# Report of the Superintendent of Schools

---

To the School Committee of Hebron:

I herewith submit my second annual report of the public schools of Hebron.

It has been impossible to obtain teachers of a high educational quality and proper normal training during the past year, and many makeshift arrangements have been made to merely keep schools running. Conditions are, however, grading up so that it may be possible to change some things for the better.

Conditions have made it necessary to convey in children from the Nelson and Center Districts to the so-called Academy District School which has overcrowded that school. While this results in a very deplorable condition, few teachers being able to handle so many grades at all and no teacher to advantage, yet I believe if a proper building could be had so that two teachers each with four grades could be put into this district and then all possible children conveyed into this school (ie) Nelson, Center, and No. 8, we could have an adequate time for instruction and a 100 per cent. more efficient school.

During the school year I have spent some time in an analysis of the local school conditions and I will give a few of the facts obtained.

In the first place, during the fall term there were registered in all Hebron schools 78 pupils divided among the following schools: Alders 15, Sodom 15, Brighton Hill 18, Academy 25, No. Eight 5.

These children were divided by grades as follows:

Grade 1,	16
Grade 2,	12
Grade 3,	5
Grade 4,	10
Grade 5,	12
Grade 6,	5
Grade 7,	9
Grade 8,	9

According to age they were divided by grade as follows:

	age 5	age 6	age 7	age 8	age 9	age 10	age 11	age 12	age 13	age 14
Grade I	5	7	-2	2						
Grade II		3	5	-2	2					
Grade III				1	-2	1		1		
Grade IV				2	4	-2	1			1
Grade V					3	5	-3	1		
Grade VI					1	1	2	-1		
Grade VII						1	2	2	-2	2
Grade VIII								3	5	-1

A study of this table will show the school conditions fairly well, for instance, in the first grade it will be noted there are in Hebron 5 children, age 5; 7 children, age 6; 2, age 7; and 2, age 8. Now most children begin school between the ages of 5 and 6, and any that begin later are backward for their age. More especially is this true in the upper grades, in the analysis for this district. In but *one* case was the brightest child of the grade found in the oldest group, and most often he was found among those who had begun school at an early date.

We thus find that in Hebron of our 78 pupils, 52 are normal for their age, 15 are one year slow, and 11 over two years backward.

Compared with the other towns in the district, we note that while Hebron's percentage above normal is 66.6, Buckfield's 83.6, Sumner, 55.3, Hartford, 70.4. Now when we realize that the natural average for backward children is but 10 per cent, it will be seen that our children are not getting along as rapidly as they should. While the registered attendance, last fall was 78, the average attendance for the term was but 58.6, a condition which in itself is disgraceful.

With 25 percent of our children out of school all the term, is it not to be expected that 33 per cent are more or less backward?

I further analyzed the schools to see what percentage of our school population, that is those between 5 and 21, go to school, and found for last year:

For the State, 74.7.  
 Hebron, 67.9.  
 Sumner, 62.9.  
 Buckfield, 58.8.  
 Hartford, 51.3.

The percentage of daily attendance, however, is not as favorable:

For the State, .76.  
 Hartford, .77.  
 Sumner, .67.  
 Hebron, .50.

Therefore, last year, we see that only one-half of our school population really attended schools. This low figure is due to some starting high school and dropping out after one term.

In the percentage of children who went to High School based on the number of children enrolled in school census, over 15 years of age, the figures are

For State as whole, 19.4  
 Hebron, 30.5  
 Sumner, 29  
 Buckfield, 27  
 Hartford, 19.6

We here see that a larger percentage of our boys and girls go to secondary schools than in the neighboring towns, but yet less than one out of three have gone even here and 70 per cent. of our local population will never have above rural school education.

The percentage of Hebron children who have completed the eight grades in the rural school is however, more favorable.

In State as whole, 60.8  
 Hebron, 66.7  
 Buckfield, 71.8  
 Hartford, 55.5  
 Sumner, 47.3

Here is seen that less of our children drop out of school with less than elementary schooling than in the State as a whole.

To summarize briefly it will be noted that in Hebron of the children between 5 and 21 years of age, two out of three went to some school. These two went one half the time, or 75 days, one out of three over 15 years of age attended high school, two out of every three who start school finish the eighth grade.
