## Superintendent's Report of Schools.

Gentlemen of the School Board:

I herewith present you with my report of the schools of Hartland. It has been my aim to conduct the schools along established educational lines, for if at every change of administration a revolution results it must prove disastrous to the welfare of the schools.

The schools as a whole have made very fair progress. In the village sickness has played its part in keeping down the attendance. In the rural schools two terms were not satisfactory. I place the greater part of the blame on the pupils for no school can be a success unless they are willing to obey the rules of the school. One of the great things that we need in education is co-operation. Parents, pupils, teachers and superintendent all have a duty to perform and just so far as each one does that duty our schools will be a success.

### TEACHERS.

In all eighteen teachers have been employed this year. We were not able to retain several of our teachers for the fall term and several changes were made but for the winter term as many of the fall teachers were retained as seemed advisable. And on the whole this term has been the most profitable. Three teachers, including high, have been retained in the same school for the year and seven for two terms. The less changes made when good work is being done the better. Ten teachers have had college or professional training. I advise every young person who wishes to teach in the public schools to prepare for the position.

### COURSE OF STUDY.

But very few changes have been made in the course of study as it is well suited to our needs in the rural schools. In the grammar school I would advise the addition of at least one more study in the ninth grade and more time put on writing and mathematics. This school has six more weeks a year than the other schools and consequently can do more work.

#### REPORTS.

In my office is a record of the class work done in the schools. At my numerous visits I have conferred with the teachers and in several instances with the pupils themselves in regard to the work. For ~~several~~ reasons I have not deemed it wise to go to the expense of having special cards printed for individual reports. This, however, is an incentive to the pupil to make a greater effort and provisions should be made for their use. The cost would be about \$3. Term rank cards have been furnished in all the schools.

#### SUPPLIES.

Our schools are well supplied with maps except the high. We need a map for teaching Physical Geography. The map for teaching History was placed in the Grammar room and has proven a valuable asset. Practice paper for writing, in addition to the writing books, has been furnished. I feel that not enough stress is placed on this subject. We are undoing in the written work of the other studies much that is learned in the writing exercises. More care must be taken and all written work be a writing lesson.

#### TEXT BOOKS.

No changes have been made in the basic texts this year and only such additions to the basic texts have been made as was necessary on account of books that had passed usefulness. The high school is well supplied with books and will need but very few for the year. In the lower schools the large arithmetics are worn passed usefulness and the small books are not satisfactory. We have read all we have for the reading line and will need quite a number of supplementary readers. The schools must have the necessary tools with which to work but beyond that it has always been one of my principles to let fads alone.

I herewith submit a list of the outstanding bill for text books, contracted prior to April 1, 1910, and as I understand the law the town is ~~not~~ bound to pay. And I shall maintain this position until I have more convincing proof that such is not the case:

## ACADEMY.

This department is well furnished with laboratory equipment both for Chemistry and Physics. We are in a position to do good work in sciences. The crying need for this building is a heating plant with some system of ventilation. On some of the coldest days we have been obliged to suspend school as the rooms could not be heated. With the extreme heat near the stoves, the cold and uncomfortable condition at the rear of the rooms and the lack of pure air is enough to make living in these rooms a danger to the health of the pupils. Until some means are found to relieve this condition the schools will never be in much better condition than at the present time.

## IN CONCLUSION.

For various reasons I shall omit the reports in detail of the several schools. It is true that while only two terms were entirely unsatisfactory, other schools and different terms in the same school have met with different degrees of success and I

rely upon the good judgment of the citizens to fully realize this.  
I am only too glad to admit any mistakes that I may have  
made and only ask that others may do the same. I wish to  
thank all who are connected with the schools for their co-  
operation and the citizens for their many kindly and helpful  
suggestions.

Very truly yours,

F. L. ROWELL.
