CITY OF BANGOR.

MAYOR'S INAUGURAL ADDRESS,

MARCH 16, 1863;

ALSO,

THE ANNUAL REPORTS

OF THE SEVERAL DEPARTMENTS, AND THE

RECEIPTS AND EXPENDITURES,

For the Municipal Year 1862-1863.

BANGOR:
WHEELER & LYNDE, PRINTERS.

1863.

CITY OF BANGOR.

In City Council.

ORDERED, That the City Clerk be, and is hereby directed to cause to be printed, for the use of the City Council, four hundred copies of the Address of the Mayor, this day made to the City Council, together with the several Annual Reports of the Subordinate Officers of the City Government, and a particular account of the Receipts and Expenditures of the City for the last Municipal Year, and one hundred copies extra of the Report of the Superintending School Committee; the same to be printed in pamphlet form.

IN BOARD OF ALDERMEN, March 16, 1863.

Passed—sent down for concurrence.

SAMUEL H. DALE, MAYOR.

IN COMMON COUNCIL, March 16, 1863.

Passed in concurrence.

A. L. SIMPSON, PRESIDENT.

A true copy.

Attest :—GEO. W. SNOW, CITY CLERK.

MAYOR'S ADDRESS.

Gentlemen of the City Council:

At the threshold of each Municipal year on the induction into office of City Governments, we are following a custom now become universal, and having taken our respective oaths of office, and invoked the aid of that Divine Being to whom nations as well as communities and individuals must look for their support and guidance, let us firmly rely upon that Giver of all Good, that He will sustain us while we earnestly and cheerfully labor for the prosperity of our City, the welfare of our fellow-citizens, and the honor and improvement of ourselves.

Called to the Chief Magistracy of this city at a time when the foundations of our General Government are being shaken—when disunion, rebellion, and all the horrors of civil war are raging with all the madness and fury that diabolism can instigate; when two years of anxiety and suspense, of suffering and heroism unparalleled in the history of this or any other nation, has been endured and borne by the loyal and true, let us, at the outset of our municipal career, firmly and unmistakably plant our feet on the side of loyalty and good government, stamping treason, disunion, and disloyalty, in whatever form or guise, until this monster so hideous is forever exterminated from our land; and you, who are called to assist me in my official duties, and I, who am called to preside over the affairs of the city and assist you in your deliberations, must and will stand firmly together for the honor of our city, the welfare of our State, the glory, integrity and unity of our common country—and having done all, to stand! stand firm in the faith, that out of all this great evil a kind and overruling Providence will eventuate good. This is my hope, my faith, my trust, which I doubt not is yours also, as I am sure it is of the great, generous public heart of our beloved country. With the love of country enshrined within us, let us enter upon our duties, doing first that which lies nearest to us.

The war in which we are engaged has imposed new duties and obligations on each one of us, and it is gratifying to witness the noble and generous response our citizens are making in aid of our country's cause. Men without compulsion, and in large numbers, have offered themselves

to their government, have nobly gone to the war, have sustained themselves heroically on the field and honorably in the camp, and quietly and patiently are they awaiting the summons to battle. While these are absent, the city has generously provided for those they have left dependent at home, and is willing to continue in so doing; and while our city, in its corporate capacity, is doing so much for the needy at home, our citizens, through the "Ladies' Agency to the Sanitary Commission," are doing the grandest work yet undertaken in this or any other country—that of providing for the sick and wounded of our armies.

The patient, anxious toiling of our ladies for these many months, for the amelioration of the sufferings of our soldiers, deserves all praise, and I should be false to my duty, and unjust to my own convictions, did I not, in my first official communication, bear testimony to the unmistakable value of their labors, so quietly, systematically and economically performed, and so liberally and generously dispensed. God will bless them! The sick and wounded soldier will love them! The country will appreciate their services by a grateful remembrance of their Christian duties; while those whose households are cheered by these kind offices rendered to their loved and absent ones, will hold the self-sacrificing devotion of those noble women in warmest gratitude.

OUR SOLDIERS.

From the Adjutant General's Report of 1861, I find the number of men gone from this city to the war, was 658; In 1862, I find the city has paid bounties to those gone, additional to the above, 236; Bangor men serving in regiments of other States, 11; do. in United States regulars, 13; do. in U. S. navy, 40; total, 958. This large number of young and active men out of a population of sixteen or seventeen thousand is a matter of considerable interest; and what is wonderful, is the small number of deaths and casualties incident to war that have occurred among them. Should the occasion demand and another call be made for more men, in whatever form it may come, I have no doubt but the same spirit will actuate our people to fill the ranks as heretofore, and the same patriotic ardor be manifested that we have seen in the past.

SOLDIERS' MONUMENT.

Prominent among the grateful and honorable acts of our fellow-citizens, stands the subscription to the "Soldiers' Monument Fund"—a sum so large, so munificent in its character as to elicit the warmest praise. It is refreshing that amid the din of war and its consequent excitement, thoughtful minds and grateful hearts, forgetting the burdens imposed by it, are ready to do honor to the memory of the illustrious dead, in erecting a monument on consecrated ground, by which the names of our own Jameson, Pitcher, Carpenter, Dean, Chamberlain, Ayer, and other brave officers and citizen soldiers, may be handed down

to the latest days of our posterity. All honor to the brave dead, "who die for their country," and to the living, that such a privilege is granted them of erecting their monument.

FINANCES.

Through the City Treasurer, and by his books, we are enabled to ascertain the actual financial condition of our city, its resources and liabilities, its demands and supplies; and by his report, which will be before you, you will know what has been done during the past year.

The present permanent debt of the city is \$170,535,00; the temporary loan is, \$13,000; increased liability over that of the previous year, \$8,500.

The amount advanced the Soldiers Volunteer Contingent Fund, is as follows:

For the year 1861-2,	\$10,193 21
" " 1862-3,	23,923 58
" Bounty to soldiers,	24,580 00
	\$58,696 79

What portion of this sum will be re-imbursed by the State, I am not able to inform you. By an order of the last City Council, my immediate predecessor has been authorized to proceed to Augusta to adjust the same.

The appropriations and expenditures for the last municipal year, were as follows:

	Appropriations.	Expended.
Highways,	\$13,000 00	\$12,919 14
Fire Department,	7,500 00	6,871 93
Pauper, "	7,500 00	6,054 34
Schools,	15,000 00	13,756 01
Salaries,	6,700 00	5,178 45
City Watch,	2,250 00	2,038 45
Contingent,	42,850 00	37,694 47
Interest,	11,200 00	12,614 16
	\$106,000 00	\$100,126 95
Less unexpended,		8,873 05
		\$106,000 00
State Tax,	15,068 64	
County Tax,	28,86 77	
Overlayings,	6,099 41	
	\$135,454 82;	

total am't assessed for taxes.

Of this amount of assessed taxes for the past year, \$98,267 45 have been collected; and from the amount of overdue taxes for the years 1858,

'59, '60 and '61, \$29,172,55—there has been collected and paid into the Treasury, \$26,762,76, leaving but a small balance of overdue taxes unpaid. This fact of collection speaks for itself. It is creditable to our people that they have so readily responded when the calls upon all are so numerous and weighty.

As none of the permanent loan will become due the present year, no appropriation, save those for the State, County Tax, our city expenses, and soldiers' volunteer fund, will need providing for. These several amounts will be presented at the proper time and our people will as cheerfully respond as in times past. The Governmental Income Tax, which goes into operation this year, will be additional to our many burdens, and I cannot but hope that the per centage of our city tax may be reduced, by wise economy, to a fraction below that of last year.

For particular items, I refer you to the Treasurer's Report, and it will be your duty to carefully scrutinize and examine it, that by your careful judgment the policy of the coming year may be judiciously presented, and that all your appropriations and expenditures be as just and economical as if they were your individual matters.

SCHOOLS.

There is no branch of the several departments which our people are so much interested and so sensitive about as our public schools; and none in the whole range of our expenditures for which our taxes are paid with so much cheerfulness. "Bangor Schools" have since the first day of our city stood in the front rank, and I am happy in bearing testimony to the faithfulness of our teachers and the earnestness which those who are officially called to their supervision have manifested for their welfare. The interest in these schools (with but an occasional exception) is unabated, and my occasional visits during the past year have more and more convinced me that if any one thing was wanted more than another, it was that of parental, rather than official care and interest. Let me urge upon those who are immediately interested in this matter the importance of making frequent visits to these schools, and becoming better acquainted with the teachers, and with their cares and responsibilities, thus giving a healthy tone to the whole department.

The Primary, Intermediate, Grammar and Select Schools are all in a good healthy condition, are well attended, are under able and competent teachers, and are worthy of your generous confidence. The High School for Girls continues its successful career as regards numbers and interest, and under the care of its principal and assistant is a model school for our young ladies.

The Boys' High school is not so large in numbers as could be desired, but this is so from various causes over which the school has no control. This is accounted for in part from the fact of a disposition among our

young men to graduate too early, and of the parent or guardian to take them away from school for various reasons. Too many, I fear, leave the school who should remain to enjoy its benefits, while many others for secular reasons do not avail themselves of this high privilege. The principal, Mr. Tower, and his assistant, Miss Hallowell, are fully up to the literary standard which this school demands, while the introduction of music and the formation of a library give it additional interest and value. This school should be maintained in its high educational standard, and I fully hope an increased interest will be manifested by all in its welfare.

I cannot close this branch of my address without urging upon you the importance of continuing the "military drill," which has been introduced into our schools, both as an exercise conducive to the physical and moral improvement of our young, and at the same time cultivating a taste for military discipline.

The whole number of scholars, as per returns to the State, is	5886
Whole number of schools,	57
Number in attendance, Summer term,	3,776
" " Winter "	4,026
Average attendance, Summer term,	3,101
" " Winter "	3,157
Whole number Principals,	69
" " Assistants,	9
Male teachers,	7
Female teachers,	71

It will be noticed that the average attendance in these schools compares favorably with former years, and, on the whole, I believe this Department is in as good condition as, under all the circumstances, we could expect. The school for apprentices has been maintained during the winter, but not with so much interest as in years past. More of our young men should avail themselves of the advantages which this school offers.

The unexpended balance of the last year's appropriation is \$1283.99 to the credit of this department.

I would here urge the importance of the Superintendent of Schools personally attending to the planting of trees around those school houses that have not been attended to, and the replacing of those that are dead and useless, as he may find in his visits for that purpose.

PAUPER DEPARTMENT.

By the report of the Overseers of the Poor, I have been enabled to gather what has generally been the condition of this branch of our city's munificence, and have been gratified to find the wholesome tone which surrounds it, the economy with which it is administered, and the judicious and impartial care which attends it. The appropriation of \$7500

has been so well cared for that there remains unexpended and to the credit of that fund \$1445,66. Besides the generous and liberal care of those within our Alms House, much pains have been taken to assist those who do not care to avail themselves of this institution, but with a little outside help can take care of themselves. This is commendable and praiseworthy in the recipient, and thoughtful and judicious on our own part; and if any word of mine could reach the ears of the new Board, I should advise the same system be continued the present year.

A recent visit to our Alms House more fully confirms my good opinion of the Superintendent, Mr. Gilman, for the neatness, order and good management of the establishment. It is a credit to the city, and redounds to the honor of those early thoughtful men who projected it. The farm is under excellent management; the buildings, fences and grounds in perfect order, while a tasteful disposition of shade trees is alike grateful to the inmates and the passers-by.

An appropriation will be needed to build a large reservoir, or cistern, for the use of the house, and to erect a fence on the Webster Road end of the farm. The receipts and expenditures of this Department will be found in the Report of the Overseers, to which I must refer you. The following statistics may be of interest. The number of families calling for aid outside of the Alms House is 159, consisting of 572 persons—Americans, 231; Irish, 279; French, 19; Scotch, 7; English, 8; Africans, 4; Provincials, 25. The whole number of those sent to the Alms House during the year 125; discharged, 63; absconded, 4; died, 4; sent to Insane Hospital, 3; now resident (March 1st) 51. Number sent to House of Correction, 50—males 33, females 17. Discharged, 26; absconded, 9; died, 1; transferred, 1; in custody, 13. Number of persons sent to the Work House, 16; discharged, 13; in custody, 13. Total in Alms House, 51; in House of Correction, 13; in Work House, 3; in all 67.

FIRE DEPARTMENT.

The Fire Department of our city is now in good working order, and too much praise cannot be bestowed on this branch, so essential to the safety of property and security of our citizens. No class of our people deserve the public thanks more than the firemen,—ready at all times, night or day, to work for a meagre compensation, their alacrity and promptness at first alarm, are, and ought to be, fully appreciated. During the year there have been 35 alarms—25 fires, 10 false alarms. This is a considerable diminution from former years. The amount of property destroyed has been much smaller than for several previous years, and this is undoubtedly attributable to the promptness and efficiency of the Department, with the powerful co-operation of the steam fire engine. Now that the practical value of steam in this service has been fully tested, and the verdict unmistakably rendered in its favor, I have no hesitation

in recommending the purchase of another steam fire engine at as early a day as you think advisable.

The Chief Engineer urges the importance of purchasing one thousand feet of leading hose, also caps and coats for hosemen attached to companies Nos. 3 and 6. He also recommends the building of one or two more reservoirs during the year, in localities now deficient in a supply of water, and the rebuilding of two, which are in a dilapidated condition. The whole number of reservoirs is 29—on the East side 16, West side 13. This officer also recommends the sale of old Tiger No. 6, and old No. 4 engines, and urges the necessity of furnishing horses for the steam fire engine nearer than the city stables. This Department, like most of the others, has during the year made its expenditures come within the appropriation. For details I refer you to the Engineer's Report.

STREETS AND HIGHWAYS.

By the Report of the Street Commissioner, I am gratified to learn that the streets, highways and bridges of the city are in good repair and condition. The appropriation last year for this Department was \$13,000. This included the expense of building a bridge over the Kenduskeag at Six Miles Falls, at a cost of \$4,700. This is a substantial structure, well and thoroughly built. The whole net expenses of this Department are \$12,919.14, leaving an unexpended balance of \$80.86 in the Treasury.

The main sewers on Main and State Streets are in a bad condition, and will, during the coming year, have to be rebuilt. In my judgment, as also that of your Street Commissioner, when rebuilt, they should be of brick or stone, and of ample dimensions, as all experience shows that permanency and size are both desirable in so important a matter as our sewers and drains.

In a city so large as ours, with so many miles of streets, roads and sidewalks to be attended to, with their breaking out during the winter, with the cleanliness and order which have been observed in their supervision, too much praise cannot be awarded those who have had charge of this Department. The Report of the Commissioner is clear, to which I refer you for detailed statements, and recommendations.

CITY PHYSICIAN.

The Annual Report of the City Physician, which will be before you, gives such information as will call your particular attention to some mode of separating the children at the Alms House from the older inmates of that institution; also of providing for the better heating of the hospital rooms which are, as at present arranged, somewhat defective. These recommendations are worthy of your early consideration. The Report of Dr. Jones gives you the usual statistical information of his Department, and to it I refer you that you may better understand the physical

condition of that portion of our fellow citizens who have claims on our kindness and official regard.

CITY MARSHAL.

This officer in his report to the City Council says the whole number of arrests made under his charge is 522. For drunkenness, 223; prosecuted for offences, 232; discharged without prosecution, 67. His Report will give you all the particulars needed to govern your action the present year. He suggests an additional day police force as important and necessary to the interests of the city, and I am not sure but such an increase would be both wise and economical. This matter being entirely within your control, you will give it such careful consideration as it demands.

The night watch and day police are important to the safety of our property and the moral welfare, peace and order of our city, and if either or both need to be enlarged for the better preservation of the one, or the strengthening salutary effect of the other, I am sure you will give this branch of our government such aid as is demanded and asked for.

CITY SOLICITOR.

The City Solicitor, in his Report to the City Council, informs us that when he came into office, the following cases were standing against the City, some of which have been disposed of. Others remain for trial and adjustment, as follows:

- Samuel Veazie vs. Bangor, exceptions filed.
- Henry Q. Norton vs. Bangor, new trial in April.
- Isaac M. Bragg vs. Bangor, to be argued before full Court.
- Henry B. Farnham vs. Bangor, trial in April.
- Calvin S. Weld vs. Bangor, trial in April.
- Samuel Kealiher vs. Bangor, entered for April.

The cases of John S. Colbath, Moses Savary, John M. Leonard and Roderick Young, against the city, have been settled. For a more particular account of the cases in litigation, I would respectfully refer you to the City Solicitor's Report, which will be before you.

CITY AGENCY.

From the Report of George Wellington, Esq., City Agent, I find the sales for the past year amount to \$6,142.61, against \$7,421.16 the previous year, with a profit on the business of the year of,	\$1,251.55
Less Salary,	500,00
Total nett,	<u>\$751.55</u>

There is a material falling off in the sales from any preceding year, and if I could be assured that the cause of temperance was as surely advancing, as the business of this agency is decreasing, the hope and

prospect of this cause would be in the ascendant. The Agent assures me he intends to confine his sales as by law required, and the limited amount sold would seem to confirm his statement.

HARBOR MASTER'S REPORT.

By the Report of our Harbor Master we learn that, notwithstanding the fears of most of us, the commercial business of the city has been materially increased over that of the year 1861, to the extent of 214 more arrivals, and 31,522 more of tonnage. Our imports of foreign goods were about the same as in 1861, but our exports have considerably exceeded those of 1861. In 1861, 264,083 bushels of potatoes were shipped, while in 1862, the export was 502,550 bushels—an excess of 228,467. In deal to Europe about 17,000,000 feet were shipped; in brick about 9,000,000, thus showing that our trade, foreign and coastwise is gradually but surely increasing. For particulars I refer you to his report as a matter of commercial interest. The fees from the office the past year were about \$700, and by statute they go to the Harbor Master as his salary.

PUBLIC CEMETERIES.

The Report of the Cemetery Board states that the burials during the past year within the public cemeteries, are as follows: Mt. Hope, 90; Levant Road, 6; Pushaw Road, 4; Pine Grove, 4—Total 104. The interments in private cemeteries have been—Mt. Hope Corporation, 89; Mt. Pleasant, 93—Total, 182. Grand total 286.

The Committee recommend that an appropriation be made to put in repair the bridge over the brook at Mt. Hope, and to replace the fences around the Pushaw Road enclosure, which will require about \$50. They also call the attention of the City Council to the unsightly appearance of the entrance to the public grounds at Mt. Hope, and near the receiving tomb, and I can but hope that the Mt. Hope Corporation will, at an early day, remove all those obstructions which offend the good taste of those who visit this consecrated spot. To their Report, for other matters of interest, I would call your special attention.

KENDUSKEAG STREAM.

I would call your attention, particularly, to the condition of the bed of the Kenduskeag stream. An act giving additional powers to the city has just passed the Legislature of our State, authorizing the removing and keeping clear the obstructions that yearly find themselves in this stream. This matter has been too long delayed, and should not be suffered to continue. I allude to the numerous rocks and logs which at the early season show themselves, and for want of proper care and attention remain to the injury of vessels and cargoes which enter this port. This stream is a common highway, and should receive your care and attention, that the dangers alluded to may be obviated. How and in what

manner it shall be done is entirely within your control, but I shall be most happy when you give it your consideration.

MARKET HOUSE.

In all well-appointed cities, among the first things that attract attention is the public market. In its corporate capacity, this city has done nothing towards furnishing a suitable public market, but private enterprise and capital have supplied this want by a commodious building in a central locality near Kenduskeag Stream, where the tidal waters ebb and flow, and secure that cleanliness and sanitary properties which are indispensable to the health of the people. It is desirable that our citizens should avail themselves of the facilities thus furnished. I would call your attention to an act passed at the last session of our Legislature, giving additional powers to our city for the regulation of the sale of meats and fish, and I shall be happy to co-operate with you in any desirable measure that may promote the public health and comfort in this behalf.

WOOD STAND.

Section 11 of an Ordinance passed April 29, 1850, ordains "That the northerly half of Ohio, and the southerly half of Hammond Streets, near the Hammond Street Church, and Broadway, between State and York Streets, shall continue to be stands for the sale of wood and bark, until others are appointed by the Mayor and Aldermen."

Since the passage of this ordinance our city has materially increased its population, while its private residences and stores have multiplied, so that the question naturally arises—should not some other places be found, less central, but equally as convenient as the above mentioned, for the sale of wood and bark? I have no hesitation in saying that the one on Ohio and Hammond Streets should be changed. It is due to those who live in its neighborhood, and equally due to those who pass and repass those places, so much obstructed as at times to be difficult of passage. Though the ordinance, as it now stands, refers the whole matter to the Mayor and Aldermen, I cannot but believe that the matter, of which there is so much general complaint, should be fully considered and acted on by the whole City Council.

EAST MARKET SQUARE.

I would call your attention to that portion of our city called "East Market Square," which at this early spring should demand your consideration. There are uncollected assessments due from parties which can be adjusted. The "Universalist Church" structure has been completed during the past year, and is now occupied. The grounds on its front belong to the city. These need grading and ornamenting with shrubbery and trees, and I cannot but hope that some measures will be immediately taken in carrying out the original design, as an act of justice to

all that are interested in the immediate vicinity, and who have been assessed for the improvement thereof, as well as to a general desire to see this central spot under care and cultivation.

CITY ORDINANCES.

In 1851, the Ordinances and By-Laws of the city were revised and codified by Commissioners appointed for the purpose, and the same were published by the City Council. Since that time many changes have taken place; new ordinances have been created, and old ones abolished, until the present volume is quite useless, as well as nearly out of print, not enough copies, as I understand, being on hand for the use of the city government. I would recommend that they again be revised and codified, and published in a new volume the current year.

SALE OF PROPERTY.

Should the City Council, during the year, deem it for the interest of the city to offer for sale any portion of its unimproved lots, that permanent and substantial buildings may be erected thereon, which will improve the general appearance, and, at the same time, add to the taxable property of our city, it will be well for you to consider if that portion adjacent to the City Hall, at the corner of Hammond and Columbia Streets, may not be advantageously disposed of, at this time, when capitalists are seeking investments, and while we are obliged to resort to loans or excessive taxation. Some relief may be obtained by disposing, at so favorable a moment, of some of our vacant, unimproved real estate, which is not of much practical value to our city, leaving an abundance for all future wants for our public buildings.

PENOBSCOT AND KENNEBEC RAILROAD.

In the last annual address of my predecessor, it was stated that an amount of over-due bonds and coupons from the city to the P. & K. Railroad, as also a certain amount of undue bonds and coupons were unpaid and unprovided for, and had not been surrendered to the city. By an amicable arrangement between the parties, such an extension was granted as to allow the company to gather its resources and fulfill its positive engagements, and I am happy to state that all outstanding, over-due bonds and coupons have been surrendered, and the company are prepared to meet those coming due and payable to the 21st of April next to the amount of \$20,000.

The amount due the city for land damages of \$1,000, as also the amount of six notes of \$600 each, with interest, remain unpaid and over-due. What the intentions of the new railroad organization in regard to these are, I have no means of judging. But at the next meeting of the directors of that corporation, I am assured the matter will be somehow adjusted and settled.

UP RIVER RAILROAD.

By an act of the Legislature, passed March 20, 1860, Bangor was authorized to grant its credit for the construction of a railroad to Mattawamkeag, to the amount of \$850,000, provided that within two years from the passage of the act, it should be approved by a two-thirds vote of our citizens. This act would have expired by limitation on the 20th of March last, but at a meeting of our citizens, called for that purpose, on the 19th of March, 1862, the vote was against granting this aid. Since then nothing has been done, except keeping the charter alive, and the hope still lingers that ere many months some steps may be taken to put into that upper country such facilities for communication as may render our border frontier more secure from foreign invasion, and open a market to the Penobscot, which our Aroostook neighbors will joyfully hail and which will prove advantageous to all sections.

Gentlemen of the City Council:

I have thus called your attention to the condition of our municipal affairs as I now understand them, and have made such suggestions as I deem for the interests of the city. Other suggestions will be communicated from time to time as circumstances may require.

A very important duty, as regards the interests of the city, will devolve upon you in the selection of subordinate officers to complete the organization of the City Government.

If the duties of an official have been honestly, promptly and faithfully discharged; if justice and courtesy have been impartially bestowed; if he has not perverted the power delegated to him, prejudicial to the interests of those who contribute to his support; if he is loyal and true to his government, he may reasonably expect a continuance of public favor. *Merit and peculiar fitness* for office will, I am persuaded, be the only test you will apply in your selections.

In mingling my congratulations with yours in view of the general prosperity of our municipal affairs, let us remember the position of honor and responsibility we have assumed. The moral influence of our city is second to none in the State. The intelligence and genius of her mechanics, the commercial sagacity of her merchants, with the financial talents of her people, will compare favorably with those of any other section. Yielding a ready obedience to the times, proud of her sacrifices, glorying in the success of her brave sons, responding cheerfully to the Government, she looks steadily forward to the hour when the Supreme Ruler of the Universe shall in his wisdom still the storm and tempest, and out of all this seeming chaos bring order and peace—one people! one nation!

SAMUEL H. DALE.

TREASURER'S REPORT.

TREASURER'S OFFICE, }
March 14, 1863.

To the City Council :

The undersigned respectfully submits to the City Council the following statement of the Receipts and Disbursements of the Treasury for the financial year 1862. Also, a statement of the City Debts to and from the City, so far as appears by such records and documents as are in his possession.

SETH PAINE, TREASURER.

|                                                                                                                                                                                                                    | <hr/>        |
| Contingent credit,                                                                                                                                                                                                 | \$138,315 35 |
| Total disbursements,                                                                                                                                                                                               | \$187,166 86 |

The contingent Fund has credit on account of Loans for the sum of \$8,440 more than has been charged to the fund on that account during the year. This sum should, therefore, be charged the fund to show its true standing at this date.

The account being thus adjusted, we find the fund unexpended in the sum of \$5,157 53.

By reference to the foregoing statements it will be seen that the standing of the several departments at the close of the present financial year is as follows:

|                             |  |             |
|-----------------------------|--|-------------|
| Contingent fund unexpended, |  | \$5,157 53  |
| School " "                  |  | 1,223 99    |
| Pauper " "                  |  | 1,445 66    |
| Salary " "                  |  | 1,621 57    |
| Fire " "                    |  | 628 07      |
| Watch " "                   |  | 201 55      |
| Highway " "                 |  | 80 96       |
|                             |  | <hr/>       |
|                             |  | \$10,359 33 |
| Interest fund overdrawn,    |  | 1,414 16    |
|                             |  | <hr/>       |
| Total unexpended,           |  | \$8,945 17  |

The Joint Standing Committee of the City Council on Accounts and Claims, have examined the foregoing account of the City Treasurer for the past municipal year, and find the same satisfactorily vouched and correctly cast.

SETH PAINE,

*Treasurer and Collector.*

R E P O R T

OF THE

SUPERINTENDING SCHOOL COMMITTEE.

---

*To the City Council of Bangor :*

The Superintending School Committee of the City of Bangor respectfully submit the following as their Annual Report of the administration of the Department of the Public Schools for the School Year 1862-3.

Accompanying this Report is a Tabular View, which exhibits in a compact and convenient form the names of all the Teachers and Assistant Teachers employed during the year, with the compensation of each ; the number and grade of all the Schools, both annual and semi-annual, or Suburban ; the length of each school, and the whole and average number of scholars in attendance at the Summer and the Winter Terms respectively.

The Committee, after being duly qualified by taking the required oath, was organized by the election of Frederick E. Shaw, Esq., as Chairman, and Joseph H. Perkins, Esq., as Secretary.

The period of time which elapses between the annual election of the Superintending School Committee and the day when the first term of the annual schools should commence is quite brief, being usually but one week. During this time some of the more important duties of the Committee must be performed : such as the organization of all the annual schools, by the examination of applicants for employment as teachers ; the election of the teachers of all the annual schools ; the examination and transfer of scholars to the several higher grades ; also, the making of the ordinary repairs of school-houses, in readiness for the commencement of the schools. In respect, however, to the last named duty of the Committee, we would state that the present Committee will leave all the school-houses in good repair, and in readiness for the commencement of the schools by our successors. Nothing,

in this respect, will be left for them except to direct the putting in order of the walks at most of the school-houses, which service is wholly impracticable until the disappearance of frost.

#### FINANCES.

Immediately after the organization of our Board, our Finance Committee, by invitation, had an interview with that of the City Council, to consider the subject of appropriations for the Public Schools. The Committee of the Council stated that the City Council intended to make a material reduction from last year in the amount of appropriations for all the Departments of the City Government, and requested our Committee to exhibit estimates, with this understanding, for the Department of the Public Schools for the current year. They did so, and after a careful examination of the expenditures of the past year, the Committee arrived at the conclusion, that, with an appropriation of \$15,000, (which was \$2000 less than that of the previous year,) we could administer the School Department this year without serious detriment to the best interests of the schools, or deterioration of the school property. Our estimates for repairs of school-houses, and the cost of superintending those repairs, formed no inconsiderable item in our scheme of economy.

Our estimates were approved by your Finance Committee, and the sum thus agreed upon, to wit: \$15,000, was appropriated by the City Council for the support of the Public Schools for the ensuing year. The Council also appropriated, for the compensation of the Superintending School Committee, the sum of \$550, which is a reduction of \$350 from the sum paid for that service during the preceding year.

With these reduced appropriations, the Committee undertook the administration of the School Department.

We present below a tabular statement of the appropriations and expenditures of the current and the previous year:

|                                      | 1862-3.     | 1861-2.     |
|--------------------------------------|-------------|-------------|
| Appropriations,                      | \$15,000 00 | \$17,000 00 |
| Bank Tax,                            | 2,026 95    | 1,909 75    |
| Total,                               | \$17,026 95 | \$18,909 75 |
| Amount Expended,                     | \$15,802 96 | \$18,722 88 |
| Balance unexpended,                  | 1,223 99    | 186 67      |
| For Superintending School Committee, | \$550 00    | \$900 00    |

The following are some of the particular classes of expenditures:—

|                           | 1862-3.     | 1861-2.     |
|---------------------------|-------------|-------------|
| Compensation to Teachers, | \$13,490 49 | \$15,060 66 |
| For Fuel,                 | 1,341 38    | 1,244 60    |
| Books and Stationery,     | 83 55       | 137 50      |
| Ordinary Repairs,         | 690 54      | 1,596 66    |

|                         |         |                  |                    |
|-------------------------|---------|------------------|--------------------|
| Extraordinary Repairs,  | (none.) |                  |                    |
| Furniture and Supplies, | \$50 22 |                  |                    |
| Miscellaneous Bills,    | 124 53  |                  |                    |
|                         |         | 174 75           | 666 71             |
| Ornamental Trees,       |         | 17 25            | 16 75              |
|                         |         | <u>15,802 96</u> | <u>\$18,722 88</u> |

The classification we have made above of the expenditures of 1862-3, is not so minute as is that of the preceding school year. Opposite to our classes of "Extraordinary Repairs," (of which there were none this year,) "Furniture and Supplies," and "Miscellaneous bills," we have placed the gross sum for 1861-2, of \$666 71, which, added to the several other sums classified, gives the whole amount expended, namely:—\$18,722 88.

The amount of bills outstanding against the School Funds at the commencement of the present year and paid from this year's fund, is about \$490 00, nearly all of which was for fuel. The amount of bills now outstanding is about \$150 00, about one-third of which is for the engraving of Diplomas.

The amount of fuel now remaining at the several school-houses is nearly as large as it was at the close of the preceding school year. It is properly prepared, housed, and secured under locks; and is estimated to be sufficient for the use of nearly all the schools until December.

The expenditures for the repair of damage to school property, caused by wanton and malicious persons, which was mostly in the breaking of window glass, are estimated to be less than those of former years.

It will be observed that the amount of money at our disposal the present year unexpended, is unusually large—amounting to over \$1,220 00. Our explanation of this, if any explanation be needed, is that the actual expenses for repairs have very much fallen short of our estimates at the commencement of the year. The expenses on account of books to be furnished indigent scholars; of furniture and supplies of school-houses, and those included in "Miscellaneous Bills," have also fallen some short of the estimates. Our estimate of the "School Fund" from the Bank Tax was upon the same sum as the preceding year. It exceeds that sum this year by \$117 20. Our estimates for compensation to teachers differ not materially from the amount paid; for it was expected in the beginning of the year, that to keep within the scope of the reduced appropriations, some reduction in compensation to teachers must be made. Other plans of economy were to abbreviate somewhat the length of the school terms, and to discontinue one or two schools of the lower grades by apportioning the scholars among other schools of the same grade in the vicinity.

After careful inquiry and mature deliberation, the Committee, early in the year, established the compensation of the teachers of all the annual

schools excepting the Intermediate and Primary, at about 10 per cent. less than the amount paid the previous year—those schools to be taught the same number of weeks as in the preceding year. No reduction was made in the compensation of the teachers of the Intermediate and Primary schools, but the term of these schools was shortened two weeks, and none in that paid to the teachers of the Apprentice and Suburban Schools. The term of these last named schools was of the same length as in the preceding year. Two Intermediate schools and one Apprentice school were dispensed with this year, but all the scholars belonging to them were supplied with instruction in other schools of corresponding grade.

In conclusion of this financial topic, the Committee would respectfully state that they intended to expend all the money placed at their disposal for the support of the public schools; and that their only regret, after so economical an administration of the School Department, is, that it was impracticable to ascertain the large unexpended balance in ample season to make a just and meritorious distribution of it among those teachers whose compensation would have been inadequate for the service rendered had it been equal to the rates of the preceding year.

#### TEXT-BOOKS.

The 3d Section of "An act to amend chapter eleven of the Revised Statutes relating to Common Schools," approved March 15th, 1862, recites as follows:

SEC. 3. Sec. 49 of said chapter is amended by adding to the fourth item the following; "And it shall be the duty of Superintending School Committees to select a uniform system of text-books to be used in the schools of the town, due notice of which selection shall be given; and any text-book hereafter introduced into the schools of any town, shall not be changed for five years from the date of its introduction, unless by vote of the town," so that item fourth of said forty-ninth section will read as follows: "Fourth, direct the general course of instruction, and what books shall be used in the schools. And it shall be the duty of Superintending School Committees to select a uniform system of text-books to be used in the schools of the town, due notice of which selection shall be given; and any text book hereafter introduced into the schools of any town, shall not be changed for five years from the date of its introduction, unless by vote of the town."

As there is some ambiguity in this act, the Committee will here state (what they regard as "due notice") that they have discarded but two text-books since the approval of the act, namely: those of Algebra and Geometry in the High Schools, and have substituted for them, for the purpose of the required "uniform system of text-books," Greenleaf's New Elementary Algebra, and Greenleaf's Elements of Geometry. All

text-books for instruction in mathematics in all the grades of our public schools, as now authorized, are of the "uniform system" or series of Greenleaf.

The Committee will here remark that all changes in text-books that have been ordered for many years past were without expense to the city or the parents of the scholars, the publishers having, in all cases, taken the partially worn books for themselves in even exchange, kind for kind, for the new ones adopted; and in many instances provided for the sale of the newly adopted books at the bookstores in this city, at cost, for a limited period after the exchange.

#### DIPLOMAS.

Several years ago the Committee ordered the awarding of Diplomas to the meritorious graduates of the two High Schools, but the order was not carried fully into effect until this year. Last year, for the first time, Diplomas were awarded, but they were only in manuscript. The present Committee have established the form and substance of a Diploma, and procured engravings of it in a style which commends itself to the favorable criticism of persons of good taste in such matters. It is stereotyped and electrotyped in two parts, so that impressions may be taken of Diplomas for graduates of either of the High Schools, at pleasure. Impressions may be taken on parchment by our common printing presses, and in a style of neatness not distinguishable from lithographic copies.

The entire cost of the plates does not exceed \$55 00. With these plates the annual expense of Diplomas will not exceed 40 cents for each graduate receiving it.

The Committee feel confident that the beneficial influence on the scholarship and deportment of the under-graduates of our High Schools, resulting from the public conferring of Diplomas at the Annual Examinations on the meritorious graduates, by the Superintending School Committee, in the name of the City under its official seal, and approved by the instructors of those schools, will sufficiently justify the Committee in thus carrying out the order of a former Committee.

We here insert the subject-matter of a Diploma in the form as engraved for a graduate from the High School for Girls:

#### HIGH SCHOOL FOR GIRLS.

##### CITY OF BANGOR.

This Diploma is presented by the Superintending School Committee of the City of Bangor, in behalf of the City, to as a Certificate that she has completed the course of instruction prescribed in the (Classical or English) Department of said School, and that after a thorough examination she is hereby awarded the highest honors of the school for Scholarship and Deportment.

In testimony thereof the Committee have hereunto affixed their signatures, together with the Seal of the City, on this      day of      in the year of our Lord one thousand eight hundred and

[Ribbon with Seal attached.]

#### THE SCHOOL TEACHERS—THEIR EFFICIENCY AND COMPENSATION.

These laborers are peculiarly worthy of their hire. The corps of public school teachers in this city numbers about eighty. The amount of labor which they perform annually, in the intellectual and moral training of our youth, is almost inconceivable to those not officially connected with the schools. Interest and pride alike inspire in them a commendable rivalry, especially those in the same grade of schools. Each teacher in the respective grades strives to excel the other in the excellence of their schools, and to secure the approbation of the Committee and the parents of their pupils. They are more deeply and immediately interested than any other persons in the preservation of good order in their schools. Inability to do this is fatal to the prospects of a teacher, as much so as incapacity to instruct youth. The task of the successful government of a school of fifty to seventy or a hundred youth, from half as many different families, is, of itself, enough for one person.— Superadd to this the task of instructing youth in a variety of studies, which can be done successfully only amidst quiet and good order, and it is seen at a glance that upon a school teacher are imposed two tasks widely differing in their nature, yet so allied in the conduct of a school that a failure to perform either contemporaneously is fatal to the hopes and aspirations of those who attempt it. No person can be retained in employment as a teacher after incompetency for either of these tasks is demonstrated to the Committee. The two-fold task must be successfully accomplished, or the much desired and in most cases much needed employment for wages is necessarily terminated.

Other considerations in respect to teachers have weight. The large expenditure of money, time and severe application requisite to qualify one for the profession of school-keeping is not to be thrown away by a failure to achieve success through a want of industry and courage to encounter the trials and ever recurring obstacles that lie in every teacher's path. All the motives are for success in the profession. Success ensures the desired employment, and this service should, above all others, receive an adequate reward.

The Committee have reason to be proud of the corps of teachers in the service of the schools during the past year. Parents and pupils alike

have reason to be grateful to them for the fidelity and zeal with which they have performed their daily tasks.

All the teachers whom the Committee have retained in the service are competent, faithful and efficient, though there may be shades of difference among them in the degree of their efficiency and usefulness. The greater portion of them rank as first class teachers, and have given entire satisfaction; the others rank high above mediocrity, and are improving daily as they have opportunity for more experience.

A considerable number of these teachers have habitually devoted to their pupils more hours of labor daily than the prescribed number of hours for the daily sessions. Assistance to pupils in individual instances, and the recitation of omitted lessons by absence, or of lessons not fully prepared through idleness or indifference, are usually postponed till after the usual school hours. This practice prevails much more extensively in the three higher grades of schools, though it is quite common in the lower grades; yet no one of these teachers has ever asked for or received any compensation for this voluntary yet valuable extra service.

The conceded superiority of our Public Schools as a whole is attributable to the good success of Committees in their efforts to secure competent and faithful teachers. The Profession of Teachers is honorable, and is elevated in the degree of encouragement held out to it by the government, through its agents, the Superintending School Committee.

Such being the qualifications, character, and good success of our Public School Teachers,—all but two or three of whom are of our own citizens and households, and were educated for their profession in our own schools,—it was with extreme regret that the Committee were obliged to reduce the amount of their compensation for service the past year, which was imperative in consequence of the reduction in the amount of the annual appropriation for the support of the Public Schools at the commencement of the year. Their compensation before this reduction was fully merited for the service rendered. It has this year been too low, and for stronger reasons than those existing at the commencement of the school year, should in simple justice be materially increased. To effect this a large appropriation, of a sum certainly not less than that of former years, should be made hereafter. The Committee earnestly commend these considerations and this recommendation to the attention of the City Council.

The Committee should not omit to mention here that, in the beginning of the year, when the determination of the City Council to reduce the amount of the appropriation for the Schools as well as the other departments of the city government, in consequence of the disturbed condition of our national affairs and the consequent extra demands upon the city treasury and the citizens, was made known to the public, our teachers

were not behind the foremost of our citizens in self-sacrificing patriotism. They cheerfully submitted to the prospective reduction in the amount of their compensation, which was even then inadequate to the service rendered, and expressed their willingness to bear their share of the new burdens and sacrifices enjoined upon all good citizens, in a patriotic support of the government. While the Committee were considering the expediency of diminishing the length of the school Terms a few weeks, in consequence of the reduced appropriations, several of the teachers voluntarily proposed to keep their schools out without compensation for the additional time above what was required by the Committee.

The Committee will add that they have practiced the most rigid economy in all of the other departments of the Schools, in order to make the reduction in the amount of teachers' salaries as small as possible.

The reduction in the compensation of both the salaried teachers and those employed by the week, during the past year, was about 10 per cent. on that paid the previous year. To some persons, who do not properly consider all the circumstances, this sum may seem small, not unjust, and not detrimental to the highest success of our Public Schools; but it is large when made on a former inadequate compensation, and in times when the necessary expenses of living are greatly increased.

The theory of our institutions is compensated labor. If the labor of our public school teachers be not properly classed in that of the industrial pursuits productive of material wealth and prosperity, it is simply because it has just claims to a higher rank, to the higher domain of intellectual and moral culture, of the arts and sciences, which lie at the foundation not only of all industrial pursuits but of all the professions in life. The farmer, the mechanic, the merchant, the artist, the statesman, the professional gentleman, all were beneficiaries of our free public schools, and from them derived the elemental qualifications of success.

Are not our public school teachers, then, above all others worthy of their hire? Should not the compensation of their labor be the last to encounter the implacable pruning-knife of retrenchment and reform in our public expenditures?

#### THE ANNUAL EXAMINATIONS—SUCCESS OF THE SCHOOL YEAR.

The annual examinations of the Public Schools commenced February 20th, and continued, with but four day's interruption, until March 7th. They were as thorough as ever before. The attendance of parents and friends of the scholars at the examinations was generally larger than formerly. The deep interest which a large number of our citizens have heretofore taken in the welfare of our Public Schools, is, happily, unabated—it has rather increased from year to year, and necessarily exerts a most salutary influence on both the teachers and their pupils. The

largest freedom is granted to citizens and strangers to visit our schools, not more at the public examinations than at all other times.

It is not from the annual examinations alone that the Committee form their judgment of the character and progress of the schools. In the discharge of their duties, the Committee make frequent visits to the schools, advising with and counseling both teachers and pupils on the distinctive rights, duties and mutual obligations of both. Their visits are always unannounced, and they much more frequently see the schools in their every-day than in their holiday dress.

The Committee are happy to be able to report an eminently successful school year. During no previous year, so far as their knowledge extends, have the Public Schools been so generally free from disorder within, and from complaints against teachers from any source. Quietly and without ostentation have the teachers and pupils performed their respective duties. Our teachers have been as faithful and efficient in their labors as they were when their compensation approximated nearer than it has the past year to a just and merited standard. No abatement in their former efforts to advance their schools has been discovered in a single instance. The fruits of their labors are abundant, plainly discoverable, and are hereby duly acknowledged.

#### SPECIAL MENTION OF SCHOOLS.

The HIGH SCHOOL FOR GIRLS has, during the past year, fulfilled the most sanguine expectations of the Committee, the Teachers, and so far as we are advised, of all the friends of the school.

During the Summer vacation, Mr. SHEPHERD resigned his office as Principal, to enter into the military service of the country, and Mr. ROBERT P. BUCKNAM, then an instructor in the East Maine Conference Seminary at Bucksport, was elected as his successor. The school suffered no detriment, nor did it lose so much as a day by the change of its principal. It has continued on with the eminent degree of discipline and success which characterized its former administration. This fortunate transition of the school from the charge of a successful and well-approved teacher to that of an entire stranger, was doubtless attributable, in a great measure, to the assistant teacher, Miss H. M. Thurston, who, by the gentleness and geniality of her whole intercourse with her pupils, and by her unremitting devotion to their highest welfare and success in their studies, had secured the unlimited confidence and respect of all. The Committee, in expressing their entire satisfaction with the services of Mr. Bucknam thus far, will not withhold an expression of their very high appreciation of the services of Miss Thurston as the assistant teacher.

The annual examination of this school occupied three half days, at the conclusion of which a Diploma was conferred upon each member of the Senior and graduating class, ten in number, by a unanimous vote of

the Committee at a special meeting, and in accordance with the recommendation of the teachers. Nine of the Diplomas certify to a completion of the prescribed course in the Classical Department.

The members of the graduating class of this school have, by their enterprise and the favor of liberal citizens, laid the foundation of a valuable School Library. Among the works already obtained is a full set of the new American Encyclopedia, which is kept upon the teacher's table for ready reference.

The High School for Boys has continued through the year under the charge of Francis E. Tower as Principal, and Miss Susan M. Hallowell as Assistant.

The Committee are happy to be able to report this school in a highly satisfactory condition in respect to discipline and thoroughness of instruction. From extreme and most annoying disorder which prevailed a portion of the preceding year under the charge of Mr. Parker, and for a short time after it was placed under the charge of Mr. Tower, it has been reduced by a prompt and judicious exercise of authority, to proper subordination and discipline. Such happy results were anticipated by our predecessors as expressed in their Annual Report.

This school was subjected to a very thorough examination, occupying two half days, and the result was highly satisfactory both to the Committee and the large number of visitors present.

The regular exercises of the examination were interspersed with readings of original pieces, select recitations, and some very finely executed solos and duetts by members of the school with piano accompaniment by Miss Hallowell, the accomplished Assistant. The school has been made socially as well as intellectually attractive to its pupils.

The members of this school have through the generosity of citizens laid the foundation of a High School Library, which will be in time a valuable acquisition to the school.

It is a matter of sincere regret that this school for many years past has not been more extensively useful. The number of scholars in it has been relatively quite small ; but the cause of this, it should be stated, cannot be in the fact that during limited portions of those years good order was not maintained, for the attendance has been small while the school was under the best discipline and instruction as well as when it became unattractive by a lack of both. Nor is it in any alleged lowering of the grade of the school. The course of study now required is as high and complete as it ever was. It admits of a thorough preparation for admission to any New England College, and, of course, to any college in the Union, even one or two years in advance. It offers optionally a merely English or a Classical and English course. This school has also the use of a well selected Chemical and Philosophical

Apparatus in common with the High School for Girls. The transference of a few boys from the first class in the Select School at the commencement of the past two years, to this school as a means of relieving the former and filling up the latter, has not deteriorated the grade of the High School nor wrought any change whatever in the course of study or the progress of the regularly admitted classes. The propriety of such premature transference of boys to the High School has been questioned, but it was concurred in as a temporary expedient—a necessity which may not often occur.

Several citizens who take a deep interest in the welfare of our Public Schools have suggested the propriety of raising the grade or course of study in the High School still higher, and retaining the first class in the Select School another year for preparation to enter the High School thus arranged.

What then is the cause of the meager attendance in this school of the highest grade, and with a prescribed course of study so complete?

It is possible that, to the unattractive location of the school-house and the rather unprepossessing appearance of the school-room, viewed in both respects in comparison with the High School rooms on Abbott Square, may be attributed a very small part of this deficiency in numbers; but the principal, if not the whole cause, is in the disinclination or inability of many parents to give their boys the full benefits of this school. They content themselves with the attainments acquired in the Select School, or only a limited course in the High School, then finally remove their boys from the school to the work-shop, the counting-room or to some other occupation—a few, unfortunately, to no useful occupation whatever.

It is certainly desirable that all the boys who accomplish the course of study prescribed in the Select School should also avail themselves of the High School course; but however desirable, it is unfortunately found to be not practicable. Circumstances entirely beyond the control of the Committee and the teachers render it so. A few of the graduates from the Select School enter the High School and remain there only a short time; some leave and return to suit the convenience of other occupations; a few others do not enter it at all. But a large majority of these graduates do avail themselves of the whole or nearly the whole course of study in the High School.

But notwithstanding this deficiency in numbers ordinarily in attendance at the High School for Boys, this school can by no means be dispensed with, nor merged into other schools: nor should its rank and course of study be depreciated in the least for any temporary expedients. Such a school as this constitutes an integral part of our excellent and well matured system of Free Public Schools. A considerable number of our young men avail themselves of its excellent privileges, benefits

and honors, and therein qualify themselves for higher positions in life and greater chances of success in whatever employment or profession they may engage, than those do who are limited to the course of study in the Select Schools. Socrates who in his old age was a teacher by profession, on being taunted by an illiterate by-stander for the small number of pupils in attendance at his Academy, replied—"It is true I have but few pupils,—only one here to-day as you see, but *he* is PLATO!"

The Select School for Boys, under the charge of Mr. Burleigh Pease, has met the entire approbation of the Committee. It is a well-ordered and progressive school. It is, as will be recollected, a union of two schools which was effected the previous year.

The two Select Schools for Girls, the one under the charge of Mr. Joseph E. Littlefield, with Miss Helen M. Fox as assistant, and the other of Miss Deborah B. Hersey, have fully sustained their former high reputation. The discipline and thoroughness of instruction in both are apparently the highest attainable.

The six Grammar Schools, three for Boys and three for Girls, have been conducted with great ability, thoroughness and success. Special mention of each school is superfluous. The teachers have all been indefatigable in their efforts to elevate their schools respectively to the highest standard of excellence. The school for Boys on Spring Street, and that for Girls on Union Square, have been more successful than they were the previous year under the charge of the same teachers.

These Grammar Schools occupy a very important position in our grade of Public Schools. They mark the half-way course, being the third from the highest and lowest grade. They are the High School to many of their pupils; for it is observed that a considerable number of the graduates from these schools do not enter the Select Schools. But they are not withdrawn from school at this stage of the course offered by the city because of any defects in the Select Schools, for these last are under the most thorough instruction and discipline. It is to be observed also that not all the graduates from the Select Schools enter the High Schools. The number of the schools of the three higher grades respectively, namely, six Grammar, three Select, and two High Schools, indicates about the relative number of scholars who avail themselves of the full course of study provided by the city. Whatever and however various the causes of this decline in the number of scholars who complete the course prescribed in the Higher Schools, none of them are attributable to any defects in the grades, the course of instruction, or the character of the schools.

The admonition deduced from these remarks is addressed exclusively to the parents and guardians of our youth who reach the Grammar School grade. Their highest interests and honor, their highest regard for the future welfare of their children, all enjoin upon them special

efforts to secure to the youth entrusted to their care the full benefits of our excellent system of Public Schools,—a system which is the fruit of the more than parental care, the patient study, the collective wisdom guided by experience, of the school officers of this city since the days of the revered ABBOTT. The system is complete in itself, and requires for its full development, not innovation, but liberal appropriations, the employment of skillful and faithful instructors, and a Board of competent and ever watchful school officers. Nothing more will then be wanting but the will and fixed purpose of all parents in the city to secure for their children the full benefits of our Free Public Schools.

The Intermediate and Primary Schools are numerous, and well filled. They have been provided with the best teachers attainable by the Committee, and have been conducted with gratifying success. The annual examination of them attracted throngs of the parents and friends of the pupils, many more than could gain admission to the school rooms. For statistics of these, as for all the other schools in the city, we refer to the comprehensive "Tabular View," appended to this report.

The Semi-Annual or Suburban Schools have been generally successful and satisfactory to the Committee and the citizens of the Districts.—The Committee were not fortunate, in the first instance, in the selection of the teachers for two or three of the schools for the Winter Term, but more successful and acceptable teachers were substituted without creating animosities or disturbance as soon as practicable. Nearly all the teachers supplied to these schools for both terms had more or less experience in the art, and were generally the free choice of the citizens of the respective Districts.

But one Apprentices' School was opened the past winter. It was well attended, with the exception of the last few days of the term. It was kept in the brick school house on State Street, by Mr. George A. Snow, of Brewer, who was in charge of one of the two Apprentices' Schools the previous winter. His services were entirely satisfactory to the Committee.

#### CASES OF ALLEGED SEVERE PUNISHMENT.

But two instances have occurred during the year of complaints preferred before the Committee against teachers for alleged excessive and cruel punishment. One occurred in an Intermediate School. It was brought before the Committee, and dismissed after a full hearing, as without just cause.

The complaint in the other case was of a graver nature, which having been brought before the Police Court and having attracted to a considerable extent the attention of the public, we briefly state here, solely for the beneficial influence it will inevitably exert on the conduct of the pupils of the Public Schools generally.

The father of a member of the High School for Boys alleged very severe and brutal treatment of his boy by the Principal of that school, and asked the Committee to hear the evidence and pass judgment on the complaint. The Committee by appointment gave a full hearing to both parties. The father and his boy with four or five of his schoolmates who saw the transactions, were present as witnesses; also Mr. Tower, the Principal.

The substance of the case as there presented, was this: The act complained of was very severe and brutal treatment of the scholar by the teacher, in striking him a heavy blow on the head with a ruler. The boy stated that he remained after the school was dismissed, at the request of Mr. Tower, and was told by him that he was going to punish him for being sent out of the class-room, and asked him to hold out his hand for a feruling. The boy told the teacher that he had done nothing, and would not be punished unless he knew what he was to be punished for. He then appealed to a class-mate who was in the class-room when he was sent out, and was standing near, to say if he whispered. The reply was, he heard him muttering something with his lips. The teacher then took the boy's arm and the boy instantly seized the teacher, when the latter struck the blow on the head, as complained of. The boy further stated that the wound caused by the blow was very severe; that it bled a good deal, and that a portion of the time of the next day and night he felt severe pain in the head. He stated further that he had no physician to dress the wound, and was not confined to his home on account of the injury. It did not appear that the cranium was fractured in the least. Two or three other class-mates stated that they did not hear the boy whisper, and that he was sent out of the class-room just as he was taking his seat for the recitation.

Mr. Tower, the Principal of the school, submitted his statement of the affair, which was in substance,—that on the occasion referred to he requested the boy to tarry after the school was dismissed, as is his custom when he proposes to correct or punish a refractory scholar; that he then told the boy that he was going to punish him for the violation of order, for which he had been sent out of the class-room, and requested him to hold out his hand for punishment with a ferule. The boy replied saying—and repeating it in harsh language—that he would not be punished. He then reminded the boy that he had several days previous given notice to the whole school that as there had recently been several violations of order in the class-room he should punish every boy who should after that be sent out by the assistant teacher. He stated that the blow given on the head of the boy was brought on by the boy himself, by violently seizing him at the instant of taking the boy by the arm, and attempting by forcible means to resist the punishment which he intended to inflict, which was simply by feruling on the hand.

In answer to an interrogatory by the Committee the boy admitted that the teacher did not intend the blow on his head (so far as he knew) as a part of the punishment.

The parties having left the Committee room the Committee was unanimous in the opinion, that no vote of censure of the teacher for the blow on the head (for which alone the complaint was made) should be passed. They regarded the blow as wholly unpremeditated and brought on by forcible resistance to a punishment entirely proper in itself.

But the Committee were left in some doubt, whether the teacher had or not with sufficient clearness made known to the boy the offense for which he was to receive punishment, and consequently laid the whole subject on the table till opportunity was had for further inquiries of the parties and the assistant teacher on this point.

Meanwhile, and but a few days after, this boy and a confederate who was formerly a school-mate, but not then a member of the school, committed a violent and premeditated assault upon Mr. Tower while on his way from his boarding house to his school. For this offense the two assailants were brought before the Police Court, and after examination were ordered to recognize in \$300 each for their appearance at the ensuing February Term of the Supreme Judicial Court. A bill of indictment was found against them and on arraignment they pleaded guilty.

In pronouncing sentence, His Honor Judge KENT, presiding, said :

The offense for which these respondents stand convicted is in some respects peculiar and aggravated. The government has waived all the charge except that of an assault and battery. The respondents have pleaded guilty to that. The facts as I gather them from the examination of witnesses, are that Mr. Tower was Master of the High School for Boys in this city—that on the morning of the 22d of January, as he was walking in the streets, he was assaulted by the two respondents violently, but not with weapons; that he was struck by them several times, and after leaving them and crossing the street, he was followed by both and again assaulted, and either fell or was thrown down by them and again injured by them, when down. The extent of his injuries was not so serious as at first feared, but certainly they were not trifling. One of the boys was then a scholar in his school; the other had been, but had left a year or more before this assault. They both appear to be stout and athletic boys of 17 or 18 years of age, and nearly of the same size of Mr. Tower.

I confess I have been in great doubt as to my duty in fixing upon the sentence to be awarded. It is somewhat startling to find that we have among us boys of their age, sons of, I believe, respectable parents, born and educated in our city, which boasts of its civilization and morality, who could and did, coolly, and with premeditation and concert, meet a respectable, quiet citizen, the head of one of our High Schools, as he was peaceably proceeding to his school-room, through a public street, and there with violence and with the intent to insult him and do him great personal injury, assail him with all their strength and attempt to carry their brutal purpose into execution, and actually to a very considerable extent carrying it out.

When such things come to our knowledge we may well ask, who is in fault? If I could believe for a moment that there was any considerable number of our citizens who would justify, excuse or uphold our children in such exhibitions of reckless violations of the peace of our city and good order and decent behavior, I should be forced to look more directly to a kind of punishment that would in its nature be particularly calculated to restrain others from like offenses.

The doubt which I alluded to has been, whether I should sentence these boys to imprisonment in the County Jail or House of Correction, or impose a fine.

Whatever may have happened in the school room between the master and one of the respondents is not before me. It is quite certain that it could not be anything which could in any way excuse or justify this assault. If there had been any wrong, the law was open for redress. As to one of the respondents, he had had no connection with the school for a long time.

But I cannot but see and feel that these respondents are young, inexperienced, and possibly have never been controlled as their best good may have required; that so far as the Court knows, this is the first offense of which they have been accused; that incarceration in the common jail might be a lasting stigma upon them, and possibly operate rather to make them reckless and indifferent to their future course and character than to repentance and reformation. I do not forget that they have pleaded guilty.

In view of the whole case, but not without misgivings and doubts as to my conclusion, I shall impose a fine only; but in such a sum that it may not be looked upon as nominal, but such as shall in some degree mark the convictions of the Court as to the magnitude of the outrage and the necessity of an example, and with the hope of the leniency of the sentence in this case will not be regarded as indicating a like leniency if there should be a repetition by these respondents or others of any similar lawless violence and inexcusable outrage.

Sentence each to pay a fine of \$75 to the use of the State.

Soon after the examination of the two boys before the Police Court, and while they were under recognizance, the boy who was punished at school caused Mr. Tower to be summoned before the Police Court to answer to the charge of assault at the school-room, as above described. After full examination, and arguments of counsel on both sides—the defendant's counsel citing the Statute law and many judicial decisions in similar cases of alleged assault—the complaint was dismissed and the accused discharged.

At this examination the assistant teacher, whose classes recited in the class-room, testified that this boy (the complainant) had been sent out of the class-room several times before the day of the alleged assault, for disorderly conduct. She could not make oath to more than six times during the year, but thought more than that. She also testified that before she left the school-house on the afternoon of the alleged assault, and before the boy was called up by the Principal for punishment, she fully informed Mr. Tower of the offense committed by the complainant in the class-room, and for which she sent him out.

Mr. Tower on being questioned by members of the Committee in relation to the question on which the Committee were left in doubt—whether he made known to the boy before he proposed to ferule him the offense for which he was charged—replied that he had the impression that he so stated to the Committee at the time of the examination before them. He stated that his assistant teacher did inform him of the offense committed by the boy in the class-room, and that the boy well knew for what he was to be punished.

At the next meeting of the Committee held after these inquiries were answered, the subject of the complaint preferred by the father of the boy was taken from the table and disposed of by a vote, that while the Committee regret the occurrence of the act complained of, they, in view of all the circumstances attending it, believe Mr. Tower is not deserving of the censure of the Committee.

The Committee have thus presented the facts in the case. It was the first instance in this city, so far as our knowledge extends, of the arraignment of one of our public school teachers before the Police Court for alleged assault on a scholar, or of an assault by a scholar upon the teacher out of school for alleged provocation in school.

None can regret more than the Committee do, either the severe blow which the teacher without premeditation inflicted on this boy, or the assault by him and a confederate on a teacher out of school. But, as the two cases of alleged assault were brought prominently before the public, through proceedings in the Criminal Courts, and elicited inquiries as to the relative rights and duties of the Committee and the public school teachers, the Committee are persuaded that a recital of the facts, in connection with the remarks of Judge KENT in pronouncing sentence as above stated, would serve as a wholesome warning against future offenses of the kind, and exert a most salutary influence in behalf of good order and necessary discipline in our Public Schools. It hardly needs to be stated here that had the blow complained of on the head of the boy been premeditated as a deliberate means of punishment for that offense, or any other offense however aggravated, the Committee would have lost no time in dishonorably discharging the teacher from further service.

#### MISCELLANEOUS SUBJECTS.

No new school house has been erected the past year. No more school room will probably be needed for several years. The Committee respectfully call the attention of the City Council to the school edifice on Prospect Street occupied by the High and Select School for Boys. The location is not eligible, nor are the school rooms attractive, particularly that occupied by the High School for Boys. The City Council is as competent, to say the least, as is the Committee, to determine the

expediency and propriety of erecting a new building for these schools upon a more eligible site.

The only other school room in the city that has, so far as we know, excited unfavorable remark during the past year in respect to its locality, is that in the basement of the school house on York Street. That room is in good order, and is as well lighted as either of the other rooms in that house; but it is in the basement. In this respect its location is not unlike the room occupied by Miss Hersey's Select School for Girls in Abbott Square.

The wood room adjoining Miss Thayer's Primary School-room in the house on York Street, should be opened and fitted up for a class-room. That school is always very large, but has no class-room for the use of the assistant teacher.

The whole number of schools that have been in operation during the past year is 57, namely: 2 High, 3 Select, 6 Grammar, 11 Intermediate, 18 Primary, 4 mixed Intermediate and Primary, 1 Apprentice, and 12 Suburban. All of them are Annual Schools except the Suburbans, which are Semi-annual, and the Apprentice which has but one term a year.

The whole number of Principal Teachers is 69; of Assistants, 9. Total, 78. Male teachers, 7, Female, 71.

The average attendance of scholars at the schools during both terms of the past year has been greater than it was the year previous.

In respect to repairs the Committee will state, that in no instance during the past year, so far as their knowledge extends, have the school-houses or other school property suffered any detriment from neglect to effect needed repairs in proper season. The damage caused by evil disposed persons has been comparatively light. A considerable portion of this has been by the breaking of windows. The windows on the river side of the Front Street school-house, on the road-side of the Central District and Hill-Side school houses, and in the brick house on State Street, have suffered most in this respect. Wooden shutters have been placed on the windows thus exposed in the three first named houses, and have been effectual in protecting the windows from damage.

The expenditures for school books for indigent scholars are considerably less than those for the same object last year, yet all the applications for books by such scholars have been granted. In a few instances members of the Committee have furnished the books on their own account, and given the applicants an opportunity to earn money enough to pay for them.

Two of the teachers were for a time much annoyed by the filling of their door-locks with gravel and other obstructions to the keys through the key holes. The Committee, aided by the teachers, as speedily as

practicable, detected the malicious boys who committed these acts, and caused the Police to visit them. These offenses have not been repeated since.

The Intermediate School on State Street, above Newbury Street, was discontinued at the commencement of the year, and the scholars belonging there were assigned without detriment or inconvenience, to the Intermediate Schools in that vicinage.

The Committee will remark in conclusion, that a vacancy has existed in their board since the resignation in August last, of Frederick E Shaw, Esq., who then entered into the military service of the country.

#### RECAPITULATION.

|                                                         |                   |             |
|---------------------------------------------------------|-------------------|-------------|
| Amount of appropriation,                                | \$7,000 00        |             |
| Special appropriation for repairs,                      | 500 00            |             |
| Received from other sources and paid into the Treasury, | 4,312 28          |             |
|                                                         | <u>          </u> | \$11,812 28 |
| Total expenses for the year,                            | \$10,366 62       |             |
| Balance in the Treasury,                                | 1,445 66          |             |
|                                                         | <u>          </u> | \$11,812 28 |
| Leaving unexpended,                                     | \$1,445 66        |             |

The chopping and hauling of the wood for the use of the Alms House, together with about one hundred and fifty cords distributed to persons outside, has been principally done with the labor and teams at that place.

For the number of days support of paupers in the Alms House, together with their nation, age and sex, we refer you to Schedule herewith annexed, marked A.

Also to Schedules marked B and C, for the number of commitments, days support, nation, age and sex, in the House of Correction and Work House, during the past year. Likewise to Schedule D, for an account of stock, tools, provisions, clothing, &c., on hand.

The number of families calling for support during the year, outside of the Alms House, is one hundred and fifty-nine, containing five hundred and seventy-two individuals. Americans, two hundred and thirty-one; Irish, two hundred and seventy-eight; French, nineteen; Scotch, seven; English, eight; Provincials, twenty-five; African, four.

The inefficiency of the brick cells in the male department of the House of Correction, required that they should be built anew. An appropriation was asked for by the Board of Overseers for that purpose, and was promptly made by the City Government, and the money expended for that purpose, and for lowering the wall of the main building connected with the cells, thus giving them a more airy and healthful appearance. This appropriation appears in our report under the head of special appropriation.

Never has any provision been made for the extinguishment of fire at the Alms House, a necessity which has been neglected too long, both for the safety of the inmates and of the buildings. We would, therefore, recommend that an appropriation be made to build a reservoir the coming season, on the Farm, and near the Alms House, that will hold water enough to put out any fire that may occur, and furnish all water that may be needed in and about the House.

To the satisfaction of the Overseers, has Mr. and Mrs. Gilman performed their duties as Superintendent and Matron of the different departments during the past year.

By different individuals has religious services been held at the Alms House, much to the satisfaction of all connected with the department.

Dr. R. K. Jones, City Physician the past year, has cheerfully performed his duties at all times in a very satisfactory manner.

All of which is respectfully submitted.

J. W. HUMPHREY, } Overseers  
EDWARD ELLISON, } of  
JONATHAN BURBANK, } the Poor.

Bangor, March 12, 1863.

## SCHEDULE A.

A list of names of persons who have received support at the Alms House, from March 1st, 1862, to March 1st, 1863, with their age, nation, number of days residence, health, deportment, &c.

| Names.               | Age | Nation.       | Days | Health.    | Deportment. | Remarks.    |
|----------------------|-----|---------------|------|------------|-------------|-------------|
| Cornelius Tobin,     | 75  | Irish,        | 365  | Lame,      | Good,       | Resident.   |
| Margaret Chase,      | 75  | American,     | 365  | Poor,      | do          | do          |
| Joseph Lambert,      | 67  | Col'd French, | 365  | Lame,      | do          | do          |

*To the City Council :*

GENTLEMEN—In accordance with my duty as Chief Engineer, I herewith submit a statement of the condition of the Fire Department of this City.

Since my last Report the Department has consisted as at that time, of one Steam Fire Engine, two Hand Engines, and one Hook and Ladder Company. The Hand Engines have been overhauled and put in thorough repair, and are now in better working order than ever before. The Steamer has worked to our entire satisfaction during the year, and has needed no repairs.

The Houses have been put in thorough repair during the last year, and are now in good condition; on the Houses of Nos. 3 and 6 but slight repairs were needed, but the House occupied by the Steamer had to be thoroughly overhauled and extensive repairs made, including an entire new Floor.

The Steamer and Tender have been hauled to the fires at an expense of \$160 00; and here I would strongly recommend that some new arrangement be made whereby Horses for this business can be obtained in a prompter manner than during the past year; in many cases the Engine has been kept waiting nearly half an hour, and it is well known that five minutes work of an Engine at the beginning of a fire is often the means of saving thousands of dollars, and therefore I urge it upon you that some new arrangement should be made.

The whole number of fires and alarms during the past year is thirty-five.

|                   |          |
|-------------------|----------|
| Number of Fires,  | 25       |
| Number of Alarms, | 10       |
| Total,            | <hr/> 35 |

Of the above fires the causes, so far as ascertained, were as follows, viz :

|                     |       |
|---------------------|-------|
| Incendiarism,       | 2     |
| Defect in Chimney,  | 3     |
| Burning of Chimney, | 1     |
| Accidental,         | 12    |
| Unknown,            | 7     |
|                     | <hr/> |
| Total,              | 25    |

By referring to the list of fires it will be seen that the losses have been much smaller than last year, which may in a great measure be attributed to the very prompt and efficient manner in which the Foremen have discharged their duties.

In the said Schedule will also be seen the amount of losses by said fires as near as can be ascertained.

There has been purchased for the use of the Department 500 feet of leather Leading Hose, viz: 250 feet of John Agnew, of Philadelphia, at a cost of \$292 75, and 250 feet of J. L. Shaw & Co., of Portland, at a cost of \$270 00; also Rubber Suction for Nos. 3 and 6, at a cost of \$79 91 each. It will be necessary to purchase 1000 feet more Leading Hose this season, and I would recommend that it be purchased of J. L. Shaw & Co., of Portland, as their Hose is cheaper than the Philadelphia Hose and are equally as good. There has also been purchased a Uniform, consisting of a Cap and Coat for the Company attached to the Steam Fire Engine, at a cost of \$153 75, and it will be necessary to purchase a similar one during this season for the Hosemen attached to the Companies of Nos. 3 and 6.

There has been built the past year a first class Brick and Cement Reservoir on Kenduskeag Avenue, near the junction of Jefferson Street, capacity 28,000 gallons, arched top with two openings and cost \$540 00. I would recommend that one or two new Reservoirs be built each year, as there are several localities very deficient in the supply of water, those most so I noticed in my report last year, and I would particularly recommend that the two Reservoirs, one on French Street, near the residence of E. T. Fox, and the other on the corner of Adams and York Streets, be rebuilt the present year, for they are in a bad condition. The whole number of Reservoirs in the City is twenty-nine.

|            |       |
|------------|-------|
| East Side, | 16    |
| West Side, | 13    |
|            | <hr/> |
| Total,     | 29    |

There are also two wells and one scuttle (Western R. R. Depot).

I would recommend that Old Tiger No. 6, and Old No. 4 be sold as old metal, as they would at the present high price of metal bring more than in any other way. I would also recommend that a Hose Carriage and

a Squirrel-tail Suction be purchased for the Steamer; the Hose Carriage to be suitable for carrying 1200 feet of Hose.

The expenditures for the past year have been \$7421 93, and the appropriations were \$7500 00

I have paid into the City Treasury \$50 00 received for the Old Engine House at the head of Exchange Street, and \$500 00 for Engine No. 4, sold to the town of Orono, in all \$550 00

The accompanying documents give a full account of the number of Fires and Alarms, the members of the Department, number of Reservoirs and Wells, and where located, and the amount of Property belonging to the City and in charge of the different Companies.

I would call the attention of the City Council to the salaries of the Chief Engineers and Assistants, which are altogether too small for the services rendered, and would recommend that they be raised, the Chief Engineer's to three hundred dollars, and the Assistants' to one hundred dollars each per year.

In closing, I wish to express the deep sense of obligation I feel towards the Assistant Engineers and all other members of the Department, for their cheerful co-operation in the affairs of the Department during the past year. A spirit of union and harmony has pervaded all their actions, and their faithful labors deserve the approval of the public.

All of which is respectfully submitted.

H. H. FOGG, Chief Engineer.

## Fires and Alarms Since March 10th, 1862.

| Date.     | Owners or Occu-<br>pants. | Location.         | Loss.     | Insured | Causes.               |

# R E P O R T

OF THE

## AGENT FOR THE SALE OF LIQUORS.

---

*To the City Council :*

The undersigned would respectfully ask leave to make the following report of his doings as City Agent for the sale of spirituous liquors in the city of Bangor for the past year.

|                                                 |            |
|-------------------------------------------------|------------|
| Whole amount paid to City Treasurer from March  |            |
| 9th, 1862, to date as per his receipts on file, | \$6000.00  |
| Cash on hand and due from Agents,               | 142.61     |
| Stock on hand at this date,                     | 880.90     |
| Store Furniture,                                | 35.00      |
|                                                 | \$7,058.51 |
| Amount of stock on hand, March 10, 1862,        | \$1,902.68 |
| do purchased since do do                        | 3,403.43   |
| do expenses for rents, freights, &c.,           | 303.69     |
| do cash on hand, March 10, 1852,                | 85.16      |
| do due from Town Agents, March 10, 1862,        | 107.00     |
|                                                 | \$5,801.96 |
|                                                 | \$1,256.55 |

Respectfully submitted.

GEO. WELLINGTON, Agent.

Bangor, March 10, 1863.

**R E P O R T**  
OF THE  
**COMMISSIONER OF STREETS.**

---

*To the City Council :*

The Commissioner of Streets would respectfully submit the following report, which with the accompanying schedules, shows the Receipts and Expenditures of his department from March 1, 1862, to March 1, 1863.

The amount appropriated for the department was thirteen thousand (\$13,000) dollars. Amount received from sundry persons, as per Schedule A, seven hundred and fifty-six dollars and eighteen cents, (\$756 18.) Making thirteen thousand seven hundred and fifty-six dollars and eighteen cents, (\$13,756 18.)

The amount expended was thirteen thousand six-hundred and seventy five dollars and twenty-two cents, (\$13,675 22.) Leaving a balance unexpended of eighty dollars and ninety-six cents, (\$80 96.)

There is also due this department for the use of teams, &c., about two hundred dollars (\$200,) which I am unable to give in detail, as it has not been collected, nor have the contracts been fulfilled.

The bridge at Six Mile Falls, which was estimated at four thousand dollars, (\$4000,) cost over forty-seven hundred dollars, (\$4,700,) which left less than eight thousand three hundred dollars (8,300) for streets, &c.

The sewers on Main and State Streets will probably have to be rebuilt this season, and I would recommend building of brick or stone, as experience shows they are more economical. There will also have to be extensive repairs made on many of the streets, and I would recommend a liberal appropriation for this department this season.

Schedule B gives the amount expended on each street, bridge, &c.

Schedule C gives a list of the property belonging to the City, under my charge.

It would have been difficult to have kept a separate and correct account of my expenditures as Health Officer, therefore I have included them in the Highway Expenses.

All of which is respectfully submitted.

TAYLOR DURGIN, Street Commissioner.

Bangor, March 9th, 1863.

## SCHEDULE A.

A list of the Receipts and Expenditures.

| Appropriation,                                         | EXPENDITURES. |             |
|--------------------------------------------------------|---------------|-------------|
|                                                        |               | \$13,000 00 |
| Amount received of Seth Paine, Jr. for bills rendered, |               | \$13,675 22 |
| Less the following amount paid into the Treasury:      |               |             |
| Received of Cyrus Hewes for one pair of horses,        | \$300 00      |             |
| " " Wm. B. Hayford for one pair of horses,             | 220 00        |             |
| " " Stranger, " pig,                                   | 3 00          |             |
| " " Dudley, " lumber,                                  | 3 50          |             |
| " " A. L. Simpson, " "                                 | 7 30          |             |
| " " W. C. Holt, " "                                    | 11 79         |             |
| " " E. L. Hamlin " "                                   | 18 96         |             |
| " " D. Sanborn, " "                                    | 7 63          |             |
| " " County of Penobscot for gravel,                    | 3 00          |             |
| " " City of Bangor for Manure,                         | 81 00         |             |
| " " " " " Fire Department,                             | 100 00        |             |
|                                                        |               | \$756 18    |
| Balance in the Treasury unexpended,                    |               | \$12,919 04 |
|                                                        |               | 80 96       |
|                                                        |               | \$13,000 00 |

## SCHEDULE B.

Amount Expended for Repairs.

|                    |          |                          |             |

|                                                                                                       | <b>\$992 13</b> |

The day and night Police have been vigilant and attended to their duties, and good order has prevailed through the year.

By the above table it will be seen that there were prosecuted as common drunkards, 10 ; 19 for sale of liquors and common sellers ; 92 for assault and battery ; 22 for drunkenness on the streets ; 7 for riot ; 4 for assault on Police. These, with 50 drunkards discharged without prosecution, show the criminal record resulting from the sale and use of intoxicating liquors the past year.

The business requiring the attention of the Police is of such a nature that I consider an additional Policeman absolutely needed. There are several localities in the city where a Policeman should be constantly stationed. Among them, Exchange Street, and the neighborhood of steamboat wharf. There are other places where there should be Policemen at certain hours of the day ; as the Post Office, in the evening, and the Western Railroad depot on the arrival and leaving of the trains.

The day Police, as now constituted, have to be on duty fifteen hours each day. They should be relieved at sunset, but they are required to

---

be on duty until the coming on of the night Police, at nine o'clock. This, all must admit, is a hard task.

The labors of the Marshal at his office, hearing complaints and making complaints to the Court, and in looking up testimony, and attending the trials of offenders, prevent his being on the streets as much as he could wish, consequently nearly all the street duty has to be performed by the two Deputy Marshals, and it is not in the power of the whole force, however capable they may be, to answer all the proper calls made upon them. Some arrangement should be made, it seems to me, to meet more fully the wants of this department.

H. B. FARNHAM, City Marshal.

CITY OF BANGOR, January 1st, 1863.

*To the City Council :*

The Harbor Master hereby submits the following as his report for the year 1862:

The whole number of arrivals at this port, of vessels over fifty tons measurement, from the opening of navigation, April 19, 1862, to the closing of the same, Dec. 5, 1862, was 1980, with a tonnage of 95,642 tons; whole number of arrivals of vessels under fifty tons measurement, 250, with a tonnage of 3600 tons; total tonnage, 99,242.

CLEARANCES—Foreign, 126; Coastwise, 1834; remained in port in consequence of ice, 50; total, 1980.

DIFFERENT VESSELS ARRIVED.—Steamers, 4; Ships, 18; Barks, 18; Brigs, 59; Schooners, 601; Sloops, 7; Total, 707.

Fees collected, \$705; uncollected, \$2.

| Salt,      | 25,884 bush. | Pork, | 3740 bbls.    |
| Flour,     | 76,874 bbls. | Coal, | 6006 tons.    |

### E X P O R T S .

POTATOES. From the crop of 1861 there was shipped 213,000 bushels at an average price of 38 cents per bushel, amounting to \$80,940 00. From the crop of 1862, 289,550 bushels at an average price of 45 cents per bushel, amounting to \$140,287 50. Total number of bushels 502,550. Total amount in value, \$211,247 50—of the above (in consequence of the river closing suddenly) 20,000 bushels remained in port—of that amount 10,000 bushels have been shipped by the way of Winterport.

Our deal trade with Europe the present season has been as follows :  
Twenty-five ships and barks cleared for Europe—with a tonnage of 21,-  
905 tons measurement—with 17,000,000 feet of deal—value here \$144,-  
500.

BRICKS. 8,960,000—at the estimated value of \$5 00 per thousand,  
amounting to \$44,800 00. Of the above quantity 3,511,000 were pur-  
chased by the Federal Government. The above except 800,000 were  
manufactured in Brewer. Amount of lumber surveyed 160,000,000.

Respectfully submitted,

ANDERSON PARKER,  
Harbor Master.

*To the City Council :*

The City Physician respectfully submits the following report for the municipal year just closing :

He has been called upon to prescribe for 153 persons, 93 of whom were inmates of the Alms House, or House of Correction, and 60 of their several houses. The Alms House has been visited 135 times and 280 visits have been made to sick paupers elsewhere. Diseases of 67 varieties, and in 232 individual cases have received attention. Nine persons have died ; one in the House of Correction, four in the Alms House, and four elsewhere. Six of these died of Pulmonary Consumption ; one of Inflammation of the Brain ; one of Disease of the Heart ; one of Disease of the Kidneys and Lungs ; and one the result of a burn. Thus only one death has resulted from acute disease, and one from accident.

Five hundred and sixty-four children in the Public Schools have been vaccinated.

No epidemic disease has prevailed among us during the year, and but few cases of Diphtheria, which has caused such fearful mortality in other localities, have occurred within the City.

There have been an unusually large number of feeble persons and of children at the Alms House within the year, but the general sanitary condition of the Institution has been satisfactory, few cases of disease having originated there.

It has been objected to the present connection of the House of Correction with the Alms House that the virtuous Poor are compelled to associate with those convicted of crime ; but when it is considered that a very large proportion of the latter are guilty of Intemperance only, and when sober are quiet and well behaved persons, while quite a

a number of the paupers came from the lowest dens of vice in the City, it will be at once perceived that to separate these two classes does not answer the end desired.

The particular in which the present arrangement is most defective is in the proper discipline and education of the children, of whom there are always quite a number in the house, generally 25, rated as scholars, and half as many younger children.

I would urgently recommend that apartments be provided for these entirely separate from the rest of the institution, in order that such a system of education and discipline may be adopted as shall promote the best interests of the children and of the city, but which is utterly impracticable in the presence of a large number of adults. Such intelligent and worthy female paupers, if any, as could reasonably object to the promiscuous society of the other department, might be here employed in caring for the children.

The arrangements for heating the rooms set apart for the sick are defective; for though usually sufficient, when the wind is in a certain quarter in cold weather it is impossible to render these rooms comfortably warm, and it has happened within the last few weeks that a patient, weak and exhausted by consumption, has dragged himself into the general sitting room that he might enjoy the warmth of the stove there.

Of the faithfulness, care and devotion of the Superintendent and Matron in the performance of their duties, I can speak only in terms of the highest commendation.

Respectfully submitted,

RALPH K. JONES,  
City Physician.

Bangor, March 9th, 1863.

REPORT  
OF THE  
CEMETERY BOARD.

---

*To the City Council :*

The Cemetery Board for 1862 report as follows :

The interments within the City Burial Grounds during the year ending March 1, 1863, have been 104, viz :—In Mount Hope, 90. On Levant Road, 6. On Pushaw Road, 4. Pine Grove, 4. In the private Cemeteries, 182, viz :—Mt. Hope Corporation, 89. Mt. Pleasant, 93. Total interments within the City, 286.

The condition of the several Cemeteries is as follows :

Mount Hope Public Grounds.—This is in fair condition except that the bridge over the brook at the entrance needs to be rebuilt. Estimated expense, twenty-five dollars. We have expended within the last year fifteen dollars and sixty-six cents for copy of plan of lots, repairing receiving house, and fences. Near the entrance to the public, but upon the private grounds of the Mount Hope Corporation, stands a stable, which with its accessories of manure, tools, and rubbish, presents an unsightly appearance. As the City has quite recently, for the convenience of this Corporation, given up to it a portion of the public grounds, it may be hoped that an accommodating spirit on its part may soon cause the removal of objects disagreeable to the sight of visitors, and not in keeping with the general condition of their property.

On Levant Road.—No expenditures have been incurred. It is believed to be in fair condition at present, but likely to need some repairs on fence and receiving house soon ; amount not large.

On Pushaw Road.—The fence is in a dilapidated condition and should be rebuilt. Estimated expense twenty dollars. The use of this Cemetery and consequently the interest felt in its protection seems increasing.

Pine Grove.—Within the year five lots have been sold and paid for at ten dollars each, and twenty dollars have been received for the standing grass. The seventy dollars have been paid into the City Treasury. Expenditures have been four dollars and forty cents for repairs of fences.

The immediate vicinity of the school house creates a necessity for frequent repairs of fences. A new and stout one should be built on two sides of the school lot near this Cemetery. Or better still, the house should be moved away if the public interests will permit. Estimated expense of a new fence, fifty dollars.

In the original laying out, a large and commanding site in the front part of the grounds was reserved for monuments to the memory of those whom the whole community might in after years particularly wish to honor. The present seems an appropriate time to bring this location into use. It is understood that an association is being formed from among our citizens for the building of a durable monument to the memory of those of our gallant officers and soldiers, who yield their lives to their country's service in the war now raging in behalf of freedom and the Union. That such a structure should be within a public Cemetery and under the protection and care of our City, will seem obvious to all who reflect that its design is to commemorate, during all coming time, the sacrifices of citizens in the performance of their duties to the public, and their efforts to uphold the honor of a loyal City and State. Placed elsewhere, it would stand only as the expression of individual feeling, while it should represent the patriotism of the whole City, and be to future generations an incitement to heroic devotion to the common good, and to aspirants for civic honors a call to fidelity to public duties, so long as the love of Woman shall be given to the brave, and Man shall honor the loyal and true.

Believing that the subscribers to the association will willingly yield their individual preferences for another location, and that the City of Bangor will in future years accept its care and protection as a sacred trust, we recommend the appropriation, by the City Government, of a spacious monument on the reserved grounds of the Pine Grove Cemetery. Respectfully submitted.
