TWENTY-FIFTH ANNUAL REPORT
OF THE
Receipts and Expenditures
OF THE
CITY OF AUBURN

FOR THE
FISCAL YEAR ENDING FEBRUARY 28,

1894

TOGETHER WITH OTHER ANNUAL REPORTS AND PAPERS RELATING
TO THE AFFAIRS OF THE CITY.

AUBURN, ME.:
PRESS OF BRIDGE "THE PRINTER."
1894.

CITY OF AUBURN.

IN BOARD OF MAYOR AND ALDERMEN, }
March 19, 1894. }

ORDERED, The Common Council concurring: That the City Clerk under the direction of the Committee on Printing, cause one thousand copies of the Mayor's Address, together with the Reports of the several City Officers, to be printed for the use of the city.

Read and passed; sent down for concurrence.

WILLIAM E. LUDDEN, *City Clerk*.

IN COMMON COUNCIL, }
March 19, 1894. }

Read and passed in concurrence,

J. H. NEAL, *Clerk*.

MAYOR'S ADDRESS.

Gentlemen of the City Council:

We have assembled here to-day, and have taken upon ourselves a solemn obligation to faithfully perform the duties of the offices to which we have severally been elected. The management of the municipal affairs of our city has been entrusted to us by our fellow citizens, and we, gentlemen, have accepted the trust, and in doing so, the people have the right to expect from us, an honest, faithful and economical performance of every duty. Many times, no doubt, during your term of office, you will be called upon and expected to devote so much of your time that the business of the several committees on which you may be placed, shall not suffer by your neglect. It will be my endeavor to co-operate with you in every commendable effort tending to the advancement of the city's interest. The severe depression in business throughout our land has cast a gloom over our fair city, and to-day we are suffering from the hard times; therefore, let us see to it that in the expenditure of the people's money we receive 100 cents of value in return for every dollar expended. I trust that we shall discharge every duty without fear or favor, acknowledging always our dependence on Him who controls our destinies. And with wisdom and fidelity let us discharge the responsible trust committed to us in such a manner that we may have the consciousness of having faithfully performed our duty.

I will now call your attention to the condition of the finances. Our entire indebtedness, aside from our water works debt, is \$228,000.

RESOURCES.

Uncollected taxes for 1893,	\$29,737 75
Uncollected taxes, 1891 and 1892,	7,118 68
Amount due on tax deeds,	841 63
Amount due on sewer assess.,	2,422 00
Slattery note,	68 00

Total, \$40,188 06

Indebtedness less resources, \$187,811 94

The Lewiston and Auburn railroad stock valued at \$74,900, which I think should be reckoned as available resources of our city, would reduce our indebtedness \$112,911.64; \$14,500 of 5 per cent. bonds fall due March 1st, 1895, which will be your duty to provide for. A detailed statement of the liabilities and resources of the city may be found in the following table:

STATEMENT OF APPROPRIATIONS, RECEIPTS AND EXPENDITURES FOR THE YEAR ENDING FEB. 28, 1894.

	Appropriations.	Receipts.	Total Receipts.	Expenses.	Balance.	Overdrawn.
Highways	16000 00	1309 85	17309 85	21179 02		3869 17

Total overdrawn \$23,933.78.

The appropriation of \$150,000 made on account of water works was raised by a temporary loan.

CITY WATER.

During the past year, the city has purchased the water works from the Auburn Aqueduct Company. From the report of the water commissioners, I find the following statement of the receipts and expenditures of the water works, between June 7, 1893 (the date of the purchase of the water works) and March 1, 1894.

RECEIPTS.

Notes payable,	\$185,262 62
Water receipts,	19,997 09
Bonds of Auburn Aqueduct company assumed,	58,700 00
Bonds, issued by order of city council,	30,000 00
Miscellaneous receipts,	21 50
Coupons and interest,	8,724 57
Cash on hand,	804 36

EXPENDITURES.

Purchase of franchise,	\$250,000 00
Construction,	30,068 36
Repairs,	285 09
Furniture and fixtures,	507 80
Expenses,	3,591 03
Water rents, overdue and unpaid,	1,830 69

Number of water takers, 2,369.

For all details pertaining to the management of the Water Works, since its purchase by the city, I would refer you to the report of the water commissioners. I express the hope that the next Legislature will submit to the people an amendment to the constitution of the State, exempting from the 5 per cent. debt limit, all debts incurred in the purchase or

25-00

construction of municipal water systems. In this way our floating debt can be easily funded at a low rate of interest.

SCHOOLS.

Our public schools, we can point to with pride, as ranking with the very best in the State. I trust they may in the future continue to hold the high rank which they have attained. No appropriation of money can be made that will be productive of so much good, as that appropriated for the education of our children. The new schoolhouse in Perryville has been completed during the past year at a cost of \$11,736.35.

In New Auburn a new school building is much needed and I trust this will receive careful consideration. For the amount expended for the support of our schools for the past year, I refer you to the report of the School Committee.

HIGHWAYS AND STREETS.

The repairs of our streets are always attended with large expense, requiring a continual draft from the appropriation.

Amount expended in the construction and repairs of highways and streets during the past year,	\$21,179 02
Appropriation,	16,000 00
Receipts from various sources,	1,314 85
Total,	\$17,314 85
Overdrawn,	3,864 17

The Street Commissioner's report will furnish you with the details of work done in his department.

NEW ROADS.

The Valley road, so called, running from Summer street to the road running past Mt. Auburn Cemetery, must be built this year.

SEWERS.

During the past year sewers have been built on Temple, South Goff, Newbury, Second, Pulsifer, South, Winter, Turner, Summer, Whitney and Cushing streets, the total being 4,854 feet, at a cost of \$6,212.28.

Sewers are much needed on other streets in the city, to which your attention will be called as soon as may be.

POLICE.

During the past year our police have been painstaking and vigilant in the exercise of their duties. One-third, at least, of every twenty-four hours, we leave our places of business and our homes to the care and watchful eye of our police. Auburn has always been favored with faithful, trusty men. I trust we may be as fortunate in the future, in the selection of the police. The report of the Chief of Police will give you the details of the work done in this department.

FIRE DEPARTMENT.

Our Fire Department is made up of honorable, sober men, who take pride in having their department prompt and efficient. The Chief Engineer, in his report, recommends certain improvement, which you will carefully consider.

POOR DEPARTMENT.

We are assured from the Holy Writ that the poor we have with us always. It is gratifying to know that we have a good home for our poor and unfortunate. Mr. and Mrs. Newell have thus far managed the affairs of the home successfully and prudently. They are kind in their treatment toward the poor, which should be considered a worthy and commendable qualification for that position. The farm is one of the best in town, growing better each year under its present management.

CONCLUSION.

In conclusion, gentlemen, permit me to say that I have in a brief manner endeavored to give you some idea of the condition of affairs in our city. May our labors together in the coming year be crowned with abundant success.

HILLMAN SMITH,

FINANCIAL REPORT.

Gentlemen of the City Council:

I herewith submit to you the report of the receipts and expenditures of the City from February 28, 1893, to March 1, 1894.

RECEIPTS.

As per Treasurer's report, \$181,385 23

EXPENDITURES.

E. G. EVELETH, *Treasurer.*

I have examined the accounts of the City Treasurer, for the year ending February 28, 1894, and find them properly vouched for, and hereby approve the same.

ANDREW W. P. COBB, *Auditor.*

Report of Board of Water Commissioners.

To the City Council of the City of Auburn:

GENTLEMEN:—The Board of Water Commissioners herewith submit their annual report:

The Board was duly organized July 31, 1893.

Jerome B. Hunton was elected Clerk of the Board August 1, 1893, and on November 6th Albert Haskell was elected Superintendent.

August 2, 1893 the commissioners procured an office for the transaction of business in the Mechanics Savings Bank Block at a rental of \$300 per annum, and properly furnished the same with a suitable safe and other furniture.

A proper system of book-keeping was in due time adopted, and thus far is proving very satisfactory.

On June 7, 1893 the city became owner of the Auburn Aqueduct Company's property, since which time the water works have been very much, and permanently improved, especially by putting in a 24 inch pipe from Wilson Pond to the gate house on the Poor Farm, a distance of 3,000 feet.

Proper connections have been made for distribution of the water from the gate house by 10 inch and 12 inch pipes.

Water was introduced through these pipes on the 10th day of December last, since which time there has been a suitable and abundant flow of water to all water takers and for city purposes, which has proved exceedingly satisfactory to the Board, and especially so to the water takers.

In no case has there been any serious complaint for want of proper supply, from any source.

The Board prepared an ordinance regulating the proceedings of the Board for supplying the City of Auburn with pure water and defining the duties of Superintendent and Clerk, also an ordinance regulating the duties and liabilities of plumbers in connection with water pipes in the City of Auburn, which have been duly approved by Hon. C. W. Walton, Judge of the Supreme Court of Maine.

The cost of the additions and improvements which have been made since the city became owner of the property is \$30,068 36.

Following is a statement of the receipts and expenditures of the Water Works between June 7, 1893 and March 1, 1894.

RECEIPTS.

To notes payable,	\$185,262 62	
Water rents collected,	19,997 09	
Bonds of Auburn Aqueduct Co.		
assumed,	58,700 00	
Bonds issued by order of City		
Council,	30,000 00	
Miscellaneous receipts,	21 50	
	<hr/>	
Total,		\$293,981 21

EXPENDITURES.

For purchase of Franchise, etc.,	\$250,000 00	
Construction,	30 068 36	
Repairs,	285 09	
Furniture & Fixtures,	507 80	
General Expenses,	3,591 03	
Coupons and Interest,	8,724 57	
Cash on hand,	804 36	
	<hr/>	
Total,		\$293,981 21

The adjustment of the account of all receipts and expenditures properly had and incurred by the Auburn Aqueduct Company between Sept. 19, 1891 and June 7, 1893 is in the hands of the Court, by virtue of Section 11 of "an act to supply the City of Auburn with pure water," and approved February 19, 1891. The whole matter under this Section is referred to Chief Justice Peters and Ruel Small, esq., and arrangements are made for a hearing in the latter part of the present month, or the first of April.

The amount of water rents due Nov. 1, 1893, and unpaid is	\$1,593 15
The amount of water rents due and payable prior to Nov. 1, 1893 and still remaining unpaid is	247 54
Total amount overdue and unpaid,	<hr/> \$1,830 69

The total number of water takers is 2,369.

For further information in relation to water takers, reference is made to the detailed report of the Superintendent which is herewith transmitted.

The condition of the water works, and land, and other property connected therewith, is very satisfactory.

All damages for lands taken for the use of the water works have been adjusted for the sum of \$100.

The damage, if any, for taking water from Wilson Pond, which is claimed by the Union Water Power Company has not been adjusted, and in all probability will have to be settled in the courts.

All bills for expenditures by the Board have been approved by a majority of the Board, and examined by the Auditor, and approved by the Committee on Accounts, before being paid.

The water rates have been fixed by the Commissioners and approved by the City Council, and so fixed as to pay annually all expenses for operating the works, and for repairs, together with interest on all moneys expended for purchase or extension of said water works, and not less than one per cent.

of the principal expenditures incurred, in compliance with the Act to supply the city with pure water.

In establishing the water rates, in some cases they have been slightly increased, but in a large majority of cases they have been decreased from the rates formerly charged by the Auburn Aqueduct Company.

The books of the Auburn Aqueduct Company have been carefully audited by the order of the Board, with a view to ascertaining the probable correctness of the account of receipts and expenditures incurred by the said Company between Sept. 19, 1891 and June 7, 1893, as filed in court by the said Company. This work has been done in a very careful and efficient manner by Mr. F. W. Hunton and will aid very materially in the hearing before the referees.

The Commissioners thus early in their work have no particular suggestions that they deem of sufficient importance to make in this, their first annual report.

In closing this report we feel it due to the Clerk and the Superintendent to state that they have discharged their several duties to the general satisfaction of the Board.

All of which is respectfully submitted,

W. W. BOLSTER,
A. L. GOSS,
E. S. PAUL,
H. G. FOSS,
R. M. MASON,
A. M. PULSIFER,
S. K. BALLARD,

Board of Water Commissioners.

Auburn, March 1, 1894.

Report of Superintendent of Water Works.

To the Board of Water Commissioners :

GENTLEMEN: The report of the Superintendent of the Auburn Water Works from the 7th of November, 1893, to March 1st, 1894, is herewith respectfully submitted.

The books of the former Superintendent not being kept with reference to a yearly report, I am unable to make any report previous to November 7th.

The 3,000 feet of 24 in. pipe at the lake with well, gate-house and strainers, are all in working order, and with the exception of completing the gate-house and filling in the deep cut and grading around the same, it is completed. A comparison of the water service from last season proves that our engineer, Mr. M. M. Tidd, has solved the problem of the Auburn Aqueduct Co., the previous owners. The cost of the improvements are about \$25,500 which is under Mr. Tidd's estimate of \$30,000. The water from the new pipe was let on to the city December 10th.

PUMPING STATION.

We have for fire service and domestic service on the high lands of the city a reservoir of 592,175 gallons capacity, supplied by two Worthington Pumps rated at one million gallons each for twenty-four hours, with two upright boilers of thirty-five horse power each. The pumps are in good condition, one of the boilers is getting quite old, but still does service as a spare boiler and in fires when we run both pumps. It would be economy to take out the old boiler and have a large hori-

zontal boiler set in its place. The reservoir seems to be in good condition; it was washed out and painted in July, 1893, the paint was not as it should have been and is now nearly all washed off.

Gas has been put into the boiler and engine rooms, boiler No. 2 and the steam pipes covered with asbestos covering, a wash stand with hot and cold water in engine room, a rail around stairs, two lights of glass in door of boiler room, two sight feed oil cups on pumps, changed drips on pumps, and the sewer, which was of cement pipe and broken down, replaced with cast iron soil pipe.

Mr. Rand, our engineer, has repainted both pumps. The float that was supposed to ring the electric bell when the reservoir was pumped full has been replaced by a float in oil and it works very nicely. The room over the work shop is being finished off for a tenement, and a roll-way door is being put into the boiler room. The old gate between the high and low service, which has been out of repair for two years has been replaced by a new gate; the gate between the 10 in. and 12 in. pipe at the station has been repaired, these were very important gates as there is no other connection below the upper end of Turner street.

HYDRANTS.

The hydrants of the city have been thoroughly repaired and when they were inspected in January they were all in good condition; one hydrant was broken at the Auburn Stove Foundry fire and repaired immediately. The fire department have had all the water for fires that was wanted and are pleased with the new service.

LIST OF HYDRANTS AND LOCATION.

- No. 1 Center street, near Henry Noyes house, low service.
- 2 Center street, near box 87, low service.
- 3 Center street, corner Turner, low service.
- 4 Turner street, corner Rowe street.
- 5 Turner street, corner Dennison street.

- 17 Fern street, corner Lake street.
- 18 Lake street, junction Upper Court.
- 19 Maple street.
- 20 James street, near John Mullaney's.
- 21 Goff street, near George Brown's.
- 22 Goff street, corner Grant street.
- 23 Manley street, corner Willow street.
- 24 Manley street, opposite Temple street.
- 25 Hampshire street, corner Oak street.
- 26 Union street, corner Hampshire street.
- 27 Union street, corner School street.
- 28 Court street, corner Goff street.
- 29 Court street, north side near M. C. R. R.
- 30 Court street, south side near M. C. R. R. park.
- 31 Court street, near Auburn Hall.
- 32 Court street, near Elm House.
- 33 Washington street, near watering trough.
- 34 Washington street and Minot Avenue.
- 35 Washington street, opposite Foundry.
- 36 Washington street, beyond box 124.
- 37 Hutchins street, near Hutchins Box Shop.
- 38 Drummond street, foot of R. R. street.
- 39 Drummond street, top of Drummond Hill.
- 40 Elm street, foot of Spring street.
- 41 Elm street, foot of Pleasant street.
- 42 Academy street, corner High street.
- 43 Spring street, near Shaw's Boarding-house.
- 44 Spring street, foot of School street.
- 45 Spring street, near Ivory Bowie's.

- 46 Pleasant street, corner Hampshire street.
- 47 Pleasant street, corner Court street.
- 48 Pleasant street, corner Drummond street.
- 49 High street, opposite Dr. Philoon's.
- 50 High street, corner Elm street.
- 51 No. Main street, opposite Cracker Factory.
- 52 Main street, near Hersey Block.
- 53 Main street, front Roak Block.
- 54 Main street, corner Elm street.
- 55 Main street, foot of E. L. Park.
- 56 Main street, opposite L. W. Haskell's house.
- 57 So. Main street, corner Pulsifer's, near Pulsifer's store.
- 58 So. Main street, near F. A. Haskell's house.
- 59 Laurel Ave., corner Laurel street.
- 60 Laurel Ave., opposite J. O. Foss's house.
- 61 First street, opposite rear French sisters.
- 62 Broad street, corner Second street.
- 63 Broad street, corner Fifth street.
- 64 Fourth street, corner Cook street.
- 65 Cook street, corner Sixth street.
- 66 Cook street, Corner Eighth street.
- 67 Cook street, corner 24th street near Bolster's.

HYDRANTS NOT ON CITY'S LAND.

- 68 Ara Cushman Co. yard, near west wing.
- 69 Ara Cushman Co. yard, near Box Shop.
- 70 Androscoggin County, near jail fence.
- 71 Ferd Penley, between boiler house and wool shop.

METERS.

A thorough investigation of the meter service has been made and the meter changed, leveled up and repaired. At the inspection the 1st of February they were all in good condition. Number of meters in use November 1st, 14; number new set, 13. We still have quite a number of services that should have meters. All of the meters set are Crown Meters.

SERVICES.

All of the services and street mains that we could learn of that had frozen up the year before and could be lowered, we attended to with three exceptions, and should have made those safe if we had had more time. Number of services lowered, 10; number feet of street mains lowered, 200; and the sprinkler service at the Fitz Bros. Last Factory, 250 feet of 6 in. pipe. A large number of services and street mains had been lowered previous to November 1st. We have had some trouble with frozen services, mostly on Summit street. Number of services thawed out this winter, 9.

The 1st of December careful inspection of the high service disclosed an excessive waste of water, and to quite an extent it has been remedied.

No. of houses on high service,	230
of families on high service,	301
of factories all on meter,	8
of water closets,	151
of bath tubs,	69
of bibbs,	841
of horses and cows,	160
of inhabitants,	1,237
Average amount of water used per day by meters,	13,100 gals.
Average used per inhabitant for month of November,	119 gals. per day.
Average used per inhabitant for month of December,	67 1-2 gals. per day.
Average used per inhabitant for month of January,	65 gals. per day.
Average used per inhabitant for month of February,	63 1-3 gals. per day.

With the amount of water now being pumped, we have been enabled to dispense with an assistant engineer.

LIST OF WATER TAKERS AS SHOWN BY SERVICE BOOK OF
THE AUBURN WATER WORKS.

Total number of water takers,	2,358
As follows, viz. :	
Total number of families at \$7 per year,	1,253
Total number of families at \$6,	905
Stores, specials, extras, etc.,	200

REPORT OF OVERSEERS OF THE POOR.

To the City Council of Auburn :

GENTLEMEN :—We herewith submit to you an account of our doings as Overseers of the Poor for the municipal year ending February 28, 1894, which is as follows :

The amount appropriated by the City Council
for the support of poor and insane persons,
and salary of overseers was \$4,000 00

Received from other towns and State for supplies
furnished paupers as follows :

From the town of Yarmouth,	\$210 19	
Norway,	28 00	
City of Augusta,	59 68	
State,	16 00	
Mrs. Geo. Webb,	38 33	
Simon Morrison,	5 00	
C. H. Record,	2 50	
Ann J. Moore,	18 44	
Nathaniel Davis,	131'43	
	<hr/>	
		\$509 57
Total receipts,		<hr/> \$4,509 57

EXPENDITURES.

For the support of insane persons,	\$2,136 87	
Supplies furnished Almshouse,	843 12	
Superintendent and wife at Almshouse,	500 00	
Support of persons off farm who have settlement in city,	1,318 23	
Support of persons off farm who have settlement in other towns,	102 17	
Support of persons who have no settlement in the State,	204 29	
Miscellaneous expenses,	13 89	
	<hr/>	
Total expenditures,		\$5,118 57

There are now due the city the following sums :

From the town of Minot,	\$ 3 94	
Detroit,	14 84	
Brunswick,	3 50	
Durham,	321 66	
Lisbon,	16 20	
City of Lewiston,	98 59	
T. F. Keefe,	39 00	
	<hr/>	
		\$497 73

The following statement shows the account of the Poor Department with the city for the year commencing March 1, 1893, and ending February 28, 1894 :

Appropriation by City Council,	\$4,000 00	
Rec'd from other towns,	509 57	
Due from other towns,	497 73	
	<hr/>	
		\$5,007 30

Paid for support of insane persons,	\$2,136 87	
Support of poor,	2,967 81	
Miscellaneous expenses,	13 89	
		<hr/>
		\$5,118 57
Overdrawn,		<hr/>
		\$111 27

We have now upon the farm 2 horses, 14 cows, 2 yearlings. 1 bull, 5 shoats, 2 hogs, 1 two-horse dump cart, 1 two-horse wagon, 1 ox cart, 1 one-horse wagon, 1 harness, 2 sets double harnesses, 1 mowing machine, 1 horse rake, 3 plows, 1 plow-sulky, 3 harrows, 25 hens, 50 bu. corn, 8 bu. barley, 16 bu. oats, 2 bu. peas, 8 bu. beans, 25 bu. potatoes, 5 bu. beets, 2 bu. turnips, 30 tons hay, 2 tons straw, 46 tons ice, 30 cords wood, 15 lbs. tea, 1 bbl. pork, 1 bbl. vinegar, 6 tons coal.

There are now on the farm 14 paupers, average number for the year 15.

There has been two deaths and one birth on the farm.

Though times have been hard and many persons out of employment, the appropriation has been overdrawn only one hundred and eleven dollars and twenty-seven cents.

We recommend that the sum of four thousand five hundred dollars be appropriated for the ensuing year.

The services of Mr. and Mrs. Newell, who have served us so faithfully in the past, have been engaged for another year.

A. M. PENLEY,
J. M. STEVENS,
H. O. WHITMAN,

Overseers of the Poor.

Messrs. Overseers of the Poor:

I herewith submit to you an account of my doings as superintendent of the City Farm for the municipal year ending February 28, 1893, which is as follows:

REPORT OF STREET COMMISSIONER.

To the Mayor and members of the City Government of the City of Auburn :

GENTLEMEN :—I herewith submit to you a statement of my expenditures as Street Commissioner for the year ending February 28, 1894.

STREETS AND HIGHWAYS.

Expenditures :

Repairs on Streets and Highways, \$21,179 02

Appropriation, \$16,000 00

Receipts :

For board of Fire Dept. horse, 144 00

Received from other sources, 267 32

Received from Permanent Improvements and New Road Departments, 903 53

\$17,314 85

Overdrawn, \$3,864 17

The property of the Street Department is as follows :

Eleven horses and harnesses, \$1,900 00

Five double dump carts, 300 00

One single dump cart, 30 00

Six double sleds, 180 00

Five road machines, 600 00

One derrick, 50 00

Five snow plows,	\$100 00	
One street sweeper,	10 00	
Old harnesses,	30 00	
One single harness,	25 00	
One stone crusher,	2,000 00	
Miscellaneous tools,	300 00	
	<hr/>	
Total,		\$5,525 00

NEW ROADS AND SIDEWALKS.

Appropriation,		\$1,000 00
Expended :		
Grading Union street,	\$ 90 00	
Grading Spring street extension,	135 00	
Grading Highland Avenue and building sidewalk on same,	33 75	
Grading Winter street,	82 50	
Building Clarke street,	54 00	
Building Harvard street extension,	54 25	
Building sidewalk, Danville Junction,	121 60	
Building sidewalk, Gamage Ave.,	80 65	
Building sidewalk, Washington street,	51 30	
Grubbing Hotel Road,	63 00	
Labor on Upper Court street,	149 50	
	<hr/>	
		\$915 55
		<hr/>
Balance,		\$84 45

PERMANENT IMPROVEMENTS.

Expended :	
Curbing set and flagging laid, 3,281 feet,	\$3,339 11
Stone culvert on Goff Hill,	26 00
Stone culvert, West Auburn,	24 00
Three stone culverts, North River Road,	180 75

Bridge on South River Road,	\$118 50	
Bank wall on Miller street,	42 68	
Bank wall on Second street,	34 47	
Bank wall on Spring street,	33 00	
Bank wall on Broad street,	31 50	
Labor on Upper Court street,	205 30	
	<hr/>	\$4,035 31
Appropriation,	3,000 00	
Rec'd of F. L. Dingley for labor,	51 45	
Rec'd from other sources,	5 00	
	<hr/>	\$3,056 45
		<hr/>
Overdrawn,		\$978 86

SEWERS.

Sewers have been laid on the various streets during the past year as follows : viz :

Temple street, 250 ft. 8 in. pipe,	
2 catch basins,	\$193 35
South Goff street, 484 ft. 12 in.	
pipe, 4 catch basins,	711 43
Newbury street, 390 ft. 8 in. pipe,	
2 catch basins,	280 65
Second street, 234 ft. 8 in. pipe,	} 285 93
2 catch basins,	
Second street, 44 ft. 12 in. pipe,	} 285 93
Pulsifer street, 44 ft. 12 in. pipe,	
Pulsifer street, 234 ft. 8 in. pipe,	
2 catch basins,	
South street, 142 ft. 8 in. pipe, 2	
catch basins,	151 12
Winter street, 530 ft. 12 in. pipe,	
2 catch basins,	412 42
Turner street, 480 ft. 15 in. pipe,	
3 catch basins,	545 40
Summer street, 290 ft. 15 in. pipe,	
1 catch basin,	349 30

Whitney street, 1,092 ft. 12 in. pipe, 6 catch basins,	\$848 90	
Cushing street, 640 ft. 24 in. pipe, 1 catch basin,	2,147 85	
	<hr/>	\$6,212 28
Appropriation,	\$4,000 00	
Sewer assessments paid,	1,676 00	
Sewer Permits,	255 00	
Labor done for S. K. Ballard,	13 50	
Old pipe sold,	4 00	
	<hr/>	\$5,948 50
Overdrawn,		<hr/> \$263 78

Respectfully submitted,

D. P. FIELD,

Street Commissioner.

REPORT OF CHIEF ENGINEER.

*To the Honorable Mayor and City Council of the City of
Auburn:*

In conformity with my duties I make the following report and recommendations as Chief Engineer of Fire Department for the year ending March, 1894.

There is in the department one steam fire engine, one two-horse hose reel, two one-horse hose wagons, one hose pump, one hook and ladder truck, and one horse that is entirely under the control of the department. We have about 6,000 feet of serviceable hose, and pipes, spanners, stretchers, ladder straps, smoke protectors, etc., to fairly well supply the needs of the department.

During the year the engine has been repaired with new valves for the pumps, and a relief valve for the use of stop nozzles. There has been three Callahan nozzles and two rubber flexible pipes bought, which now gives a stop nozzle for all streams that would be required at an ordinary fire. There has been twelve rubber coats, six rubber smoke protectors, besides other articles needed, purchased from time to time as required. The department has also added to its apparatus two nicked and three painted Lindgran-Mehan four gallon chemical fire extinguishers with pump for recharging.

A double swing harness has been procured for the hose reel so that now each horse used on the fire apparatus is supplied with that style of harness.

The fire alarm system has been entirely changed about during the year, five new Gamewell boxes have been added

and the old style gongs or tappers changed for those requiring less battery power. All the alarm boxes beginning with eight are now north, and those beginning with nine are south of Court street, which will give a chance for those that may hereafter be added numbered above one hundred for the hills or outside districts. The boxes have also been supplied with key boxes so that by breaking the glass the key may be had without the delay of awakening neighbors to obtain one. I wish to call your attention to the fact that there are sections which need to have boxes now and would recommend that one be put farther out on Washington street, one on Lake and Fern streets or that vicinity, and one over Prospect Hill near residence of Hon. W. W. Bolster.

The hydrants now set are all in good working condition, but the city stands much in need of others, especially so in the section below Little River bridge where so many large four story wooden tenement houses have been erected, and that part of the city over Goff Hill which takes a long time for the apparatus to reach even after the alarm has been given, and in view of the present extremely low price of materials, it seems to me that this present year the city should make an appropriation for hydrants so that one may be set at each of the following places, to wit. :

- One on the corner of Granite and Fern streets.
- One on the corner of Upper Court and Granite streets.
- One on the corner of Upper Court and Summit streets.
- One on the corner of Upper Court and Haskell streets.
- Three on Western Avenue if pipes are laid this year.
- One on Minot Avenue near Fitz Bros. Co.
- One on the corner of First and River streets.
- One on the corner of Second and Gill streets.
- One on the corner of Second and Dunn streets.
- One on the corner of Third and Cook streets.
- One on the corner of Fourth and Dunn streets.
- One on the corner of Fifth and Pulsifer streets.
- One on the corner of Sixth and Broad streets.
- One on the corner of Sixth and Barker streets.
- One on the corner of Willow and Pine streets.

One on the corner of Pearl and Pine streets.

One on French near school house and corn factory.

One on the corner of Turner and Summer streets.

Two or more on Gamage Avenue between the Dennison street hydrant and Five Corners near brick school house.

During the year past no new hose was bought. The department had at the first of the year 950 feet of Eureka hose not in use because the threads were cut different from the hose in use. The couplings were milled over so as to run without trouble, and we thus avoided having to purchase any. The city should buy about 1000 feet this year of double jacket hose of some good make, of which there are quite a number on the market to select from.

There was bought during the year a tap and die for fire hose, and also a set of tools for connecting on the couplings, so that hose can now be (and in fact have been during the year) repaired by the janitor of the engine house without extra cost to the city.

My experience the past winter convinces me that the heating apparatus should be changed so as to give better results. There has been about 30 tons of coal burned, and yet in extreme cold weather, or when there has been a large amount of hose to be dried, we have been obliged to set up a stove and run a wood fire in the lower part of the house. This took about two cords of fitted hard wood.

I am well aware that only a certain amount can be done in any municipal year, and that many things which are wanted in all the different departments have to wait over for lack of funds, but I trust the council for the current year will consider the necessity of more fire apparatus. There is, in my opinion, need of more in a city like this, covering so much territory. The time taken to make the run, and the small number of men at hand on the start, gives the fire a chance to gather that headway that perhaps may be beyond the power of the department to control. I therefore recommend that a hose reel or wagon be purchased for the New Auburn section, and a company of ten men be organized in that section as a hose company. I also feel it essential that the city have rubber blankets to cover goods in stores or furniture in dwellings.

There has been, during the past year, 31 calls upon the Fire department, 23 by general alarm and 8 by telephone. The latter were for chimneys burning out, brush fires, rubbish near river wall which needed looking after, and thanks are due the parties who thus called as it accomplished all that was required and made a great saving in expense to the street department as well as the men who would be called from their work.

The total amount of loss by fires was about \$36,000; the insurance on the same was within two or three hundred dollars of covering the losses.

The total amount of hose laid at fires was 30,600 feet.

The general alarms responded to were as follows: To wit:

April 29th, box 93, house on First street, cause, unknown.

May 9th, box 86, Hersey Block, Main street, cause, unknown.

May 10th, Chiefs' call, Bearce & Wilson's shed, cause, sparks from engine.

June 14th, box 86, Heath building, Court street, cause, unknown.

June 21st, box 93, Laplant's house, Third street, cause, oil stove.

July 4th, box 82, Thompson's stable, Coburn street, cause, lightning.

July 12th, box 85, Tobacco store, Court street, cause, lamp.

July 21st, box 85, Fickett's house, Pearl street, cause, oil stove.

July 21st, box 89, A. Knights, Main street, cause unknown.

July 28th, box 86, wood pile, upper Main, cause, incendiary.

Sept. 19th, box 85, Ladd's store, Upper Court, cause, lamp dropped.

Nov. 11th, box 95, G. T. freight shed, cause, unknown.

Dec. 2nd, box 81, Pollister Block, Court, cause, lamp exploded.

Dec. 9th, box 95, Maine Investment Co., Main street, cause, defective flue.

Dec. 11th, box 91, A. B. Latham's, Spring street, cause, chimney burned out.

Dec. 14th, box 94, Stove Foundry, cause, unknown.

Dec. 15th, box 94, Stove Foundry, cause, from debris.

Dec. 18th, box 81, Ahern store, Main street, cause, over heated stove.

Jan. 10th, box 81, Elm Block, Court street, cause, steam pipes.

Jan. 28th, box 84, Wilbur House, School street, cause, chimney burned out.

Jan. 28th, box 81, H. R. Smith's building, Court street, cause, unknown.

Feb. 18th, Box 81, Maine Hotel, Main street, cause, unknown.

Feb. 24th, box 84, Mrs. Bearce's house, Goff street, cause, chimney burned out.

In conclusion, I wish to thank the Committee on Fire Department for aid in having my wishes carried out, to His Honor, the Mayor, and Council for granting all the favors asked for the Department, and to the Department for the manner in which they have supported me throughout the year.

Respectfully submitted,

L. W. HASKELL,

Chief Engineer.

REPORT OF CITY SOLICITOR.

To the Honorable City Council of the City of Auburn:

I have the honor to submit herewith my report as City Solicitor for the year just ended.

The case of John Bolton vs. City of Auburn stands upon the docket of the S. J. Court of this county in the same condition as reported by my predecessor in office.

The case decision of R. R. Com'rs on petition of Municipal Officers of Auburn for approval of grade crossing, on extension of Spring street, was dismissed from docket in April, 1893.

The suit Auburn vs. Yarmouth for \$78.77, pauper supplies furnished H. Maria Hitchcock, entered in the April term of the S. J. Court, resulted in favor of the city. The defendant paid the sum sued for and costs, has reimbursed the city for sums since expended, and has assumed the care of the pauper.

The case Auburn vs. Y. M. C. A. entered in our S. J. Court in January, 1893, was argued before the presiding justice the following April, and sent to the Law Court on report. This was a suit for taxes assessed upon the Y. M. C. A. building for the years 1891 and 1892. The Y. M. C. A. claimed exemption from taxation for its entire property. The contention of the city that that portion of the property owned by the Association, but not actually occupied and directly used for Association purposes, is properly subject to taxation, was

sustained by the full bench. This decision has an importance beyond our own limits, as firmly establishing a principle in this State.

As long ago as February, 1885, a petition of A. M. Fogg and others was presented to the County Commissioners for the opening of a road from Summer street up through the gully to Bird Flat.

On June 3d, 1885, a hearing was given and it was adjudged that common convenience and necessity did not require the location prayed for. From this decision an appeal was taken January 18th, 1886, and a committee duly certified by the S. J. Court reversed in toto the decision of the County Commissioners, who thereupon under the law located the way. Auburn was allowed three years within which to open the way. The three years expired March 31st, 1890. The city still having neglected to open the way was liable to indictment for its neglect to do so.

In the April term, 1893, an indictment was entered against the city in September, 1893, the city demurred to the indictment on technical grounds. The demurrer having been overruled and the indictment sustained there seems to be nothing left for the city to do but build the road this season.

There is pending also the suit of James Wood in equity vs. City of Auburn and the Auburn Water Commissioners, in the S. J. Court. The bill was filed December 11th, 1893. A temporary injunction was granted, restraining the city from shutting off the water from the tenements of the plaintiff. The city has filed its answer.

The suits of George A. Pulsifer for \$500, Nellie M. Pulsifer for \$2,000 and Eben J. Pulsifer for \$200, all for injuries received in the same accident upon Broad street in New Auburn, were entered in the Supreme Court in September, 1893, and will probably be tried the coming April.

During the year there has been much litigation between the Lewiston and Auburn Horse Railroad Co. and the cities of Lewiston and Auburn, the questions involved being the relative rights of the municipalities and of the Railroad Co. in the streets. The Railroad Co. contended that it had the right to remove snow and ice from its rails at all seasons of the year

without regard to the question as to whether, by so doing, it rendered the streets unsafe and inconvenient for public travel, and that it was not in the power of the municipalities to prevent the Railroad Co. from keeping its rails bare all the year round; the cities holding the reverse of these propositions. These contentions were happily settled in the case of the indictment against the city of Auburn, tried in the January term, 1894, before Judge Walton. The presiding justice held the law to be in substance, that whether the removal of snow and ice from the track of the Horse Railroad Co. created a defect in the streets or not was a matter entirely within the discretion of the Municipal Government, and if, in their judgment, such removal created or would create a defect in the streets, they not only had the power to prevent its being done or to repair the defect in case it had already been created, but that it was the duty of the municipality to exercise this power.

By an act of the Legislature of Maine, approved February 19th, 1891, a charter was granted to the city of Auburn, giving the city the right to take water for municipal and domestic purposes. The said charter was not to take effect, however, unless the city within fifteen months from the approval of said act offered, in writing, to purchase all the property, franchises, rights and privileges of the Auburn Aqueduct Co., and unless in case of the acceptance of said offer by the Aqueduct Co., the city should pay the price to be agreed upon or determined according to the method prescribed in said act.

On June 29th, 1891, the city gave the Auburn Aqueduct Co. a written notice offering to buy its property, franchises, rights and privileges, except its cash assets. The city and the Aqueduct Co., failing to agree upon the price to be paid therefor, upon the petition of the city of Auburn, the court, on the 16th day of October, 1891, appointed a commission consisting of Hon. Chas. W. Walton, Lucelius A. Emery, James A. Weston, Franklin A. Wilson, and Weston F. Milliken to appraise the property under the provisions of said act of 1891.

On December 8th, 1891, the commission met at the Court House in Auburn and gave a hearing lasting four days,

upon the question submitted to them. On the third Tuesday of January, 1892, the report of the commissioners was filed. The commission, as appears by said report, appraised the property as worth on the 19th day of September, 1891, (the date agreed upon by the parties as of which the property should be valued) the sum of two hundred and fifty thousand dollars. On January 27th, 1892, the Auburn Aqueduct Co. filed objections to the confirmation of the report of the commissioners, the main objection being that the value placed upon the property by the commissioners was too small; the report was nevertheless confirmed pro forma, whereupon the Aqueduct Co. filed exceptions and the case was marked for the Law Court.

In the September term of 1892 the exceptions of the Auburn Aqueduct Co. were withdrawn. A special judgment was given on the case November 11th, 1892, confirming the finding of the commissioners and the case was retained upon the docket for further proceedings under Sec. 11, Chapter 82 of the private and special laws of 1891. It was now incumbent on the city within two calendar months from date of the entry of said judgment (i. e. November 11, 1892) to notify the Auburn Aqueduct Co. of the city's willingness to purchase the plant at the price thus fixed. Pursuant to a vote of the City Council passed November 21st, 1892, the Mayor notified the Auburn Aqueduct Co. on December 9th, 1892, of the city's willingness to purchase. On December 13th, 1892, a proposition of the Auburn Aqueduct Co. dated December 10th was presented to the City Government by which the company offered to reconstruct its works during the year of 1893 under the direction of an engineer to be approved by the City Government. The City Council passed a resolve at the same meeting declining to accept the offer.

The proposition for the city to purchase a controlling interest in the stock of the Auburn Aqueduct Co. met with no better success. The crises came on the 17th day of February, 1893, when this proposed deal was rejected by an overwhelming majority of the city council.

In the mean time the two months within which the Auburn Aqueduct Co. could avail themselves of the city's

offer to purchase at the appraisal of the commissioners had expired, and the city found itself unexpectedly in the possession of a franchise of its own free of all conditions.

The Auburn Aqueduct Co. now found themselves in a trying position. The proposition for the city to acquire a controlling interest in the stock of this company having so unexpectedly miscarried, they found not only that the time within which they could accept the city's offer had expired, but that in consequence of their not accepting it the close of the 9th day of February, 1893, saw Auburn in possession of an unconditional charter; a charter equally as good if not superior to their own. With this charter they were now confronted.

Then it was that the act of the Legislature, Chapter 560 of the Private and Special Laws of 1893 was concocted and put through the legislature backed by the influence of a powerful lobby. This act took effect upon its approval, March 24th, 1893.

It provided for the suspension of the city's charter and its ultimate repeal, if upon the acceptance by the Aqueduct Co. of the city's offer to purchase at the appraisal (an offer which had ceased to exist on the 9th day of February) within ten days of the approval of the act and the filing and approval of deeds of transfer, the city should fail to pay, or cause to be paid within thirty days from the approval of said deed, by a justice of the Supreme Judicial Court, \$100,000 of the purchase price and within sixty days thereafter the balance of the price \$91,700. The bonded indebtedness of the Company, \$58,700, was also to be assumed and paid by the city.

The Aqueduct Co., relying upon the constitutional limitation of municipal indebtedness, thought that the money could not be raised, and that the city's failure to raise it would throw the property back into their hands and that the city, under the first and second Sections of the Act of 1893, would lose the charter which became vested in it on the 9th of the preceeding February.

Nor were they to rely alone upon the inherent difficulty of the task which now confronted the city, for on the 24th day of May, 1893, a bill in equity was served upon the city of Auburn, William W. Bolster, then mayor, James A Pulsifer,

the city solicitor, the Auburn Aqueduct Co., and Eben G. Eveleth, treasurer of the city of Auburn. This bill was signed by eleven tax payers of the city of Auburn, Lucius Packard, Greenleaf D. Willard, Almon B. Donnell, Daniel Lowell, H. B. Bisbee, Robert A. Varnum, J. L. Lowell, F. A. Gerish, George Hanson, A. Libby, and Daniel Briggs. It prayed for an injunction restraining the said city or its said officers from accepting the deed of the Aqueduct property, the deed which was held by the Clerk of Courts as an escrow and which had received the approval of Judge Walton. It asked that the said Bolster, Pulsifer, and Eveleth be perpetually enjoined from borrowing money on the credit of the city of Auburn, to be used in payment or part payment of the consideration set forth in said deed or from paying any money therefor from the treasury of the city of Auburn.

A hearing was had at Augusta, May 26th, 1893, before Hon. T. H. Haskell, assisted by other members of the bench, at which hearing the injunction was denied, and on the following day was paid \$100,000 as the first installment toward the purchase of the Aqueduct property. Notwithstanding the strenuous efforts of the Aqueduct Co. and its co-adjutors to injure the city's credit and hinder and embarrass in every way the labors of those charged with the raising of this large sum of money, on the 7th day of June, 1893, just one month and two days from the approval of the deed by Judge Walton, was paid the last installment, \$91,700, and the city received the deed, and the people became the sole owners of their water supply.

The great learning, eminent ability, and strong, broad minded sence of justice of Judge Walton was a tower of strength to the people's cause in the time of direst need. The result of this case reflects lasting honor upon his career and increases his title to our respect and affection.

Respectfully submitted,

JAMES A. PULSIFER,

City Solicitor.

REPORT OF CHIEF OF POLICE.

Auburn, Me., March 1, 1894.

*To the Honorable Mayor and Aldermen of the City of
Auburn :*

GENTLEMEN :

I have the honor to submit, as Chief of Police, the following doings of the Police Department for the year ending February 28, 1894.

The number of complaints made before the Municipal Court for the year are shown in the following table :

Intoxication,	293
Vagrants, tramps, idle and disorderly persons,	112
Assault and battery,	25
Intent to cheat and defraud,	23
Larceny,	19
Taking logs from river,	5
Trespass,	5
Unlawful assembly,	4
Ball Playing,	4
Fast driving,	3
Arson,	3
Adultry,	3
Obstructing street,	2
Obstructing sidewalk,	1
Cruelty to animals,	1
Common runaway,	1

Resisting officer,	1
Disturbing religious meeting,	1
Contempt of court,	1
Eves dropper,	1
Selling cigarettes to minors,	1
Malicious mischief,	1
Fornication,	1
Nuisance,	1
Bicycle riding on sidewalk,	1
	<hr/>
	514
Seizure of intoxicating liquor,	7
Search and seizures,	5
	<hr/>

526

Two persons during the year have been taken to the Insane Assylum, and two boys have been taken to the State Reform School.

Respectfully submitted,

W. S. LARRABEE,

Chief of Police.

REPORT OF LIQUOR AGENT.

To the Honorable Mayor and Members of the City Government:

GENTLEMEN:—I herewith submit my report as Liquor Agent for the City the current year ending Feb. 28, 1894.

CR.

By liquors on hand March 1, 1894,	\$760 62	
Cash paid City Treasurer,	13,348 74	
Cash paid City Treasurer for		
casks sold,	55 73	
Empty casks on hand,	10 00	
	<hr/>	\$14,175 09

DR.

To liquors on hand March 1, 1893,	\$863 05	
Liquor bought from March 1,		
1893 to March 1, 1894,	9,648 76	
Agent's Salary,	375 00	
Freight, trucking, fuel, etc.,	141 21	
U. S. License,	25 00

Respectfully submitted,

P. M. WOODMAN, *City Agent.*

REPORT OF CITY PHYSICIAN.

To the Mayor and City Council:

I herewith submit my report as City Physician for the year ending March 19, 1894. Very few calls have been made at the city farm, but more than the usual number of poor people have been treated at the city's expense. The whole number attended is twenty-three and the number of calls made is one hundred and fifty-three. At usual prices the expense to the city would be \$214.50.

Two deaths have occurred at the city farm, one from consumption, the other from chronic heart disease. There have also been two births.

Respectfully submitted,

B. G. W. CUSHMAN,

City Physician.

REPORT OF BOARD OF HEALTH.

To the Honorable City Council of the City of Auburn:

GENTLEMEN:—The Board of Health present the following report:

There have been seventy-two complaints made to the Board during the year, of nuisances; all of which have been carefully looked after by one or more members of the Board. With but one or two exceptions our advice has been kindly received and the unhealthy premises made cleanly. We have on several occasions where no complaint has been made, requested occupants to clean up their yards and stables. In every instance they have complied with our request.

During the year we have had the pleasure of seeing new sewers laid on Winter, Summer, Turner, South Goff, Temple, South, Whitney, Second, Newbury and Pulsifer streets. Quite a large number of houses on these streets have entered the new sewers. Seventeen entries have been made into old sewers.

The number of cases of typhoid fever reported during the year is 17, with no deaths; scarlet fever thirty-one, no deaths; diphtheria 18, with 2 deaths. Our efforts to properly quarantine and disinfect contagious diseases, have met with no opposition. The City Government and Street Commissioner have assisted us in our work in every possible way their means would admit.

There are many suggestions we might make, but our

experience the past year leads us to the belief that at the proper time if we ask we shall receive the hearty co-operation of all interested.

Respectfully submitted,

DANIEL LARA,
GEORGE S. WOODMAN.
ANDREW M. PEABLES.

Board of Health.

REPORT OF INSPECTOR OF VINEGAR.

To the Honorable Mayor and members of the City Government :

The amount of labor required of "The Inspector of Vinegar" during the year has been very light indeed. In fact, nothing in the line has been offered, and, therefore, I presume the acid that has been retailed by the grocers of our city has pleased the taste of the customer.

With due appreciation of the responsibility of my office, I herewith faithfully submit my annual report.

Yours respectfully,

O. W. JONES,

Inspector of Vinegar.

REPORT OF SCHOOL COMMITTEE.

To the City Council of the City of Auburn:

SCHOOL BUILDINGS.

The School Committee are happy to report the completion of the Perryville school-house during the last year; it is well constructed and conveniently arranged; it was built none too soon, as it is already occupied nearly to its full capacity. In New Auburn there is a serious lack of school accommodations; there is a pressing call for a suitable lot and a new school-house. The lot purchased by the city for this purpose two years ago is unsuitable. The probable cost ought to be added to the usual estimates of the ordinary expenditures for the ensuing year for the erection of a suitable and proper school-house in this growing section of our city, where all the present suitable accommodations are packed with pupils.

The school buildings of the city have been very much improved during the year by repairs that have been made, and are now in very good condition, but still subject, in some cases, as a matter of economy, to further improvements.

SCHOOLS.

Not overlooking the great importance of our school system our schools are being managed with the strictest regard for economy. To carry forward the work in our schools efficient and competent female teachers are in the main employed and nearly all of them are residents of our city.

The Auburn schools have had a successful year's work, and are now in a quiet and prosperous condition, the reports concerning them being almost without exception favorable. In connection herewith, the Committee submit the able report of the Superintendent of Schools for more particular information respecting their management, methods and merits, who, of course, has had larger opportunities of observing them all, and of estimating their relative excellence than any member of the Committee. Looking to his report for details, we have only to consider here any features of our school system that may appear deserving of comment. Our public schools offer an excellent education, free of charge, to every child in the city who is able to remain long enough to complete the course. Unfortunately, only an insignificant fraction of the whole number of children reap the full advantages of the system. The children leave, not because, even in their own opinion or in that of their parents, they have learned enough, but because circumstances will not allow them to remain longer, because their services are needed at home, or in some occupation in which they can earn a pittance for their own support.

The absence of friction or disturbance in our schools during the past year, with harmony and good feeling instead, speaks well of the good discipline and condition that has prevailed.

The spirit of progress, the methods used, and the work done within the past ten years have placed our schools among the foremost in the state. With good and efficient teachers we shall never have *poor* schools, but with good teachers, good accommodations, school buildings properly constructed and arranged, we can have in the highest sense *good* schools.

In the assignment of teachers the Committee have made it a point to select the best teachers with due regard to permanency. Old teachers who have proved themselves competent have been selected instead of new ones; other things being equal, residents of the city have been chosen.

The schools have been free from epidemics the past year.

HIGH SCHOOL.

The high school building is an honor and an ornament to Auburn, it is among the first of its class in the state. There has been no change in the building the past year. The school is now under the efficient management of Professor J. F. Moody as it has been in the past eight years. Upon the resignation of Frank W. Larrabee, Charles L. Hill was appointed assistant teacher. There has been no change in the course of study during the year, the course is such that a good preparation can be obtained, by those desiring it, to enter any college in New England. At the close of the last year a class of forty-eight graduated from the school, the largest that ever graduated in any one year, seventeen of whom entered the various colleges in the state.

The school still merits the usual high commendation heretofore given it.

FINANCES.

The following is a financial statement which gives the amount of money received and expended for schools during the past year :

HIGH SCHOOL.

Appropriation,	\$5,000 00	
Received from state,	375 00

Supplies,		
	<hr/>	\$24,248 56
Not expended,		<hr/> \$155 28

Respectfully submitted,

W. W. BOLSTER,

For the Committee.

REPORT OF SUPT. OF SCHOOLS.

To the Superintending School Committee:

I herewith submit my ninth annual report of the Public Schools of the City of Auburn.

BUILDINGS.

Extensive and much-needed repairs have been made on and in the schoolhouses at Danville Junction, Danville Corner, West Auburn Primary, North and West Auburn Grammar, North Auburn Primary, East Auburn and Gowell's. New seats are needed at the Hotel Road, Littlefield's, Rowe's, Woodman's and Auburn Plains schoolhouses. Several of the buildings need painting, and numerous small repairs. The Webster yard is still ungraded and the city is disfigured by the fence that surrounds it. The water closets at Chamberlain and Douglas schools menace the health of teachers and pupils. All the buildings in the city need to be cleaned during the long vacation; many need whitewashing.

BOOKS.

One of the first duties of the new committee will be to take into consideration the matter of replacing the badly worn geographies and arithmetics with new ones. The books now in the hands of the children cannot be used longer than the present school year. The pupils have been able to do the

work without loss of time by changing books from one room to another, but these economies cannot be continued much longer as all parts of the books are very much worn. The committee continues its record of very low expenditure for books, etc. The amount expended for the past year was \$553.56 or 28 cents per pupil.

SUGGESTIONS AND OUTLINES FURNISHED TEACHERS.

For the past two years the reports of the Committee and Superintendent have been sent to all the patrons of the schools. Evidence is not wanting to prove that they have been read to a greater extent than was anticipated. The parts of these documents that gave some account of what the schools are doing and how the work is done, seem to have aroused the greatest interest. These facts furnish me with an excuse, if any is needed, for recording here the following outlines and directions that have been given the teachers during the year.

It is not best for your school or you that all of your time be given to your school work, but no teacher can do her duty who does not give to it her first and best thought and effort.

To be a successful teacher one must visit schools and study them; read educational books and papers and study them; study her pupils and their needs and the subjects she teaches; read some of the best books, study the forms of nature about her and be familiar with current discussions and events; devise, adapt and adopt methods of instruction; be alert, receptive, acquisitive, reflective and responsive; love her work and put her best effort into it; have an interest and fill a place in the community in which she lives; have an ideal and strive to attain to it.

Do not waste time in the routine work of the school or recitations. Curtail preliminaries, abridge introductions. Start when you begin. Get at the gist of the lesson. Spend your time and strength on important facts. Stop when you get through and then attend to something else, promptly.

Give definite questions and brief, lucid explanations. So train pupils that they will use the words and sentences that will best express the answer desired.

A teacher can be guilty of no greater mistake than to permit pupils to recite in halting, rambling, indefinite statements. This evil is aggravated if the teacher's questions are vague, or irrelevant, or her explanations are illogical, diffuse or pointless.

She must hold herself and her class to the topics under consideration. She must so train herself and her pupils that she can get at the work at once, stick to the text, finish each part in its order and summarize the essential points before closing the recitation. By example and precept make pupils feel that dawdling is a grievous offense.

Have some particular object to accomplish by each lesson. See that you accomplish it. Clinch at least one point in every recitation. Make the children feel that they have added something to their store of knowledge and best of all that they have gained strength and inspiration for further effort.

Put the most careful thought into training pupils how to work and always strive to so conduct your recitations as to develop the power of application.

Do not allow your pupils to feel that you will do their work or thinking if they fail to do it.

So far as you can find time have the children study the outlines of the history of Auburn, Maine and the United States. This work must necessarily be quite elementary in most of the schools. If the pupils have access to the necessary books and if they are directed and encouraged in their reading and if a few minutes each day are given to questioning them on what they have read you will find that in a short time the salient facts are selected and fixed in their memories.

Plan for such systematic written work as will make it easy for pupils to express in writing what they know and think, and render them familiar with the use of capital letters and punctuation marks, and give them correct ideas as to indenting, spacing, margins and clear, appropriate English.

Instruction in oral reading is important but training in receptive reading is much more valuable.

It is of the first importance that pupils should read (silently) some of the choice writings of the masters of English undefiled until they catch the spirit of the author, become saturated with his ideas and are able to appreciate the work for its beauty of expression, richness of thought and the warm life blood that flows through it.

Instruction in oral reading in the public schools should only attempt to so train the children that they can place the printed page before the listener as he would see it if he were using his eyes instead of his ears.

Do not aspire to have your pupils acquire that form of so called "elocutionary reading" that is as painful to the listener as it appears to be fascinating to the one who does the vociferating.

Will you take notes when you visit schools and be ready to report the points that you observe that you commend?

Will you take the time to write out the details of some work that you particularly enjoy and of which you are making a special feature?

Will you make a list of the words that your pupils most frequently mispronounce.

Judge your pupils by the best things they do. Assign the best possible motives for what they do and say. Cultivate the habit of judging and feeling kindly toward your pupils.

Study your pupils for the purpose of finding some way in which you can help them. The least attractive often need your counsel and sympathy the most.

Resist so far as possible the impulse to feel angry toward pupils. Feel and express pleasure that your pupils so conduct themselves as to permit you to commend them.

Find time to talk familiarly with your pupils. Show an interest in them and the work and trials that interest them. Make them feel, by feeling a genuine concern for them, that you are their friend, companion, guide; that they have rights and privileges as well as duties.

Respect the individuality of the individual. Let him see that he has a separate place in your thought and care and

that he stands or falls on his own merits ; that he must do his work in his own way. Encourage him to have a way of doing things. Adapt the discipline to the pupil. Do not feel that you have done your duty until your management of a child tends to fit him to manage himself.

There are two main purposes to be sought in school work :

1st.—To give the power to see, feel, express and do.

2d.—To gain the mastery of some facts.

The first is a *sine qua non* ; the second is important but will follow largely as a result of the first.

While it is true that it is not what a child learns but what he becomes that measures his progress, yet it is no less true that what he becomes depends largely on what he learns.

By precept and example strive to make it a controlling thought with your pupils that their happiness depends upon their making others happy, and that what we do to or for others concerns us vastly more than what others do to or for us.

The report of the Superintendent for 1893 contains detailed directions of the work required and suggestions as to methods to be used. See pp. 10-17, 19 and 20, and 30-33.

It is important that you spend the most of your time and effort on the subjects mentioned below.

Insist on the penmanship in all written work being the best that the pupils can do. Urge them to adopt a round, legible hand without shading or flourishes.

Drill on the spelling of the words the pupils will use in conversation and written communications. Test their knowledge of the terms used by having them put the words in sentences of their own construction.

In reading, drill on the words used until they can call them readily at sight in any connection. Have the printed page so read that the listener can see it with his ears. Devote some time to sight reading. For this work select text that is easier than the lessons that they study and on which they are drilled.

In language, strive to so train your children that they can speak and write correct and vigorous English. Facility, ac-

curacy and definiteness are the ends sought in this study. If your pupils cannot talk and write good English you are doing less for them than you ought.

In geography do not fail to have the pupils see the things about which they are studying, see representations of them, make models of them or see them with their intellectual eyes. Words without ideas and images behind them are the most worthless of all rubbish.

Illustrate and explain the processes in addition, subtraction, multiplication, division and fractions by the use of objects. Verify, test and exemplify all definitions. Drill on the oral combinations and the processes until they are thoroughly mastered and until they can be performed rapidly, accurately and understandingly.

If any of your classes do not come up to this standard in oral combinations,—drill on them. If any of your classes can not write and read numbers as readily as they can write and read words,—drill on them. If any of your classes are not thoroughly familiar with the processes in addition, subtraction, multiplication and division, and cannot perform the mechanical work promptly and correctly,—drill on them. If any of your classes do not understand fractions and cannot use them as easily as they do whole numbers,—drill on them.

These suggestions apply with equal force to all the fundamental principles of the subjects that you teach.

Your success and usefulness as a teacher are measured by the thoroughness with which your pupils master the elements and principles of the subjects studied. If you can do but little, do that little well. Do not waste your time and the energies of your pupils on work that is far beyond their abilities or scholarship. Review and continue to review until the pupils know and can use what they are studying. Do not fail to have the first steps and processes made so familiar that the children will know them so thoroughly that they can use them under all circumstances and at a moment's notice. Be content with nothing less than having each pupil think out and apply in all possible ways the principles that will be of use to him in any walk in life.

The ability to spell the words in common use and to use

these words understandingly and skillfully, the power to pull the pith out of what is read and judge of its merits, a perfect familiarity with the fundamental rules of arithmetic, and some definite idea of what the world is and what the people in it have done and are doing, are indispensable to every citizen in a civilized community. Strive to so conduct your work that your pupils will, by their own efforts, secure for themselves these blessings.

If you can so train your pupils that they will study intelligently and can kindle in them a love for study, and can breed in them the habit of close, continuous application, you will be entitled to be ranked as a pre-eminently successful teacher.

ITEMS FOR IMPROVEMENT.

During the year 1892-93, I made a careful study of the schools for the purpose of deciding upon the points on which I would ask the teachers to make a special effort to have the children strive to improve. The year's study in this subject and a large mass of notes were condensed into the seven short sentences found below and the brief comments that follow them. These were printed on small cards and given to each pupil. The teachers were asked to call attention to these requests and endeavor to develop a personal and school enthusiasm to excel in each of the particulars mentioned. They were asked to call attention promptly to any violation of these injunctions and were urged to be still more alert to speak in hearty approval of every honest effort made to improve in the particulars enumerated.

Stand and sit erect.
Move promptly and quietly.
Speak distinctly and gently.
Study more than text books.
Master what you study.
Be courteous and thoughtful.
Be diligent and trustworthy.

On the opposite side of the above card the following note was printed.

AUBURN, ME., Jan., 1, 1894.

Will you read or repeat the above once each day? Will you make an earnest effort to do the things there mentioned better than you did them last term? I am sure that you will be greatly benefited if you try to improve in these several ways. I am equally sure that you will always remember with pleasure every effort that you make to do more and live better than you did yesterday. These requests and suggestions are made by your superintendent,

W. W. STETSON.

And your teacher,

GENERAL EXERCISES.

The exercises given below were compiled by the teachers of this city and are used in our schools. A glance at the list will give one an intelligent idea of the scope and character of the work our schools are doing outside of routine lines.

DEVOTIONAL.—Scripture responsive exercises. Bible quotations alphabetically given. Memorizing short chapters. Bible questions.

SINGING.—Motion songs, illustrating the different occupations.

ROLL CALL.—Facts, items or incidents instead of response.

GEOGRAPHY.—Swift's lessons. Questions from cards. Geography matches. Geography games. Chart exercises. Use of moulding board. Moulding schoolyards, streets, states, counties, and different bodies of land and water. Local geography.

ARITHMETIC.—Colburn's Mental Arithmetic. Rapid oral combinations. Analysis of problems. Making change by use of toy money. Problems in actual measurement by the pupils. Number building with pegs and with

figures and signs on cardboard. Use dominoes, making all the combinations possible with them. Number games.

LANGUAGE.—Correcting common expressions. Expressions of courtesy used. Sentence building with words on cardboard. Different kinds of sentences found in reading lesson.

PATRIOTISM.—Patriotic songs and selections. Observe holidays and birthdays of distinguished Americans. Sketches of noted men and events in our history. Stories and incidents illustrating bravery, self-sacrifice and struggles of boys who attained distinction in spite of adverse circumstances.

PHONICS.—Drill on sounds of letters. Drill on words mispronounced. Vocal gymnastics, according to the Monroe system.

READING.—Such stories as will inspire the pupils with love for the brute creation. Books from the public library. Short stories read by the teacher and reproduced by the pupils, orally or in writing. Mention something by the same author, besides the piece read. Reading about cities. Picture stories. Current events read from daily and weekly papers by the teacher, and discussed with the pupils. Record of books read by pupils with outlines and comments.

HISTORY.—Swift's lessons. Names of presidents and something about each. History matches. Important dates. Sketches of important men in history.

DRAWING.—Maps. Original designs. Figures previously drawn. Fill out figures partly drawn.

LITERATURE.—Short sketches of authors. Pictures of authors and other noted persons brought in by pupils. Sketch of person for whom the building is named. Character games. Memory gems—prose and poetry. Selections from the standard authors. Complete poems of standard authors memorized.

SPELLING.—Matches. States and Territories. Objects in the school room. Months and days. Mixed letters for making words. Words often misspelled.

MISCELLANEOUS.—Civil government of city, county, state and nation. Elements of Physiology. The evil effects of all stimulants and narcotics upon the human system. Lessons on form, color, weight, size. Location of places and buildings. The principles of agriculture. Lessons in Physical culture. Lessons in modeling. Lessons on Mineralogy. Lessons in Botany. Lessons in Zoology. Lessons in Philosophy. Making simple experiments before pupils. Talks on natural phenomena noticed by the pupils. Paper weaving, folding and cutting. Sewing cards. Winding colored yarns. Putting puzzles together. A, B, C mottoes. Walking about the room with books on heads to secure erect position. Busy work tiles. Stick laying in a variety of forms. Soak a handful of peas over night and use with toothpicks in making squares, triangles, prisms, etc. Lessons on the names, dates and meanings of the different holidays. Lessons in Astronomy. Lessons in Natural History using Prang's and other pictures. Time by the clock. Talks about common things and subjects of interest to the pupils. Queer queries. Questions asked and answered by pupils. Items and objects of interest brought in by pupils. Copying of quotations. Write the name of each pupil on a slip and have the pupils copy. Exercises appropriate for the birthdays of noted men. Morals and manners. Conduct in the home, school, public places, in the street, etc. Treatment of elders, superiors, etc.

OUTLINES FOR CLASS WORK.

Appreciating the great injury that would be done pupils by limiting their work to text books, and the matter discussed in them, I have prepared lists of topics in Nature Studies, Geography and History. They are intended to aid teachers and pupils in taking broader and better views of school work

and to make the recitations something more than a lifeless recital of isolated facts. It is believed that they have helped to stimulate pupils to observe, read, study and seek for more forcible forms of expression.

TOPICS FOR NATURE STUDIES.

LIST OF BOOKS.

FOR TEACHERS AND FOR SUPPLEMENTARY WORK IN NATURE
 STUDIES, READING, GEOGRAPHY, HISTORY AND LANGUAGE.

Although there are a large number of books published on the above subjects, teachers are often at a loss to know what to select that will meet their wants and the needs of their pupils. To simplify the matter somewhat the following lists have been compiled and a few of the best books under each sub-division of the above subjects have been named. These titles, with the introductory note given below, were distributed

to the teachers last September. I am assured that they have been materially aided by these suggestions in making their selections from the Public Library.

A sincere effort to interest the children in these books cannot fail to give a larger and better view of the subjects studied than can be gained from text-books. If this work is well done the habit of reading will be formed, the work of the home and the school happily and profitably associated, a love of the beautiful in literature developed, and the judgment so trained that the pupils will separate the leading facts from those of minor importance. Are not these ends worthy of your best endeavor?

I trust that the accompanying "Topics" will assist in putting the work in such form that the pupils must see and examine the things studied in full size or in miniature, study representations of these objects, and make drawings and form mental pictures of them. To do this work successfully they must read some of the books mentioned under the head of "Books for Pupils."

TEACHERS' LIST.

MAGAZINES.

American Teacher, Popular Educator, Teachers' Institute, Review of Reviews, Cosmopolitan, Forum.

METHODS.

Page's Theory and Practice of Teaching, Hughes' Mistakes in Teaching, Howland's Practical Hints for Teachers, Prince's Courses and Methods, Swett's Methods of Teaching.

BOOKS FOR PUPILS.

NATURE STUDIES.

Eyes Bright. First Book of Botany, Youman. Each and All, Andrew. Child's Book of Nature, Hooker. Natural History Readers, Johonnot. Leaves and Flowers, Spear.

Guides to Science Teaching, Boston Society of Natural History. Sea-Side and Way-Side, Wright. Natural History Object Lessons, Ricks. Outlines of Lessons in Botany, Newell. Star Land, Ball. Seven Little Sisters Prove Their Sisterhood, Andrews. Learning about Common Things, Abbott. Look-about Club, Bamford. Insects, Manton. Field Botany, Manton. Talks about Useful Plants, Barnard. Wake Robin, Burroughs. Silver Wings and Golden Scales, Burroughs. Birds and Bees, Burroughs. Birds and Bees and Sharp Eyes, Burroughs. Bird Ways, Miller. Natural Philosophy for General Readers, Atkinson. The Chemistry of Common Life, Johnston. A Study of Leaves, Dennis. Life and Her Children. Facts and Phases of Animal Life, Vernon. Science of Familiar Things, Brewer. First Book of Science, Procter. Little Folks in Feathers and Fur, Miller. Stories Mother Nature Told Her Children, Andrews. What Shall We Talk About? A Boy's Workshop, Waite. Birds Through an Opera Glass, Merriam. Friends Worth Knowing, Ingersoll. Fairy Land of Science, Buckley. History of a Mouthful of Bread, Mace. A Year With the Trees, Flagg. Little People, Hook. The Earth in Past Ages, Herrick. A Naturalist's Rambles About Home, Abbott. A Young Mechanic, Lukin. The Five Gateways of Knowledge, Wilson. The Home Acre, Roe. The Playtime Naturalist, Taylor. Gleanings in Science, Molloy. Light Science for Leisure Hours, Procter. Young Folk's Cyclopædia of Common Things, Champlain. Fairy Land of Flowers, Pratt. Four Feet, Two Feet and No Feet, Richards. Little Flower People, Hale. Town Geology, Kingsley. Hand Book of Household Science, Youmans. Scientific Agriculture, Luptons. Natural Resources of the United States, Patton. Nature Reader, Wright. First Book in Geology, Shaler. Leaves from Nature's Story Book, Kelly. Stories from Animal Land, Chase. A Year With the Birds, Flagg. Sketches of Nature, Burroughs. Wonders of Plant Life, Herrick. Philosophy, Water, Abbott. Philosophy, Air, Abbott. Philosophy, Fire, Abbott. Philosophy, Sky, Abbott.

HISTORY AND BIOGRAPHY.

Beginners in American History, Montgomery. From Colony to Commonwealth, Moore. The Story of Our Continent, Shaler. Our Country, Strong. Stories From the Old World, Church. Little People of Asia, Miller. Boys of Other Countries, Taylor. Men of Iron, Pyle. Stories of India, Pratt. Stories of China, Pratt. Northern Europe, Pratt. American History Studies, 4 vols., Pratt. The Great West, Pratt. Our Fatherland, Carver. True Stories from New England History, Hawthorne. Old Times in the Colonies, Coffin. The Boys of '76, Coffin. Building the Nation, Coffin. Marching to Victory, Coffin. Redeeming the Republic, Coffin. Biographical Stories, Hawthorne. Lights of Two Centuries, Hale. Ten Boys who Lived on the Road from Long Ago to Now, Andrews. Portraits and Biographical Sketches of Twenty American Authors. Girls who Became Famous, Bolton. About Old Story-Tellers, Mitchell. Lodge's Short History of English Colonies in America. The Printer Boy. The Bobbin Boy. Pizarro, Pratt. Stories from French History, Scott. English History, Strickland. Ancient History, Strickland. Modern History, Strickland. Queens of American Society, Ellet. Child's History of England, Dickens. Pilgrims and Puritans. History of the United States, Higginson. Napoleon, Abbott. Life of Lincoln, Holland. French Revolution, Abbott. History of Germany, Lewis. Thirty Years' War, Gardiner. Gardiner's Students' History. Moors in Spain, Lane, Poole. Spain, Hale. Our Own Country, Dunton. Our American Neighbors, Dunton. Modern Europe, Dunton. Boyhood of Lincoln, Butterworth. English History for American Readers, Higginson and Channing.

GEOGRAPHY AND TRAVELS.

Young Folks' Travels in Europe. The World and Its People. Historical Geography of the United States, MacConn. Footprints of Travel, Taylor. Our World Reader, Hall. Geography Teaching and Land Modeling, Frye. Family Flight Around Home, Hale. Books of Notable Voyages, Kingston. Outward Bound, Optic. Shamrock and Thistle, Optic. Down the Rhine, Optic. Up the Baltic, Optic. Northern Lands, Optic. Cross and Crescent, Optic. Sunny Shores, Optic. Vine and Olive, Optic. Isles of the Sea, Optic. Doings of the Bodley Family, Scudder. The Bodleys Telling Stories, Scudder. The Bodleys on Wheels, Scudder. The Bodleys Afoot, Scudder. Mr. Bodley Abroad, Scudder. The Bodley Grandchildren, Scudder. The English Bodley Family, Scudder. The Viking Bodleys, Scudder. To Siam and Java, Knox. To Ceylon and India, Knox. To Egypt and the Holy Land, Knox. Through Africa, Knox. In the Russian Empire, Knox. On the Congo, Knox. In South America, Knox. In Great Britain and Ireland, Knox. In Australia, Knox. In Mexico, Knox. In Northern Europe, Knox. In Central Europe, Knox. Zig-zag Journeys, 14 volumes. Shaler's Story of Our Continent.

MISCELLANEOUS.

Little Lord Fauntleroy, Burnett. Young People's Cyclopædia of Persons and Places. Due North, Ballou. Due West, Ballou. Anecdotes of Animals, Lee. Alice's Adventures in Wonderland, Carroll. Aunt Joe's Scrap Bag, Alcott. Five Little Peppers, Sidney. Gipsy Breynton Series, Phelps. Two Boys and What They Did in a Year, McKenzie. Water Babies, Kingsley. Stories of Industry, Clow. How to Get Strong, Blaikie. Boys of Other Countries. The Earth in Past Ages. The Secret of Character Building, Motte. Getting on in the World, Mathews. Tom Brown at Rugby, Hughes. Twice-told Tales, Hawthorne. American Boy's Handy-book, Beard. American Girls' Handy-book, Beard.

How to Write Clearly, Abbott. Our Government, Macy. Politics for Young Americans, Nordhoff. The American Citizen, Dole. Bivouac and Battle, Optic. Sea and Shore, Optic. A Start in Life, Trowbridge. Biding His Time, Trowbridge. The Wonders of the World. Lessons in Manners, Wiggin. This Continent of Ours, King. The Land We Live in, King. Self Help, Smiles. Duty, Smiles. Thrift, Smiles. Character, Smiles. Life and Labor, Smiles. Little Women, Alcott. An Old Fashioned Girl, Alcott. Little Men, Alcott. Jo's Boys and How They Turned Out, Alcott. Eight Cousins, Alcott. Rose in Bloom, Alcott. Under the Lilacs, Alcott. Jack and Jill, Alcott. Silver Pitchers, Alcott. Spinning-Wheel Stories, Alcott. Learning to Read, Abbott. Learning to Talk, Abbott. At Work, Abbott. At Play, Abbott. At School, Abbott. Vacation, Abbott. Experiments, Abbott. Travels, Abbott. Museum, Abbott. Hours with Men and Books, Mathews. Men, Places and Things, Mathews. Wit and Humor, Mathews. Children of all Nations. The Doctor's Daughter, Sophie May. The Asbury Twins, Sophie May. Our Helen, Sophie May. Quinnebasset Girls, Sophie May. Robinson Crusoe, Defoe. Swiss Family Robinson, Wyss. Grimm's Fairy Tales. Stories of Industry. Hawthorne's Wonder Book. Black Beauty, Sewell. Winners in Life's Race, Buckley.

VISITING SCHOOLS.

There have been so many calls for the section of last year's report that treated of visiting schools that I have decided to reprint the suggestions made and the slips used in doing this part of the work.

The time that is spent in visiting schools, the care that is exercised in studying the work done and the methods used, and the effort that is made to aid the teachers in their work are indicated, to some extent, by the following questions and the way in which they are used.

.....*Building*.....*Grade*.....*Teacher*.

Observations made by the Supt......189

Answers.

1. Has she the instincts and tact of a teacher?
2. Did she seem to have consulted the course of study?
3. Did she seem to have prepared herself for the recitation?
4. Had she some definite plan of work?
5. Did she possess the undivided attention of her pupils?
6. Did she teach more than was in the text-book?
7. Did she use the facts and objects with which the children were familiar to illustrate principles studied?
8. Were her statements accurate?
9. Did her questions follow each other in a logical order?
10. Was her manner of questioning effective?
11. Were the essential points of the lessons emphasized by practical applications?
12. Did she lead the children to discover their errors?
13. Did the work done seem to promise lasting results?
14. Were her explanations suited to the abilities and advancement of her pupils?
15. Were the important points of the lesson fully developed and carefully summarized at the close of the recitation?
16. Did her teaching tend to make thinkers or machines?
17. Were the pupils taught *how* to reason by using the facts learned?
18. Did she encourage her pupils to read the books and papers found in the library, also books and magazines found at home?
19. Did she test their knowledge of what they had read by questions during the recitation period or in general exercises?
20. Did they master the work of the lesson?
21. Were important points frequently reviewed?
22. Were her questions brief and searching?
23. Were her recitations so conducted as to develop thought?
24. Did she despatch the details of her work expeditiously and quietly?

25. Did she secure promptness, accuracy and brevity in her recitations?
26. Were the tones of the teachers and pupils natural and pleasant?
27. Were her pupils respectful and courteous?
28. Did they speak distinctly?
29. Did they seem to make progress in their studies?
30. In what branch of study did the class seem to be weak?
31. Was the teacher too talkative?
32. Did it seem as if the teacher questioned the brighter pupils only?
33. Did the teacher always address her questions to the whole class?
34. Did she indulge in repeating the pupil's answer?
35. Did she say or do anything which the pupils might have said or done themselves?
36. Were her pupils urged to prepare simple apparatus to illustrate principles studied?
37. Were they energetic, self-reliant and progressive?
38. Did they stand, sit and walk as they should?
39. Was she careful in her manner, tone and words in her intercourse with her pupils?
40. In arithmetic did her pupils give parrot or intelligent analyses?
41. Did they analyze the problems or state the processes used in the work?
42. Were different examples assigned to different pupils?
43. Were fractions so taught that they were readily used mentally in interest and percentage?
44. Were the pupils rapid and accurate in mental work in arithmetic?
45. Did they thoroughly prepare their lessons before coming to the recitation?
46. Did she have them illustrate the principles involved by practical demonstrations?
47. Did she try to teach the cause and relation of facts studied?
48. In reviews were the questions so worded as to require the pupils to think if they answer them, and to use their own words in their answers?

49. Did the teacher watch the class steadily?
50. Did she change her position unnecessarily?
51. Did she ignore faults and irregularities?
52. Was the class quiet?....diligent?
53. How was the order in passing and handling books and apparatus?
54. Was the teacher just in praising?....reprimanding?
55. Did she practice self-control?
56. Was order maintained by harsh measures?
57. Was she kind and firm in her treatment of her pupils?
58. Did she rule by muscle?....by will power?....by inspiring self-control?
59. Did the discipline of the school influence the pupils helpfully outside of the schoolroom?
60. Was the moral atmosphere of the school wholesome?....mental?
61. Were the relations existing between the teacher and pupils kindly and intimate?
62. Did the pupils obey promptly....cheerfully?
63. What was the temperature?....atmosphere?
64. Was the teacher's writing on the board commendable?
65. Was the schoolroom tidy and attractive?
66. Were the pupils who were not reciting studying?
67. Were all the members of the class giving attention to the work of the recitation?
68. Was her instruction interesting enough to deserve attention?
69. Did her questions include the answers desired?
70. Did she suggest by words or tones the answers required?
71. Did she assist her pupils to such an extent as to make them dependent upon her?
72. Did they answer questions with the rising inflection?
73. Were they allowed to guess at answers?
74. Did their answers take the form of questions?
75. Did the teacher seem to be governed by the idea that it was her principal business to *hear* recitations?
76. Did she stimulate her pupils to think by asking suggestive questions?
77. Did she encourage healthful discussions?

78. Were her pupils alert and interested?
79. Did she infuse life and energy into the pupils and the work of the school?
80. Did she seem to be buried in her text-book?
81. Did she bring some new idea into each recitation?
82. Did the pupils read with good expression?
83. Did they speak in clear, distinct tones, and in a prompt and decided manner?
84. Were they allowed to read without comment or suggestion?
85. Was the amount of text read too much?
86. Was there enough time spent in studying the thought of the selection read?
87. Were the pupils required to reread a paragraph until they read it correctly?
88. Were mistakes in pronunciation and emphasis left uncorrected?
89. Was the pronunciation of the pupil clear and accurate?
90. Were mumbling, drawling, slurring tones permitted?
91. Did the pupils recite words or ideas?
92. Had the teacher read the Preface, General Remarks and Notes in Bright's work on language?
93. Did she embody the suggestions found therein in her teaching?
94. Did the younger pupils recite frequently enough?
95. Did she have some definite object to accomplish by each lesson?
96. Did she have some definite way of accomplishing it?
97. Did her pupils master the work attempted, and state clearly *their* ideas?
98. Was the work on the board and slates neatly done and arranged?
99. Were the pupils allowed to injure the text-books or other school property?
100. Were their answers indefinite or incomplete?
101. Did they use the words and sentences that expressed in the briefest and clearest manner the answers desired?
102. Did they understand the words used?
103. Were they required to work?

104. Did the teaching tend to develop the power of concentration?...memory?...attention?...application?
105. Did it tend to develop the power to see things in all their parts and relations?...to grasp and analyze ideas?
106. Were the pupils told to do or taught *how* to do the work required of them?
107. Are the pupils' vocabularies large and well selected?
108. In the assignment of lessons did the teacher indicate that she had made a study of the abilities and needs of her pupils and of the text assigned?
109. Is she familiar with current events?
110. Has she a special line of study or investigation not directly connected with her school work?
111. Has she read some of the standard works on education?...in general literature?
112. Is she a regular reader of an educational magazine?
113. Is she interested in the best interests of the community?
114. Is she instinctively a student?
115. Does she inspire her pupils?
116. Is her knowledge of the "common English branches" broad and accurate?
117. Is she energetic?...enthusiastic?...progressive?
118. Can she devise?...execute?
119. Is she up with the times in thought?...reading?
120. Is she interested in her work?...in her pupils as individuals?
121. Does she exert an influence for good over her pupils because of the quality of her personality?
122. Did she spend much time on non-essentials?
123. Did she save the time and energy of her pupils by properly grouping facts that should be considered together?
124. Did she do the required work in mental arithmetic?
125. Did she put her best effort into teaching the important topics?
126. Was the work on the charts satisfactory?...oral combinations in number?...general exercises?...reviews?...synonyms?...phonics?

127. Could the pupils give the reason why the statements they made are true?
128. Was the recitation a means of making the pupils' information more definite and extensive?
129. Did pupils study about things or study the things themselves?
130. Was each lesson so taught as to justify the teacher in feeling that something had been accomplished, something done?
131. Did she use her own and her pupils' time and energies to the best advantage?
132. Did her influence and teaching tend to make pupils thoughtful?considerate?gentle?generous?erect and graceful in carriage?courteous in manner?
133. Did she appeal to the best motives in her efforts to control or influence her pupils?
134. Did she have suitable work prepared and assigned to those who were not reciting?
135. Did she have the power of holding pupils to their work and good behaviour without a visible effort?
136. Did her teaching tend to develop the best qualities and abilities of her pupils?
137. Are her pupils doing more and better work than they did last term?
138. Did she have the faculty of inducing them to voluntarily put forth their best efforts?
139. Did she "clinch" some point during the recitation?
140. Did she make the recitation accomplish all it was capable of doing for her pupils?
141. Did she use effectively the facts that are naturally tributary to the lesson?
142. Did she, to a reasonable extent, go back to the first principles of the work being done?
143. Were oral reviews a part of the regular exercises of the school?
144. Did they include only the essential facts and principles studied?
145. Did she use facts, incidents and current events to illustrate and simplify the work of the text books?

146. Can her pupils apply in a practical way what they learn from books?
147. Does she devise and adapt her methods, select the facts she teaches and arrange the material she uses?
148. Is her work in these particulars characterized by good taste and sound judgment?
149. Did her pupils know how, and were they willing to think?
150. Did their statements follow each other in natural order?
151. Did she have drill exercises in the pronunciation of words?
152. Did her pupils use good English?....are they skilful talkers?
153. Were inaccuracies in pronunciation and construction corrected?
154. Could they use in an intelligent manner the facts and principles which they had recited?
155. Do they know what they should about the soil of this section?....plants?....rocks?....city?....county?....state?....famous men?....great and current events?
156. Does she familiarize herself with what her pupils have been doing in preceding grades?
157. Does she know and properly appreciate what they are to do in the higher grades?
158. Is her work a continuation of what precedes and does it best prepare the pupils for what follows?
159. Does she avail herself of anniversaries, current events, the changes of the seasons, the phases of the moon, etc., to impart information?
160. Did she thoroughly verify and test the pupils' ideas of the statements made and the definitions given?
161. Did her questions show intelligence and an ample grasp of the topic?
162. Did she use good English?
163. Did her sentences convey to her pupils the ideas she desired?
164. Were pupils impressed and influenced by what she said?

165. Do her pupils dawdle?
166. Does her teaching tend to help pupils to use their faculties naturally?
167. Could they see things with their intellectual eyes?
168. Could they use books and facts, or were they burdened by them?
169. Was there a state of hostility between teacher and pupils?
170. Did they do enough in a given time?
171. Did she have the faculty of leading pupils to work out questions for themselves?
172. Did she pump the lesson out of her pupils by leading questions?
173. Did they understand the connection and relation of facts recited?
174. Does her teaching tend to encourage pupils to accumulate facts or to develop strength?
175. Did she have pupils analyze words?
176. Were her statements clear, accurate and appropriate?
177. Was her manner decided?....inspiring?....controlling?....forceful?
178. Have her pupils read some of the best authors?
179. Have they memorized some standard selections?
180. Did her teaching develop love of country and a just regard for our best men and women?
181. In what did she excel as a teacher?
182. In what was she weak?
183. In what were pupils specially proficient?
184. In what were they particularly deficient?
185. Was enough time spent on *drill* exercises?
186. Does she study the methods of other teachers?
187. Is she persistent in her efforts to learn the best methods?
188. Is she fertile in giving variety to her work?
189. Does she act on suggestions made to her?
190. Is she a better teacher than she was last term?

Remarks :

COMMENTS.

I have believed for some years that any criticism of the school in the presence of the pupils is an injury to the teacher; that oral criticisms and suggestions are generally unsatisfactory and soon forgotten, and that a written statement of the particulars in which a teacher excels or fails will be much more helpful. My practice for some time has been to leave the teacher in full control of the school during my visit, call for such classes or exercises as I wish to hear, and have the teacher conduct the recitation. Then I am at liberty to ask questions whenever I wish and make such remarks as will arouse a new interest on the part of the pupils and give the teacher new courage and better ideas of her work. To help in this work I have had the above questions printed on slips and by placing appropriate answers opposite the points that need special attention or deserve commendation I convey to the teacher in a concise form my estimate of her work. Of course but few of the above questions are checked at any one visit. It is understood that any point that is not clear to the teacher will be explained at a personal interview.

Among the things to be accomplished in visiting schools, I consider the following to be the most important.

1. To commend the work of the teachers and pupils whenever possible, and thus stimulate them to greater effort.
2. To call attention to their deficiencies.
3. To inspire them to larger and better views of what they should be doing.
4. To so place the work before the teacher that she will not be satisfied with anything less than the best that study, thought, ingenuity and painstaking effort can accomplish.

NOTICE OF VISITS.

I herewith add the copy of one of the cards sent to teachers before making one of my regular visits. It will give some idea of what work is done and the preparation that must be made. All of my visits are not preceded by similar notes of warning.

“The last time I visit your school this term I wish to hear any exercises or recitations in which your classes excel, or to which you have given special attention or effort. I shall also call for an oral review in one of the regular studies, the selection to be made after I enter the room. This review is to include the important facts and principles of the study named from the beginning of the subject to the point to which the class has advanced. Those having charge of ungraded schools may, if they prefer, combine all their classes and have them give the review together, dropping from the exercise the lower grades as they reach the point to which they have studied.

If there is any topic upon which you wish me to speak to your pupils, please call my attention to the matter before proceeding with the work called for above. If your pupils have been particularly interested or done special work in any given line, please call my attention to the facts so that I may comment upon them.

I notice that the schools that take the highest rank in arithmetic and language use Colburn's Mental Arithmetic and Bright's Graded Lessons in English the most.”

COURSE OF STUDY FOR RURAL SCHOOLS.

The course of study found below was prepared during the summer vacation and has been in force during the fall and winter terms. It has proved as successful as was anticipated and it is expected that within the next year the schools of the rural sections of the city will be as well graded as are those of the city proper.

FIRST DIVISION.

1. Reading—Words and sentences from the board, Primer, First and Second Readers.
2. Spelling—Words read and used.
3. Language—“Bright's Graded Instructions in English for First Year or Grade.”
4. Writing—All the small and capital letters, Tracing book No. 1. Words and short sentences.

5. Number—1 to 10 by Grube Method. Addition, Subtraction, Multiplication and Division Tables to include the 5's. Rapid oral combinations. Notation and Numeration to 300. Slate work in addition and Subtraction, sum or minuend not to exceed 300; Roman letters to include L.

6. Nature Studies—Lessons on plants and animals.

7. General Exercises—Selected from published list or prepared by teacher.

8. Physical Culture—Selected from published list.

9. Miscellaneous—Conversations on common objects, politeness, truthfulness, chaste language.

10. Reviews—Brief oral reviews of all work done.

SECOND DIVISION.

1. Reading—Third and first half of Fourth Readers.

2. Spelling—Words read, used and first half of Harrington's Speller, Part 1.

3. Language—Bright's Second, Third and Fourth Years or Grades. Hyde's First Book in English.

4. Writing—Tracing books Nos. 1 and 2. Copy books Nos. 1 and 2.

5. Number—Tables to include 12's; Rapid oral combinations. Examples from Colburn's Mental Arithmetic. Franklin's First Book in Arithmetic, pp. 1-115.

6. Geography—Through United States, using "Topics."

7. Nature Studies—Lessons on plants, rocks and animals. See "Topics."

8. General Exercises—Same as in "First Division."

9. Physical Culture—Same as in "First Division."

10. Hygiene—Laws of eating, drinking, clothing, studying, sleeping and exercise.

11. Miscellaneous—Treatment of others in the house and on the street. Conversations on common objects, personal habits, five senses.

12. Reviews—Review thoroughly all preceding work, the object being to select and fix in the memories of the children the essential principles and facts.

THIRD DIVISION.

1. Reading—Last half of Fourth and first half of Fifth Readers.

2. Spelling—Words read and used. Last half Part 1, and first third Part 2 of Harrington's Speller.

3. Language—"Bright's Fifth and Sixth Years or Grades." Hyde's Second Book in English.

4. Writing—Copy books Nos. 3 and 4. Letter writing, notes, and invitations.

5. Number—Large Arithmetic, pp 1-185. Rapid oral combinations. Examples from Colburn's Mental Arithmetic.

6. Geography—Large Geography, pp. 1-98. See "Topics."

7. Nature Studies—Lessons on plants, rocks, soil and animals. See "Topics."

8. General Exercises—Same as in "First Division."

9. Physical Culture—Same as in "First Division."

10. Physiology and Hygiene—Laws of health, narcotics and alcohol.

11. Miscellaneous—Conversations on common objects, industry, obedience, care of property.

12. Reviews—Same as in "Second Division."

FOURTH DIVISION.

1. Reading—Last half of Fifth Reader and books selected by Superintendent.

2. Spelling—Words read and used and last two-thirds of Part 2 of Harrington's Speller.

3. Language—"Bright's Seventh and Eighth Years or Grades." Complete and review Hyde's Second Book in English.

4. Writing—Copy books Nos. 5 and 6. All business forms.

5. Number—Complete and review large Arithmetic. Rapid oral combinations. Examples from Colburn's Mental Arithmetic.

6. Geography—Complete and review Large Geography See "Topics."

7. History—Complete and review. See "Topics."

8. Nature Studies—Same as in "Third Division."

9. General Exercises—Same as in "First Division."

10. Physical Culture—Same as in "First Division."

11. Physiology and Hygiene—Same as in "Third Division."

12. Miscellaneous—Sketches of noted men and events.

13. Reviews—Same as in "Second Division."

The report of the Superintendent for 1893 contains *detailed* directions of the work required and suggestions as to methods to be used. See pp. 10-17, 19 and 20, and 30-33.

Give two written reviews in Reading, Spelling, Language, Geography, Arithmetic and History each term. In reviews have the questions of such a character as to cover the important topics taken up since the last review and so worded that the pupils must think to answer them and use their own words in what they write. In ranking all written work take into consideration the following points: neatness, punctuation, spelling, capitalization, construction and correctness of answers. Give careful instruction in these particulars.

In conclusion I desire to again thank the members of the Committee for a support that has aided largely in bringing the schools to their present state of efficiency.

Respectfully submitted,

W. W. STETSON,

Supt. of Schools.
