Report of Superintendent of Schools

To the Superintending School Committee:

I herewith submit to you, and through you to the citizens of the town, my first annual report as superintendent of the schools of Isle au Haut.

In beginning this report I wish to state that upon assuming my new duties at the opening of the spring term of 1916, I found the standard of scholarship and general condition of the schools to be excellent. In consequence of this I feel that much appreciation and credit should be given to your former superintendent, Mr. Tyler M. Coombs, whose interest and labors have accomplished much. It has been my purpose and aim to continue the good standing of these schools and to make any improvements that time and opportunity might make possible.

Since my connection with these schools commenced, only one change in the teaching force has been necessary, this being caused by the resignation of Miss Mary French after a year of service in the East Side school. This absence of frequent changes of teachers has been very fortunate for the welfare of the schools. We are also fortunate in having teachers of Normal school training, which in my judgment makes their work much more efficient and profitable.

As we have expended only a part of the fund of \$50, advanced by the state for purchase of equipment I would suggest that a suitable flag pole be erected for the Thoroughfare school and a flag and pole be furnished also for the East Side school. The first

mentioned school has already been furnished with a new flag. This detail is made necessary by law and is an influence for patriotism which should not be overlooked. Some much needed new books have been purchased, among these a new and uniform set of geographies, the best to be had. Next year a uniform set of new arithmetics should be introduced.

As the plaster walls and ceiling in the new building have become less fresh and bright than they were when first put on I would suggest that something be done to them when it becomes possible. Muresco, or a similar material, in proper tints to be most restful to eyesight, would add much to the beauty of the room and be an advantage in the way of sanitation.

In view of the fact that the work of the year has been remarkably free from friction or complaint the school work has had very little to interfere with steady progress. The average daily attendance has been high at all times except during a period of the winter when sickness cut into the number who could attend.

Before closing this report I wish to thank the town officials, teachers and public who have all done much to make the work of the year pleasant.
