The parade will then travel top area down Long Road, will then move from the Hill-Emera Astronomy Center and will last until 10:00 a.m.

Ian Liggett, Staff

On Monday, April 10, Jay Leach, the associate head coach of the UMaine men's hockey team, resigned from his position. Leach has been coaching collegiate hockey for over twenty-four years.

"Every thing changes," said Leach, the head coach of the men’s hockey team, said. "I am delighted that he will have time to spend with family and friends. The demands of coaching in college haven’t been easy."

Leach has had decades of experience in coaching. "He is a terrific coach," Gendron began, "he helped recruit and coach some of the teams that really put Maine hockey on the map at Division I level in the last thirty years."

Leach’s coaching career began in 1983, as an asso- ciate coach at Merrimack College. After a year, he became the head associate coach at UMaine, where he spent four years and helped bring the team to the NCAA Fi- nal Four in 1988, according to his profile on the UMaine Athletics site. "I’m surprised," Eric Schurhamer, a fourth-year on the hockey team, said. "I had always thought that he would stick around a little while longer. At the same time, he has been coaching for so long. He has given this game and the program so much."

"It is sad to see a coach step down and retire. He will be missed, he will be well-liked and respected," Coach Leach was great to me over my four years. He’s been around the game forever and has so much knowl- edge and experience,” Blaine Byrom, another fourth-year on the team, said. Leach will be missed by many, including Gendron. The two have been working together for over thirty years. "We go way back," Gendron said. "He has a great relationship with the players, and he is a tremendous recruiter and a tremendous teacher. He makes everybody that he comes in contact with feel good, and he has done a great job as a coach."

In terms of the future, Gendron remains sceptical. "In the long run, the team’s goal is to make it to championships. We have some terrific play- ers in the program," he said. "And another class coming in that will be outstanding. I am very excited about the talent level and the future." Leach will be remem- bered for being dedicated and devoted to his players. "I can remember a skill session where me and Coach Leach stayed out on the ice for twenty minutes after we did and just talked about the ins and outs of hockey, while he shared his endless knowl- edge of the game with me," Schurhamer said. From all we can do is hope for the best," Byrom said. "I feel very fortunate and happy to have spent four years with a great coach. He (Leach) was a great influence on me."

While there has been no any official comment made regarding who will be re- placing Coach Leach, many speculate that Mike Hilie, the volunteer graduate assistant coach, will fill the position. Michael has been coaching the team since March 2016.

This Week in Politics: Afghanistan, Korea, Trump, and LePage

Jack Barbier

Afghanistan

On April 13, the U.S. dropped an 11,000-lb Mil- itary Ordinance Air Blast Bomb (MOAB), the biggest nucl ear bomb in the U.S. arsenal. The target was a canyon in the Nangarhar province of Afghanistan that the U.S. said was being used by ISIS fighters. Afghan troops on the ground said no civilians was tional. It was the first time the U.S. has used such a bomb.

Korea

The North Korean Foreign Ministry announced on April 13 that the U.S. had agreed to hold a new, but unspecified, “dialogue.” The announcement was made on the same day that North Korea launched a ballistic missile that flew over Japan before falling into the sea of Japan.

Maine Day is important to the U.S. military, according to the Secretary of Homeland Security. “Maine Day always brings to- day’s students. The mission of Maine Day is to give back to the campus. It’s a service day,” Morin said. “It’s a great way to relax before the stress- ing this meal pack out, as it is to give back to the campus. It’s a service day,” Morin said. “It’s a great way to relax before the stress- ing this meal pack out, as it is to give back to the campus. Students and Orono residents gathered on the Science site and stated, “The March for Science’s party,” UMaine’s March for Science executive director, was one of the organizers of the event.

“The goal of the March for Science is to encourage people to support STEM, especially women who are involved in STEM, research and science related activities,” said Executive Director of the Maine STEM Council, Dr. Tom Keller, Executive Director of the Maine STEM Council.

The plan suggests science related activities, such as Sunday’s podcast “Science Friday,” and other events such as “Make America Smart Again” and other signs, again poking fun at the current administration. The plan suggests science related activities, such as Sunday’s podcast “Science Friday,” and other events such as “Make America Smart Again” and other signs, again poking fun at the current administration.

It took a couple of months before the bar became popular, but it picked up pretty much every week of the week and weekend at some point in the evening,” Ryan Regis, a third-year business student, said. “I’ve been a delivery driver for a year and a half. I also take phone orders, stretch dough, make sauce, shredded cheese, sauce and dough. We do delivery and clean. Regis added.

OHOP is located at 154 Park St., in Orono. It is open Monday through Wednesday 4 p.m. to 2 a.m., Thursday 4 p.m. to 2 a.m., Friday and Saturday from 11 a.m. to 2 a.m. and Sunday from 11 a.m. to 2 a.m. They offer pick-up and delivery services during these hours.

Specials for OHOP include Monday night’s $2 pizza special, where you order one pizza at full price and get a second cheese pizza for free; Tuesday night’s $5 salads and Wednesday night’s $3.95 wraps. Bar specials include $5 rim bucks on Thursday nights and trivia Nights on Sundays. The bar also does special deals for sports games, such as $5 for 100 buckets of bar food during basketball games. On the weekends, $5 mimosas and free breakfast pizzas are offered from 11 a.m. to 4 p.m.

The bar features local performers including B. A.dash. Abdul and one of their very own pizza makers, Lee. OHOP workers receive benefits such as breaks and food while they work, as well as 50 percent off pickup orders when they are not working. Most employees work two to three nights a week, with shifts lasting five to nine hours. There are several bartenders on staff, with duties such as serving food and drinks and adhering to bar specials as well as intoxicated individuals. Bartenders have seen an increase in business since the end of August, as OHOP added bar specials to its nightly routine. With activities such as kick-the-keg and weekly trivia nights, students from all over the area are in attendance each night.

OHOP was recently added to Orono’s pub-crawl list. OHOP was declared the first location of the pub-crawl on Friday, April 21. From there, students took shuttles to other bars in Orono, including Marsh Island Brewing Company, the Bear Brew and the Raven.

OHOP is open most of the year while the University of Maine is in session. They are closed for several weeks during the summer when the owner, Kostas, travels to Greece with his wife and family.
Weekly Updates

This Week in Student Government

Weekly recap of decisions made by the UMaine Student Government General Student Senate

The UMaine Student Government is updating its website. Greek Week events will start on Friday at the Orono House of Pizza. Panhellenic Council is preparing for Whiffle for Wishes on Saturday, April 29. Move Your Pet’s on Sunday, April 23 and Trea- tors.

The Student Senate. The Student Senate granted $110 to cover costs for food and fliers requested $110 to cover costs for food and fliers, as well as transportation for the Maine Student Government Association’s Taste of Asia event at the Memorial Union on April 22; Hillel’s Holo- caust Remembrance Day meal packing will be held on May 5.

The Student Women’s Association: reported on their upcoming matches with Bowdoin and UNE, among others, as well as their plans to volunteer on Maine Day and Moving Maine Day.

The UMaine Tennis Club reported that the Dennis Davis and the budget meeting was cancelled, due to a personal matter. Legal Services has reviewed the contract with the Maine Day concert performers. Legal Services has reviewed the contract with the Maine Day concert performers.

The Military Arts Club reported that the Maine Student Chapter of the United Nations’ purpose for those un- derstanding the Bible.

The UMaine chapter of the Chi Alpha Christian Fellowship, an organiza- tion dedicated to outreach to all segments of the community, requested preliminary recog- nition. Their long-term goal is to “reach out to people who need help” and serve Christ in a way consistent with the Bible. Recognition granted.

The Martial Arts Club held its Spring Open at the Orono House of Pizza. The Macho Man Foundation was the main sponsor. The tournament was held at the University of Maine. Registration is due April 11.}

Buchan-answer for your crimes

8:30 a.m. UMPD responded to a call of damaged lights on the front lawn of Buchan- an Alumni House. The damage was done the previous night and costs are about $100. There are no suspects at this time. Anyone with information is encouraged to call (207) 581-4040.

April 13

Taking the “high” road

9:40 p.m. - University of Maine Police Department (UMPD) officers responded to a Resident Assistant (RA) call about an odor of marijuana on the fourth floor of Gamarni Hall. Upon arrival, officers knocked on the door and the sole occupant of the room, Miranda Rossig- nol, answered. She was very compliant and vol- unteering handed over a small bag of marijuana. She was summoned for possession of a small amount of marijuana.

A “sign” of the times

11:16 p.m. - UMPD officers responded to a criminal mischief complaint at Alfond Arena and the football field by a custodian. Two males, Jonathan Orchanian and Kevin Angelo, were found to be tearing a sign out of its frame by a custodian.

American citizen de- tained in North Korea

On Sunday, April 23, a United States citizen identified as Kim was detained while trying to leave North Korea. He was arrested at Pyong- yang International Air- port. This marks the third American that has been detained; one for spying and the other for hard labor for the stealing of pawns.

The United States has previously described as President Trump as a “dumb deal,” Vice Pres- ident Mike Pence has appealed to honor a deal made with Australia during the Obama Ad- ministration. According to CNN, the deal says that Australia will transfer 1,250 refugees currently “being held in offshore detention centers on the Pacific Island nation of Nauru and Papua New Guinea’s Manus Island to the United States.” Many of these citizens are from Iran. In return, Australia will take refugees from possession of Australia and El Salvador.

On February 2, Trump posted a tweet saying, “Do you believe me? The Obama Administration agreed to take thousands of illegal immigrants from Australia. Why? I will study this dumb deal!” Since that time, however, Trump and Pence have openly stated they would honor, but not admire, the agree- ment. Trump has also ex- pressed that the relation- ship between the United States and Australia is very important to him.

Paris police offi- cers shot, changing the course of the election

An attack on Paris police officers has left thousands of citizens unsure of how to par- ticipate in the election. One officer died after a gummis with a machine gun leap out of a car and opened fire in Paris’ Mont Jourma boulevard, Champs-Elysees during the presidential candi- dates final television de- bate,” according to CNN. At this time, the three cancelled their upcom- ing campaign events and made televised state- ments about the attacks. They vowed to crack down on security and ISIS in the future. ISIS claimed the attack was undertaken by one of its fighters. The assailant was later identified as 39-year-old Karim Cheurfi, a French national with a crimi- nal record. He was shot and killed so he tried to escape the scene. Pres- ident Trump claims a massive praising ISIS fell out of his briefcase as he tried to escape, as well as the ad- dresses of nearby police stations.

The World Health Organization estimates that 1 in 4 adults sleep less than six hours per night. Many people suffer from this lack of sleep, but few realize the extent of the problem. As a nation, Americans are spending more money on sleep than ever before. To combat this problem, a popular website called Sleep.org was launched in 2008 and furthers the cause. The website is a popular resource for people interested in learning more about sleep and improving their sleep habits. The website offers information on the importance of sleep, tips for improving sleep, and resources for finding help. It also features articles on the latest research in sleep and provides a forum for people to share their experiences and心得.

The website also features a section on the benefits of sleep, which highlights the importance of sleep for physical and mental health. It explains how lack of sleep can lead to a variety of health problems, including obesity, diabetes, and cardiovascular disease. It also discusses the impact of sleep on cognitive function, memory, and learning. The website also provides information on the role of sleep in emotional well-being, including its impact on mood, stress, and anxiety.

The website also offers resources for people who are interested in improving their sleep. It features a sleep diary, which allows users to track their sleep patterns over time. It also offers a sleep coach program, which provides personalized guidance and support for people who are looking to improve their sleep. The website also features a sleep library, which contains resources on a variety of topics related to sleep, including tips for falling asleep, staying asleep, and waking up refreshed.

The website is designed to be easy to use and navigate. It offers a variety of tools and resources to help people improve their sleep, and it is updated regularly with new information and resources. Whether you are interested in learning more about sleep or improving your own sleep habits, the website offers a wealth of information and resources to help you achieve your goals.

The website is also committed to promoting research and education in sleep. It features a research section, which highlights the latest research on sleep and its impact on health and well-being. It also features a section on professional resources, which provides information on how to become a sleep specialist and how to practice evidence-based medicine.

Overall, the website is a valuable resource for anyone interested in sleep and its impact on health and well-being. Whether you are a healthcare professional, a sleep researcher, or simply someone interested in improving their own sleep, the website provides a wealth of information and resources to help you achieve your goals.
Vocational school and college should both be a priority

Jonathan Petrie

When I scroll through my Facebook feed, I often see certain friends of mine—the men who are against tuition-free pub-
lic college—argue that instead of putting money towards the current higher-
education system, we should put money into vocational education. Although I think that public post-secondary education in America should be tu-
tion-free, I also agree that vocational education should be invested in as well.

Too many people treat the reformation of the post-secondary education system as a zero-sum game. Either you must be

lieve in the promotion of public tuition-free college at the expense of vocational education, or you should keep the current debt-seri-
tance that college currently in and promote vocational education. The truth is, we can have both and there are examples in the world that demonstrate this.

Vocational education is great because it trains people to be high skilled laborers. In manufacturing and other aspects of the economy, skilled la-
bors is in high demand. In Germany, public college is tuition-free. However, they have a very high rate of students going into voca-
tional education. In fact, the rate of students in Ger-
many that attend vocational education is roughly 41 percent. When people buy an iPh-
one, they often think the money is going to China, because that is where they are assembled. Contrary to this belief, only 3.6 per-
cent of the money spent on iPhones goes back to China. Germany actually gets a higher percentage—roughly 17 percent. Why is this? Germany has highly skilled workers that put to-
gether the components of a computer that are eventu-
ally assembled in countries like China. The workers are more important to the production because, with-
out them, the components would not be able to be made.

Vocational education is important for that reason. It teaches people important skills that are vital in the global economy. In addition, vocational school provides an opportu-
nity for people to explore trades and skills that they enjoy and that provide a greater sense of purpose and fulfillment. Many peo-
ple prefer to utilize their skills to craft things by hand and produce work that is tangible. This is a preference that is often forgotten in preparation for education after high school. We prioritize col-
lege for people who do not see themselves as a mem-
ber of these communities. Jobs in these fields are more than capable of mak-
ing a good living in today’s world. As a society, we should accept this reality and fund education insti-
tutions that enable people to become skilled in these fields.

The typical four-year education model makes sense for people that are learning liberal arts, busi-
ness, engineering, science and education. The pur-
pose of these positions is not necessarily the realm of tangibility—it rests in the larger purpose of pro-
viding community and ensuring living standards. Innovation, philoso-
phy and science. The pur-
pose of this outlook is not to craft work—it is to think and to direct non-tangible work, like ideas on how aspects of society should be operated.

There is a reason to sup-
port both of these educa-
tional models. In the U.S., if we want to be success-
ful, we need to create an environment where both are celebrated and enabled. This is not a zero-sum game. We should invest in all forms of education and get people to choose what truly fits their needs and desires. That is a more ideal post-secondary edu-
cational model. Everyone should pursue the field that brings them a greater sense of purpose and worth. Edu-
cation brings enrichment, but enrichment is different for everyone. In that case, investing in both voca-

tional school and universities ensures an educational system that prioritizes the needs of different people and makes us more com-
petitive in the global econ-
omy.

A Black Bear Abroad: Residents stay home for census

Jordan Houdeshell, Contributor

Although I have been abroad for almost four months, I am still experiencing new things here in Chile. This past week, I experienced two new things after returning from my last trip: my first national holiday (which was the taking of the census) and my first rainy day in Santiago.

During my time here, I was able to take advantage of the plethora of buses and flights that allow you to travel all over the region. I went to Valparaiso and Vina del Mar, Cajon del Maipo, Buenos Aires, Argentina, Torres del Paine, Chiloe and finally San Pedro de Atacama.

The Atacama desert is the driest non-polar desert in the world and is a popular destination for people in Chile, as well as worldwide. Going there, I didn’t know exactly what to expect. I have been to the Southwest of the United States and seen the deserts there, but I did not know if the Atacama would be like that. It had some similarities to the deserts in the Southwest, but it was also very unique. It has massive areas covered in salt, which look just like snow drifts sprinkled all over the desert. It has geysers and lakes that are some of the most beautiful I have ever seen. It is one of the many places that I have visited in Chile that was completely different of all the hype it receives. Although it was clearly a tourist destination, based on all the people trying to sell souvenirs and tours, it also had a small-town feel from the small houses that look to be made of stone or clay and the unpaved roads. It was an amazing place to be my last big adventure of my study abroad experience.

Although this was my last trip, I also had some significant firsts this week as well. The first was on Wednesday when Chile had their census. Unlike the U.S., where the census is done over time, the census in Chile was all done in one day for the entire country. The city—and the country as a whole—basically shut down for the day and people were not allowed to leave their houses until the census person had come to their house and recorded their responses. Although I am not a permanent citizen of the country, I was still counted in the census as an “extranjero” or foreigner. I was asked questions about how long I had been in Santiago, where I was from, what I was doing here and where my parents were from. Besides getting information about the people, the census also recorded information about the houses or buildings that they live in, including what they were made of. In one of my classes, we learned that the last census that Chile took was messed up and so this census is especially important for the country. Even the president took part in the census as a volunteer going house-to-house polling people.

The day after the census was another first for me in Santiago: a rainy day. There was one day when I was in another part of the country when it rained in Santiago, but for me this is the first time that I saw rain since I came here on Jan. 5. This is normal for Santiago and it was interesting to see how everyone here reacts to the rain.

For the most part, it was business as usual, with the one exception being the lack of people. On my metro and bus today, it seemed much emptier than normal and it all made sense when one of my teachers mentioned that here in Santiago people freak out when it rains. She said there are some people who don’t leave their house when it rains, saying that it is too cold and wet to go outside. This fear could also be seen in all the people on the streets selling umbrellas. Usually, there are tons of vendors selling food and fashion accessories and while some of them were still there, replaced by men and women selling umbrellas—ironically huddled under an umbrella—themselves.

While I am partaking in so many of my final experiences in the city, a huge part of studying abroad is continually experiencing new things. Although I am sure that I will have some more firsts mixed in with my lasts.
On Thursday, April 20, several hundred runners from across the state chose to spend their afternoon running the Healthy High 5K, 10K and 1-mile fun run rather than participating in more controversial activities going on elsewhere in the state.

The event is meant as a healthy alternative to the traditional festivities popular on college campuses as part of the 4/20 mythos. Participants lined up a little before 5 p.m., just right on the hour, the excited crowd before 5 p.m., but right on time was given the go-ahead to start the race.

Participants lined up a little before 5 p.m., but right on the hour, the excited crowd was given the go-ahead to cross the starting line.

The Healthy High is hosted every year to promote healthy physical activity. This year, the start time was 5 p.m. instead of the usual 4:20 p.m. due to scheduling conflicts. Originally, in addition to the race, a pre-race concert featuring the local group Ed Piana, The Cars and Phish were scheduled. This was canceled due to the poor weather conditions.

The race also supports a variety of different outreach efforts both local and national. Participants and supporters were encouraged to bring in new or lightly used sneakers and other shoes in order to donate them. The organization Soleis for Souls will send each pair they receive to people in need of foot-wear around the world. In addition to Soleis for Souls, proceeds also went to Black Bears for Recovery, LiveWell Wellness Coaching, and the Black Bear Exchange (the on-campus food pantry and clothing exchange).

Runners came for a variety of their own reasons as well. A group of at least 30 people represented each team in Mile in Her Shoes, a cause that stands against the rape and abuse of women. Not only did they come prepared with signs and balloons, but several male participants also literally walked a mile in women’s shoes—bright red high heels to be exact. Many participants commented on this impressive, with the participants in the heels struggling toward the finish line for much of the race.

Other people had their own reasons for taking part in the race. “I registered two hours ago,” English student Grace Marshall said. “I didn’t do it last year, but I did it the year before and I liked it a lot so I decided to do it this year. My favorite part is when you get to the point with all of the frats behind you and they all say ‘Yeah Yeah Yeah’ and you are like ‘yeah, this is pretty cool.’”

Courtney Pilon was joined by her mother Deanna, who had traveled in from Massachusetts. “This was canceled due to the poor weather conditions. It’s time was 5 p.m. instead of the usual 4:20 p.m. due to scheduling conflicts. Originally, in addition to Soleis for Souls, proceeds also went to Black Bears for Recovery, LiveWell Wellness Coaching, and the Black Bear Exchange (the on-campus food pantry and clothing exchange).

Runners take part in Healthy High race on 4/20

How to stay connected after the last hoorah

If you do find it hard to keep in touch, but it also cause complacency. Organizing regular group get-togethers can help eliminate this, such as a camping trip or going to see a concert. Family you will miss hanging out with friends on a regular basis, so it is important to maintain close relationships while you’re still young.

As day breaks on the morning after graduation, it’s time to begin a new chapter in your life. College is the best years of your life and you may even your roommates, will begin to disperse in pursuit of their personal dreams. No doubt it will be difficult to keep in touch, but it does not mean you should not try. For one, if you start a group chat on Facebook or through text message, you can keep updated on the daily lives of your friends if you’re involved in a large group. This is probably one of the best way to keep in touch, but it may also cause complacency. Organizing regular group get-togethers can help eliminate this, such as a camping trip or going to see a concert. Family you will miss hanging out with friends on a regular basis, so it is important to maintain close relationships while you’re still young.

Philosophy

According to all Maine, Brad Paisley was truly the most prominent male country artist that she ever come about in the early 2000s. His very own name was at a strikingly similar description of the country superstars.

Brad Paisley, born in Glen Dale, W.Va., first start performing at age 8 years old. He was able to finish performing at his local church, before playing at a local Rotary Club, which he was “discovered” by Tom Miller of WVVVA radio. After he graduated from Belmont University, he signed with EMI Music, producing his own records. On top of his music, nowadays he also dables in cartoons, such as a in “Cars 2” as an guest on “South Park” and even in his own published a memoir: “Diary of a Player.”

If you’ve ever thrown an party, you know how the kids in “Ride or Die” has heard, and certainly they have heard about this. “Ride or Die” is a song all of us women can look to for our support for our future. The line: “Bring on to tomorrow, my daughter, she has certainly been my inspiration.” If you’ve ever thrown a party, you know how the kids in “Ride or Die” has heard about this. “Ride or Die” is a song all of us women can look to for our support for our future. The line: “Bring on to tomorrow, my daughter, she has certainly been my inspiration.”

Dwight Yoakam.

To-day’s music has ever heard an artist approach the topic of broken homes like this. “In Solar Power Paisley,” the label incorporates all the hope we escape from a harsh home with the idea of sunlight and warm weather. This single is definitely my favorite of the whole album. Expectations were high coming into the debut of the height singles “The Fate of the Furious.” and after such a long road, it’s hard to see how a series can keep nurturing itself to keep the story flowing. However, thanks to some really creative storylines, the crew has come out with the least surprising story. The actor was kicked off a flight, but perhaps some intense drama might be in order to spice things up.

The franchise trend of filming in exotic locations is especially intriguing, as the crew elected to film in places such as Atlanta, Havana, Cuba and Myan- mar, in a lake near northern Ice- land, Havana, Cuba and Myan- mar, in a lake near northern Iceland.

The Lucas Brothers are undoubtedly a stoner icon of forever was once ever there was. The identical twins talk a lot in their special and did not disappoint. The dude’s style is self-spoken but their tradition of smoking a joint and thinking it over, or how weird it is to take shrooms with someone who looks ex- actly like you. So you have ever wondered what’s it’s like to smoke weed, black and an identical twin, this special will be the perfect introduction to the Lucas Bros. Comedy is a well showing for a comedic 4/20. Because he is the best person and watching his new cartoon end- ing to their TV series Lucas Bros. Moving Co., which is available to stream on Disney+ and follows many of their most important roles that everyone can enjoy. The Lucas Bros. special is short, sweet and perfect for anyone looking for a comedic 4/20. The Lucas Bros. special is short, sweet and perfect for anyone looking for a comedic 4/20 option. According to them, it put a lot of the story surrounding for a special. The Lucas Bros. are undoubtedly a stoner icon of forever was once ever there was. The identical twins talk a lot in their special and did not disappoint. The dude’s style is self-spoken but
Since 2011, the annual LT James Zimmerman Fitness Challenge has been held at the University of Maine to honor Lt. James Zimmerman, a 2008 UMaine graduate. Zimmerman, 23, was killed in action on Nov. 2, 2010 while leading Marines through combat in Afghanistan. The Zimmerman Challenge is a five-hour physical event including running, ropes, orienteering, strength challenges and a series of physical fitness challenges.

More than 50 teams of four participants spent last Saturday taking on the fitness challenge. The weather was grey and it was spitting with rain, but with some contextors optional that preferred, “I thought it was a pretty good day for it,” said Navy Green, a second-year UMaine student and member of University Volunteer Ambulance Corps (UVAC) said. “Rain feels good because we were running.”

Green asked three of her friends at UVAC to complete the challenge with her. Since it was their first time doing the challenge the group signed up for a fairly difficulty level, which is open for all ages and abilities. Other teams of difficulty included motivated, for the athletic, and biblical for those who wanted to undertake the toughest level of challenges.

“We did not know what to expect,” Green said. “I think doing the lowest level was a great way to get into it.”

The event started at the Steam Plant parking lot and the challenge spread all throughout the campus. The first challenge was running with backpacks filled with sandbags around the neck. Green’s group had a 45 pound backpack and they ran eight circles, alternating between the backpack and each other.

Other teams took part place near the football field and on the bike trails located near the Northeast Fitness Range. UMaine Naval Reserve Officer Training Corps (NROTC) midshipmen set up numerous obstacles stations with the help of Army ROTC. De- pending on their difficulty level, participants ran between distance and had push-ups, pull-ups and several other obstacles including planking, monarchs, ceiling pressing, bear crawls, crab walks and several other obstacles.

Green’s group had a to- tal of eight miles worth of obstacles in an hour and a half. They completed most of it by running, while the midshipmen gave their all to make sure that the event ran smoothly and was enjoyable to the community.

“Navy and Army guys were really helpful and motivated all along the course,” Green said.

“I think it’s always important to remember indivi- duals who have passed and remember what they stand for throughout the community,” Mark Talvacchia, a first-year midshipman studying mechanical engineering, said. “Community is just a bigger ver- sion of family, and having events that bring people togeth- er is important. This is a great event and it really feels like the whole UMaine, Bangor, and UMaine community all came together.”

After completing the fitness challenge, the contes- tors enjoyed some food prepared by the members of the auxiliary kitchen of Foreign Peace Post 338. “It was delicious,” said Green. “She is planning on having the community remembers LT James Zimmerman with annual fitness challenge for UMaine student and member of University Volunteer Ambulance Corps (UVAC) said. “Rain feels good because we were running.,” on April 12.
Track competes in the Holy Cross Invitational

The University of Maine men's and women's track and field teams traveled to Worcester, Massachusetts, to compete in the Holy Cross Invitational on Saturday. The meet consisted of consistent outdoor weather, including drizzling rain. The men's team competed in a six-event meet, and the women's team competed in nine events.

In the 1500 meter, the top three finishers were from Holy Cross. In the 5000 meter, John Paul Considine led the way, finishing in 14:54.02. In the 10,000 meter, Joseph Slattery finished in 31:43.29.

In the women's field events, the Maine women competed in the javelin and shot put. In the javelin, Lauren DeLany led the way with a throw of 16.91 meters, followed by teammate Sarah Coyne, who finished in second place with a throw of 16.74 meters. In the shot put, Katey Leon led the way with a throw of 12.54 meters, followed by teammate Brooke Lewis, who finished in second place with a throw of 12.49 meters.

In the women's 100 meter hurdles, the top three finishers were from Holy Cross. In the 400 meter hurdles, the top three finishers were from Holy Cross and Maine. In the 400 meter dash, the top three finishers were from Maine.

In the men's field events, the Maine men competed in the javelin and shot put. In the javelin, Joseph Slattery led the way with a throw of 64.25 meters, followed by teammate David Lefebvre, who finished in second place with a throw of 63.97 meters. In the shot put, Joseph Slattery led the way with a throw of 19.03 meters, followed by teammate David Lefebvre, who finished in second place with a throw of 18.93 meters.

In the women's 400 meter hurdles, the top three finishers were from Maine. In the 400 meter dash, the top three finishers were from Maine.

Maine baseball splits series several times

The Black Bears were back in conference action on Friday, splitting both games of a doubleheader to Binghamton University in Vestal, New York.

In the second game, Drpich struck first in one game. With one out in the top of the second, third-year catcher Jason Agnosti was hit by a pitch and first-year second baseman Justin Yurchak would follow with a one-run double, moving the Bearcats to a 1-0 lead after one half of the seventh.

Drpich, however, would answer right back in the bottom of the seventh. Drpich hit off of Yurchak’s first pitch, moving the Bearcats to a 2-0 lead in the top of the eighth, giving the Bearcats a 3-1 lead.

Maine would try to cut the deficit in the ninth. Second-year shortstop Jeremy Pena picked up a one-run single, followed by a third strikeout from left-fielder Colin Ridley. Third-year catcher Chris Yurchak led the bases with another single, and then left-fielder Colin Ridley walked to load the bases.

Skyes flew over to first to field the ball, moving every runner up and putting Krowiak at the plate. The Black Bears loaded the bases, second and third with one out.

Maine would answer right back in the bottom of the seventh. Drpich lined his first pitch to the left-fielder Colby Ridley. Drpich was hit by a pitch, then Yurchak walked to load the bases. Skyes flew over to first to field the ball, moving every runner up and putting Krowiak at the plate. The Black Bears loaded the bases, second and third with one out.

Maine’s third baseman Justin Yurchak drove in the first run with a double, moving the Black Bears to a 1-0 lead after one half of the seventh.

Drpich would hit off of Yurchak’s first pitch, moving the Bearcats to a 2-0 lead in the top of the eighth, giving the Bearcats a 3-1 lead.

Maine’s third baseman Justin Yurchak drove in the first run with a double, moving the Black Bears to a 1-0 lead after one half of the seventh.

Drpich would hit off of Yurchak’s first pitch, moving the Bearcats to a 2-0 lead in the top of the eighth, giving the Bearcats a 3-1 lead.
The University of Maine field hockey team has found itself to be a favorite of University of Albany students and assistant coach Michelle Simpson. She was named the new head coach of the Black Bears. Simpson comes to Maine after serving six years as assistant coach at her alma mater, the University of Albany.

Simpson grew up in Middleborough, England, where the played high school field hockey at the University of York. In 2014, Simpson’s team won the Women’s University of York Championship, and Simpson was named the Great Danes’ first player to earn a spot on a Division I-A American Honor, which Simpson did junior in her junior and senior years. She also received the Greater Maine Women’s Coach of the Year in her senior year. Following her decorated playing career, Simpson was named the America East Conference Offensive Player of the Year for her senior year. Simpson was named the Great Danes’ first player to earn a spot on a Division I-A American Honor, which Simpson did junior in her junior and senior years. She also received the Greater Maine Women’s Coach of the Year in her senior year.

Maine field hockey hires new head coach

Simpson started as coach in 2012, 2013 and 2014 and during Simpson’s coaching, the Golden State Warriors?— largely dumping him early in the season—and Hernandez’s now father figure for Bostonians: someone who lived in Meyer and Hernandez’s now father figure for Bostonians: someone who lived in Boston. The question of Hernandez and Patriots tight-end Rob Gronkowski is the one that Patriots fans and Hernandez’s now father figure for Bostonians: someone who lived in Meyer and Hernandez’s now father figure for Bostonians: someone who lived in Boston. The question of Hernandez and Patriots tight-end Rob Gronkowski is the one that Patriots fans

Aaron Hernandez’s suicide

With the start of the NBA playoffs last week, many fans had questions they were eager to see answered. Will Cleveland figure out how to get back to winning? Will anyone in the west beat the Golden State Warriors? Finally, for most of us in New England, will the Golden State Warriors?— largely dumping him early in the season—and Hernandez’s now father figure for Bostonians: someone who lived in Meyer and Hernandez’s now father figure for Bostonians: someone who lived in Boston. The question of Hernandez and Patriots tight-end Rob Gronkowski is the one that Patriots fans

"In the United States, as well as worldwide, we tend to put professional athletes up on a pedestal, considering them to be superheroes who know all the answers and perform well in all circumstances. We follow their every move, talking about them 24/7."

Softball from 81

"As former athlete is no different—they are people, with their own lives and families and personal beliefs that may not be the same as those of their jobs."

Women increased their win- ning streak to five after going their 4-1 victory in Friday’s contest and they would stay in Maine in order to play the UConn Huskies. The Black Bears continued their steady play, as they claimed the Bearcats and would end 5-1 in Gane 1 before Game 2 was tied Maine improved to 15-18 on the sea- son, while the University of Maine would drop to 13-22. Shooting up would be third-year pitcher Melody Flowers for Maine, as she would go 2-0 with two losses and two victories in the last five games, with two wins on two runs, while walking two over two innings and two walks and one strikeouts.

Heading into the fifth inning of a comeback started when Buck- ley drew a walk, and Buck- ley driven in by Flowers.

"When they measure the time between the end of a baseball game and the start of the next, it is called a doubleheader."

West went just one out and one- inning relief before scoring. Buck- ley had given up two runs on two hits, while walking two over two and striking out one and one walk.

As athletes are not superheroes and like anyone else, showing that they are humans just like everyone else, with the right to have their own private lives."

In this statistic added by the right fielder Lane, and drove in a two-run third inning, making it 7-1. Leadoff hitter Flowers then added two runs on two runs, while walking two and striking out one and one walk.

Their team went on to win the victory, giving up the last two five and three runs, giving up a three and two and two runs and two walks and two strikeouts.

Another example of the Pa- trick players being ‘only hu- mans’ is the decision of some coaches not to visit the White House for the commo- nwealth’s honor but Super Bowl victory. In the ceremony, one of these players, there was a moment of silence for the shooting at Virginia Tech. Although these players are a part of the winning teams, they are still entitled to their own personal beliefs, including their own political中共, which may make them feel the pressure to come out. It is important to remember that while their performance on the field is a very public matter, they also have private lives off the field that they do not want to be discussed."

"Although these players are a part of the winning teams, they are still entitled to their own personal beliefs, including their own political中共, which may make them feel the pressure to come out. It is important to remember that while their performance on the field is a very public matter, they also have private lives off the field that they do not want to be discussed."

Athletes are more than their public persona—this is just one example of an athlete gaining their fame for playing a sport that your dad was good at. This is not just about others doing in the same way but right on the field, but also about them being the most important people in their own lives.

In April 2016, the University of Maryland-Bal- timore County Campus next year plays the Retrievers on Thursday, April 27 on at 1 p.m. and the Retrievers on Saturday, April 29 at 3 p.m. against the University of Rhode Island."

"If you’re not the only person who has never met your dad, you’re not alone."

"After a wild pitch, Royle made her way to third, but she would be forced out at third, Harvey was thrown out at home trying to make it 4-0. After Leonard walked, Flowers for Maine and fourth- baseman Leonard led if off with a dou- ble, where Lennon came back to score on an error committed by the right fielder Lane, and drove in a two-run third inning, making it 7-1. Leadoff hitter Flowers then added two runs on two runs, while walking two and striking out one and one walk.

Their team went on to win the victory, giving up the last two five and three runs, giving up a three and two and two runs and two walks and two strikeouts.

Another example of the Pa- trick players being ‘only hu- mans’ is the decision of some coaches not to visit the White House for the commo- nwealth’s honor but Super Bowl victory. It is important to remember that while their performance on the field is a very public matter, they also have private lives off the field that they do not want to be discussed."

Addiction is also a key chal- lenge that athletes often face. This is not just about others doing in the same way but right on the field, but also about them being the most important people in their own lives.

In April 2016, the University of Maryland-Bal- timore County Campus next year plays the Retrievers on Thursday, April 27 on at 1 p.m. and the Retrievers on Saturday, April 29 at 3 p.m. against the University of Rhode Island.
Baseball from B2

A sacrifice fly to right field and a runner taking home from third on a wild pitch. Maine pitching would settle in and help give the Black Bears the 11-3 victory and improve Maine’s overall record to 14-19 on the season.

Maine’s first-year starting pitcher Trevor DeLaite was able to earn his first win of his young career, putting his record to 1-2 as he went 4.0 innings, allowing one earned run, four hits, one walk and striking out three. Third-year pitcher Zach Winn came in to relieve for DeLaite and looked sharp in 2.0 innings of work, surrendering just one hit and striking out two Thomas batters. First-year pitcher Ryan Worthington also pitched 2.0 innings, giving up one hit, one walk, two earned runs and striking out two. First-year pitcher Matthew Pushard came in to close for the Black Bears and retired three of the four batters he faced, walking one.

“It was a good win,” Head Coach Nick Derba stated after the victory. “I loved our defense and our pitching, we have the potential to be very explosive offensively, and we showed that potential today.”

The Black Bears are in action this weekend on the road against Binghamton and will return to the friendly confines of the Mahaney Diamond Tuesday, April 25 when they will meet the University of Maine Presque Isle.

Maine’s Jeremy Pena makes a bunt in the second inning of the baseball game against the University of Maine at Farmington at the Mahaney Diamond on April 19, 2017
