ROME SCHOOL REPORT

YEAR 1929-1930

To the School Committee and Citizens of Rome:

I herewith submit my twelfth annual report of the schools for the year ending February 10, 1930.

In reviewing the work of the year I wish to thank the members of the school committee for the interest they have shown in the schools. At the annual meeting of the committee in the spring the care and general oversight of the school buildings were allotted to the several members of the committee and I wish to say that the committee has performed its duty and in every way has worked to make the schools better.

Much credit is due the teachers for the fine work accomplished. At the beginning of the year the following teachers were employed. Arthur Wilde, Dudley School; Lucie Burrell, Robbins School; Ermine Bickford, Blaisdell School and Alida LeBaron the Whittier School. At the beginning of the fall term Buford Grant was engaged to teach in place of Mrs. Bickford who resigned to accept a similar position in Smithfield.

The teachers have shown a keen interest in their work and the pupils have made a steady progress during the year. The matter of discipline has been especially gratifying and there has been a splendid cooperation between the school and home.

Three things which pertain to the welfare of the schools should be brought to the attention of the voters at this time. First is the matter of teachers' wages. At present we are paying a flat salary of fifteen dollars per week, a sum much below that average wage of the state and a salary not in

keeping with responsibility of a position of this type nor commensurate with the amount of work required of a teacher.

It is not good business to hire cheap teachers, that is teachers without experience or training. Neither is it good business to pay an experienced, trained teacher less wages than he is worth. Local teachers are often obliged to teach at home and we are indeed fortunate to have such to draw from. They should however be paid a living wage. As the school situation now is we are obliged to fill vacancies with untrained teachers. The cost of board is \$6 and added to this is the cost of traveling expenses which leaves the net amount of salary barely \$30 per month. I would suggest an increase in salary to \$18 per week.

Second is the matter of the length of the school year. The minimum school year is thirty two weeks. The majority of towns now hold schools in session thirty six weeks. In the report of last year I brought this matter to your attention and the benefits derived by the children from this extra schooling was clearly explained. The town therefore raised the sum of \$2,300 for the common schools which will allow to keep our schools in session for the maximum school year.

You will note that there is an unexpended balance in the common school account. I wish to state that the winter term will close March 7 and that this balance will be used at the end of the year.

The third matter which concerns the schools is that on conveyance of pupils and common school tuition. Some years ago the school back of Long Pond was closed. The pupils in this district, at present, four in number are conveyed to the Robinson school in Mt. Vernon with a tuition charge of one dollar per week per pupil. The pupils in the south end of the town of which there will be five next year attend school at Belgrade Lakes at an approximate cost of one dollar per week per pupil. The pupils in the Hersom district so called, are conveyed to the Robbins school at a cost of \$8 per week. There are other cases in town where application

for conveyance has been made and in some instances this should be granted.

Children who live at an unreasonable distance from a school are entitled to conveyance and this applies equally to all children, even though a child has but temporary residence. I want to emphasize this fact that conveyance of pupils constitutes a legitimate expense in any school system.

HEALTH PROGRAM IN THE SCHOOLS

The matter of teaching boys and girls the rules of good health and good behavior has become one of the well defined aims of our school curriculum. Perhaps no subject taught is worthy of more attention and brings such rich returns to humanity.

In the larger centers full time school nurses and physical training instructors are employed with splendid results. In the smaller towns the health program is carried out by the teacher in charge and altho this work is less thorough and far reaching, nevertheless much good is accomplished.

The state however, offers to the small towns the trained service of their health staff at a very small cost. For instance if the town appropriates our quota of \$24, and pays the same over to the State Health Department, this department will give the town the equivalent of double this amount in service.

The town of Sidney followed this plan last year with the results that 175 pupils were given a thorough physical examination as to the teeth, throat, nose, ears, eyes, skin diseases, weight and nutrition. A report of all defects were sent to the parents and in almost all cases a nurse visited the home and advised with the parents concerning the correction of these defects.

This health work in addition to its benefit to the child while in school, has a direct bearing on the physical and economic happiness of the succeeding generations.

An article will be placed in the warrant to raise \$24 for this work and I hope it may receive the support of all the voters.
