The Mahaney Dome is standing once again, Orono.

LePage wrote a letter explaining that if they held off at least one year from raising tuition, he would be submitting a request for additional funding to avoid the increase. “Maine is the only state in the country to reduce the inflation-adjusted amount for a four-year public education over the past five years,” LePage wrote in his letter, “and much of the credit for that accomplishment is due to the system’s five-year tuition freeze.”

In his offer, LePage stressed the importance of continuing UM’s push toward one University, an effort to reduce overhead, raise student aid, increase cooperation and reduce duplication across the system at this time.

Umaine Dome re-inflated, but out of service

The collapse was due to a 51-foot cavity on the south side of the dome. Larry Mahaney, a longtime benefactor of UMaine athletics, was considering a freeze for the past 19 hours in the interest of meta-

The Legislature’s Edu- cation Committee an- nounced Thursday that it had signed off on a sup- plemental budget propos- al for the University of Maine system for the cur- rent 2016-2017 academic year. This proposal would halve a possible tuition in- crease for students and provide funding for other programs. Under the agreement, Governor LePage agreed to provide an additional $7 million to the system. This includes $4.65 million to tuition, $2 million to early childhood programs for high school students taking col- lege courses and $1.5 million to pre- low-grades programs to increase college access. The agreement was first offered in March of 2016 by LePage, hoping to freeze tu- ition and earmark funds for early childhood programs and scholarship. At the time, many states were reducing allocations to their public colleges and universities, forcing tuition increases. The University of Maine system has had a tuition freeze for the past six years in exchange for a stable state funding, com- pared to an average 13 per- cent increase in tuition at public universities nation- wide over the same period of time. Along the way, the trustees have had to make major cuts to programs and staff to cut costs. “It’s not Christmas, but it’s a step in the right direction,” Trustee Carl Turner said in a phone interview with the Portland Press Herald.

In the proposal offered in March of 2016, the Board of Trustees had con- sidered raising the tuition. LePage wrote a letter explaining that if they held off at least one year from raising tuition, he would be submitting a request for additional funding to avoid the increase. “Maine is the only state in the country to reduce the inflation-adjusted amount for a four-year public education over the past five years,” LePage wrote in his letter, “and much of the credit for that accomplishment is due to the system’s five-year tuition freeze.”

In his offer, LePage stressed the importance of continuing UM’s push toward one University, an effort to reduce overhead, raise student aid, increase cooperation and reduce duplication across the system at this time.

The dome collapsed in January 2007, under similar circumstances. At that time, there was a 20- to 30-foot tear and it was non-functional for two weeks. LePage noted that there is insurance on the dome and in preparation for big storms. UMaine also has contingency plans in place for their programs if the dome is out of service long-term. Both teams will use the Mitchell Baring Pavilion and other campus facilities while consider- ing off-campus options like Shaggers Baseball and Softball Training Facility in Brewer.

According to the Bangor Daily News, Terre Armee CEO Roger Bloomingdale was enthusiastic about the partnership. “Adding the composite arch bridge system to our portfolio is an exciting development that will fuel the growth of both Terre Armee and AIT [Advanced Infrastructure Technologies] in the coming years.”

According to CEO of AIT Brett Svedula, “This exclusive partnership with TA [Terre Armee] will enhance our presence in the U.S. and Canada by leveraging our long-term and extensive market knowledge and sales expertise.”
LePage from A1

LePage nominates three for UMaine’s Board of Trustees

On Tuesday, Jan. 17, Gover- nor LePage announced his nominations for the newest members of the Univer- sity of Maine Board of Trustees. These nominations included Deputy Attorney General Lisa Marchese and financial ad- viser Kelly Martin from Presque Isle.

Marchese is a University of Maine graduate and currently serves as the criminal division chief at the Maine Attorney General’s (AG) Office. She is a longtime homicide prosecutor in the state of Maine, has chaired the Domestic Violence Homicide Review Panel and currently serves on the AG’s homicide referral working group. Her continued work with the community has been honored by the Maine State Bar Association and Maine Child Abuse Action Network. Included in LePage’s nom- inations was financial adviser Kelly Martin from Presque Isle, who has been serving on the board of trustees since 2011. Martin is an element of the University of Maine in Orono.

All three nominations must submit to a public hearing be- fore the Legislature’s Educations Committee and receive final confirmation by the Maine Senate.

The board of trustees typ- ically has 16 members, in- cluding the commissioner of education and an additional 15 members who are appointed for five-year terms by LePage and approved by the Maine Legislature. Members can be reappointed once. A student member may serve a single two-year term.

According to the Board of Trustees’ website, the University of Maine website, members include Commis- sioner of Education Robert E. Hasson, who began his term on Dec. 8, 2016; Samuel W. Col- lin (March 24-2018, May 26, 2020); Jason E. Coombs (May 12, 2016- April 20, 2018); James O. Donnelly (Sept. 30, 2014- May 26, 2019); James R. Erwin (Apr. 6, 2012- May 26, 2017); Norman L. Fourni- er (Sept. 26, 2007- May 26, 2018); Mark R. Gardner (Sept. 12, 2015- May 26, 2017); M. Michelle Hood (March 30, 2016- May 26, 2020); Grapo- ry G. Johnson (May 11, 2011- May 26, 2020); Kevin P. Mc- Cann (April 7, 2009- May 26, 2018); Sharon H. Moody (April 14, 2014- May 26, 2018); and Theresa A. Santon (May 5, 2016- May 26, 2020). The University of Maine currently has three representa- tives from the Orono campus. These include Professor Patti Milos, a lecturer in the Busi- ness College, Samuel Roter, an undergraduate student, and Kimberly Miner, a graduate student representative at the university.

The Maine Campus

Structures and Compos- tible to corrosion. Typical- ly have a lifespan of 100 years and are easy to construct. While the Advanced Infastructure Technologies in-a-Backpack uses inflat- able arch structures that can be transported to site in bags resembling bouncy play-doughs. Once on site, the arches are inflated and in- flated with air, forming a lightweight hollow arch. The arches are filled with concrete and used to sup- port the rest of the bridge. This construction method doesn’t require as much heavy equipment, uses fewer people and takes significantly less time and money than a traditional bridge construction pro- ject. These arches usual- ly have a lifespan of 100 years and are easy to construct. Typical- ly the process take two to three weeks to complete.

UMaine’s Advanced Structures and Compos- tibles Center, led by Habib Dagher, began developing technologies for the pro- gram in 2010 — and spent upwards of ten years test- ing it. In 2010, it went to market through Advanced Infrastructure Technologies. Since 2010, the com- pany has sold and complet- ed 20 bridges in the United States, 15 in Maine, three in Michigan, two each in Pennsylvania and Massa- chusetts and one each in New Hampshire and Ver- mont. They have also sold two internationally, one in Trinidad and one in Tobu- go. Several other projects are in the works.

The small staff of ten people within the center has spent ten years gaining various approvals from federal and individu- al state governments need- ed to allow the construc- tion of its composite structures. With the new partnership, the role of marketing and selling the bridges will be passed to Terre Armee, while the Advanced In- frastructure Technologies will continue to handle the engineering aspect of the projects.

The University of Maine has an equal opportunity/affirmative action institution.
In February 2014, the University of Maine athletics department hired Karin Creech, the former University of North Carolina Senior Associate Director of Athletics from 2012 to 2014. He served as Chief of Staff, overseeing the department’s capital projects, human resources and facilities. He was hired as an at-will employee under a letter of appointment for Orono, meaning the university could let him go at any time.

Last week, Creech signed a four-year contract with the university’s athletics department, keeping him in Orono until 2021. The contract will take effect on Feb. 10. With the new contract, both Creech and the university are given more responsibility. If Creech decides to leave the department, he has to pay a buyout of $100,000 in years one and two, and $50,000 beyond year three and nothing in year four. If he is fired without cause, UMaine would have to pay his one-year salary.

At this point in time, Creech is receiving $183,855 a year from the university. However, private donations will provide $25,000 in annual supplements over the next four years to bring him into a “nationally competitive” range.

“I am grateful for the opportunity to continue leading Maine athletics,” Creech said in a university press release. “My time at Maine has been one of the best of my career. Thank you to President Hunter and University of Maine for entrusting me with this responsibility. I look forward to working with our great team of student-athletes, coaches and staff in the coming years as we pursue excellence.”

In Creech’s time at the university, he has seen many successes both inside and outside of the athletic arena, including a 2016 America East Conference title for the softball team, back-to-back regular-season championships and Women’s National Invitation Tournament appearances for women’s basketball.

Under Creech, the university has also seen an increase in student-athlete’s success. Since he arrived in 2013, the university has also hired long-time UMaine football coach Joe Cosgrove and former softball coach Lynn Coutts as senior associate directors of athletics, while promoting Haydnmy to the head coach position for football and Mike Harasymiak to the head coach for softball.

Creech has also hired long-time Maine hockey coach Dave Smith to head coach for hockey and Mike Harasymiak to the head coach for football.

An endowment to support Men’s Ice Hockey has also been established under Creech. UMaine has seen a 20 percent increase in annual giving to the athletics department, including more than $1.5M raised for the locker endowment.

“Karin’s outstanding leadership of UMaine athletics has beneﬁted the university, the state and Black Bear fans near and far,” UMaine President Susan Hunter said in a statement. “He is a thought leader, teacher and mentor with a vision for Maine’s only Division I athletic program. We look forward to supporting Men’s Ice Hockey and gramm. He came to UMaine with a strong record of athletics leadership, management and fundraising and has effectively used those talents in the last three years to advance Maine Athletics. This academic year, Karin launched a new strategic vision for UMaine Athletics. We look forward to this next chapter in the history of Black Bear Nation.”

The strategic plan includes five known areas of focus for Maine — Maine’s team, academic achievement, innovative leadership, new resources and expectation of excellence. Creech, a native of Chapel Hill, North Carolina, received a bachelor’s degree in political science from North Carolina State University. He attended Liberty University in Lynchburg, Virginia to obtain his master’s degree in management and leadership. He and his wife, Shae, live in Bangor.
Weekly Updates

This Week in Student Government

Weekly recap of decisions made by the UMaine Student Government General Student Senate

General Good and Welfare

Senator Erin Daugherty was appointed. Abdal Zaenat was observed as a potential senator.

Club Presentations

The Athletic Training Student Organization presented on their EAA Conference in Philadelphia from Jan. 6 to Jan. 9. The intramural Volleyball Team presented on their tournaments on Nov. 12, 2016 and Dec. 10, 2016.

Executive Reports

President Kevin Bois reported that he is currently working on enhancing the student government website. He plans to add a new feature for the clubs and organizations page to add either a photo or logo to represent them, as well as the time they meet the officers and some brief information on the student organization. He is also currently working on planning the spring concert for Maine day. “Something that is really high on my list is making sure that our student body gets some good entertainment.” Bois reported.

Vice President Jared Dumas reported that he was able to attend the Frozen Fenway hockey game over winter break and was pleased to see how many student supporters there were for the hockey team.

Vice President for Student Organizations Jacob Johnson reported that he would like to get senators together for the Organizations Fair on Wednesday, Jan. 25. The event will be held from 10 a.m. to 1 p.m. in the Memorial Union. Johnson reported, “What I’m asking from you guys, is what I did last organization’s fair; I talked to all of the student organizations, talked about student government and what we do. It was a really good impact, something good to do. For a lot of them that was the only contact that they’ve ever had with student government even though they are a student organization. If you would like to go with me and talk to all of the organizations you are welcome to.”

New Business

A motion to allocate $2,000 for an ice rink project was passed.
Bus crash in Italy leaves more than a dozen dead

A bus returning from a school trip hit a bridge pylon in northern Italy on Saturday, leaving 16 people dead and 39 injured. The bus was returning to Budapest, Hungary, from a mountain resort in France, carrying 55 people — mostly school boys between the ages of 14 and 18.

Upon impact with the bridge, the bus immediately went up in flames. Some students were thrown out of the bus and others were trapped inside.

A number of students were reportedly saved by a sports teacher on the bus, who, after being thrown out, returned to the middle of the fire to drag them out. He suffered numerous burns as a result.

Firefighters reported to the scene immediately and remained through the night. Authorities are currently investigating the cause of the incident.

Avalanche in Italy traps numerous patrons inside hotel

Two days after a deadly avalanche swallowed a hotel trapping multiple people inside, crews of rescue teams were able to pull people out from the site. Rescuers had to drill holes through the roof of the destroyed Hotel Rigopiano after they heard survivors calling from underneath the collapsed debris.

Survivors called out “Angels! Angels!” when the rescuers first broke through. In a very emotional scene, bystanders yelled “Bravo!” as children were extracted. Rescue crews found ten people in the wrecked age of the hotel, five of whom had been rescued, and five who were waiting to be extricated, according to the Italian Civil Protection Agency. Four of the ten people were rescued were children. All survivors showed signs of hypothermia, but none suffered life-threatening injuries. Two were confirmed dead.

32 dead after Hirano Express train derailment in India

32 were killed and 50 injured after an overnight passenger train derailed in southern India on Saturday. Seven cars of the train were thrown off the tracks, some landing on a parallel track, a result of not gauging by his attorney an arrangement Friday. Guzman is accused of running one of the world’s largest drug trafficking organizations and escaping prison on several occasions. He is described by officials as “the most notorious criminal of modern time” and was not handcuffed at his court appearance Friday.

According to a CNN article, U.S. Attorney Robert Capers of the Eastern District of New York addressed reporters before the arraignment by asking, “Who is Chapo Guzman? In short, he is a man who has known no other life than one of crime, violence, death and destruction.”

His charges included the operation of a continuing criminal enterprise, conspiring to murder rivals, firearms violations and money laundering. His next court appearance is scheduled for Feb. 3.
The success of President Donald Trump may appear to signal the beginning of a new world order stretching his country, labeling a self-admitted murderer of three criminals who is waging a new world order stretching his country, labeling a self-admitted murderer of three criminals who is waging...
White House website changes reflect Trump's conservative priorities

ObamaCare from A6

going to the doctor early and taking care of issues before they become more serious and more expensive to treat. This also causes confusion.

When the government steps in, it can leverage its economic power over the health care system. If we do not act now, we will be insuring everyone and make medicine and perhaps people to get treated sooner. We can save more lives with prescription drugs and companies can achieve cheaper drugs. That is also known as the Affordable Care Act. This comes as a surprise for many, as avoiding the existing health care system was one of Trump's biggest claims on the campaign trail. On the official Donald Trump's website, Trump's plan for healthcare will rely on an open market system. When we will see this plan on the White House page, no one knows. There's also a question on whether Trump will follow his proposed plan at all or try something new.

As for climate change, Trump infamously wrote a tweet on Nov. 6, 2017 that stated: "The concept of global warming was created by and for the Chinese in order to make U.S. manufacturing non-competitive." More recently in 2014, Trump was reported “showing in Texas and Louisiana, record setting freezing temperatures throughout the country and beyond. Global warming is an enormous lie.” As the presence of cold weather proves that the climate is not changing, the same way the presence of footprints means training. The concept of global warming has been created for the benefit of China and for the Chinese. We're going to follow his proposed plan at all or try something new.

For the health care system, there are many different options. Americans purchase private health care. This is the insurance of everyone and make health care more affordable. It will help businesses. Instead of being forced to buy insurance for your employer, you may get a pay raise or a tax cut. To make the health care system more affordable, it is important for the bill to become cheaper.

We are now an ever-increasing number of people wanting our new president to fail in his endeavors. We have seen, Trump changed his mind. He's willing to support Mike Pence as his vice president to Ballotpedia, Trump his mind. He's willing to support Pence as his vice president to Ballotpedia.

He stated, 'I think I'm evolving,' so his mind. He's willing to support Pence as his vice president to Ballotpedia. He stated: "The concept of global warming was created by and for the Chinese in order to make U.S. manufacturing non-competitive." More recently in 2014, Trump was reported “showing in Texas and Louisiana, record setting freezing temperatures throughout the country and beyond. Global warming is an enormous lie.” As the presence of cold weather proves that the climate is not changing, the same way the presence of footprints means training. Black Bear Abroad: Welcome to Chile

Santiago, Chile features a variety of different climates for travelers to explore.

Contributor
Jordan Houdeshell

Santiago, Chile

March 23, 2017

Santiago is a city of about half million people in the middle of Chile. The city is surrounded by mountains, creating a basin that houses that city. Because it is south of the equator, the seasons are reversed, which means when I departed on January 3, I left Maine’s winter wonderland and on January 5, I landed in a tropical paradise. Like much of the United States, Santiago gets cooler at night, reaching it’s peak temperature around four or five in the afternoon, then cooling down overnight. There is also not as much humidity in Santiago, so even though it is 90 degrees during the day, you are not usually coated in a layer of sweat.

Santiago is a city of about seven million people in the middle of Chile. The city is surrounded by mountains, creating a basin that houses the city. In the winter this creates issues with snow, but since the summer is right on time, the worst of the snow is a distant concern.

If you were to travel for an hour or so you would be at the beach, the desert or the mountains, giving the city an appeal for people who want to experience a variety of climates. Most students have the opportunity to experience all these during their time here and I look forward to these opportunities.

As a metropolitan city, it is also home to an extensive public transportation system, including buses and metros. In the winter this creates issues with snow, but for many, including myself, not usually a part of daily life, this was a bit of a surprise to me. Being from Connecticut, I am familiar with New York’s subway system and when I arrived in Santiago, I was terrified with the thought of having to figure out a system completely opposite to me. Luckily for me, Santiago’s metro system is the easiest system I have ever encountered. After only having taken public transportation in the United States, it seemed a bit of an adjustment, but for many, including myself, not usually a part of their daily routine, the metro system is the easiest way to navigate the city, that was another adjustment to these opportunities.

Santiago has super busy roads, which at much hour you are a scary sight. As a larger city, it is also home to an extensive public transportation system, including buses and metros. Coming from Orono, Maine, where public transportation is available at your fingertips, but for many, including myself, not usually a part of their daily routine, the metro system is the easiest system I have ever encountered. After only having taken public transportation in the United States, it seemed a bit of an adjustment, but for many, including myself, not usually a part of their daily routine, the metro system is the easiest system I have ever encountered.

As a metropolitan city, it is also home to an extensive public transportation system, which is much different from my usual experience. Having your own car is great, by day but at night it is just a normal sound that helps me fall asleep at night.

Finishing up my first week here in Santiago has been an adventure. Having to get used to a new language and a new culture all at once is a bit of an adjustment, but in a place like this, it is completely worth attending to.

The University of Maine Museum of Art (UMMA) is holding in this spring semester with an array of community outreach and volunteer opportunities and events can be found on their website.
The Emera Astronomy Center has a history of engaging events and programs that cater to diverse interests. Founded in 2009, the center has supported various activities and initiatives aimed at increasing public awareness about the universe and promoting global health. Its mission is to foster a sense of wonder and discovery among students and the wider community.

**Partners for World Health**

Partners for World Health, in collaboration with the Emera Astronomy Center, aims to bring together students and professionals from diverse fields to work towards creating a better future. This partnership has led to several successful events and projects, including the annual 5K run to support a mission trip to Senegal.

**Spring semester is upon us**, bringing with it the appeal of engaging events, seminars, and workshops. The center offers a range of programs specifically designed for UMaine students, making it an ideal place to connect with like-minded individuals and explore new opportunities. Whether you’re a seasoned stargazer or a curious newcomer, there’s something for everyone at the Emera Astronomy Center! For more information, visit [UMaine.edu](http://UMaine.edu).

Review

**Nettles release "Vessels," end transmission.**

**By Nathaniel Trask**

**Editor**

Ryan Goings and Nathaniel Trask discuss their roles in "Crazy, Stupid, Love." A film for those in love, it is being called the best movie of 2016. "La La Land," which stars Ryan Gosling from director Damien Chazelle, is a romantic musical filled with upbeat numbers that will keep you dancing all night long. Not only does it have a cold snap that radiates throughout, but it also leads analysts down a winding path of <br>From the image, it appears that the text is discussing the release of a new album by the band Starset, titled "Transmission," which is described as a space opera and features songs of various lengths. The album is composed of 15 songs and was released in July of 2014. Now, their first offering — was originally released back in 2013 and is titled "Red." "Transmission" is the band's second album, and it features a more polished sound compared to their debut. The album's sound is described as a mix of electronic rock, alt-rock, and alternative rock and is composed of genres: electronic rock, alt-rock, and alternative rock. The album's title track, "Transmission," is a space rock song that features a mix of electronic and acoustic instruments, creating a captivating and unique sound. The album's release was accompanied by the release of the music video for the lead single, "Last to Leave," which features a dramatic and visually stunning storyline. The band's music is accompanied by the choreography of Maxon Hurwitz, who has previously worked with other artists such as "Vessels" (who Twitter bios note: "I'm not the singer"). To put it quite simply, Hollywood has not made a film of this caliber in a long time. "La La Land" blends so many different filmmaking elements together to make it truly magnificent. It's3

"La La Land" enters the box office in a case where that happens, but honestly that effect is something that standards people go through to make a name for themselves in what's ever their desired career may be. For Chazelle, who wrote and directed the film, it is obvious that the story takes on a personal tone for him — and in a case where that happens, a film can become much more dynamic than anything you could ever imagine. It's a nice thing to see that musicals are highly anticipated among viewers. This might be because it simply stands out among all the long list of romantic dramas, comedies or classic romantic films, which are going on the market, for the industry. Nevertheless, if a flick such as "LA Love" received the amount of widespread acclaim from critics as it did — and it's still a musical — that's good news for the genre. It goes without saying that "La La Land" is the best musical film to grace the cinematic screen since "Los Misérables." It's very funny and dramatic and leaves you wishing life as it is in the movies. Although we had to wait until the end of 2016 to see "La La Land" at the box office, it made its debut. The film's success is attributed to the chemistry of the cast and the personal connection that Chazelle has with the characters. It's a wonderful film that is definitely worth seeing. The movie is a must-see for anyone who enjoys musicals, and it is a true masterpiece in the genre. The film's debut was met with critical acclaim and earned the director and his team numerous awards, including four Academy Awards. In conclusion, "La La Land" is a film that is sure to leave a lasting impact on audiences and critics alike. It is a testament to Chazelle's talent and ability as a filmmaker, and it is a film that will be remembered for years to come.

The University of New Hampshire’s (UNH) Wildcats’ (16-3) record remains perfect in conference play as the University of Maine (11-11) visited the Lundholm Gymnasium Thursday. First-year guard Blanco Millan led all Maine scorers with 15 points, the only Black Bear to reach a double-digit statistic. Millan’s efforts were not enough as her team fell to the Wildcats in a score of 46-40.

Maine kept it close throughout the entire game, but was never able to obtain a lead. UNH never fell by more than 10 and for the third quarter. Maine kept the game within six points. In the second half, Maine fell behind UNH’s stellar 81 shooting percentage, going 24-first half and finishing at 50 percent in the air. While Maine’s shooting performance was more accurate than UNH’s in the first half, their percentage in the second fell as they went 12-23 from the field. Eight of Millan’s points came in the second half as well as nine of fourth-year guard Sigi Koizar’s three. Both players were relatively quiet in the first quarter, which allowed UNH to take a four-point lead into the third quarter. Fourth-year forward Sheraton Jones was the centerpiece of Maine’s offensive in the first quarter, scoring five points and picking up three rebounds. All 11 of Millan’s production came in only seven minutes of play. Jones has tallied 22 points this season with a 29.8 shooting percentage. Koizar’s nine points were enough to move her up in rank in Maine’s all-time scoring leaders. She passed Liz Wood’s record of 1,468 career points to move into seventh place. Jones and Koizar will move past Emily Ellis who played for Maine between 1981-1985.

UNH had three double-digit scorers. Third-year forward Olivia Haley led the team with 14 points. Second-year guard Brita Laine and third-year center Katie Prager each had 10, 18 and 18 points respectively. Pogue and Laii both had the win in 2014, scoring 250 and 223 points respectively which is good enough for fourth and sixth place. Koizar currently holds the seventh place in Maine East this season with 233 points. The Black Bears were able to take a four-point lead into the third quarter. Fourth-year forward Shara Tate has the center of Maine’s offensive in the first quarter, scoring five points and picking up three rebounds. All 11 of Millan’s production came in only seven minutes of play. Jones has tallied 22 points this season with a 29.8 shooting percentage. Koizar’s nine points were enough to move her up in rank in Maine’s all-time scoring leaders. She passed Liz Wood’s record of 1,468 career points to move into seventh place. Jones and Koizar will move past Emily Ellis who played for Maine between 1981-1985.

UNH shot 38% from within the arc and 22% from beyond. Their numbers slightly edged Maine’s, Pogue’s percentages of .532 and .143 for the game. The Black Bears dominated Maine by a margin of 13. The game was UNH’s head coach Gary Hixson’s 500th career win in seven seasons with her team. Pogue made her 700th career point in the game, Maine turned 13-22 from the field, Maine’s shooting percentage in the second half, Maine made 11-for-18 from within the arc and 5-15 from the three. Maine’s team had 11 assists, while Maine’s team had 19 steals.

For Maine, third-year guard Bailey Tate had 11 points, fourth-year guard Rachel Jones had 11 points, second-year guard Sigi Koizar had 9 points. Millan led all Maine scorers with 15 points, the only Black Bear to reach a double-digit statistic. Millan’s efforts were not enough as her team fell to the Wildcats in a score of 46-40.

Men's hockey falters twice against BU

An early lead for the Black Bears (8-13-3, 2-9-2 HEA) was crushed halfway through the third period as the No. 3 Boston University (BU) Terriers (16-5-2, 9-2-2 HEA) capitalized on two of their seven total power plays. Maine could not climb back, falling in the contest 4-1. BU has only lost once since this season at home in the Agganis Arena.

The bulk of BU's scoring came late in the third period, scoring three goals with the first two coming as Maine was down a man. BU took their first lead a minute later off a three on two odd man rush. Fourth-year Nick Roberto raced into BU's offensive zone off a Bobo Carpenter pass and fed it across the crease to third-year Nikolas Olsson who tallied the game's final goal.

During the first 10 minutes of the opening period, each team hit a post, with one coming from Boston University and the other from Maine first-year forward Ryan Smith. Boston University was the first to score at 15:52, as Keller put one in after a rebounded shot from the point which Holway, who rung his post, with one coming from Maine's Krzysztof Vesey. Maine's fifth leading scorer with seven goals and eight assists. The 1-0 score remained for nearly 20 minutes of game time when BU's first-year Clayton Keller tied the game at one. Maine's crux was a lack of offensive chances. Maine only managed to accrue 13 shots on first-year Jake Oettinger.

Throughout the season, Maine has been regularly outshot on average of 33 to 29. Maine's seven penalties didn't help the cause either as BU scored two times on the power play, ultimately costing them the game. BU's consistent offense was enough to pick up the two points and push their win streak to seven. Boston University currently rests in second place in the Hockey East, only behind Boston College.

Men's hockey falls to Boston University, 3-1

We have co-ed adult hockey leagues (A, B & C Levels). We offer several options: Half-Season, Pick & Choose Your Games & Full Season!

Frozen Friday Laser Light & Sound Show
Friday Nights From 7:30 - 9:00 PM

See Hockey on B5

Adult Co-Ed Learn to Skate & Play!

Required Equipment:
- Certified hockey helmet
- Full face protection (visor or 7/8 shield)
- Ice Hockey Gloves
- Ice Hockey Pants
- Shin Guards
- Protective Cup
- Hockey Skates
- Hockey Stick

Just $15!
Every Wednesday at 8:30 PM

This weekly co-ed clinic emphasizes learning and improving hockey skills in a fun and challenging environment. Focusing on skating techniques, stick handling, puck control, passing, shooting and proper positioning. Each session is designed for adult players with no experience to beginner and intermediate experience.

Men's hockey falters twice against BU
Bears kept it close and were in the first half. The Black only allowed Maine with their 9-2 lead and never to the Wildcats double-digit points and grabbed a game-Hampshire's third-year forward by the score of 74-63. New Hampshire's third-year forward for Bryant University. The Bulldogs 125-60, placing Bryant outran the Black Bulldogs 125-60, placing Bryant in third place with a time of 7.02 seconds.
The majority of teams have not moved, where the teams who have moved don’t mind making another change, including the Rams, Chargers and Raiders. What comes to be known is whether these relocations are good for the NFL and if the team’s fan bases are stabilized in the new city their team was in, or will in the near future.

The Chargers called San Diego home for 56 years in the city they’ll be playing in the near future. Coach Jeff Fisher, who has a new home, or will in the next couple seasons, as the organization made the decision that if not for a crazy play that occurred during the Divisional Round of the playoffs against the New England Patriots.

Late in the fourth quarter, it appeared that Raiders quarterback Charlie Woodson stripped ball back Tom Brady, giving the ball to the Indianapolis Colts, Carr suffered a gruesome broken fibula and was ruled out for the remainder of the game. The team was unable to win in the playoffs, getting taken out by the Cleveland Browns 27-14 in the Wild Card round.

It looks like Oakland will not have a football team in the next few seasons, as the organization filed relocation papers to move to Las Vegas. It is a process that will take several weeks, but if it approved, which seems likely, the team would play in Oakland for a couple seasons before moving by 2020.

With these recent moves of NFL teams relocating to another city, this may be the stepping-stone for other teams to decide if they want to move. There are actually 20 teams in the league who have never moved, six teams who moved once, two teams that moved twice (Chargers, Raiders), two teams that moved multiple times (Rams, Cardinals) and two teams that were part of the Cleveland Browns relocation community (Brown, Browns). The majority of teams have not moved, where the teams who have moved don’t mind making another change, including the Rams, Chargers and Raiders. What comes to be known is whether these relocations are good for the NFL and if the team’s fan bases are stabilized in the new city their team was in, or will in the next future.

**Hockey from B2**

**Second-year forward Josh Puthurkey** and **Greenway**. The lead increased to two goals for the Terriers and this was Harper’s eighth goal on the season.

“We hadn’t capitalized on our power play opportunities until that point, so it’s important that we took advantage when we could, and we did out of here with a win,” Boston University Head Coach David Quinn said.

Maine finished the period with 15 shot attempts and eight on goal, while Boston had 24 attempts and 15 on goal. McGovern made 12 saves and Oettinger made nine.

The Black Bears finally put one on the scoreboard at 6:18 of the third period, as **Brem Hutton** slotted the puck past Oettinger’s left shoulder on a power play to cut the deficit in half. This was Byrne’s 11th goal on the season.

“I definitely wasn’t expecting that to go in,” Byrne said. At 9:23, the Terriers took the two-goal lead right back as third-year defender **Benjamin Kelley** scored off deflection, assisted by **Keller**. This was Hickey’s fourth goal on the season.

Maine’s Holway with under two minutes remaining didn’t give the Black Bears a chance to climb back into the game, as they fell 3-0.

This was the largest margin of defeat in any game this season for the Black Bears, who fall 3-10-6-1 in the season and 4-12-1 in Hockey East. Maine is eighth. Maine’s 51 goals in conference play is the fewest of any team in the conference. Maine is also tied with Merrimack for the fewest number of wins in conference play (4).

Maine took the lead back as third-year defender **Taylor** for her second career goal. Just like that, it was 2-0 after two periods of play.

After third-year defender **Amy Schlagel** put New Hampshire up 1-0, Maine’s first-year forward **Kam Walker** was able to break through for an unassisted goal. Walker stole the puck in the neutral zone, beat a defender and placed the puck right inside the posts to make it 3-0 less than five minutes to play.

After putting first goal on goal. McGovern made eight.

While Boston University made nine saves on 19 shots. Northeastern Saturday, Jan. 28 at 7 p.m. at Alfond Arena.

Maine won two in their remaining seven games to match last year’s win total of 10. It was the largest margin of defeat in any game this season for the Black Bears, who fall 3-10-6-1 in the season and 4-12-1 in Hockey East. Maine is eighth. Maine’s 51 goals in conference play is the fewest of any team in the conference. Maine is also tied with Merrimack for the fewest number of wins in conference play (4).
