Genn's White Orpingtons

(The Best in the East as Our Winnings Prove)

Our Grand Egg Producing Strain
of White Orpingtons Are
Without a Peer

Bred in the hardy Maine climate, they are
the greatest producers of winter eggs known.

Every Pen headed by a prize winner or a
near relation.

No. 1 Pen—Headed by **Peter the Great**,
Winner at Boston Show, also First at Bangor
over all Orpington classes. This bird is
valued at \$500, and is certainly worth the
money. Eggs from this pen 25c. each

No. 2 Pen—Headed by **Ajex**, a wonderful
bird; a winner of many first prizes as a cock-
erel, and being beaten at Bangor show this
year only by **Peter the Great**, winning
2nd Money. Eggs from this pen 20c. each

All other pens, carefully mated to grand stock, **15c. each**

A DEPOSIT MUST ACCOMPANY ALL ORDERS

Superintendent of Schools' Report

SUPERINTENDING SCHOOL COMMITTEE

Fred F. Tracy, Chairman,	term expires March, 1914
Charles L. Tracy,	term expires March, 1915
Florence Crowley,	term expires March, 1916

A. W. Gordon, Secretary to Committee

SUPERINTENDENT OF SCHOOLS

A. W. Gordon

Gouldsboro, Maine, February, 1914.

To the Members of the Superintending School Committee and the Citizens of the Town of Gouldsboro:

I present herewith my fourth annual report of the condition, progress and needs of the schools of Gouldsboro.

THE SCHOOL YEAR

We have had a prosperous school year with a marked increase in attendance in several schools and a very good average attendance in nearly every school in town. The record of the Pond District is especially deserving mention, this school with an enrollment of fourteen for the spring term having ten pupils perfect in attendance and the other four having a total of but six days absent while there was not a tardy mark for the term. This school had the poorest attendance of any school in town a few years ago and such an improvement speaks well for the pupils, the teacher, and the community interest. Several other schools have nearly as good records and we regret the incompleteness of the school statistics and the omission of the roll of honor of attendance from this report made necessary on account of closing the school report before the end of the winter term.

Our teachers as a whole have been efficient and faithful and we regret the impossibility of retaining satisfactory teachers for a longer time, several of our best teachers leaving every year for better positions elsewhere. However, this constant change of teachers is common to country schools and one of their chief disadvantages. The remedy is in making the country school more attractive to teachers by offering higher salaries, having a longer school year and providing better school buildings and equipment.

The salaries paid in this town at present are good but not above the average while the school year is considerably below the average for the State, this of course reducing a teacher's yearly salary although the salary per week is good. This year we have been able to increase the school year two weeks by reason of the large balance brought over from last year and the extra amount received from the State equalization fund which shows in the resources of the common school account. The school year of thirty-two weeks should be continued and a longer school year would be an advantage not only in providing more schooling for the scholars of the town but would also make it possible to retain our best teachers for a longer time. A good many towns maintain a school year of thirty-six weeks and this is considered about right for Maine towns of this class.

In regard to equipment, a great improvement has been made in the supply of text books the past few years while most of the schools are now supplied with maps, charts, dictionaries, and a few with globes. Many of the rooms have been made more attractive by pictures, flags, clocks, and other schoolroom decorations, and a few rooms have even been provided with organs. The school leagues deserve a great deal of credit for their work along this line and at the present time there is a school league in every school in town, most of them having raised considerable funds the past year.

The school buildings in town come under the various heads of good, fair and poor. We now have one first class building, several fair ones and an equal number of poor buildings. A great improvement has been made in most of them the past few years, especially in the schoolrooms, but there is yet much to be done in the way of providing proper conditions of lighting, heating, ventilation and sanitation. A definite program of improvement in this direction should be followed out from year to year until all the desired improvements are made.

NATIONAL SCHOOL RECORD SYSTEM

The National School Record System has been introduced in this town this year. This is an index card system for keeping a record of all the school children from the time they enter until they leave school. This system is being established in many places in this State and in fact all over the country as its name indicates, it being the purpose of school superintendents to have a uniform system of school records in every town and city so far as possible. By this system the superintendent and teachers keep on file duplicate records of each pupil, the records including the date and place of the child's birth, name and occupation of parents, date of first entering school, a complete record of attendance in all schools attended, progress through the grades including rank in each subject for each grade, effort, health, deportment, and in fact a complete school record of the child. The local records are now complete to date and begin with the fall term, 1912. At the present time a great effort is being made to better serve the interest of the individual child and this system should be of much assistance to teachers and superintendent in this most important work.

In connection with this system we wish to especially impress upon parents the importance of obtaining transfer cards from the local schools for their children when they change residence. These cards make it possible to place the child in the proper place in the new school without delay and he is thus enabled to go right on with his work without loss of time.

SECONDARY SCHOOL SCHOLARS

The State examination for scholars who wish to enter secondary schools has been given twice this year and the following scholars have qualified for free tuition, their names being given in this report as a matter of record: Chandler Noyes, Everett Lovejoy, Pauline Kingsley, Ottilie Wilkinson, Ruth Leighton. The number of scholars from this town seeking a higher education still continues to increase and the town is now represented by students in nearly every high school in this vicinity as well as in several of the private secondary schools. This certainly shows a commendable ambition among the

boys and girls of the town to make the most of themselves and the records they are making in these schools are a credit to themselves and their town.

NEW SCHOOL BUILDING

The new school building at West Gouldsboro has been completed and occupied since the middle of the fall term. This is a modern school building constructed according to plans approved by the State Educational Department and the State Board of Health as is now necessary by law. This building is lighted, heated and ventilated according to approved methods and is constructed in a thorough and workmanship manner, being complete in all details. While the cost was more than anticipated this is not an unusual occurrence in public or private building and nothing has been left in this building to be completed later on with the expense charged to other accounts as has happened before now. In some of the discussions and criticisms always incident to any public affair it has been said there were too few scholars in this village to need a building of this size and the present enrollment of the school would seem to confirm this contention. However, the small attendance is only temporary on account of several large ninth grades passing out of the school the past few years and there is no doubt but this school will have a good attendance again within a short time. It is poor economy in erecting a school building to provide for present day needs only with no provision for the future and almost the certainty of expensive additions later. This building is a credit to the town and we trust the citizens will give it a careful inspection when opportunity offers.

THE NOON INTERMISSION

Better supervision of pupils during the noon intermission by teachers is greatly to be desired and this has been a topic of considerable discussion at recent educational meetings. The resolutions given below were unanimously passed at the Conference of School Superintendents at Castine in July, 1913, and are self-explanatory. Active steps for an improvement along this line will be taken this year and we desire the earnest co-operation of parents in bringing about this much to be desired improvement.

Whereas, the noon hour frequently becomes a menace to the moral and physical development of school children and it is often an occasion for the wanton destruction of school property:

BE IT RESOLVED:

First, that superintendents of schools and superintending school committees when engaging teachers shall make arrangements for them to remain at their schools during the noon hour in all cases where it is required that children shall be away from their homes and at school during that period and when other adult supervision is not available and that recognition of this additional service be made in adjusting the salaries of teachers so employed.

Second, that in all cases where children go to their homes during the dinner hour there be a requirement that they remain away from the school premises until within fifteen minutes of the opening of the school.

Third, that parents be urged to pay closer attention to the provision of suitable material for the noon lunch and that teachers be aided in their efforts to make of the noon time meal an exercise for the teaching of neatness, hygiene and table etiquette.

Fourth, that the recreation periods of the children in all schools should have the personal supervision and oversight of the teacher or other responsible adult.

In closing this report I wish to thank all who have assisted in any way in the progress of the schools during the past year.

Respectfully submitted,

ADELBERT W. GORDON,
Superintendent of Schools.
