### CITY OF CALAIS

### ANNUAL REPORTS

OF THE SEVERAL DEPARTMENTS OF THE CITY GOVERNMENT

FOR THE FINANCIAL YEAR

1930 - 1931

MAY 1 2 1934

Ordered—That the reports of the several departments for the past year, as certified by the Auditor, be accepted and printed with the other reports in pamphlet form and the usual number bound in cloth for exchange.

#### Attest:

. .

GEORGE E. NEWTON, City Clerk. Calais, April 13th, 1931

15892.3

### MAYOR'S ADDRESS

When an individual has the good fortune and the confidence of his friends and fellow townsmen to the extent that he is continued in a public position for the third continuous term, some of the things he has to say must of necessity be a repetition of what he has said before, and first I am going to ask your consideration of such a necessity.

As you know, it has been the custom for nearly one hundred years, and is now the Law, that we who have been selected to manage the affairs of this City, shall get together in Public Meeting for purposes of organization.

I desire first to express my sincere thanks to my fellow citizens for the confidence indicated and to say to you that no matter what success or otherwise has been attained, I personally have enjoyed the effort, and I have particularly enjoyed my association with the several men representing the different divisions of the City, and together we have tried to do a good job.

It is with real pleasure that I continue with at least five members of the old board, and from what I already know of the new men who are to be with us in council, I feel sure the same pleasant, friendly relations of past years will continue, and I look forward to a year of good fellowship in our united efforts.

My purpose today is to bring to your attention some of the problems that confront us, and to make recommendations on appropriations that are necessary this morning to meet the requirements of the State; but with your permission I will delay most of the appropriations to an adjournment of this meeting, and until I have had time to consult my associates, and be advised by them in these important matters.

It is necessary, however. at this morning's meeting, to make some of our highway plans in order to be entitled to State Aid, and along this line I recommend for your approval the following amounts:

For General Highway,	\$14,000.00
For State Aid Highway,	1,500.00
For Sidewalks,	3,000.00
For Repairs to Bridges,	1,000.00
For Winter Roads,	3,000.00
For Maintenance 3rd Class Roads,	621.00
For Patrol Maintenance, Route No. 1,	765.00
For Cutting Bushes on Improved Roads,	150.00

The physical condition of our City is about as it was a year ago. The several departments seem to be functioning well, and whatever I might say about most, would have to be along lines similar to what I said a year ago.

Many cities and towns in our Commonwealth are at this time committing themselves to a financial program for the year to come. The trend is particularly serious in these days of business recession, depleted tax revenues, and the need of larger budgets for the relief of the needy and unemployed, and unless this situation soon halts and better times come along, it would seem that we must confine our outlays to projects that are strictly necessary and not merely desirable.

We of today must not be indifferent to an inevitable time when the sagging weight of debts must finally be paid off, and without impairment to current expenses.

About here I have a confession to make. During the year 1929 we tried for a year of strict economy, and during that year withstood the clamor of those who felt that our Highways were not what they should be, and following this policy we made considerable success in Debt Reduction. Here is the confession: In 1930, weakening under this continual clamor, we gave way, and to some extent our roads were improved, but we did not get as far in debt reduction.

Under ordinary circumstances, we would probably not worry much over that, but now, unfortunately, a situation presents itself in the shape of a very serious condition of "Public Welfare" brought about by general hard times, and it would seem really necessary at this time that we go back to first principles and more rigid economy.

The particular need in the present economic situation is a check to expenditures, if we can bring it about, rother than to find a solution of this very serious welfare problem, by the roadway of added expenditures and new taxes, as the advocates of "Welfare Relief" and the solvers of the "Prot lem of Unemployment" in ours and other States have advised

I do admit however that some additional revenue is undoubtedly needed as a temporary measure this year to tide towns and cities over difficulties resulting from increased expenditures for welfare relief.

One of the reasons why cost of government in cities is so high, is that we have fallen heir to various public services made necessary or demanded of us by legislative action. The Legislature, for example, passes a law providing for maintenance on Third Class Roads: A certain percentage of all monies expended on Third Class Roads in the town for perhaps three or four years back. This road may not require a quarter of this amount for bushing and scraping up, but we must, under the law, appropriate the set amount and go on and expend it, if not on maintenance, then on new construction.

I just mention this as an example of some of the items in our appropriations which are made because we are compelled by law to make them.

#### SCHOOLS

Our schools are, I think, of a high standard, and my regret is that we cannot hope to increase our allowance to that branch of our Civic Life in the face of other present demands.

We do want as far as possible—all of us—that our boys and girls be developed into man and women intellectually and temperamentally fitted to take their places in shaping the destinies of the town and nation; and furthermore our work for young people wants to be and must be a joy rather than just the fulfilling of an obligation. They are our hope and our salvation if we give them the right beginning, and most of us realize that character is moulded principally in the earlier years.

#### FINANCES

Finances, that is city finances, to most people means just "How Do We Stand?" and I have to admit that for

reasons explained in the confession previously made, we have not reduced the Net City Debt in the year just passed to the same extent as of the year before, but there has taken place a substantial reduction, and we go at it again with the hope that we shall have backbone enough to STOP.

This stopping however is a hard thing to bring about when as you all know, so many are clamoring for a job, and when the influence of Unemployment Societies over state and nation is all the while along the line of encouraging public work to alleviate this lack of unemployment.

A copy of the Auditor's recapitulation is on hand here for those desiring same. The Treasurer's books have been audited and found correct, but owing to the fact of his being at the moment in a Boston Hospital, we thought best not to submit a report or statement for him except over his own signature, and I promise you the publication of such report a little later on his return to the city.

With these ideas, as well as many others, I wish to state for myself and for my council, that our chief aim and ambition will be to justify your confidence, and with a promise to give you our best effort for the welfare of the City of Calais we start our Administration.

NED H. MURCHIE, Mayor.

### REPORT OF CITY SOLICITOR

To the Honorable Mayor and Board of Aldermen: Gentlemen:

During the last Municipal year there was no litigation in which the City was a party and there is no litigation now pending.

Respectfully yours,

H. J. DUDLEY, Solicitor.

## HIGHWAY COMMISSIONER'S REPORT

To the Honorable Mayor and Board of Aldermen:

Gentlemen: I respectfully submit my report for the fiscal year ending March 31, 1931.

We began work early in April, removing snow and ice from the streets, cleaning catch basins and other work as usual. We then made repairs on the streets in different parts of the City.

We took up the rails left by the Street Railway Co. from the Lower Wharf, along Main Street and North Street, to Milltown, afterward repairing North Street from Bank Corner to Milltown, using crushed rock and tarvia, which put the street in good condition.

State Aid Highway work was done on Main Street near Hinkley Hill.

Third Class Highway work on Charlotte Road where we built a good gravel road.

The usual repairs on Sidewalks, Sewers and Bridges.

A truck and snow plow were added to the Highway equipment which gave good service in removal of snow from the streets.

We used the crusher about four months and crushed about 6000 tons of rock, some sold to other parties. The crusher has worked well.

The sidewalks need considerable work which will probably be done next season.

For financial statement please refer to the Auditor's statement.

Yours truly,

GEO. A. MacDONALD, Commissioner.

### HEALTH OFFICER'S REPORT

#### To the Mayor and Council of Calais:

This is my tenth annual report to you as both Health Officer and City Physician. It will be brief as it has been the year with least to report in either capacity of any of the There has been one case outside the Almshouse ten. for any considerable attention requiring continuous died after great mental suffertime. That patient the usual amount oſ police been ing. There has especial note. At the Almswork but nothing of house one person has died since the last report, Melvin Dudlev. on August 3, 1930. There have been two old men requiring continued service from chronic troubles of the aged.

As Health Officer I have to report the usual number of nuisances which have been abated in so far as they could be under the circumstances applying to each case. Most of them have been cases of deposit of garbage and other filth, including dead animals in places where they became offensive to the public. Until Calais has some provision of some kind for disposal of garbage these nuisances will persist. Some of them are due to ignorance, some to wilfulness, but most to carelessness and a great many to exasperation at conditions due to lack of any legitimate provision for disposal. During the summer Calais can and should have at least a weekly systematic collection of garbage. This is a greater need than the average person realizes.

As to communicable diseases, there has been no consecutive number of related cases of anything amounting to an epidemic. There have been reported four cases of scarlet fever, all mild with no death: eleven cases of mumps; six of measles; two of chicken-pox and one of typhoid. There have been but three cases of pneumonia reported, though many deaths have even assigned to that cause and though all types of pneumonia are reportable. It is reasonable to suppose that there have been many more than three cases of infectious lobar pneumonia but nobody reports them. Pneumonia is a frequent and complication of the chronic or feeble and so gets assigned as the direct cause of death. Left over from previous years or discovered during this one have been three typhoid carriers. One of these

veillance. Two are still known active carriers and are supervised by the State.

The annual Clean-Up Week in May was one of the two most successful ones of the eight we have had since 1921. To have another one more money will have to be raised. In the absence of any other sanitary service these annual weeks are indispensable and must be supported and carried on.

Respectfully,

CHARLES E. COOK, M. D.,

Local Health Officer

LIBRARY

Calais, Me., May 4, 1931

\$2,055.69

To the Mayor and City Council:

1.12

In behalf of the Trustees of the Calais Free Library, I submit the following report:

Total number of books drawn for the year ending May 4, 1931, 20,152; for the year 1930, 19,454; increase 698.

Number of readers at the tables for the year 1931, 3,354; for the year 1930, 3,004; increase 350.

Number of new patrons for the year 1931, 289; for the year 1930, 206; increase 83.

Number of books added 1931, 454; for the year 1930, 400; increase 54.

Circulation	for 1931,	20.514
Circulation	for 1930,	19,454
Circulation	for 1929,	18,704
Circulation	for 1928,	18,335
Circulation	for 1927,	16,847
	42	

The following sets of books have been added the past year:

A new edition of the Book of Knowledge Boy Scout Pamphlets, eighty-seven Four Children's Libraries, fifty books A new Webster's International Dictionary A new set of Nelson's Loose Leaf Encyclopedia, with index Bailey's Encyclopedia of Horticulture, three volumes.

Since last report new shelves have been added, also during vacation in August the interior of the building was redecorated by Mr. Joseph Leeman in a very satisfactory manner.

The floor in the stock room needs painting and a new sign for the front of the building obtained.

A new card catalogue is an urgent necessity.

A small appropriation should be made to provide these needs.

Respectfully submitted,

MARY A. CURRAN, President.

REPORT OF SUPERINTENDING SCHOOL COMMITTEE

Frank R. Bailey, Term Expires	1933
Mrs. W. A. Murchie, Term Expires	1932
Clarence B. Beckett, Term Expires	1934

ACADEMY BOARD

ŵ,

Frank N. Beckett, Term Expires	1932
B. W. Corliss, Term Expires	1932
Clifton Grearson, Term Expires	1932

FRED C. ENGLISH, Superintendent of Schools

To the Superintending School Committee of Calais:

I herewith submit my second annual report as Superintendent of Schools for the year 1930-31.

Plans started a year ago towards a renovation of the entire school plant have been carried forward during the past year. The Academy was painted outside with two coats of lead and oil so that this building has now been completely renovated inside and out.

There was a small fire in the cupola of the Church Street building, the insurance of which was used to repair the damage and to assist in redecorating the building which was done from top to bottom.

Every room in the Milltown building was painted, murescoed, and varnished At South Street new slate blackboards were installed. The interior of the Manual Traning building was covered with celotex. Besides these paint jobs many other minor repairs were taken care of. This work has rendered these buildings fairly habitable. Nevertheless they are still a long way from being ideal class and school rooms.

No material changes have taken place in the general school structure except in Milltown, where the Platoon scheme has been somewhat modified so that now it seems to possess many of the advantages of the Platoon scheme together with all the advantages of the old time school. Supplied with a new principal this school has been a marked improvement over the old school.

Continuing my policy of supplying a text book in each fundamental subject to every child I have purchased quantities of text books so that now that goal is practically in sight. I believe that the results of this policy will be reflected in the improved scholarship of our pupils a few years hence.

The year's faculty has been on the whole satisfactory. As a whole the teachers of our public schools compare exceptionally favorably with the employees of any other institution, commercial or otherwise. They are generally devoted to their task, loyal to their profession, endeavoring to make life a little better for the coming generation.

This last year, when the outlook has not been so bright for many people, has influenced many children to remain in school who otherwise might have gone to work. As a re-

sult our capacity to house the children properly has been more than reached. It is not far distant when more adequate facilities and better buildings must be provided.

I believe that the Calais schools are in a normal and healthy condition, other than in the case of housing. Most of the problems which have confronted us have been solved or there is a prospect that they will soon be solved.

Respectfully submitted,

FRED C. ENGLISH, Supt. of Schools.

### REPORT OF FRED A. TARBOX, PRINCIPAL OF CALAIS ACADEMY

To Mr. Fred C. English, Supt. of Schools for the City of Calais:

I herewith submit my report as principal of Calais Academy for 1930-31.

Re	gistration		
	Boys	Girls	Total
Freshmen,	37	49	96
Sophomores,	26	36	62

#### Health

During the winter term we had six lectures by Dr. Hadley of the State Department of Health. These talks have been informational and I believe are excellent, due to their application in the future welfare of our pupils who are to take up their duties as citizens of the community.

Group talks have been given to the boys and girls on personal hygiene. Although none of these are required, I believe that health education is of paramount importance.

#### Course of Study

We have decided that a divided course of study in civics and history could not be thorough. To eliminate this

deficiency a full year's course in Civics has been added for Juniors. The Seniors are to take a full year's work in American History.

This limitation of time is not the real reason for the change. We believe that our schools should be more in line with everyday life. Our school curriculums are archaic in that they do not meet the natural requirements of the pupil as a citizen. It has been truly said, "That democracy does not flow through the schools."

This criticism cannot be laid at the door of the high school alone. We are influenced by college requirements. In the pursuit of some college courses the student does not enter the school of life. We should try to graduate pupils who may in some future time as citizens be cognizant of deception in government. Government by the best minds is better than political favoritism.

The pupil should have a knowledge of his own country; its government, and its institutions. He should study geography with a purpose. The Seniors, before graduating, should have a working knowldege of Arithmetic. In English he should know words, and how to use them in 'written composition. Classical literature should not be entirely neglected. The pupil should know the best literature of his own time, and be qualified to use his knowledge of English for practical purposes.

#### Improvements

We have accomplished something due to the fact that Mr. English has a definite plan of gradual improvements. In an edition of the Calais Advertiser I have printed a number of things that we need. It is my firm conviction that if we plan for the future and make improvements gradually, and within our appropriations, we shall have a high school which needs no apologies.

#### The Pupils

We have a fine group of young people, loyal, and with a fine sense of decency of what a young person should be in his relations with others. A few are preparing for college, and will be a credit to the school. There are a few who cannot adapt themselves to certain studies. We cannot rightfully deprive them of a chance to further their school work. It has been our aim to fit them into our course of

study without injuring the standard of the school. We are utilizing our school plant to the limits of our time and teaching force. Five pupils entered college from this school last year, and all have done commendable work.

#### Athletics

We have been very successful with our teams this year. There has been some talk in regard to the conduct of the same, but I have taken up various complaints with a great deal of care. Our pupils are fair. They have conducted themselves with credit to the school while on trips to the various towns. At the dances, they have conducted themselves as young ladies and gentlemen should.

Several people not connected with the school have been drinking on these trips; but the people who are more intimately connected with what is going on will back me in my assertion that our pupils of Calais Academy have done nothing that would mar the good name of the school. I do not assume that we are perfect, but it is much better to "get our backs to the wheel" instead of knocking.

#### The Faculty

Miss Bates has taken the place of Miss Grearson in the History Department. We have organized the work and hope to have this department practical and helpful. Miss Bates has done commendable work this year.

Miss Leighton has taken the place of Mrs. Roy Leavitt. The commercial department is by far the largest in the school. The pupils have made marked progress in the work this year.

Miss Fleming has done excellent work with Bookkkeeping, Commercial Law, and Business Practice. Her department needs to be greatly enlarged to keep in step with modern methods of business practice.

Miss Hill has charge of the orchestra, and has put on several interesting plays which the pupils have enjoyed. Miss Hanson has charge of the Broadcast, and has assisted Mr. Lane as planist during the song assemblies. Miss Larner has given her annual French Party. A French Club has held meetings during the year with interesting meetings. Mr. Barrett has had a very successful year. His work with the pupils is well worth my commendation.

#### Extra-Curricular Activities

We have enjoyed the work of Mr. Lane at the Academy this year. Chorus singing is one of the most important means of fostering the better things of life. Singing is one of the school activities which is carried beyond the school days of the pupils. It teaches patriotism, loyalty and friendship in more striking ways than any other media.

Our assemblies have been much better than last year due to the fact that the pupils take an interest in this type of entertainment. More valuable lessons can be taught by assembly programs than through the printed page. Good assemblies are conducive to good friendship.

#### Further Needs

Last year L stressed the need of better facilities for the noon lunch. I hope that we can make some progress along that line this year.

We need hot water in the girl's basement. We need a room for the care of pupils who are taken ill during school hours, but at present this is impossible due to the lack of room.

We are doing all we can with the money, time, and space allotted to us. When a new building is erected then we can go on with more advantages for the pupils and teachers.

I wish to thank Dr. Miner, Dr. Bunker and Dr. Cobb for free consultation with relation to the physical welfare of the pupils. Charles Gillis has again been of great assistance as business manager of many activities. Clowes Warnock and Walter McFarland have been my laboratory assistants, and have done good work. Catherine Anderson, Arlene Dwelley, Elizabeth Rutherford, Marjorie Ross, and others have all contributed a great deal of time in carrying on activities connected with the school.

#### The Debating Team

The team this year consists of two seniors and two juniors. Herbert Cook, Charles Gillis, John Reynolds and Alvah Hall. They have given preliminary debates at St. Stephen, Eastport, and our own Rotary Club.

#### New Books

We now have a new Encyclopedia Britannica. Refer-

ence books in English and History have been added to our school library. Every pupil in the school has a usable text book in his subjects. This type of management has been appreciated by the teachers and pupils alike.

Respectfully submitted,

FRED A. TARBOX, Principal.

#### CHURCH STREET SCHOOL

The registration of Church Street School for the year 1930-1931 has exceeded that of the previous year by thirty pupils, the enrollment being as follows:

Gra	de		Boys	Girls	Total
1			16	20	36
2			21	31	52
3			25	16	41
4			22	19	41
5			19	27	46
6,	2	divisions	31	39	70
7,	2	divisions,	39	23	62
8,		divisions,	30	36	66
9,		divisions	48	51	99
То	ta	1,	251	262	513

This enrollment has been reduced by numerous cases of whooping cough and measles among the first and second grades. Some of these pupils lost so much time that it was unadvisable for them to try to make up such time.

Grade two registers fifty-two pupils and we have found it much too large to devote a great deal of time to the individual. Our rooms are scaled for thirty to thirty-five pupils and all over such numbers deduct from the efficiency of good work.

Grade five has suffered much of the same inconvenience as grade two, although in both cases the ability of each teacher has been proved and work has been up to standard.

Grade nine this year has ninety-nine as compared to eighty-three last year. This grade should have a curriculum to include such subjects and activities as will induce the pupil to carry over from the eighth grade. Here seems to

be the breaking point and unless the course becomes attractive the dormant desire is not stimulated by the nonflexible course. The remaining grades are normal when compared with last year and show very favorable results.

#### Attendance

Attendance has been average in spite of the numerous cases of whooping cough, measles and the usual community sickness. Tardiness as caused by weather and distance from homes prevails although we are working to reduce it to a minimum.

Truancy appears only in certain cases and is not general. Lack of proper interest creates in the pupil the problems we have to deal with.

#### Improvements

The new passage way connecting the main building with the Gymnasium has many advantages. I find the rooms, corridors and pupils have been warmer and not exposed to

A new clock, wired to ring period signals, has been installed. New chairs for the Home Economic Department, also new ceiling and more equipment for Manual Training. sudden changes of indoor and outside temperatures. There is less confusion during class changes to and from the Gym as the pupils are under constant supervision.

From money earned by an operetta last fall we have subscribed to numerous magazines for the Library, also purchased two silver Basket Ball statuettes to be used as awards for Junior High interclass games.

#### Noon Lunch

Aided by the American Red Cross the Domestic Science class prepared a hot lunch, in a variety of forms, for pupils bringing their lunch during the winter term. The extra "hot dish," proved to be a healthful as well as desirable help to the pupils. L believe such a project could be developed to give pupils actual experiences in preparing, serving and in social relations of groups outside as well as in the home.

#### Faculty

We have three new members with us this year: Miss Elizabeth Beckett, ninth grade English; Mr. Harold Hamil-

ton, ninth grade History, and Mr. Bernard Cough, Physical Instructor. All the teachers have given every bit of energy and cooperation that could be had and have worked hard to make this year a success. I wish to thank them at this time for all that they have made possible.

I also wish to thank the School Board and Superintendent for their co-operation during the year. To the parents and citizens I extend my thanks for their cooperation and support in the activities and routine of our work.

Respectfully submitted,

GERALD SCOVILL, Principal.

#### MILLTOWN GRAMMAR SCHOOL

The enrollment for the year has been as follows:

Grade	1,		31	
Grade	2	20 C	34	
Grade	3,		30	
Grade	4,		27	
Grade	5,		30	
Grade	6,		25	
Grade	7,		25	
Grade	8,		16	
Total.			218	

#### Total,

The teachers for the year have been as follows: Reginald Dority, Principal, Grade 7-8; Elva Blaney, Grade 5-6; Mary Boone, Grade 4; Elizabeth Higgins, Grade 3; Druscilla Mac-Arthur, Grade 3; Viola MacArthur, Grade 1; Philip Taylor, Physical Training; Frank Lane, Music; Henry Tompkins, Manual Training; Grace Goldsmith. Domestic Science.

Mr. Taylor has had charge of the textbook work in physiology in Grades 5-8. Health posters were made in this department. A new basket ball, a soccer ball, bean bags and a rubber ball, also base ball supplies have been furnished, all of which have been helpful. We have had a good basket ball team, but have played only five games.

Miss Gregory, the school nurse, has done excellent work for us this year. She has come regularly to check up

on the condition of the children and has attended promptly to all cases to which I have called her attention. Through her advice health material has been placed in the hands of all the children

Under the direction of Mr. Lane the children have improved rapidly in sight reading of music, also in quality of tone. The teachers have cooperated heartily and all the grades seem to be making good progress. Two public demonstrations have been well attended by the parents and all seem well pleased with the work of this department. An additional half-day per week and a definite course of study. would put our school on a par with others in this subject. Perhaps it is not necessary to add that a new piano would be a most valuable acquisition.

Miss Tuttle, the reading specialist, who was with us for a time in the fall, gave all the teachers most helpful ideas with practical demonstrations. Her work in English was equally valuable.

The school building has been put in very satisfactory working condition. The Celotex furnished and laid over the room occupied by Grade 1 has much improved conditions in that room, giving it an even temperature, prevening the backing up of snow under the shingles and the icing up of the fire escape. The "ice house" has lost its nickname. New slate blackboards have been installed for Grades 5-6, and the boards in the other rooms reslated. The fresh coat of paint applied to the interior of the building during vacation has given cheerful surroundings to both teachers and pupils.

A change in the electric lighting system to something more modern would be a desirable improvement. In the interests of economy, some repairs should be made on the front platform, steps and doors. A conductor across the front of the building to keep the water from the steps would tend to preserve the steps and keep them from iceing up during the winter. A new floor is needed in the Physical Training room. If the materials were furnished, I would be responsible for having it laid.

Materials for our hot noon lunch have been furnished by the Red Cross. It has been prepared at home by one of the teachers each week and brought to school in a large Thermos jug. Each teacher has done her part willingly and well, making the noon lunch a success.

Special programs and chapel exercises have been held at various times through the year. A play is now being prepared, to be given a little later.

In closing, I wish to thank all who have helped to make the present school year a pleasant one. Especially would I thank the superintendent and the members of the school committee, who have stood behind me on every occasion, and have furnished so liberally all needed materials. I would also thank the teachers for their hearty cooperation and the parents and other members of the community for the many expressions of kindness and hospitality.

Respectfully submitted,

#### REGINALD H. DORITY.

### STATEMENT OF CITY AUDITOR

To the Honorable Mayor and Board of Aldermen: Gentlemen:

I herewith present statements showing the Receipts and Expenses of the several departments for the fiscal year ending March 31, 1931, as per bills and vouchers on file at the office in City Building.

Yours truly,

M. BRADISH, Auditor.
