## MAYOR'S ADDRESS.

A STATE MATERIAL

#### Gentlemen of the City Council:-

Full information as to details of the City business will be found in the Annual Reports. There is nothing in the coming year to call for comment from me at present.

During the past year we have had some unusual expenses, the smallpox costing us eight hundred dollars, and the steel bridge costing us a considerable sum, but on the whole the departments have been economically

managed and kept within the appropriations.

It is important City officials remember they are not elected to see how much they can get for departments under their charge, but to see how economically they can do the required amount of work. I find in public affairs somebody is always asking for more expenditures, which amounts are small, but when added to many other slight increases make a large total.

The City cannot afford this year to make any increased expense, and all payments must be kept within the appropriations you authorize to-day. The law forbids any overdrafts, and while I shall do what I can I shall need the hearty aid of every City official to see that in our present circumstances the taxes are not increased.

#### I recommend the following appropriations:

\$6,000 00
400 00
2,600 00
1,000 00
6,124 00
40 00
3,000 06

#### PROPERTY IN HIGHWAY DEPARTMENT, APRIL 1ST, 1904.

One steam roller, I road machine, 3 dump carts, 2 single trucks, I double truck, I water sprinkler, 4 snow ploughs, I pump, three horse sleds, I sand sprinkler, I single roller, one double roller, I sewer plough, I road plough, 2 sleds for road machine, 2 horses and harnesses, I set concreting tools, I hand derrick, 5 jack screws, I wagon jack, 2 scythes, 4 augers, 3 grub hoes, 2 iron rakes, 7 crowbars, II snow shovels, 2 lanterns, 4 8-inch blocks, 3 double spreaders, 4 chains, 3 handsaws, 2 axes, 2 horse blankets, brush and comb, 2 cards, 4 wrenches, 4 hammers, 2 pails, 2 sponges, I stone crusher, boiler and engine, 1 portable boiler, I steam drill and fittings, 3 shovels, I bellows and anvil, I vise, 3 stone hammers, 5 pickaxes, 2 wheelbarrows, 250 feet I-inch hose, 300 tons crushed rock and gravel.

### STREET COMMISSIONER'S REPORT.

#### SEWER PIPE ON HAND.

First quality—24-inch, 98 feet; 18-inch, 321 feet; 15-inch, 367 feet; 10-inch Y's, 27 pieces; 18-inch Y's, 10 pieces; 15-inch Y's, 11 pieces; 6-inch Y's, 6 pieces; 8-inch reducers, 28 pieces.

We have ditched up every street from the Lower Steamboat Wharf to the Charlotte and Baring lines.

We have put in three culverts on the Beach road; one on the Charlotte road and one on Munroe street.

We have crushed 7000 tons of rock.

We have built 2270 ft. of macadam road on Union street; 1425 ft. on Munroe street; 425 ft. on Chandler street; 4045 on North street; 400 feet on Main street; 265 feet on Mill street; 150 ft. on Chapel street. We covered 1125 ft. of High street with fine rock, making in all two (2) miles of macadam road laid this year.

We have used 370 tons of pit gravel on the Baring road, from the Baring line to the hill this side of Maguerewock bridge We also raised the grade of the road at

the bridge so as to keep it above freshet level.

We laid 1150 ft. of concrete walk 5 ft. wide on Price street; 375 ft. 4½ ft. wide on McCullough street; 1050 ft. 5 ft. wide on Swan street, and 1500 ft. 5½ ft. wide on South street

We re-covered 125 ft. 10 ft. wide on Main street, and built 125 ft. of cement curbing

We built one gravel walk on Winter street.

We put in an 8 inch sewer on Washington street 233 ft. long, and an 8 inch sewer on the right of way leading to Mr. Stephen Chamber's house, 84 feet long.

We floored the Steel Bridge, using hard pine for

flooring.

We rebuilt the stone pier and abutment on the bridge at Red Beach. This job was done under contract. This pier was laid in cement. We also rebuilt the retaining wall on the upper side of the road near the Plaster Mills.

On the Beach road we used 300 tons of beach and

pit gravel.

### STREET COMMISSIONER'S REPORT..

We have hauled from the pit on the other side of the

river 125 tons of sand.

A portable boiler was bought for use at the crusher plant. It furnishes steam for the steam drill. We only used it a part of the season, and find that we can do more work and with considerable saving over the old way, when we fed the drill from the crusher boiler.

We used the steam roller this year for the first time and find that we can do better work and much cheaper than with the horse roller. We feel that time will show that it was a wise investment for the city.

We would recommend that a new sewer be built on Munroe street, as the old sewer is unsafe During the past year we had to repair it in a number of different places.

A sewer should also be built on Swan street

We have on hand sewer pipe to put in the Main line from Church street to Tyler, and would recommend that this piece be built as soon as the season will allow.

There are a number of catch basins to be placed on the Main street, making connection with the new sewer.

The steel bridge must be painted this year, as it is in very poor condition.

About 90 ft of the Upper bridge at Milltown will

have to be replanked.

The middle span of the Union bridge should be repaired. As one half belongs to the Provincial government arrangements should be made with them as soon as possible, so that this work can be done this season.

The girders on the bridge at Red Beach are growing weak. We built the pier and abutments of stone laid in cement with the idea of using steel girders in place of wood, believing it would be economy for the city to do so, as the bridge is subject to very heavy loads.

Considerable concrete work on sidewalks could be done in Milliown this year, as the gravel walks there are in good condition to come them.

in good condition to carry them.

The city should buy a new road machine.

Respectfully submitted,
ANDREW ESTEY, Street Commissioner.

# Calais Free Library and Reading Room.

For Year Ending March 31, 1904.

To His Honor the Mayor and Board of Aldermen:

The Trustees of the Free Library and Reading Room make r. port as follows:

Owing to certain causes, some of them of a temporary character, the circulation of the library has not been quite so large as in former years. On the other hand the use of the books for purposes of reference and research within the building has increased. This fact seems to indicate that the higher purposes of the library are better appreciated. Two hundred and eighty-seven volumes have been purchased and eight have been donated. Fourteen bound volumes of Periodicals have been placed on the shelves, making a total addition of three hundred and nine volumes, exclusive of public documents. these last named there have been received from the United States and the State Governments eighty-three bound volumes besides others in paper covers. Twentyeight of the new volumes purchased were to replace previous copies of the same works which had been worn out. Twenty-six Periodicals have been regularly received in the Reading Room. As in former years this feature of the institution has proved very attractive and useful.

Volumes have been drawn to the number of fifteen thousand two hundred and three. Visits to the Reading Room have numbered nine thousand and thirty-nine.

The branch library at Red Beach was discontinued early in the year and the residue of the appropriation for the payment of a librarian there, amounting to seventy dollars, has been left undrawn.

### LIBRARY REPORT.

Attention is again called to the urgent need of repairs upon the outer walls of the building, especially the eastern wall. The injury from water is extending from year to year. We ask that an examination may be made and the necessary work performed before further damage shall have been done.

Accompanying this Report is a statement showing the cost of the administration of the Library and Reading Room during the past year. It will be seen to have slightly exceeded the city appropriation. Not less than eight hundred dollars will be required for the coming year.

CHAS. G. McCULLY, President. Wm. J. FOWLER, Secretary.

Calais, Me., April 8, 1904.

# Report of Chief Engineer of Fire Department.

To His Honor the Mayor and Board of Aldermen:

Gentlemen:—The following is my annual report as Chief Engineer of Calais Fire Department for the year

ending March 31, 1904:

The Department has responded to 107 box alarms and 8 still alarms. Of this number 63 have been for fires of greater or less extent and the remainder for chimneys or needless alarms. Two second alarms have been rung during the year. The property of the department is in good condition excepting the ladder truck, which should be replaced by a more substantial one. The fire alarm telegraph is in good condition and has given good results during the past year. I would recommend the purchase of more fire alarm boxes. The hose which was purchased last year proved very satisfactory and I recommend more be purchased this year. The water pressure has been satisfactory the past year.

### The following are the expenditures for the year:

Hose Co., No. 1, salary,	\$780 00
Hose Co., No. 2, "	450 00
Charles Eye, "	480 00
Charles Gillis, "	150 00

## INVENTORY OF FIRE DEPARTMENT, 1903-4.

### CENTRAL STATION, HOSE I.

1 horse.

Ropes and blocks in hose tower.

1 sliding pole—brass.

- 4 beds and bedding.
- 15 chairs and table.
  - 5 fire axes.
  - 1 Desk.
  - I oil tank.
- 8 lanterns.
- 12 lantern globes.
- 33 incandescent bulbs.
- 50 ft. 1 inch rubber hose.
  - r bench and vise.
  - i sink and fixtures.
  - 1 sprinkler
  - 4 coal hods.
  - r feather duster.
  - 2 clocks.
- 2 curry combs and 2 brushes.
- 1 mop.
- 13 hydrant wrenches.
- 21 spanners.
  - r monkey wrench.
  - r Stilson wrench.
  - 4 plaster hooks.
  - 8 hose straps.
  - 1 Siamese coupling.
  - " with valves.
    - Lot dishes and pans.
- 14 overcoats.
- 2 Steel blocks and falls.
- 4 stoves, 1 cook and 3 heaters.

#### HOSE

- I Eastman set.
- 6 play pipes.
- 2800 ft. hose. Part good.
  - 100 lbs. battery zincs.
    - 11 battery jars.
    - 15 firemen's hats.
    - 24 coat straps on wagons.

- 2 chemical extinguishers.
- 2 street blankets.
- r step ladder.

### ENGINES, WAGONS, &C.

# Superintendent's Report.

### To the Superintending School Committee:

Gentlemen:—I have the honor to submit herewith my first annual report of the Calais Schools, it being the first report of a superintendent devoting his entire time to the work. This report must be necessarily somewhat composite and limited owing to the fact that my term of office began in January. Personal contact with the school work of the city extending over this period has afforded me somewhat of an opportunity to observe the present day needs,—needs which must be most conspicuous to be so readily observed and noted.

I am sure it devolves upon me to pay tribute to my predecessor in office, Mr. Joseph F. Ryan. His work in the schools renders much of my work easy. I refer to the work of organization. His report will be found supplementary to mine and I take pleasure in incorporating it, with mine.

In making this report, I purpose to confine myself to existing conditions and present day needs of our own schools as they present themselves to me, rather than upon the more or less abstract problems of school management, courses of study and school work in general. If I may seem to speak too warmly or forcibly upon certain phases, remember, it is because I feel deeply their importance. In making my recommendations to you, I do so thoroughly conversant with the conditions facing the city. I am earnestly desirous of doing justice to all. Seeming justice to a few may be serious injustice to many.

### TEACHERS.

The teaching force, I find very varied as to experience, training and successfulness. There are employed in the various departments of the school system forty-five teachers and assistants. Of this number six are graduates of college, one has had a partial college course; five are normal graduates, one has had one year at normal school; twelve have attended summer school from one to five terms. Twenty-four have state certificates or its equivalent.

The teachers for the most part possess a strong professional spirit. If, with this spirit was combined a professional training, the services of many would be incalculable. As it is, there are many who are not receiving proper remuneration for the excellent service rendered. Not a few are receiving more than their services are worth. Successful teachers are not made in the strictest sense of the word. The per cent, of successful teachers graduating from our Colleges and Normal Schools is not so large as one would infer. The training one receives there helps greatly in determining the success of the

graduate in later work, it does not insure it. To not succeed as a teacher is no disgrace. Many who have been dismal failures in one school may be an unqualified success in another. The opposite is just as true. When it is evident upon a careful observation by an unprejudiced person having the work in charge that a certain teacher is not fitted for the work, or the work suited to her, she should be induced to try her talents in another direction. Service heretofore rendered should be no bulwark behind which to flee. What right have we to compel a child to come under poor teaching and injudicious discipline because some deluded person seeks employment. would not be accepted as good business policy, why should it when the future of the child is concerned Teachers possessing a good natural ability, scholarship and culture, with an abiding love for children and a true missionary spirit, who have kept abreast of the times, gaining in power and excellence of method through systematic study and a careful consideration of the problems of daily school life, are unmistakeably an educational power. Experience measured by years of "keeping school" without a widening of horizon is of little value Often it is productive of harm through wasting of time and dwarfing of the powers of the child. It would be better for our children to play out of doors in God's own free air than to come under the eye of a teacher who, when she opens her doors in the morning, knows not what she is to accomplish in that day's work. Sentiment has no place in the management of affairs where so many are concerned.

### SCHOOL BUILDINGS

There are in use at the present time thirteen buildings. One of these, the Sandbank building, is wholly unfit for occupancy from every standpoint. The heating arrangements are poor and dangerous, as the recent fire showed. Perfect ventilation is conspicuous by its absence; lighting and seating arrangement hurtful. I realize that all monies laid out in repairs is so much

money wasted. A good school deserves a good home and reflects the character of its surroundings.

The Monroe street building, while it is in better shape than the Sandbank, demands your attention. The same may be said of the heating, ventilating and sanitary arrangements here as at Sandbank. The Union school building on Pleasant street will need considerable repairing in the near future.

The Red Beach building is not large enough to accommodate the schools contained therein. In the upper room there are considerable more pupils than seats. The same condition is noticed in the Primary room. These rooms are already taxed to their fullest seating area. At present time there are sixty children seated in forty-eight seats. The sanitary arrangements here are also very poor. This school is a distinct source of revenue to the city, earning as it does \$500 from the Academy fund of the State, besides \$300, more or less, on account of tuition of out-of-town pupils. If this school continues to grow in size and popularity we shall be forced to shut out the out-of-town pupils as we cannot accomodate them. This means a loss of \$800 a year revenue. Can you afford to do that? It is to me an unanswerable argument.

The Ford school building has been in need of repair for some time. Much must be done here before the school can open in the fall.

The Milltown and other buildings are in very good

shape excepting a few minor repairs.

In view of these existing conditions I am in duty bound to recommend the erection of three new buildings. First, a modern four room building of size to acommodate 250 pupils. The Union and Monroe street schools to be consolidated to occupy this building. This could be done at the saving of salary of one teacher, besides cost of fuel, insurance and janitor service. The location I have in mind is central to both limits of present districts. It is of sufficient size to give plenty of yard room for play ground and ample provision for any addition which may be necessary in the future to build. Such a building constructed of wood and unfurnished would cost \$12,000.

The cost for a brick building would be about \$15,000. Some of the furnishings now in use could be utilized.

Second, I would recommend a smaller building of like design accomodating 45 pupils to a room, built of wood, for the Sandbank school. The present school could be easily accomodated in three rooms instead of four as at present. The extra room could be used to accomodate any overflow from the Church street school. This building should be placed in the middle of the back end of the lot nearer Winter street in order to be away from the shadowing influences of the hill with its overhanging trees at the back of the present building. Such a building would cost about \$12,000 furnished.

Both buildings should have two entrances, with sani-

tary arrangements in the basement.

Third, I would recommend a four or six room building at Red Beach with a large room for assembly hall on upper floor for the High school and upper Grammar grades. There should be ample class rooms with a chemical laboratory. This would enable you to close the Ford school, with an attendance of 14 in five grades and transport the pupils to Red Beach. This change would not require any increase in the teaching force. The advantages of such a consolidation are many aside from the financial side of the question. Such a building made of brick would cost furnished from \$15,000 to \$17,500.

These estimates are based on returns from architects of the building used as a model, and conferences with superintendents and school boards during my recent trip to Massachusetts.

I realize that this question of new buildings is an old one. I also realize that the time is not far distant when something will have to be done. Is it good business policy to defer these things and go on spending money in useless repairing and a score of other legitimate expenses?

Money for Municipal purposes is raised by direct taxation and bond issue. I would suggest an issue of Calais School Bonds to a sufficient amount to guarantee the erection of these buildings. I would suggest a yearly appropriation of \$3,000 for redemption of bonds. This

would remove the debt from posterity without any very great increase in your present tax rate I can guarantee the interest money for at least three years. I base this assertion on the fact that otherwise we shall lose the State grant of \$500 besides \$300 tuition money which we now enjoy. There would be a distinct saving in the salary of at least two teachers, to say nothing of the repairs, insurance, care and fuel. This is no pedagogical theory but a business fact.

#### ATTENDANCE AND TRUANCY.

The attendance the past year has been good considering the great amount of sickness and the severity of the winter. There are in our schools, as in others, several pupils who want more holidays and more frequent vacations than are provided for in the school calendar. With that child goes hand in hand the fond parent who thinks the child can get on as well even though allowed to remain away from school several sessions a week. The teacher has simply to lay aside all other duties and devote her entire time to this pupil. If she does this he can easily regain the ground lost.

All unnecessary absence is classed under the head of truancy. There are many such pupils out of school who cannot be reached by the truant officer on account of their age. The truancy of these children, though not truancy in the statuatory sense, is an evil which needs to be "Truancy in the primary schools, limited in checked. amount though it is, is of as great importance as in higher The children attending these schools are in the most formative period of their lives and more susceptible to moral influences than at any time in their school life." A bad habit contracted in the primary school clings to the child during the whole term of his school attendance, and may result in his lasting injury or even his final ruin. The truant officers have no jurisdiction, under the present law, over children under seven years of age; and consequently their control over pupils in the lower grade is confined to

moral suasion. In these schools, therefore, should the wise judicious teacher, mindful of her deep responsibilities, exercise a strong persuasive influence upon the children committed to her care. To the parent belongs the duty to foster and nourish this influence.

### TEACHERS MEETINGS.

A general teachers meeting is held monthly during school year, at the call of the Superintendent, when topics of local school interests and needs are discussed and plans made. It is also my aim to have a course of systematic professional reading. The value of this cannot be overestimated.

A large number of our teachers do not appreciate the advantages of coming in contact with those outside our own school system. A tree standing alone may imagine itself a king in the forest when in truth it is the veriest sapling. The Maine Teachers' Association is to be held in Bangor in October. This will occur during term time. The meeting will occupy two days of the school week. This is, by far, the most important teachers' meeting in the state and one which every teacher should attend.

If the teachers were given the time to attend this meeting, it would be the most profitable two days wages any city or town could expend.

#### COURSE OF STUDY.

A full and complete course of study in all branches with a carefully detailed term plan is needed. The present newly adopted course of study in arithmetic has not been used a sufficient length of time yet to determine its success. The present course of study in English must be somewhat abridged to satisfy our direct needs and avails.

#### TEXT BOOKS.

The Walsh series of Arithmetics recently adopted by you are in use and giving perfect satisfaction. The ap-

propriation for Free Text Books is insufficient, as is shown from the recent yearly reports. This coming year many of our books must be replaced owing to their present worn condition. In view of this fact I would recommend an appropriation of \$800, an increase of \$100.

### SPECIAL SUPERVISION.

The report of Miss Annie M. Lang is appended and I submit same to you with a great deal of pleasure. Her work has been very successfully carried on under many discouraging circumstances. The various schools show varied power in their musical ability but are, nevertheless, very enthusiastic. A music loving school is an easily governed one.

#### FINANCIAL STATEMENT.

Herewith appended will be found a recapitulation of the payrolls in each sub-department of the entire School Department. I do this to simplify the understanding of the general itemized statement of expenditures, as well as to show the range of expenditures.

As you will note the Common School Account is overdrawn \$4.25. This would have been more if the teachers had been paid in full for the month of March. One week's pay had to be held back. This will be added to April payroll. The Free High school account does not show as large an undrawn balance as formerly, owing to the fact that the two teachers at Red Beach, Mr. White and Miss Harvell, as they are doing High school work, were placed on this payroll for the term just ended. Supply Account is considerably overdrawn. The insurance item is a serious matter, meaning in this department an average yearly expenditure of \$200 with prospects of more, owing to the increased rate. The City of Calais should insure its own buildings. The Free Text Book Account is inadequate to meet the demands placed upon

it. Text books we must have, not necessarily extravagant with them. Much must be done this coming year in replacing books that are beyond usefulness on account of torn condition and antiquity. In view of this I would respectfully call your attention to the recommendation

made above in regard to this department.

It has been reported that this city spends too much money on its schools. I deny that, "in toto," this is true. It is not a question of spending too much money, but a question of judicious expenditure. Money spent for useless repairs and in excess of service rendered is not judicious expenditure. It is the intention the coming year to keep wholly within the appropriation. This can be done if the suggestions made are approved.

Thanking you all for your kindly offices rendered and unfailing courtesy; city government, school board, teach-

ers, citizens; I submit this, my first annual report.

PIERCE D. BROWN, Superintendent of Schools.

O. A. Jamieson, Stephen E. Webber, Committee.

At the close of this fiscal year there were several bills in this department outstanding. These bills were for materials used during the past year, text books bought and not paid for, supplies and labor to be used during the coming year. These bills are to be paid from the new year's appropriations. In some instances the bills were contracted before January 1, 1904, particularly in the case of text books. The amounts of this indebtedness follows:

### COMMON SCHOOLS.

#### REPORT OF SCHOOL DEPARTMENT.

#### Music.

PIERCE D. BROWN, Superintendent of Schools.

The course of music, which is used in the schools in the city of Calais, is based on the "Educational System of Music." This system is made up of six readers and four charts.

In the first three grades, one half of the time spent on music is spent on the learning and singing of rote songs. The quality of the voice is carefully trained. No loud or forced singing is allowed by the teacher. The child's voice is allowed to grow in a natural manner. The chart is used in presenting the different keys. The new keys are presented to the child first, on the board, then on the chart. Exercises are written on the board by the teacher and the supervisor, and as soon as the child sings these exercises correctly, they are erased. Ear training is carried on to a great extent, and too much cannot be said in its favor. "America" and "The Star Spangled Banner" are learned, and sung in all grades. Written work is commenced in the first grade, and is carried on through all the grades. In the third and fourth years, two part work is commenced, the names of all the sharp and flat keys are learned, and the position of "do," and the signatures for each key are firmly impressed on each pupil's mind. In the fifth and sixth years two part songs and exercises, and the different chromatics are studied. Supplementary songs are taught in these grades, both by rote and by note. The two part work is carried on to a great extent. the seventh grade, the three part work is introduced. this year, the three forms of the minor scale are taught. Written dictation and ear training work is carried on extensively. Modulation is also taken up from the fourth grade and through the other grades. In the eighth grade, the work of all the other grades is thoroughly reviewed. The pupils in this grade should be able to give the names of each interval, and should be able to write the signature for every key. In the ninth grade sight reading is studied to a great extent in the reading of

#### REPORT OF SCHOOL DEPARTMENT.

songs. Ear training in this grade is carried on to a great extent, and much written work is done. Supplementary work in the way of standard Codas is taken up as much as possible.

The music books are in a very bad condition, and I would strongly recommend the purchase of a new set of books for all the schools. It is very hard, and in some cases impossible, for the teacher to give a singing lesson, when she finds that the desired page is out of more than half of the books.

#### Drawing.

Drawing in the schools of Calais embraces the following: Nature study by the drawing of flowers, trees, land-scapes; by pose drawings; perspective drawing; drawing of all the type forms; light and shade, brush work, both in color and ink; original designing; copying from pictures and designs; memory work; definitions of the geometrical figures and lines; composition; historic ornament, and the drawings for the special days as—Thanksgiving, Christmas, Lincoln's and Washington's birthday, etc.

The best drawings of each grade are being collected, and will be kept. In the upper grades, much time is being devoted to original design and perspective work. In the lower grades, the time is spent mostly on the type forms, and the many objects which are based on these forms. In the lower grades, as in the upper grades, the designing work is taken up. In the lower grades, the work on design is carried on to a larger extent by the making of borders.

As a supervisor, I could do very little without the aid and support of the grade teacher; and I must say that in each teacher I find an interested and enthusiastic helper. I find that they handle the work in a very successful manner

Very respectfully,
ANNIE M. LAING,

Supervisor of Music and Drawing.

#### REPORT OF SCHOOL DEPARTMENT.

# Truant Officer's Report.

To the Superintendent of Schools, City of Calais:

I respectfully report the following work in the Truancy Dept. for the city proper during the municipal year ending March 31st.

Pupils looked up, parents or guardians interviewed,	
(result subsequent attendance,)	283
Pupils arrested and placed on probation,	9
Pupils arrested and taken to school,	62
Pupils temporarily confined in station house,	5

A large number of children have been looked up whose absence was due largely to the severe cold weather and sickness so common among children in winter. I have found a large number of cases where the children did not have shoes or clothing, sufficiently whole, to make a presentable showing at school. I would suggest that each school organize a fund by voluntary contributions of a penny every week or two. The teacher could then draw upon this fund and supply those cases where needs are apparent. Here is an opportunity, you charitably inclined, of doing some real good.

I desire to extend my thanks to both Superintendent and teachers for their uniform courtesy and aid extended me in my work. Respectfully submitted,

CHARLES N. TAPLEY, Truant Officer,

City of Calais.

#### Board of Health.

Calais, Me., March 31, 1904.

To the Honorable Mayor and the Board of Aldermen:

GENTLEMEN. For the municipal year ending this date, the Board of Health begs leave to submit the follow-

ing report.

At the beginning of the year Mr. Percy L. Lord was elected a member of the Board to fill the vacancy caused by the expiration of the term of Mr. Irving W. McAllister, whose long and efficient service entitles him to the gratitude, not only of the other members of the Board, but of all the citizens of Calais. As at present constituted the Board consists of:

NAME.	TERM EXPIRES.
W. S. McKellar, M. D. Secretary,	1904
Verne M. Wentworth,	1905
Percy L. Lord, President.	1906

During the past year there has been somewhat more than the average amount of sickness, caused, no doubt, in large part, by the unusual atmospheric conditions that prevailed throughout the entire period.

Beginning in November we have had a mild epidemic of measles which has continued to the present time. We give below the number of cases reported to us, but we are satisfied that there have been many more. In numerous instances children have been attacked by this disease, but in so light a form as not to need the service of a physician; the parents did not know that the law required them to report such cases, and consequently no reports were made. When we have been cognizant of the facts we have taken account of them, but

#### BOARD OF HEALTH.

there were probably a great many such of which we have never heard. A similar statement might be made with regard to whooping cough. Most persons look upon these diseases as necessary incidents of childhood, and, unless the children become alarmingly ill, pay little or no attention to them. This does not change the requirements of the law; but it seems difficult to make the average man understand what the law does require, and rather hard to prosecute one who errs through simple ignorance.

About the middle of January one of our best physicians was called to a case which had every appearance of being chickenpox and which he diagnosed as such. Some ten days later he was called to see one or two other members of the same family. By this time other symptoms had appeared which aroused his suspicions that he might have smallpox rather than chickenpox to deal with. On January 29th, a representative of this Board saw these cases with him and they seemed so much better that we concluded that the disease, though it had some of the symptoms of smallpox, must be a peculiar form of something else, and we left the house feeling quite relieved. But the next day, when we saw them again, they were not so well, and his fears were renewed. On the Monday following, the representative of the Board took with him Dr. Charles E. Swan, our oldest and most experienced physician, and a careful examination of the cases were again made. The conclusion reached was that, while there was no room for doubt, there was sufficient reason for the gravest fear and for prompt and vigorous action. The quarantine, which had been instituted at the outset, was accordingly made more rigid, guards being placed and kept in front of the house day and night. We were not sure that we were dealing with smallpox, for none of us had ever seen a case of that disease that behaved as these cases did; but, because we were not sure, the only safe thing to do was to treat them as smallpox until some competent authority assured us that they were not. If we were to err at all, it was better to err on the safe side. Under these circumstances we wired Dr. A. G. Young, Secretary of the State Board of Health, telling him what

#### BOARD OF HEALTH.

we feared we had and requesting him to come and determine the question for us. On the 5th of February Dr. Young came, much to his own inconvenience, and in the presence of the attending physician and the Board's representative, made a thorough examination of the cases, going slowly and carefully over all the factors which entered into the problem. When he had covered the whole ground he announced his decision—that we had four cases of smallpox. They were not of the ordinary type, such as is described in the books and generally seen, but of a very mild, modified type which, however, he had often seen in the lumber camps and the villages of Northern Maine and elsewhere. This settled the question so far as this family was concerned. The Board considered it wise to employ Dr. S. E. Webber, who had been in attendance from the first, to treat these cases through their course, and this was done. The further history of this outbreak presents nothing of special interest. It is sufficient to say that all the cases were of the mildest type and all recovered, leaving scarcely a pit as a reminder of their occurrence. The dwelling was finally fumigated on the 7th and 8th of March.

But while the cases just referred to were in progress there came to us reports of cases of some eruptive disease which had existed in at least two other families but which had not been seen by a physician. They had been mild and the parties had fully recovered before we heard anything of them. We made the most thorough investigation possible, but it was hard to ascertain the Reports differed and conflicted. If one set of stories we heard were true, these people had the smallpox; if another set of stories were to be believed, they had not. At any rate it was over. But there might be infection remaining, and that meant possible danger from these sources. To guard against this we put the two suspected families under quarantine for the necessary period and then thoroughly disinfected the premises they occupied. In addition to this we caused every person who had been exposed to infection anywhere, or at any time, to be visited by a medical man and examined for

#### BOARD OF HEALTH.

suspicious symptoms. Here, also, we thought it better to err, if at all, on the safe side. As a further precaution we employed physicians to visit all the schools of the city and vaccinate all the pupils who could not show that they had been successfully vaccinated within the last four or five years. To our surprise many such were found.

We expended \$702; but we have kept the expenditures as low as possible, and they have been small compared with what they would have been had we allowed smallpox to become epidemic in the city. It was only by spending money that we saved money, and while we regret the outlay, we congratulate the city on having escaped a worse calamity.

Cases of contagious diseases have been reported as

follows:

DISEASE.	No.	OF	CASES	No.	OF	DEATHS.
Diphtheria		3				0
Typhoid Fever		5				I
Measles		55				0
Whooping Coug	h	I				0
Smallpox		4				0
Tuberculosis		2				2

Of the complaints which have been made in about the usual number and adjusted as well as practicable, it is hardly necessary to speak.

The sanitary condition of the city is not what we wish it were; but we hope it may be improved with the advent of warm weather and the removal of filth and rubbish which generally occurs in the spring.

Respectfully submitted,

W. S. McKELLAR,

Secretary.

# City Physician's Report.

Calais, Me., March 31, 1904.

To the Honorable Mayor and the Board of Aldermen:

GENTLEMEN: For the year ending this date, I beg leave to submit the following report.

While there has been rather more sickness than usual in the city, the number of cases of acute diseases among the poor has not been appreciably larger than in previous years. The chronic cases we have with us always. They require attention and medicine from the beginning to the end of every year and will continue to do so until mercifully relieved from their sufferings. To many of them, however, it is a pleasure to minister, and their patience and simple trust command our respect and evoke our sympathy. The number under treatment at present is eighteen.

It is only just to say a word in commendation of the management of the almshouse as seen from a medical point of view. Most of the inmates are well along in years and broken in health. To make them comfortable and contented requires the exercise of much forbearance and unremitting patience and care on the part of those having them in charge. This they receive in full measure. All that the existing conditions will permit is done to promote the welfare and happiness of these unfortunate ones. Under the present administration the almshouse is made more like a home than an "institution." The spirit prevailing is that of kindness and helpfulness at all times.

There have been no births during the year. Two deaths have occurred, one in the almshouse and one outside.

Respectfully submitted,

W. S. McKELLAR, M. D.

City Physician.

# City Marshal's Report.

Calais, Me., March 31, 1904.

To His Honor the Mayor and the Board of Aldermen of the City of Calais:

WM. KERR, Sexton.

# Sexton's Report.

To the Honorable Mayor and Board of Aldermen of the City of Calais:

Gentlemen: I have the honor to submit the following report of the work done in the Cemetery in the year 1903. In the spring the first work is to get the yard cleaned of all the leaves. All the ground has to be gone over with rakes and all the leaves burned. Last year the roads and walks were hoed and raked three times, the main avenue was turnpiked from South Street to the upper end of the Cemetery. There were made 200 rods of new walks. All of the hedges about the Cemetery were trimmed. Also two squares of the Old Cemetery were cleaned of underbrush and small bushes, fences repaired and quite a number of old dead trees cut down. Strangers visiting our Cemetery last year remarked how neat and clean everything was, that it was a credit to the city.

Respectfully submitted,

WILLIAM KERR, Sexton.

#### RECOMMENDATIONS.

I should recommend that just as soon as possible that the wire fence be placed about the Cemetery. The old fences will have to be taken down and the best of the poles can be used about the farm. This season there should be about fifty trees set out in the new cemetery, on the new avenues. This season there will have to be about fifty rods of drains dug and stoned. The City water would be a great convenience to the public. In a dry time the well goes dry, and all plants and shrubbery suffers. The water could be brought from Mr. W. Dutch's at a very little cost. Every year adds more work to be done. More roads and walks every year have to be taken care of.

Yours respectfully, WILLIAM KERR, Sexton.

J. M. HILL, Auditor.

# Report of City Solicitor.

To the Hon, Mayor and Board of Aldermen:

I have the honor to report the condition of my department.

During the past year three actions have been brought against the city; all suits for pauper supplies. Bangor brought suit for burial expenses of Dencey E. Shaw, daughter of Isaac Chambers, and the matter was settled by the payment of the amount claimed. The others were brought by the city of Portland for pauper supplies furnished Isaac Watson and Ella Norwood. The only other action now pending against the city is that of Lucy E. Butler for injury from defective way, and her case will be disposed of this coming April term of Court.

Respectfully submitted,

R. J. McGARRIGLE,

City Solicitor.

# Ward Bounds.

Whereas, by the the order of the City Council February eighth, 1904, the proposed change in Ward lines for this City, was submitted to the votes at the Municipal election, April 4th, 1904, and the return votes was "Yes" (302) three hundred and two, "No" was (88) eighty-eight.

THEREFORE ORDERED: That the Ward lines be as

follows:

#### Ward No. 1.

Commencing in the St. Croix river on the easterly line of Baring, thence southerly on said line to the northerly line of Robbinston, thence easterly on said line to the south-easterly corner of lot No. 2, Range 1, thence by the easterly line of lots No. 2, Range 1, No. 2, Range 2, No. 2, Range 3, No. 2, Range 4, to lot 50, thence in a direct line to the head of Chapel street, thence by the middle of said street to the County road, thence by an extension of said line to the St. Croix river, and thence by said river to the first described bound.

## Ward No. 2.

Beginning on the line of Ward One on the St. Croix-River opposite the northerly line of Chapel street; thence by the easterly line of Ward One to the north-east corner of lot number two (2), range four (4); thence in a direct line to the north-west corner of the burying ground next South street, thence in a direct line northerly to the intersection of Union street and North street, continuing the same direct line to the St. Croix River.

#### Ward No. 3.

Beginning on North street where Union street intersects, easterly to the intersection of Chandler street with

#### WARD BOUNDS.

North street; northerly on Chandler street to the intersection of Munroe street; thence easterly on Munroe street to Main street; thence in a direct line to the St. Croix River in continuation of Munroe street. From the intersection of this line with the river up the river westerly and southerly to the intersection of the lower boundary of Ward Two (2) with the river; thence on this line running southerly to the starting point.

#### Ward No. 4.

Beginning where the direct line running through Munroe street intersects the St. Croix River, down river to where a direct line from Elm street would intersect the St. Croix River; thence westerly on this line on Elm street to Germain street; thence westerly on Germain street until it intersects the line running northerly from the burying ground to the river; thence on this line to North street; thence through North street easterly to Chandler street, northerly on Chandler street to Munroe street; thence easterly on Munroe street to the starting point.

## Ward No. 5.

Beginning on the St. Croix River with the intersection of the direct line continuing Elm street down the river to the intersection of South street with the St. Croix River; thence westerly on South street to the intersection of South street with the north west corner of the burying ground; thence northerly on a direct line from the north-west corner of the burying ground to its intersection with a line running westerly from Germain street; thence on this line easterly to Elm street; thence easterly on Elm street to the place of beginning.

#### Ward No. 6.

Beginning at the intersection of South street line with the St. Croix river, down the river to the intersection of the southerly line of John Lane farm, so called, with the river; thence on this southerly line to range 4, including

#### WARD BOUNDS.

all the farms and inhabitants on the Quarry road, thence in a direct line to the north-east corner of lot No. 2, Range 4; thence in a direct line to the north-west corner of the burying ground, next South street, thence by the centre line of South street to the starting point.

#### Ward No. 7.

All the territory south of the southerly line of John Lane farm, so called, to the Robbinston line, shall be included in Ward seven.

The voting places in the several Wards shall be as follows:

Ward No. 1. At the Engine House, in said Ward.

Ward No. 2. At the Grammar School House, in said Ward.

Ward No. 3. At the School House, Munroe Street.

Ward No. 4. At the City Rooms.

Ward No. 5. At the School House, South Street.

Ward No. 6. At the School House, near Steamboat Street.

Ward No. 7. At the School House, Shattuck Street.

Ward offices of Precinct 1, Ward 7, discontinued. Officers elected for Precinct 2 are officers of Ward 7.

# Auditor's Report.

To the Honorable Mayor and City Council:

Gentlemen: In conformity with the requirements of the office of Auditor of Accounts, I have the honor to submit to the City Council a detailed statement for the financial year 1903, beginning April 1st, 1903, and ending with the last day of March, 1904, of the appropriations, the receipts from taxes, and other sources, and the expenditures of the City of Calais from vouchers and documents and from figures furnished by the City Treasurer. Accounts in detail of city property and city debt in the Balance Sheet, also other statements and information can be found under their appropriate heads.

All are respectfully submitted,

J. MURRAY HILL, Auditor.

OF THE
