Report of the Superintendent of Schools

YEAR ENDING MARCH 1, 1921

Members of the School Committee.

Directly to you and indirectly to the citizens of Hartland I make my fourth annual report.

The present school year has been the most satisfactory of any during which I have directed your schools. This has been due largely to the quality of the teachers. The average experience of the teachers is seven years and their experience, training and natural ability are aided by continuing in the same school. Five of the six elementary teachers are in the same position as last year which makes it possible for every successful teacher to do better work. The school work done this year is indicative of what will be accomplished when the task of educating our boys and girls shall be generally considered not as a job for any 18 year old girl with a High School diploma but as a profession for our finest young people to aim for. Thus will be brought to the schoolroom a matured mind and character, prepared for the great work of training children for the tasks of their own livelihood and for intelligent unselfish citizenship.

Better results have been obtained in the fundamental studies which will always be the backbone of the school course. The Standard Tests in Writing and Spelling given in June showed a marked gain in efficiency over the results obtained previously. They also showed a higher rank than that in the corresponding grade in the other towns where most of the pupils were in Rural Schools and have had a short school year. The Spelling Matches in which the pupils have participated reflect credit upon both teachers and children. A study which will receive added attention henceforth is Physical Education by which we attempt to instruct the pupils in personal and community hygiene and health.

One new feature of the school work begun a year ago and deserving special mention is the warm dish served at noon in all but one of the schools. This has meant a great deal to the child coming to school from a distance with nothing warm to

eat from morning till night. Parents, teachers and older pupils have cooperated in making this a success. I hardly need to mention that this adds considerably to the teachers' work and it helps to know that the effort is appreciated.

Schools have continued to add to their equipment from entertainment funds. Library material, pictures and utensils for the noon lunch have predominated. The Fuller's Corner School has recently purchased an organ. Owing to good weather and general good health, school attendance has been better than usual this year.

Two matters in the Academy work this year deserve special mention. The first is interest in studies. Formerly there seemed to be a tendency on the part of the pupils to choose those studies which were easiest. This year many are taking more than the required number of subjects and there seems to be a much greater general interest in studies.

The efficiency of a school system may be directly measured by the regularity of school attendance. There is no record of any Academy pupil completing a year with perfect attendance for several years and in general the attendance has been poor. This year 14 pupils have passed the half way mark with every indication that a good number will finish the year with a perfect mark. The average of attendance is improving greatly.

The outlook for next year for those who wish to raise less school money and yet have as good schools is not encouraging. One idea must be sacrificed to the other. A glance at the itemized cost below will show that conveyance and teachers make up two thirds of the total school cost. In no case can we maintain a school in a closed district at less cost than conveyance. Unless we compel children now riding to walk to school, we are not likely to meet with material reduction in conveyance costs.

Two, factors, demand and supply, will keep wages of good teachers where they are or will raise them higher. Whatever or not there is a demand for potatoes or for mill labor, there is a demand in Maine for 6000 teachers each year and many are coming to place the word "good" before the word "teachers" In spite of unemployment in the labor market there were Rural schools in Maine that could not secure teachers as late as November and many schools have teachers below standard. There will not be nearly enough good teachers available next fall,

which will keep the wages up. There will probably be many eighteen year old high school girls wanting to teach next fall those communities who wish them.

The total per capita cost of schooling the 192 pupils in the elementary schools was \$49 this year. The school dollar was divided as follows: teachers, 43 cents, fuel 5; janitors 6; conveyance 21; tuition 3; books 3; repairs 3; supplies 3; High School 13 cents.

I wish to express my appreciation of the courtesy and cooperation of the School Committee and citizens of Hartland during the past year.

Respectfully submitted,

H. B. CLIFFORD, Supt.

Report of School Physician

To the School Committee of the town of Hartland:

I beg to make the following report of my examination of the school houses and pupils of the town of Hartland.

My examination was made at the beginning of the school year.

The school rooms and other property seemed to be in excellent condition for the year's work. The village school rooms are supplied with bubbling fountains and the sanitary advantages are good if properly cared for. Good janitor service is supplied.

The attendance was better than usual. I found an excellent spirit of co-operation between pupils and teachers, and a desire among all the pupils to correct any defects they might have. All were eager to know how to keep well and strong. For the most part they were neat and tidy. The parents and school officers and teachers are to be congratulated upon the progress the schools have made in the last 3 or 4 years along these lines.

SUMMARY OF EXAMINATION

- No. defective vision, 23.
- No. defective hearing, 5.
- No. defective teeth, 76.
- No. needing tooth brush, 63.
- No. defective throats, 26.
- No. defective tonsils, 36.
- No. with adenoids, 41.
- No. with skin disease, 1.
- No. defective chest expansion, 2.
- No. under weight, 140.
- No. with pulse above normal, 65.
- No. reported for professional advice, 48.
- No. registered 116 B—116G—232.
- No. examined 109 B—109 G—218.

Report of Fire Department

February 21, 1921.

I report to the town of Hartland the equipment and condition of the Fire Department as follows.

Volunteer Fire Co., 50 men, 1 hose cart, 3 hose reels, 1 hook and ladder cart, 1050 feet of hose.

We have purchased the past year 300 feet of hose, while we really needed more, as we should never let the total amount of serviceable hose be less than 1200 feet, but owing to the high prices it was thought best to get along with as small as possible.

We have been very fortunate in regard to fires the past year having had only one of any consequence, which, with favorable conditions we were enabled to control without serious loss.

The coming year we should procure a few more feet of hose, as it is much better to buy a little every year than to buy a large amount in any one year, as hose will remain in a serviceable condition only a few years whether used or not, owing to the nature of the materials of which it is composed.

Respectfully submitted,

THOS. S. DEARBORN, Fire Chief.

Preserve This Report

A sufficient number of these reports have been printed to furnish every interested citizen with a copy. An effort has been made to get them into the hands of the voters in advance. It should be borne in mind that if copies are left at home there may not be a sufficient number at the hall to go around on town meeting day. This year or any year it is desirable for you to have a copy of the annual report as soon as issued. It is also important for you to preserve it and bring it with you town meeting day morning.
