TWENTY-SEVENTH ANNUAL REPORT
OF THE
RECEIPTS AND EXPENDITURES
OF THE
CITY OF AUBURN
FOR THE
FISCAL YEAR ENDING FEBRUARY 29,
1896,

TOGETHER WITH OTHER ANNUAL REPORTS AND PAPERS RELATING
TO THE AFFAIRS OF THE CITY.

AUBURN, ME.:
PRINTED BY MERRILL & WEBBER,
1896.

CITY OF AUBURN.

IN BOARD OF MAYOR AND ALDERMEN, }
March 16, 1896. }

ORDERED, The Common Council concurring: That the City Clerk under the direction of the Committee on Printing, cause one thousand copies of the Mayor's Address together with the Reports of the several City Officers, to be printed for the use of the city.

Read and passed, sent down for concurrence.

GEORGE E. McCANN, *City Clerk.*

IN COMMON COUNCIL, }
March 16, 1896. }

Read and passed in concurrence,

CHARLES W. COOMBS, *Clerk.*

MAYOR'S ADDRESS.

To The City Council of Auburn :—

By the suffrages of our fellow citizens, we are assembled today to assume the administration of our municipal affairs. The assumption of such a trust at any time is coupled with grave responsibilities. It is, however, our lot to enter upon these duties in the midst of wide spread disaster. Our beautiful and beloved city, upon the shores of the Androscoggin, has been devastated by an unprecedented flood, our bridges swept away, houses, homes and property of our citizens demolished and borne away upon the rushing tide of waters, our highways rent and torn beyond use or blockaded with ice, and a general condition of wreck and ruin has been wrought along our rivers and streams. There have been individual losses hard to bear. Transportation and communication have been paralysed. It was upon us, and almost before we knew it, the mischief was done.

The excitement and novelty of the situation has now somewhat worn away, and we are face to face with the hard and uncomfortable facts.

We are fortunate that no loss of life occurred in this locality. The two bridges, our chief avenues of communication with our sister city Lewiston, were old and inadequate to the present traffic demands of the two cities. Like an old garment, they might have been patched and made serviceable for a few years more, but their value was not great. The cutting off in a night of facilities for transfer and communication to which the business of our two communities had adjusted itself was a severe shock, and has been and will continue to be a loss to us all and occasion great annoyance until they can be adequately restored.

The retiring administration has acted promptly and energetically, and although some of us may not agree as to the advisability and practicability of the temporary bridge now in process of construction, it is a matter that has been decided upon by the proper authorities, and should receive our support and co-operation.

It is incumbent on us to act forthwith in the matter of the permanent bridges. The requirements are not the same for the two locations, and the conditions to be met and the results to be attained at each, must be well considered before the contracts are awarded. It would seem to be economy to place steel bridges at both locations. The engineers pronounce the piers at the South Bridge to be in good condition to receive a steel superstructure, except that they should be made higher, which can be done with stone or iron. The location of these piers determine the length of the spans and there remains to be determined the style and character of the superstructure in other particulars. I trust this can be agreed upon speedily and a contract awarded that will give us an open highway at this point not later than the middle of July.

In the meantime a profile of the bottom of the river at the site of the North Bridge can be made, which will determine what number and location of piers at this point will give us the best bridge and the most economical expenditure, or the most bridge for our money. The traffic requirements of this, the main artery between the twin cities and the East and West sides of the river, demand, without unnecessary delay, a bridge that can carry a wide and paved roadway.

There is some reason to expect that the Oakes bridge, so-called, over the Little Androscoggin River, and the one over the outlet of Taylor Pond, near the old foundry, can be replaced upon their abutments.

But we have other important interests to care for besides repairing the damages of the flood to highways and bridges.

Our educational interests must not be allowed to suffer. Our schools have been brought to a high grade of efficiency. They are the pride of our city, and in them is the hope and promise of our future Auburn.

In the past ten years the number of children between the ages of four and twenty-one years reported by the Assessors has increased about 450, the number for 1895 being 3495.

An error, by the way, crept into a copy of the figures of the enrollment last year, which has led to some misunderstanding. When the copy of the figures stating the number of persons in the city who were entitled to draw school money, was made by the State Department, the error occurred which credited to this city a larger sum than was due. When it was discovered, the figures were corrected. The city has received from the State the full amount due it, as shown by the returns made by the municipal officers to the State authorities.

The average attendance during the ten years has increased in about the same proportion as the number reported, being 1841 in 1895. From these figures it would appear there is an average increase in scholars attending our schools of about 45 each year, or one additional school, requiring additional room, facilities and teacher. The new school buildings erected within the past few years are well adapted to the needs of their several localities, the one so recently erected at Park Hill being no exception. They are ornaments to the city and creditable to our educational interests.

The tendency is towards a diminishing number of pupils in the rural schools and an increasing number in the schools of the city proper.

In three years we have had an increase of seven schools.

The situation at New Auburn calls for additional school room. It is, as I understand, universally admitted, and has been for some years, that a new and commodious building is needed there in order that our scholars in that locality may have accommodations equal to those in other parts of the city. I have no doubt, however, our citizens of New Auburn will, under the circumstances, waive their claims for the present. Temporary provisions should be made for overflow schools, good teachers provided, and the work of education go on until such time as we are in a condition to erect a suitable building, one that shall be second to none in the city.

Our Free Public Library is an adjunct to our school and educational system, and is an institution that should receive the loyal support of every tax-payer. Established by our public spirited men and women, adopted by the city and fostered by the state, it should not be in want.

Last year in consideration that it was made a Free Public Library, the city, acting under authority of a law passed at the present session of our Legislature, appropriated one thousand dollars, and the State contributed one hundred dollars additional, or ten per cent. of the appropriation of the city, for the support of the Library. Under the new regime the use of the Library has so increased as largely to add to the expense of maintaining it. This additional expense is most felt in the wear and tear and in additional assistance required in delivering and receiving the books and work in the Library. Private subscriptions have been received during the year and are assured for the future. Without them the present standard of usefulness and efficiency cannot be sustained, and the continued support of the city is equally necessary to the same end, and for the encouragement of our public spirited men and women who cannot do it all but are glad to help. Auburn should not be behind the other cities and towns in the State in supporting its Free Public Library.

THE POLICE DEPARTMENT.

is one of the first and most important municipal functions. The protection of life and property and maintenance of good order and the enforcement of law are necessary to the well being of any community. That ours is an orderly and law abiding city is unquestioned. I know of no city of equal population with so small a police force, or where less vice and intemperance exists. But we should be awake to the fact that our city has grown and is growing in wealth and population, and what sufficed for the conditions of twenty years ago is not sufficient now. A reorganization of our police force is desirable upon somewhat broader lines. The ordinance which provides for the appointment of night

watchmen and regulates their supervision and control is inadequate for the organization of a police force.

I recommend that it be repealed and a new ordinance ordained to meet the requirements of a prosperous, growing, provincial, manufacturing city. The police fee system has made itself objectionable and should be done away with. There may be two sides to the question, but I believe more satisfactory results will be reached by paying our police officers a fair salary and requiring the fees to be turned over to the City Treasurer. This arrangement will, at least, not relieve the officer from the necessity of doing his duty.

In recent years large industries and business enterprises have been established on the line of the Maine Central Railroad, and in the vicinity of Park Hill. In order to afford the citizens and property in this part of the city the protection provided elsewhere, there should be a night watchman for this locality.

The City Marshal should have an office with telephone connections and there should be an officer there day and night. There are many demands through the day for police service. The day police, as truant officers, have more to do than the average citizen knows of.

If proper quarters could be found for the Treasurer and Collector the room they now occupy would make a good Marshal's office. The lockup, which was never anything but a makeshift, and is a discredit to our common humanity, could be moved into the southerly end of the basement and refitted, where proper light could be had and the sanitary conditions much improved. How much of this can be accomplished the present year will depend upon what a more careful survey of the situation may reveal. I am aware the demands upon us will be many, and only those things can be done which will most avail to preserve our good credit and remove obstacles in the way of our progress.

THE FIRE DEPARTMENT.

is no less important branch of the public service. The city has been more than ordinarily unfortunate in its fire loss

during the past year, and credit is due the department that the loss was not greater.

We have good facilities for fire protection, a good apparatus and hydrant service with ample water supply and an efficient corps of men. The ordinances regulating this department are much the same as when the city was first chartered. The matter of their revision was agitated last year. The necessity of thorough organization, training and discipline in this department demands that we inform ourselves of its condition and if new regulations will assist its efficiency, they should be provided. We have every reason to believe the chief and his men are alive to the responsibilities resting upon them, and will leave nothing undone to give our homes and our property all the protection in their power.

The Board of Health is a factor of growing importance. I think a small appropriation should be made for the purpose of this Board.

The office of Inspector of Buildings is one created by an act of the last legislature, and is for the purpose of regulating the construction and repair of buildings with reference to the most effective prevention of the spread of fire. Its ultimate object is a reduction in rates of insurance. It meets with the approval of the fire insurance companies. The regulations should be rigorously followed, and in a few years we shall reap substantial results. The present incumbent of the office has made a good beginning.

The schedule and appraisal of our public property should be carefully revised. This, I understand, has not been done for several years.

The record this administration shall make will depend upon the economy and efficiency with which we perform the duties before us. Small expenditure is not always economy. We shall have time to look the situation over and probably award the contracts for the new bridges before we make our annual appropriations. We should be conservative in what we decide to do, but whatever we undertake should be well done. Necessary repairs should be made in a permanent and substantial manner. The highway appropriation has

been overdrawn for several years with only the ordinary expense repairs, and improvements to provide for. Not because of an extravagant use of the money but because with our many miles of roads and streets, with the rivers and streams and many bridges and culverts to keep in repair, we have an expensive system to maintain. We cannot wink them out of sight by making a small appropriation. Each appropriation should be made with the greatest care. We should determine the least amount that will adequately maintain each department in the best condition of efficiency and growth. Progress should not be retarded. The city is not going out of any branch of its business, and the appropriations must not be overdrawn. It is not economy to half do anything. These matters are in our hands. You will elect the officers and heads of departments, but cannot shift the responsibility from yourselves. If a prudent, progressive and business-like administration is to be inaugurated today, we should begin at the beginning.

The following table gives a bird's eye view of the valuation and taxation for the past seven years.

	Polls.	Valuation Real Estate.	Valuation Personal Estate.	Total Assessed Valuation.	Taxes Assessed.	Appropriations.	Rates in Mills.	Appropriations Overdrawn.
1889.....	2708	\$ 3,832,440	\$ 1,056,281	\$ 4,888,7 1	\$ 111,196.14	\$ 109,890.65	21	\$
1890.....	2887	4,000,810	1,190,491	5,181,602	118,076.32	114,515.93	21	
1891.....	2992	4,538,963	1,180,792	5,719,755	123,846.10	118,341.99	20	6,422.85
1892.....	3149	4,665,835	1,185,142	5,850,977	126,973.26	126,391.99	20	619.93
1893.....	3414	4,777,995	1,200,889	5,978,884	130,170.78	121,613.93	20	5,749.28
1894.....	3376	4,839,805	1,148,336	5,988,141	129,890.82	126,167.13	20	23,033.78
1895.....	3325	5,008,602	1,097,610	6,106,212	138,206.12	129,708.47	21	31,425 62

The overdrafts of appropriations are due largely to the fact that permanent improvements have been made in excess of the provision to pay for them year by year. We have school houses, bridges and roads to show for it, to be sure, but it has increased our floating debt to too large proportions. It is not an easy thing to stop, but we must do it. We cannot hope to make a sufficient gain in valuation to admit of any reduction in the rate. Our debts must be paid, and the earlier we begin the easier it will be. We must

not only pay our debts, but we must incur new ones and pay them. I would not recommend the raising by taxation in one year of an amount, in addition to our current needs, sufficient to pay for our proportion of the two new bridges we propose to build. I would, however, recommend that by a prudent administration we save enough to pay, at least, \$10,000,00 of it, by this year's assessment. The city can borrow money upon more favorable terms than individuals. I do not think that the question of an issue of bonds had better be raised. The city should borrow what is needed and carry it as a temporary loan, making such payments upon the principal each year as by prudent management can be saved from a tax rate that shall not be excessive and a valuation that shall not be forced.

The following is a summary of the indebtedness of the city.

Bonded debt, exclusive of purchase of Water Works,		\$218,000.
Floating Debt,		55,000.
		<hr/>
Net city debt, exclusive of Water Works loan,		273,000.
Water loan due May 20, 1913	\$30,000.	
Water loan issued to exchange for Aqueduct Co. Bonds, due January 1, 1904,	58,700.	
Temporary loan, Water Works,	19,300.	
		<hr/>
Total amount of Water debt stand- ing in the name of the city		108,000.
		<hr/>
Total		\$381,000.

The Treasurer's report will show the assets of the city. The Water Works plant and the capital stock of the Lewiston & Auburn Railroad Company are substantial assets and it is fair to reckon them as the Treasurer has done. These investments are not only self supporting, but income producing, and could, without question, be sold for a sum sufficient to cancel the entire city debt. The Water Board

pays the interest upon the whole indebtedness outstanding on account of the purchase of the works ; its own bonds as well as that portion of the water debt carried by the city.

The incorporation of the Auburn Water Commissioners and the funding of \$210,000 of the water debt during the past year was a successful financial operation, which affords great relief to the city and is especially favorable under our present necessities. If we now had the entire water debt to handle as a temporary loan, we should have our hands more than full.

Ours is a busy, thriving city, Our manufactories, industries, business houses and citizens generally, are as prosperous as can be found, and prosperity cannot be had without enterprise. Our schools, churches, charities, the sanitary conditions, the water supply, the combination of town privileges and conveniences, with the quiet and beauty of country life and scenes, make it a most desirable city for residence, and may well attract strangers to take up their abode with us.

I have thus briefly outlined the situation of some of the more important matters which we are to consider and act upon, and have indicated what it appears to me, should be the general policy of this city government.

May our deliberations be conducted without acrimony and out of an abundance of council may we get wisdom. With our oaths of office fresh upon our lips we enter upon our duties, bearing witness to God of our high purpose and the sacredness of the trust we now undertake.

NATHAN W. HARRIS.

Auburn, March 16, 1896.

FINANCIAL REPORT.

Gentlemen of the City Council :

I herewith submit to you the report of the Receipts and Expenditures of the City from February 28, 1895, to March 1, 1896.

RECEIPTS.

As per Treasurer's Report, \$198,449.25

EXPENDITURES.

HIGHWAYS.

Respectfully submitted,

E. G. EVELETH, *City Treasurer.*

I have examined the accounts of the City Treasurer for the year ending February 29, 1896, and find them properly vouched for, and hereby approve the same.

BERNARD A. CHASE, *Auditor.*

REPORT OF AUBURN WATER COMMISSIONERS.

To the City Council of the City of Auburn :

GENTLEMEN :—The Board of Water Commissioners herewith submit their third annual report :

The entire cost of the water works up to March 1, 1896, is as follows :

The original purchase from the Auburn Aqueduct Co.,	\$250,000.00
Extensions and improvements for year ending March 1, 1894,	30,068.36
Extensions and improvements for year ending March 1, 1895,	47,800.57
Extensions and improvements, for year ending March 1, 1896,	10,626.95
<hr/>	
Total cost to March 1, 1896,	\$338,495.88
In this amount is included stock on hand,	7,056.08
The balance shows the net cost of the water plant,	331,439.80
It is on this amount that the board is required to place in the sinking fund 1 per cent., viz.,	3,314.39
The existing indebtedness created in the purchase, extension and improvement of the works is	318,000.00
the balance of the cost, \$20,495.88, having been paid from water rents.	

Until the present year the city has carried the entire indebtedness of the water works, and in so doing, but for the device of a supplementary tax, the city would have exceeded its debt limit of 5 per cent., of its valuation to the extent of \$210,000.00

To resort to a technical expedient to carry for a series of years so large a debt was found inconvenient and embarrassing.

While the legislature of 1895 did not accede to the earnest and reasonable request of the city of Auburn to take steps necessary for the extension of the debt limit, sufficient to permit the municipal ownership of the water works, it did wisely enact a measure that was next to it in importance to the city of Auburn. The provisions of the act of the Legislature referred to, authorized the city of Auburn to organize its Water Board into a corporation, and to transfer to it the entire Water Plant, to be held by the Water Board in trust for the security of the payment of bonds which they were authorized to issue to an amount not exceeding \$250,000.00. In accordance with the provisions of this act, the city has caused its board to be incorporated, and has transferred thereto its water works for the foregoing purpose.

Under the direction of the City Government, the Commissioners thereafter, on July 3d and 15th, 1895, issued bonds to the extent of \$210,000.00 which were sufficient to reduce the debt of the city to a point clearly within its legal limit. With the proceeds of the sale of the bonds, the city treasurer, who is also treasurer of the Water Board, has cancelled the water debt of the city to the extent of \$210,000.00.

The premium resulting from the sale of the bonds was \$3,110.00.

The bonds issued bear date July 1, 1895, and run as follows :

\$60,000.00	for the term of ten years.
45,000.00	“ “ “ “ fifteen years.
55,000.00	“ “ “ “ twenty years.
50,000.00	“ “ “ “ twenty-four years, and all

bear interest at 4 per cent., with the exception of \$10,000.00 which is at 5 per cent.

The balance of the water debt is \$108,000.00, and being within the legal debt limit, is carried by the city. But the interest thereon is paid from the proceeds of water rents.

This \$108,000.00 is made up as follows :

\$58,700.00, an incumbrance on the water works at the time of the purchase by the city, in the shape of bonds, and which the city assumed. For these bonds the city has substituted its own bonds, with the exception of \$200.00 for a term of ten years, at 5 per cent.

30,000.00, bonds of the city for the term of thirty years at 4 per cent., interest, issued May 20, 1893.

19,300.00, loan in the form of the city's note, at 4 per cent. interest.

The foregoing act provides that the city can exchange its own bonds for the bonds issued by the Board, as fast as it can do so inside of its legal debt limit. But your Commissioners apprehend that it will be a long time before the city will be able to make such an exchange, if at any time before the maturity of the bonds, at which time they will be cancelled by the sinking fund created by the Water Board. It can easily be foreseen that the growing needs of the city in roads, bridges, pavements, school-houses and other public buildings, will cause its indebtedness to press closely on its legal limit for many years.

Section 7 of said Act of the Legislature makes its obligatory upon the Commissioners to create a sinking fund, in which they shall annually place a yearly appropriation by the city of \$3,000.00, and one per cent. of the entire principal expenditures for the purchase and extension of said Water works.

It can be seen by the report of the treasurer, as well as by the statement of assets and liabilities herewith presented, that your Commissioners have created said sinking fund, and have placed therein \$6,314.39. The sinking fund now embraces the first annual appropriation of \$3,000.00 by the

city, and \$3,314.39 proceeds of water rent, being 1 per cent. of the entire expenditures for water works.

The Commissioners deem it a matter of congratulation to all concerned that since the city came into possession of the Water works, less than three years ago, there has been a reduction of rates now aggregating over \$5,000.00 yearly. A happy feature of this large reduction is that it has not resulted in a material reduction of revenue, owing to the fact that reduced rates lead to a more general use of water for special purposes, some of which are for lawns, gardens, side-walks and bath-tub.

We will enumerate some of the more important reductions during the municipal ownership of the Water works. The first faucet has been reduced from \$8.00 to \$6.00, a reduction of 25 per cent. ; the first water-closet from \$4.00 to \$2.00, a reduction of 50 per cent. ; additional water-closets from \$4.00 to \$1.50, a reduction of 62 per cent. ; bath-tubs from \$4.00 to \$2.00, a reduction of 50 per cent. ; Meter rates have been reduced 33 per cent.

Your Commissioners believe that the present rates will be amply sufficient to meet not only operating expenses and the requisite 1 per cent., for the sinking fund, but also to pay for all extensions that will henceforth be required from year to year.

The following statement will show the net income of the Water works up to March 1, 1896.

Water rents collected for the year	
ending March 1, 1894,	\$19,997.09
Licenses and fines for the year	
ending March 1, 1894,	21.50
Water rents for the year ending	
March 1, 1895,	30,163.28
Licenses and fines for the year	
ending March 1, 1895,	69.74
Water rents for the year ending	
March 1, 1896,	28,839.14
Licenses and fines for the year	
ending March 1, 1896,	32.80

Auburn Water Commissioners.

Auburn, Me., March 1, 1896.

REPORT OF SUPT. OF WATER WORKS.

March 1, 1896.

To the Board of Water Commissioners :

GENTLEMEN :—I have the honor of submitting to you my second annual report for the year ending February 29, 1896.

The works are in good running order, and with few exceptions are giving perfect satisfaction, and these are with small main pipes. (See recommendations.) In the districts that we have changed since the city became owners of the plant, the water supply is perfect.

WATER SUPPLY.

The water supply is taken from Lake Auburn, three miles from the pumping station, through 1 12 in. pipe and 1 24 in. pipe to the screen well, then through 1 12 in. and 1 10 in. pipe to the city.

Prof. F. C. Robinson of Bowdoin College says in his report of analysis of the water of Lake Auburn that we have one of the best waters that he has ever analysed for public water works.

As this has been a very dry season, the lake has been drawn down two feet and nine inches (2 and 9-12 feet) from the highest flow to the lowest point this summer. The question is often asked me how much water we draw from the lake. I will take an extract from Engineer J. H. Shedd's report of 1889. Assuming the lake to be three (3) square miles and that we are using five hundred thousand (500,000) gallons per twenty-four hours, it will draw 28-100

of an inch in a month, three and thirty-six one hundredths (3 36-100) of an inch in one year. Having seven (7) feet and three (3) inches of water above the pipe line at the lake at the lowest point this year.

RESERVOIR.

We have for fire and domestic service on Beacon Street hill an iron stand pipe of 600,000 gallons capacity, supplied by two Worthington double acting compound pumps, rated at one million gallons each for twenty-four hours work, supplied by two thirty-five H. P. boilers each. The pumps have been examined and are in good condition. The boilers were inspected Nov. 1, 1895, by the Hartford Boiler Insurance Company Inspector, and found to be in a fair condition.

Boiler No. 2 is old and used for a reserve in case of a large fire or accident to boiler No. 1, and should be replaced by a new seventy-five H. P. boiler.

By an order of the Water Commissioners of January 4th, instructing me to have the city engineer make a plan of the pipe lines in the city, we have made the same, showing the pipes, gates, hydrants and check valves, also the size of the pipes, at a cost of sixty-five (65) dollars.

GATES.

The gates are all in perfect order. We have set this year thirty-five (35) gates, as follows: 2 12 in., 1 10 in., 2 8 in., 13 6 in., 3 4 in., 8 2 in. and 6 1-2 in., making a total of two hundred eighty-five (285) gates now in use in the system.

I have made a Record Gate Book of all gates, and it is in the safe at the office.

HYDRANTS.

There are now eighty-eight hydrants, city property, six (6) having been set this year. In addition to this number, we have nine hydrants and thirty-one hose connections in manufacturing places.

LEAKS.

We have had five leaks in the main pipe line, four caused by the blowing of the lead joints, and one from the breaking of tee in the high pressure line running from the Pumping Station to the Reservoir on Beacon Avenue, and twenty-three (23) defective leads. The old lead for the corporations was not strong enough for the pressure. The old company used one and one-half pounds to the foot. We are using three pounds to the foot.

The pipe line from the Pumping Station to the Reservoir is not strong enough to stand the pressure and hydrostatic hammer from the pump, and sometime will have to be re-laid with a stronger pipe.

EXTENSION.

There have been 17,088 feet of pipe of all sizes laid during the year, as follows:

- 1,785 feet 12 in. pipe,
- 1,667 feet 6 in. pipe,
- 621 feet 4 in. pipe,
- 3,836 feet 2 in. pipe,
- 1,410 feet 1 1-4 in pipe,
- 1,336 feet 1 in. pipe,
- 6,433 feet 3-4 in. pipe.

The estimated cost for main line pipe for 1895 was : 5,600 feet at a cost of \$6,000.00 and we did extend 9,245 feet at a cost of \$5,993.07 extending 3,645 feet over the estimate.

The tables will show where it has been laid.

Ninety-three (93) new services have been added, and eighty-nine (89) services re-laid.

One very important improvement is the laying of a twelve inch pipe from Pleasant and Turner Streets down Turner to Court, Court to Main, down Main, taking in the Roak Block hydrant, and all of the hydrants that were on the six inch pipe. After the pipe line was completed, the Chief Engineer gave a test with eight 1 1-4 in. streams. The

pressure at hydrants with two 1 1-4 in. streams was 100 lbs. and with eight 1 1-4 in streams 85 lbs., and did not drop below eighty-five throwing water over Goff Block. At the jail fire they used eleven streams, showing a pressure at hydrant of eighty-two (82) pounds.

LENGTH OF PIPE IN MAIN LINE.

The pipe line was twenty-one miles long, including the 1 in., 1 1-4 in., 2 in., 4 in., 6 in., 8 in., 10 in. and 12 in., when the city became the owners. We have re-laid four miles, and extended three and sixty-eight one hundredths miles, making the total length of main pipe twenty-four and sixty-eight one hundredths miles, using eight hundred seventeen and one-half (817 1-2) tons of cast iron pipe.

RECEIPTS

For the Fiscal Year, 1895.

Credit.

For all water receipts, repairs, etc., uncollected bills and cash on hand, \$31,981.44.

In the tables annexed will be found the classification of water supply, pumping record, pipe and gates used this year, inventory, stock, tools, meters, location, size, etc.

In closing this report I wish to say that Mr. Rand is the right man and is in the right place.

Thanking your honorable board for the kind assistance to me during the past year, I remain,

Yours truly,

F. E. BISBEE,

Superintendent.

have no settlement in		
State,	12.43	
Salaries of Overseers,	150.00	
Miscellaneous expenses,	20.75	
	<hr/>	
Total expenses,		\$4,852.79

The following statement shows the account of the Poor Department with the City for the municipal year commencing March 1, 1895, and ending February 29, 1896 :

Appropriation by City Council,	\$4,000.00	
Receipts,	1,190.26	
	<hr/>	\$5,190.26
Total expenditures,		4,852.79
		<hr/>
Balance in favor Department,		\$ 337.47

There are now due the City the following sums :

Town of South Thomaston,	\$ 75.33	
Mechanic Falls,	5.75	
Nathaniel Davis,	130.80	
	<hr/>	\$211.88

There are now on the farm, 18 paupers ; highest number for the year, 19 ; average number, 18.

We have now upon the farm 30 tons hay, $\frac{1}{2}$ ton straw, 35 bushels oats, 50 bushels corn, 150 bushels potatoes, 6 bushels beets, 30 bushels carrots, 20 bushels beans, 3 bushels peas, 8 bbls, apples, $\frac{1}{2}$ bbl. salt pork, 10 bbls. flour, 1 bbl. pickles, 5 gals. vinegar, 30 cords wood, 50 tons ice, 2 tons coal, 10 cows, 1 bull, 2 two year old heifers, 2 one year old heifers, 2 calves, 2 horses, 6 hogs, 20 hens, 1 pung, 1 wagon, 1 mowing machine, 3 hay racks, 1 hay rake, 4 harrows, 2 cultivators, 1 sulky plow, 3 plows, 1 wheel harrow, 1 winnowing machine, 1 one-horse farm wagon, 1 two-horse farm wagon, 1 two-horse dump cart, 1 single harness, 1 set double harness, 1 ox cart, 1 one-horse sled, 1 set double sleds, 1 fur robe, 1 lap robe, 1 pair street blankets.

The products of the farm are 60 tons hay, 300 bushels potatoes, 280 bushels oats, 26 $\frac{1}{2}$ bushels barley, 400 bushels ears of corn, 24 bushels beans, 15 bushels turnips, 20 bushels beets, 50 bushels carrots, 18 bbls. apples, 5 bushels peas, 5,359 lbs. sweet corn, 2,000 lbs. pork, cream sold, \$562.52.

The city government not having taken any action on our recommendation of last year, we repeat the same, viz : "An addition to the almshouse, so as to get three sleeping rooms on the first floor, as we now have and most of the time do, a few inmates who are unable to go up and down stairs, either from old age or sickness ; also the building of a bath room.

Mr. and Mrs. Geo. F. Rollins, who have had charge of the farm and inmates the past year seem to be well fitted for the work required of them, and we have engaged their services for the following year.

H. O. WHITMAN,

J. M. STEVENS,

A. A. GARCELON.

Overseers of the Poor.

Appropriation,	\$1,200.00
Overdrawn,	\$879.40

I would recommend for streets and highways for the coming year an appropriation of \$25,000.00 as the regular running expenses of the city part of this department are \$7,000.00.

I would also recommend that the sewer on Summer street be connected with Union and Turner streets, which would take about eighty feet of pipe and would take the sewer from Union street gully.

There should also be something done to relieve the sewers on Court and Goff streets.

Respectfully submitted,

FRANK F. GOSS,

Street Commissioner.

Auburn, Feb. 29, 1896.

REPORT OF CHIEF ENGINEER.

To the Honorable Mayor and City Council of Auburn

In conformity with my duties, I make the following report and recommendations as Chief Engineer of the Fire Department for the year ending March 1896.

There is in the department one steam fire engine, one two-horse hose reel, two one-horse wagons, one hose pump, one hook and ladder truck and one horse that is entirely under the control of the department; one hand hose reel located at New Auburn station. We have about 5,800 feet of good hose and about 1,000 feet which is not suitable to stand high pressure; one three-way, one two-way and one single Eastman set of pipe and holder, six single pipes with shut off valve, seven chemical tanks, with spanners and ladder straps, smoke protectors, etc., sufficient to the needs of the department.

During the year there has been a station located at New Auburn, corner of Fifth and Cook streets; house built and equipped with indicator, a hand hose reel carrying 600 feet of hose, a company of ten men raised and assigned to the new station, also suitable beds and furnishings for two men who remain at the house at night.

There has been purchased for the department one two-way Eastman deluge set, one Eastman pipe and holder, one single swing harness for hose wagon, two Rex chemical tanks, eighteen rubber coats, flexible suction hose for steamer, and other supplies necessary for the use of department.

The sleeping apartments at the engine house have been supplied with new bedding throughout, and two beds added for hosemen.

The engine has been thoroughly repaired, pump cylinders bored out, new valves in pumps, painted and put in first-class condition. A new Gamewell indicator and gong has been put in engine house, and the old indicator placed in the fire station at New Auburn. One new fire alarm box has been placed at the corner of High street and Minot Avenue.

The hydrants now set are all in good working condition.

During the year there has been no new hose bought, but have been obliged to lay aside 500 feet as being unsuitable for high pressure use.

The fire alarm system has given considerable trouble, on account of crosses of wires with other electric wires, which is a source of danger as well as inconvenience. I should recommend that parts of the system be re-wired and the fire alarm wires go above all other wires and all unnecessary loops be taken out of the wires.

There have been, during the year, thirty-six calls on the department—nineteen regular alarms, three from Lewiston, six private and telephone calls and eight for forest and brush fires, these forest fires coming during the dry time in September.

The total loss by fire, about \$14,000, insurance paid very near the same amount.

Amount of hose laid during the year, 16,000 feet.

Oct. 9th, box 124, Whitman Agricultural works, cause unknown.

Oct. 29, box 96, O'Neil's on First street, cause unknown.

Nov. 21, box 96, Wiseman's block, cause, lamp.

Nov. 23, box 91, County jail work shop, cause, overheated chimney.

Nov. 23, box 87, Frank Fifield's house on Center street, cause, lamp exploded.

Dec. 21, box 121, house back of Auburn Motor Co., cause, defective chimney.

1896.

Jan. 7, box 38, Lewiston.

Jan. 13, box 98, C. Estes' stable on River road, cause, lantern.

Jan. 24, box 96, O'Neil's shed on First street, cause, incendiary.

Jan. 29, box 35, Lewiston.

May 18, box 34, Lewiston.

May 29, box 91, Jail work shop, cause, over heated chimney.

July 4, box 85, John Sawyer's house, Gamage avenue, cause unknown.

July 12, box 92, C. H. Small's blacksmith shop, Miller street, cause, unknown.

July 21, box 96, J. B. Hunton house, Eighth street, cause, oil stove.

Aug. 24, box 93, Drummond court, cause, oil stove.

Sept. 21, box 91, A. Cushman Co., shoe shop, cause, cement caught fire.

Sept. 23, box 97, Broad street, Prospect Hill, cause, defective chimney.

Sept. 24, box 92, A. M. Penley's house, Main street, cause, lamp exploded.

March 2, box 81, John Dingley's storehouse, Miller street, cause, unknown.

March 4, box 42, Lewiston.

March 9, box 91, N. I. Jordan's house, Laurel Avenue, cause, oil stove.

I wish to thank the Committee on Fire Department for aid in having my recommendations carried out, his Honor, the Mayor, and Council for granting the favors asked for the Department, and the Department for the support I have received during the year.

Respectfully submitted,

D. D. MERRILL,

Chief Engineer.

REPORT OF CITY SOLICITOR.

To the Honorable Mayor and City Council of Auburn :

I herewith submit my report as City Solicitor for the municipal year ending February 29, 1896.

The legal business of the city for the past year has been somewhat voluminous and arduous. Immediately upon entering upon the duties of the office, the incorporation of the Auburn Water Commissioners, under the provisions of an act of the last Legislature, entitled "An Act to Incorporate the Auburn Water Commissioners," was accomplished. The records of the new corporation were started. The water plant was transferred by the city to the Auburn Water Commissioners, and measures were instituted to fund a portion of the water debt. Bonds of the Auburn Water Commissioners to the amount of \$210,000, were issued, bearing date July 1, 1895, payable in varying amounts, in ten, fifteen, twenty and twenty-four years. Much time and care was spent in drafting the conveyance, formulating the bonds, preparing the necessary votes for the Board of Water Commissioners, and the orders for the City Council, all in a manner that should be satisfactory to the purchasers of the bonds. The matter was, however, successfully accomplished. The finance committee of the Water Board had charge of the placing of the bonds upon the market, and under their admirable management, the whole issue was sold at a premium of \$3,110.

This handsome premium and the fact that the entire issue, so far as is known, is held by Maine Savings Banks and investors, speaks with greater emphasis than anything

that can be said of the complete success of the undertaking, and the high credit of our own quasi-municipal corporation.

For the benefit of those loyal citizens, who signed the bond of the Auburn Water Commissioners in the sum of \$100,000, to indemnify the purchasers of the bond issue against loss by reason of the \$58,700, of Auburn Aqueduct bonds; assumed by the city and outstanding at the time of the purchase (and which were a prior lien upon the Water Works plant), and thereby untied the constitutional deadlock that existed by reason of the city's debt limit, I wish to say, that all but \$200 of the Aqueduct bonds have been exchanged for the municipal bonds, and this \$200 is now the extent of their liability. There is every prospect that these bonds can be found the coming year, and the exchange of the whole issue completed. It would then be best to have the mortgage securing the old Aqueduct bonds discharged on the records.

In the matter of Auburn vs. Durham, suit for Pauper's supplies. The person for whom the expense was incurred, became insane while in Auburn, and was carried to the Hospital, and the amount in suit is what has been paid the Hospital for board. The commitment was made some years ago, and when the matter came to be heard, it was discovered that an informality had been made in the commitment, which would defect the suit, and a non suit was entered.

Bolton vs. Auburn, "the same as before."

The three Pulsifer suits for damages upon the highway have been referred to Hon. William P. Whitehouse.

The two Roberts suits for damages upon the highway are still pending.

Auburn vs. Union Water Power Company, suit for taxes, was entered, and heard before the presiding Justice at the September term, 1895. This suit involved the valuation of the stone dams and water power property in Auburn, belonging to the Union Water Power Company. The valuation of the assessors was greatly reduced by the court. The suit was for the collection of a supplemental tax. The valuation of the property was determined by the Court to be \$22,000, and judgment for the plaintiff was ordered for

\$440. Requests for special findings were filed by the plaintiff, and the defendant has filed exceptions to certain findings of the Court, these exceptions especially attacking the formality and validity of the assessment. If this matter can be settled and taxes for 1894 and 1895 collected upon the basis established by the Court, without further litigation, I recommend that it be done. The matter is however, in order for a hearing at the Law term in Portland in July.

In the matter of the Union Water Power Company vs. Auburn, for damages for taking water from Wilson pond, upon which a hearing before the County Commissioners was had in October, 1894, and an award of \$24,500 in favor of the Union Water Power Company was made at the April term of the County Commissioners' Report, notice of an appeal was filed, and the appeal regularly taken and entered at the January term of the Supreme Judicial Court, 1896. This matter will be in order for trial at the coming April term.

In these Union Water Power cases, the same counsel that had the matters in charge in the first instance, viz., Hon. J. W. Symonds of Portland, Hon. W. W. Bolster and James A. Pulsifer, Esq., have been retained, and counsel are prepared for trial.

I have been consulted by the municipal officers of the different departments from time to time, and have drawn such contracts and obligations as the conduct of the business of the various departments of the city have required.

NATHAN W. HARRIS,

City Solicitor.

REPORT OF CHIEF OF POLICE.

*To the Honorable Mayor and Aldermen of the City of
Auburn :*

GENTLEMEN :—I herewith submit, as Chief of Police, the following doings of the police department for the year ending February 29, 1896.

The number of complaints made before the Municipal Court for the year are shown in the following table :

Intoxication,	177
Vagrants, tramps, idle and disorderly persons,	87
Larceny,	18
Assault, assault on officers, etc.,	16
Violation of dog law,	4
Adultery,	5
Fast driving,	3
Bicycle riding on sidewalk,	5
Removing liquors,	1
Bathing,	1
Threatening to kill,	2
Cruelty to horse,	2
Unlawful shooting,	1
Contempt of court	1
House of ill fame,	2
Fornication,	2
Receiving stolen goods,	2
Threatening to do violence,	2
Bastardy,	1
Discharging firearms,	1
Removing mortgaged property,	2

Changing receipt,	1
Stoning buildings,	4
Breaking and entering,	10
Defacing buildings,	1
Selling mortgaged property,	2
Embezzlement,	2
Attempted robbery,	3
Beating board,	2
Stealing team,	1
Aiding prisoner to escape,	1
	<hr/>
Total,	361

One thousand, one hundred and ten (1,110), gallons of beer and liquor have been seized during the year.

Seven persons have been taken to the Insane Asylum, and one boy to the State Reform School.

Respectfully submitted,

THOMAS VOSMUS,

Chief of Police.

REPORT OF POLICE MATRON.

To his Honor, the Mayor, and Aldermen of the City of Auburn;

I herewith submit my second annual report for your consideration:

For want of space, I can only give a brief summary of my labors in the various departments which lie within the province of the Police Matron. The fact that my work partakes more of the missionary and philanthropic nature rather than of police work, arises from this cause: In this city there are comparatively few arrests of women, and also that for the last half of the year just past there have been no females confined in our county jail.

A part of my time has been spent with young and thoughtless girls who, without the restraints of well ordered homes, have been in danger of drifting into evil ways. In this work I have been greatly assisted by the W. C. T. U. and Woman's Reform League, and it is a matter of thankfulness to see some good results arising from our efforts in this direction. Several houses of questionable repute have been visited and plainly dealt with. In very many instances a better condition of affairs has been brought about, for where prayers and entreaties would have no effect the strong arm of the law has been appealed to; and here is where the advantage of being a police officer becomes a potent factor to bring about a desired result.

There has been the usual amount of sickness among the poor and unfortunate of our city and in most cases I have been able to supply their needs without calling upon the city for aid. In this work I have been very materially assisted

by the Associated Charities, who have also supplied me with a large amount of clothing, provisions and fuel.

In the department for securing homes for homeless children, there have been good Christian homes found for eight unfortunate little ones, who would otherwise, in most cases, have drifted to the poor-house. I have also been able to reach and benefit many other children, who while having natural guardians yet lacked much that makes life desirable and beneficial. In all this work I have been sustained by benevolent and religious societies of our city.

During the year I have made 2,195 calls, distributed 1,953 articles of clothing, have written 212 business letters, and found employment for 40 persons. I have distributed over a thousand volumes of reading matter and carried food given me by charitable people to those in need.

At Thanksgiving and Christmas, the poor were most generously remembered by the different benevolent societies, and a sum of money was given me by several business men to buy Christmas dinners for those who had not otherwise been provided for. Toys, books and picture cards were donated in abundance, and the day preceding Christmas was a most happy, albeit a most busy one, while engaged in distributing these gifts.

My heartfelt thanks are herewith tendered to those kind friends who by their generous thoughtfulness brought so much of joy and gladness to the many humble homes in our city.

The stranger within our gates have been cared for, the sick and dying visited, the ignorant counseled and instructed, the down-hearted encouraged and to the best of my ability I have endeavored to perform every duty devolving upon me, and profiting by the experiences of yesterday do better service for today.

Respectfully submitted.

MARIA M. SWETT.

February 29, 1896.

REPORT OF LIQUOR AGENT.

To the Honorable Mayor and Members of the City Government :

GENTLEMEN:—I herewith submit my report as Liquor Agent for the city for the year ending February 29, 1896.

CR.

By liquors on hand March 1, 1896,	\$ 2,538.82
Cash paid Treasurer, for liquor sold,	11,748.47
Cash paid Treasurer for empty casks sold,	69.35
Empty casks on hand,	3.00
	————— \$14,359.64

DR.

To liquors on hand, March 1, 1895,	\$1,399.10
Liquors purchased in year,	9,658.27

Net profit to the City,		<u>\$2,552.73</u>

The net profit to the City is made up as follows :

Net cash paid Treasurer as per Audi-		
tor's Report,	\$1,410.01	
Excess of stock on hand over last year,	1,142.72	
	————	\$2,552.73

Respectfully submitted,

T. S. WHITMAN,
City Agent.

REPORT OF CITY PHYSICIAN.

To the City Council of the City of Auburn.

GENTLEMEN:—I herewith submit my report as City Physician :

I have made, during the past year, eighteen visits to the City farm, and given medical treatment to eight, surgical treatment to one, of the inmates.

There has been but one death at the farm, that of Mr. Howard, of consumption.

Among the poor of the city I have made forty calls, and from this class received two calls at my office. The number of persons treated in this class were eight.

Respectfully,

GEO. A. ELLINWOOD,

City Physician.

REPORT OF BOARD OF HEALTH.

To the Honorable City Council of the City of Auburn :

GENTLEMEN :—The Board of Health submits its ninth annual report of the work of the health department for the past year. The Board organized on Saturday, April 20, 1895. The members of the Board were Andrew M. Peables, Emery Bailey and Charles B. Payson. Emery Bailey was elected president, Andrew M. Peables secretary and executive officer.

Your Board avails itself of the privilege thus presented, of publicly expressing its high appreciation of the favorable recognition and assistance it has received at your hands, and especially for the enlarged privileges bestowed upon it in conferring all the power and authority heretofore held by your honorable body in matters pertaining to health and sanitation. A further sense of obligation is found in the fact that the health officers have been cordially supported and assisted by the City Solicitor. We wish to call attention to the fact that during the past year the general health of the city has been remarkably good, the death rate being but one and one-half per cent. per thousand. Since our last report there have been thirteen cases of diphtheria reported to the Board of Health, with one death, eleven of these cases were in children under fifteen years of age. Statistics clearly show that children are more susceptible to this disease than adults. The secretary of your Board is of the opinion that three to four weeks is none too long to keep a

family quarantined, infected with this disease. Thirty-seven cases of scarlet fever have been reported, with no deaths. The type of this disease has been very mild, yet ordinarily no disease carries more terror to a family, school or community than this; hence, the great importance of early isolation. Quarantine in this disease should be from five to six weeks; disinfection and fumigation should be carried out in the most thorough and approved manner. There have been seventeen cases of typhoid fever, with one death. The death was that of a very promising young man, who contracted the disease while on a visit to the Atlanta Exposition. Nearly all the cases of typhoid during the year were contracted outside of this city.

During the year we have given considerable attention to the public buildings of Auburn. Many of the school rooms have been examined, suggestions made by us and kindly received by a committee from your body and cheerfully accepted, and non-sanitary and objectionable objects removed. The school buildings at New Auburn are not suitable in any way for school purposes. They are old-fashioned, inconvenient, ill-constructed and altogether inadequate for this rapidly increasing population. While janitor and teachers have been careful and painstaking, sickness and death have been the outgrowth of these school-rooms. The incoming administration should look to this early. It is money well spent. It is economy to look carefully to the health and education of our children.

The office of our City Treasurer and Collector is one floor above the City prison, and is often very objectionable, on account of the filthy gases and odors from rooms below.

The following list shows the number and character of the nuisances abated during the year, together with the number of complaints received and investigated:

Number of complaints,	41
Number of visits made on account of contagious diseases,	50
Number of vaults found in bad condition,	21

Number of cess pools cleaned,	1
Number of swine ordered removed,	4
Number of cellars found in bad condition.	3
Number of water closets in bad condition,	19
Number of vaults cleaned,	4

Very Respectfully,

ANDREW M. PEABLES,
EMERY BAILEY,
CHARLES B. PAYSON,

REPORT OF INSPECTOR OF BUILDINGS.

*To the Honorable Mayor and Aldermen of the City of
Auburn :*

GENTLEMEN :—I herewith submit to you a report of my work as Inspector of Buildings for 11 months ending March 16, 1896.

I have confined my work more especially to new buildings in process of construction, and those to which additions or repairs have been made. I have, however, inspected several old buildings, to which my attention has been called.

While the majority of contractors and builders have shown a disposition to carry out the instructions of the Inspector, I have found it necessary to visit some several times in order to know that the work has been done in compliance with rules and regulations.

No. of Buildings inspected,	62
Visits made,	87
New buildings,	39
Old buildings,	12
Buildings repaired,	11

Respectfully submitted,

G. F. OLIVER.

REPORT OF SEALER OF WEIGHTS AND MEASURES.

To the Honorable Mayor and City Government :

GENTLEMEN :—I herewith submit to you my report for the year ending the third Monday of March, 1896.

After my appointment and having taken the oath of office, I found our city was not the owner of a set of test weights. From this fact, I was very sure that in the past history of the city there never had any of those appointed to the office made a canvass of the place to see whether scales and measures were right or wrong, and realizing the diversity which must exist and ignorance of our state law (bearing on the duties of towns and their officers) by many using weights and measures, I felt like backing out and paying my fine, and would have done so had not some of the large business firms of the city, with attorneys and others, told me that the duties of Sealer of Weights and Measures had too long been neglected, and to brace up and do my duty. And I wish to say right here, if any of our traders think the office of little or no importance my experience the past year (granted they want to deal justly with all) would furnish them with all the evidence they need that they are in error ; and further, if any of such have any invention whereby they can ascertain whether they are getting or giving correct weight and measures without applying the U. S. Standard to their furnishings, they can get all the money they need without selling goods, meats and groceries.

By permission of our Mayor and Treasurer, I bought of the Fairbanks Company a set of brass Standard weights and

made a trunk for the same. With these and the set of dry and wine measures {which the city owns, I was well supplied for my duties for all light work, but when I came to hay and coal scales, I was obliged to borrow of the County and City of Lewiston to make a thorough test; and I will here say that our city very much needs some heavy test weights, and would suggest (for the benefit of my successor) that the city purchase (at cost) ten 50 lb., one 25 lb. and one 10 lb. iron test weights. Of the 125 or more firms and individuals on whom I have called, all have complied with the requirements of the law and availed themselves of its protection, with the exception of the following, whose names (by the advise of our City Solicitor) I give you for publication in your annual report:

Munroe, Packard & Linscott,
 Peables & Garcelon,
 John Dingley & Co.,
 Vosmus & Ross,
 Curtis & Monroe,
 John A. Sawyer,
 A. D. Goss,
 J. B. Emerton,
 J. B. Ham & Co.,
 George A. Allen,
 Olfene & Holmes,
 Merrow Bros.,

The excuse of the above was that they knew that their weights and measures were right and should not pay for a test. Messrs. Elms & Hall cheerfully had their test made and then refused to pay the small fee the statute provides. A few others have promised to pay for work done but up to the present time the promise is all I have received.

In closing this report, I speak of a few things which I have found which will more fully show the importance of a Sealer doing his duty; and allowing the following intended to deal right and justly, I have found a large number who sincerely thought because their scales balanced they must weigh right, which is no proof whatever. Quite a number use counter scales with a round or square platform and scoop,

and as the scoop will sometimes be too light or too heavy, they would balance by taking out or putting in shot at the counter-poise, then weigh without the scoop, on the platform, with the scales all wrong. Have tested a very high priced new scale, nickle plated, agate bearings, and so sensitive the air in the room kept it in constant motion, yet it would not stand test and had to go to the manufacturer for changes. Have found 600 lb. scales all wrong up to 50 lbs. and above 50 lbs. all right. Have found full sets of poise weights all wrong and lots of them picked up at the junk stores and many had been through a big fire; yet in all these cases the scales would balance and the owner thought he was getting and giving just weight. I have been obliged to condemn about a dozen scales, and a large number of dry and wine or liquor measures. I hope our City Government will appoint a faithful man to succeed me and one who thoroughly understands scales, but if such can't be found, whoever may take the office I will instruct all I can, as I profess to be well up in scale repairing and making, having had many years' experience in the business before coming to Auburn.

Respectfully submitted,

WALTER F. STANCHFIELD,

Sealer of Weights and Measures.

REPORT OF SCHOOL COMMITTEE.

To the City Council of Auburn:

The School Committee herewith submit their report for the financial year ending February 29, 1896.

In the report of last year, it was recommended that a new school building be erected in New Auburn, and that recommendation is now renewed. Every available room is now occupied and the second story of engine house has been fitted up for temporary use. The number of pupils in that section of the city is increasing rapidly, and unless additional accommodations are provided by the fall term in September next, children coming of school age at that time will have to attend in some other part of Auburn or be excluded from school privileges entirely. The two buildings now in use there are in poor condition and are so poorly ventilated that it would not be surprising if they were condemned by the Board of Health. We recommend that a substantial 12 room building be erected and that all the schools there be brought together under one roof.

APPROPRIATIONS.

The appropriations for 1895-6, as the Committee foresaw, proved insufficient. We were compelled with no increase of appropriation to pay teachers' salaries and the running expenses of five new schools which increased attendance forced us to open. The schools opened were one at Perryville, one at New Auburn, one at Park Hill, one at East Auburn and one at the Spring Street Grammar School. Music has been taught this year in the rural schools for the first time at an expense of \$300.00 and a special teacher in drawing has been employed for the city schools in connection with Lewiston at a cost of \$300. An unusually large

amount has been expended for text books and an equal if not larger sum must be expended for the same purpose during the coming year. These additional expenses should be taken into account by the City Council in making the appropriation for next year. Another room must be opened in New Auburn, and also at the Webster School and probably one at Park Hill. A conservative estimate of the expense of running the five rooms already opened and the two new rooms which must be opened is \$3,000.00, so that next year's appropriation would exceed that of this year by that amount. This should make the cost of maintaining our common schools \$28,000.00. Of this, the state will contribute \$9,000, and the city should appropriate \$19,000. Strict economy has been and still will be used in this department, and the books and accounts of the school committee are always open for public inspection. The average cost of books and supplies and the average salaries paid Auburn teachers are much lower than the expenses of other Maine cities for similar purposes, and no citizen can, therefore complain of unnecessary or lavish expenditure of public funds.

HIGH SCHOOL.

By the election of Mr. J. H. Williams as principal of the Webster Grammar School, the superintendent was relieved of that duty and the High School was put under his supervision. The school continues under the principalship of Prof. John F. Moody, who has served us in that position for many years, faithfully and well. The changes necessitated in the corps of assistants, owing to the resignation of sub-master C. S. Hill and Miss Helen R. Beede did not in any way cause an interruption of the regular work. Mr. Charles E. Merritt, Bowdoin '94, and Miss Augusta Prescott, a former Auburn teacher, were elected first and third assistants, respectively.

We would call special attention to the recommendations of Supt. Wagg, relative to the proposed improvements in the courses of study. We believe that these changes will receive the unanimous endorsement of the citizens of the city.

REPORT OF SUPT. OF SCHOOLS.

To the School Committee :

In submitting my first annual report, it is but just that I should say a word in commendation of the general condition of the schools at the time of my election as superintendent. The value of any school system is directly proportionate to the cost of its maintenance, and taking into account the economical basis upon which the schools of Auburn have been run, their efficiency must be acknowledged a matter for congratulation to the citizens and a tribute to the ability of those who have in years past had in charge the educational interests of this city.

FINANCIAL.

At the end of the last financial year, it became evident to the members of the committee that the appropriation for the year 1895-96, ought to be larger than it was for 1894-95. An increase in the number of pupils attending school necessitated placing upon the pay rolls the names of several additional teachers ; drawing was placed upon a more substantial, and hence, a more satisfactory basis by the employment of a special teacher ; the teaching of music was extended to the rural schools at a considerable outlay for books and charts, and, as is done in many other cities, an increase in salary was given to those of the regular teachers who attended the sessions of the summer Normal schools. There was, also, an unusual expense in equipping the schools with suitable text-books. Few changes were needed, but the policy pursued during the last few years, of reducing to

the minimum the amount expended for books, had rendered the greater part of those in possession of the city, wholly unfit for further use.

In view of these considerations, a sub-committee from the school board appeared before the City Council, asking for an increase of appropriation. This request was not granted and \$16,000 were appropriated—the same amount as for the preceding year. We received from the State \$8,684.97, and from tuition and the sale of books, \$32.95 making the total sum available for common school purposes \$24,717.92. This has been overdrawn \$2,403.04, the expenditure being \$27,120.96.

The circumstances that made this overdraw imperative are explained in detail in the report prepared by your committee. In connection with this brief financial statement, I submit for your consideration the following table, showing the amount of money expended, the average number of pupils attending and the average cost per pupil, in each of the cities of this state, having a population of 10,000 or over.

These statistics were compiled from the last report of the State Superintendent, and do not in any case include the cost of building new school houses.

	AV. ATTENDANCE	AMT. EX.	AV. COST PER PUPIL
Biddeford,	1,220,	\$ 51,320,	\$42.06
Portland,	4,275,	171,639,	41.01
Augusta,	992,	27,283,	27.40
Lewiston,	2,026,	49,197,	24.23
Bangor,	2,603,	46,775,	17.96
Auburn,	1,648,	25,153,	15.25

From these statistics the reader may draw his own conclusions. It *ought* not to be expected, however, that at an expense of \$15.25 per pupil, Auburn can maintain a system of schools equal in all respects to the schools of our sister cities, with expenses so largely in excess of ours. The difference in expenditure is most marked in the average of teachers' salaries, and in the cost of supplies furnished to the pupils. I take from the Maine school report for 1894 a table indi-

cating the average salaries paid to female teachers in ten cities.

Portland,	per week,	\$11.60
Lewiston,	" "	*10.50
Waterville,	" "	10.19
Deering,	" "	10.00
Westbrook,	" "	10.00
Bangor,	" "	9.78
Biddeford,	" "	9.75
Gardiner,	" "	9.31
Saco,	" "	9.00
Auburn,	" "	7.66

*Report of 1893.

EDWARD LITTLE HIGH SCHOOL.

At the beginning of the last school year, this school was placed under the jurisdiction of the Superintendent—a custom not hitherto obtaining in this city. Mr. John F. Moody has been Principal since 1886. During his term of service, the membership has more than doubled and the efficiency has increased in many ways. The class which entered in the fall of 1895 numbered 97, and is the largest in the school's history. From present indications the incoming class will exceed 100. There are now but two High Schools in the state with a larger total enrollment. This fact is a rare compliment to the intelligence of Auburn citizens, as it shows their appreciation of the value of a higher education.

There are three courses of study at present outlined—a college preparatory, a classical and an English course. It seems to me that a thorough revision of these courses is desirable. The introduction into the grammar schools of the study of elementary science will soon make possible a material abridgment of the time now given to Physical Geography and Physiology. They might well be omitted from the college preparatory course and the time thus gained be devoted to English literature.

The objection is frequently urged in Auburn and elsewhere, by men of the business world, that there few high

school studies that tend to fit a boy or girl for practical business. This objection has been answered in many places by the formation of a distinctively commercial course, giving thorough training in book-keeping, commercial arithmetic, business law, stenography and type-writing. Three of these branches we now offer in the English course, but they are not pursued consecutively or at sufficient length. There are many pupils also, who have neither the time nor the inclination to pursue a four years' course. For the benefit of such, I recommend that a two years' business course be instituted and that it be placed in charge of a teacher possessing a technical business education. In the management of the public schools, we should keep in view that which "will work the greatest good to the greatest number." I believe that the number of our grammar school graduates aspiring to business careers and desiring training bearing directly upon that end is at least equal to the number desiring to fit themselves for college. In all fairness, they should be given equal opportunity.

The High School appropriation is distinct from that of the common schools, and the receipts and expenditures for the past year were as follows:

Appropriation,	\$5,500.00	
Received from State,	250.00	
Tuition, etc.,	133.66	
	<hr/>	
Total		\$5,883.66
Paid teachers, janitor, water rates,		
fuel, supplies, etc.,	\$7,158.79	
	<hr/>	
Total		\$7,158.79
		<hr/>
Overdrawn		\$1,275.13

COURSE OF STUDY, ETC.

The present course of study has been in use for many years. From time to time, changes and additions have been made and a new course should be placed in the hands of the

teachers before the beginning of the next school year. No radical departures are advisable. We are now in a position to take advantage of the excellent work of the past, and shall be able to make a course more comprehensive in scope. The mental caliber of the teachers is such that we can safely allow them all possible latitude for the application of their individuality. Hence, a general outline of work will suffice.

In the preparation of a new course, special attention should be given to the department of reading, and an abundance of supplementary work of a geographical and historical nature should be provided. This will be of great assistance to the teachers, who are persistent in their attempts to cultivate, among the pupils, a taste for home reading. These efforts should be encouraged for there is no single line of school work capable of exercising a more lasting influence for good over the future of the children.

The elements of physics introduced, provisionally, into the first and second classes of the Grammar school and elementary physiology and botany should be placed in the permanent course.

Auburn is one of the few cities admitting pupils to the schools at the age of five, with ten years or grades below the High school. Many cities have but eight grades. By emphasizing essentials and omitting non-essentials, we can certainly reduce the time to nine years, and substantially the same amount of work can be accomplished. I recommend that this be done.

RURAL SCHOOLS.

In the management of our rural schools "a condition, not a theory confronts us." Previous committees in obedience to the prevailing public sentiment, favoring the employment of local teachers, have very often been obliged to place the ungraded schools at the mercy of inexperienced and untrained high school graduates. In not a few instances the results have been disastrous. A teacher without experience or special training, is, at best, an experiment, and in a large rural school, where the best teaching talent se-

curable is needed, an experiment that may prove costly. A child goes through school but once, and unless he is properly taught, the possibilities with which nature has endowed him, are never fully developed. There is no school in the world so difficult to teach well, as an ungraded school, and for the reason that most privileges for personal improvement and personal culture enjoyed by city pupils, are not available in rural districts, there is no school requiring a teacher of broader scholarship or of stronger personality. During the past year when vacancies have occurred in the rural schools, a determined effort has been made to improve them by employing only teachers of successful experience. This has not been possible in the smaller schools however. The establishment of a Training school and the adoption of a rule subjecting candidates to a more rigid examination than formerly, will operate to raise the standard of our teaching force, and will benefit the schools.

There are inequalities existing between the city and the rural schools that render it no easy matter to secure satisfactory teachers for the latter, restricted as we are, so largely to local applicants. The daily sessions in the rural schools are longer; the teachers have a larger number of recitations to hear and to prepare for; they receive little assistance from the special teachers and cannot be under as close supervision as the teachers of the city schools are; they are forced to teach a wider range of subjects to the children of parents more prone to criticism, both just and unjust, and—a matter of no small moment to a teacher,—at much less salary. When the salaries paid are made commensurate with the results expected, it will be comparatively easy to secure in the rural schools the same quantity and quality of work that we do in the schools of the city proper.

In his annual report of 1891, Supt. Stetson recommended that the smaller rural schools be discontinued and that the pupils be transported to other schools at the expense of the city. I cordially endorse that recommendation. The advantages thus gained, from a financial and an educational standpoint, are so obvious that it is difficult to believe that any opposition could arise from parents interested. Auburn

has at the present time at least five schools without reason for existence. The teachers of these schools are receiving the minimum salary. They could and would do more and better work in larger schools. Among the pupils, too, there is a woeful lack of interest, and none of the enthusiasm necessary to progress, that comes from competition. Experience has demonstrated that the consolidation of such schools is the most feasible plan. The committee should give this subject careful consideration.

I recommend that the study of drawing be extended to the rural schools, under the same conditions that now regulate music, and that arrangements be made, requiring two or three visits a term to each school, from the special teacher of Physical Culture.

BUILDINGS.

During the summer vacation, extensive repairs were made upon several buildings and a two-room building was erected at Park Hill. This will meet the requirements of that section for many years. This year, minor repairs, painting and whitewashing are needed in most of the rural districts. New floors should be laid at the Hotel Road and at Penley's Corner. Changes that will result in better ventilation should be made at the Douglas school in New Auburn, and an additional room should be secured. Every available foot of space is now being utilized and unless some action is taken it will become necessary to over-crowd the already crowded rooms. I am of the opinion that the duty of attending to the repairs, etc., upon school buildings should devolve upon the school committee. From their connection with the schools, they are in a better position to determine what repairs are needed and upon what buildings they are most needed.

SUGGESTIONS.

Arrangements should be made with the Assessors by which the school census shall be taken more systematically.

A truant officer should be elected by the city council.

The present method of investigating cases of truancy is unsatisfactory.

Copy books and drawing books should be furnished by the city, through local dealers. The reluctance of parents to purchase them has caused a serious interruption of the work of many schools.

The designation of the different grades of school as primary, intermediate and grammar, is a localism. The simpler method of calling the first year in school, grade I, and the second year grade II, should be adopted.

In conclusion, I beg to assure your committee, individually, that I appreciate the cordial support with which you have favored me. It has made my first year's experience as a superintendent exceedingly pleasant. In most respects the work of the year has been satisfactory. Though committee and superintendent do all they can, the efficiency of a school system depends mainly upon the fitness and faithfulness of the teachers. Auburn is especially fortunate in that respect. This has been a year of changes, and with few exceptions, there has prevailed among the members of our teaching force that spirit of loyal co-operation, so essential to success. It has been a double pleasure to me, born in Auburn and educated in Auburn schools, to unite with the teachers of this city in an earnest endeavor to keep our schools in the van of educational progress.

Appended, will be found the reports of the special teachers.

Respectfully submitted,

A. P. WAGG,

Supt. of Schools.

REPORT OF SUPERVISOR OF DRAWING.

Supt. A. P. Wagg, Auburn, Me.,

DEAR SIR.—I hereby submit to you a brief report of the present condition of drawing, which has had for several years a place in the Auburn schools, but has never until now, been systematically taught. In every community we find some people who believe that the study of drawing is of advantage only to those pupils who appear to have some natural ability in that direction. Others think that all drawing should be industrial in character; that boys and girls should be trained to become draftsmen, architects, designers or anything else that is *practical*. Such persons should visit our schools and see for themselves that the aim is not to make a few pupils *artists*, nor a few mechanics, but that there is a broad educational idea underlying the study of drawing and it is this that we aim to carry out. Teachers everywhere, are beginning to recognize drawing as a potent factor in awakening thought in the other studies taught. Geography, history, physiology, all the sciences, become more interesting to the child as well as a means of greater mental growth when he can draw his own maps, diagrams or sketches, and in the effort to do this he is learning much more rapidly than in any other way.

Col. Parker, in his "Talks on Pedagogics" says, "Every child has the artist element born in him; he loves to model objects out of sand and clay. Paint is a perfect delight to children; bright colors charm them. Give the child a paint brush and though his expression of thought will be exceedingly crude, it will be very satisfactory to him; he will paint any object with the greatest confidence." As drawing is now taught

in unison with form study, the child is taught not only to picture what he sees, or thinks, but he is led to express his thought in *making*, and it will be admitted by all who have watched children eagerly at work, that scarcely anything delights a child more than to learn how to make something. With this thought in mind we have introduced some Manual Training as home work in the grammar grades. A boy assistant in each room puts the working drawing on the black-board, then the members of the Manual Training class make free-hand sketches of the drawing with the dimensions. These drawings are taken home by the pupils who work them out accurately with ruler, compass and other tools. When the drawing is finished it is brought back to school, and submitted to the judgment of the boy assistant. If correct, the pupil receives a piece of wood and at home he constructs the object according to his plan. When one piece of work is approved the pupil can proceed to the next. This teaches the pupils not only how to read a working drawing but how to use and make one. A class has also been formed for girls who do not care for work in wood. This class is organized in the same way as the boys' class and the work is done at home. The girl assistant puts a short poetical selection on the black-board, the class copy the selection and at home, make drawings to illustrate the thought. The criticism of this work is done by the drawing teacher.

Some work has been done with the teachers with the purpose of adding to the pleasant appearance of the school-rooms. Much very good work was done in this line. The regular work in drawing last fall began with the study of leaves, flowers, twigs and other work in Nature study. The clay work in the lower grades is not of as high order as we could wish but this was owing to the poor quality and scant supply of clay. We hope to do more in this branch in the spring. The paper folding in the primary grades is good and the children have learned much from the beautiful colors used in this work. The Prang system has been used throughout the grades. The Primary Manuals are in the hands of the teacher of the first two grades. Drawing book

No. 1, has been used in the Third Year, No. 2 in the Fourth, No. 3 in the Fifth, No. 5 in the Sixth, No. 6 in the Seventh, No. 7 in the Eighth and No. 8 in the Ninth year. A blank book has been used in each of the grades for supplementary work.

Some work of the simplest kind has been done in illustrating. Many beautiful designs in colored paper have been done in all grades. Only dominant harmony has yet been taught as that is the simplest harmony. The work in model and object drawing is very satisfactory in all the grades, but little, however, has been done in light and shade as the pupils are not as yet proficient enough in outline drawing to make it wise to attempt much of that work at present.

The teachers, one and all, merit the kindest words for their ready help and hearty co-operation with us in our work and while we have not yet accomplished all that is desired, we feel that it has been through no neglect of theirs, but simply on account of the newness of the work to them and the pupils.

With sincere thanks to all who have so cordially helped me in my work.

Respectfully submitted.

HELEN L. TEW,

Supervisor of Drawing.

REPORT OF DIRECTOR OF MUSIC.

To Supt. A. P. Wagg,

During the past year music has been introduced into the country schools wherever the number of scholars was large enough to warrant it.

Fifteen such schools have been supplied with music charts or books, and in many cases, with both; the teachers have received instruction in teaching the subject at meetings held for the purpose on Saturdays, at the Webster school building. Satisfactory work has been done.

In the city schools many grades are doing advanced work.

While in some classes there are a few who do not take part in the singing, yet it is not, as a general thing, owing to a lack of musical ability but to a lack of application on the part of such pupils.

A careful examination of all pupils in the third and fourth year of school, last spring, showed that ninety-seven per cent., had tone perception and could sing the major scale correctly.

At the beginning of the fall term the High School was divided by classes into three sections, each having a separate period for music. Better work has been the result.

In all of our schools, the teachers are becoming more familiar each year with methods of teaching and, therefore, the world of music is looking gradually clearer and brighter to our pupils.

Respectfully submitted,

N. L. MOWER,

Director of Music.
