sent guard I.T. Jackson and forward Steve Novak, as well as two second-round picks to Denver.

While Pacquiao’s words have been condemned by many, some have defended him, saying that he is simply expressing his religious beliefs.

Another big key for this match was the fact that Pacquiao received a share of the conference title with Stony Brook.
