# Thousands of Dollars

- \* Are spent every year by some of the most prominent and successful merchants in this country for circulars, cards, letter heads, envelopes and other printed matter, by means of which they
- \* keep their business continually before the people. That it pays them must be apparent from the fact that that every year they are devising
- \* new novelties in the way of printing to advertise their wares. Every letter they write is written under a printed heading; every envelope has their name and business upon it; every package is labelled, and in fact every means is used
- \* to still further advertise their business.

## If It Pays Them

- ✦ Why should it not pay you. If they did not believe it was of benefit to them do you think that they would invest their money in such printing.
- ✦ If you have a business and are dependent upon the patronage of the public to make it a source of profit take every means possible to keep it constantly before them. Advertise in your local paper and supply yourself with printed letter and bill heads, envelopes, cards and circulars.
- ✦ The next time you come to Biddeford be sure and come prepared to leave an order for your printing at the Biddeford Times office, No. 227 Main street. This office is supplied with some of the latest novelties in the printers' art, and
- ✦ competent workmen are employed.

JOHN H. CHASE, TREASURER.

I hereby certify the within account to be correct.

B. H. HOYT, AUDITOR.

Waterboro, Me., March 3, 1893.

REPORT  
OF THE  
SUPERVISOR OF SCHOOLS.

---

DISTRICT NO. 1.—JOHN L. TOWNSEND, AGENT.

Spring term taught by Minnie H. Nason of Lyman. Miss Nason tried to do her duty as was shown by the examination.

Fall term taught by Ella O. Nason of Lyman. I am unable to give any report of this term as I found the school closed on account of sickness when I visited it.

Winter term taught by Frank H. Hobbs of Waterboro. Mr. Hobbs met with his usual well merited success.

DISTRICT NO. 3.—JOHN F. SANBORN, AGENT.

There have been two terms of school in this district taught by Miss Rose M. Emery of this town. This is one of our small schools but Miss Emery tried hard for the advancement of her scholars and their examination showed good advancement in the branches taught.

DISTRICT NO. 4.—CHARLES CHASE, AGENT.

Summer term taught by Miss Julia I. Bean of Waterboro. Miss Bean is an energetic teacher and by maintaining good order the scholars under her care were able to do work as was shown at the examination.

Winter term taught by Miss Cora B. Smith of this town. Miss Smith is a teacher whose experience has been large and varied and whose thorough education well fits her for the posi-

tion of instructress and the scholars did good work under her instruction.

DISTRICT NO. 5.—FRANK WILLIAMS, AGENT.

Summer term taught by Mrs. Nettie C. Watson of Waterboro. Mrs. Watson is a teacher thoroughly educated and gave her best efforts to her school.

Winter term taught by H. M. Littlefield of Waterboro.

DISTRICT NO. 6.—CHARLES W. THOMPSON, AGENT.

There have been two terms in this district under the instruction of Miss Frances M. Hamilton of this town. Miss Hamilton is a teacher of real merit who faithfully performs her duties in the schoolroom.

DISTRICT NO. 7.—JOSEPH J. CHADBOURNE, AGENT.

Summer term taught by Miss Laura E. Johnson of this town. This was Miss Johnson's first school and we hope experience will give her the qualities which make a successful teacher.

Winter term taught by J. Freeman Brackett of Limington. Mr. Brackett has worked hard for his scholars and his thorough method of instruction and earnest efforts of his scholars have made this term a success.

DISTRICT NO. 8.—JOSEPH HARPER, AGENT.

There has been one term in this district taught by Miss Ella Deering of this town and although the number of scholars in this district was small, Miss Deering gave them careful and earnest instruction while under her care.

DISTRICT NO. 9.—BICKFORD CLUFF, AGENT.

Summer and fall terms taught by Mrs. M. Belle Littlefield of Waterboro.

Winter term taught by Levi Hobbs of Hollis. Mr. Hobbs is a teacher well known in this town and, although the school was broken by sickness, good work was done during the term.

## DISTRICT NO. 10.—ANSEL T. SMALL, AGENT.

Spring term taught by Frank H. Hobbs of this town. This is the largest school in town but under the efficient instruction of Mr. Hobbs' good work was done.

Fall and winter term taught by Fred Benson of this town. Mr. Benson is a teacher whose thorough qualifications well fit him for his avocation.

## DISTRICT NO. 12.—WILL E. ROBERTS, AGENT.

Summer term taught by Lilla A. Deering of this town. Miss Deering tried hard for the advancement of her school. The average attendance was good, advancement fair.

Fall and winter term taught by Eugene G. Bagley of Waterboro. Mr. Bagley's thorough discipline together with his careful instruction made these terms a success.

## DISTRICT NO. 14.—A. W. TUCKER, AGENT.

There have been two terms in this district under the charge of Miss Lizzie May Sawyer of Limerick. Miss Sawyer is an earnest, faithful teacher and I was much pleased with the marked advancement while under her care.

## DISTRICT NO. 16.—TIMOTHY WOODWARD, AGENT.

Summer term taught by Miss Nettie Lillian Abbott of this town. Miss Abbott tried hard for the advancement of her school and is well qualified to teach.

Winter term taught by Mrs. M. Belle Littlefield of this town.

---

In submitting this my fourth annual report of the schools of this town, I can say, as in my report of last year, that I am pleased with the improvement of the schools throughout our town. All of the teachers were all qualified as far as education is concerned but in several of our schools there has been a failure in discipline, without which no school can be thoroughly successful. I would recommend that we take the benefit of the Free High School law. Out of the twenty-seven towns in our

county, twenty-two receive this benefit, and while as a town we are helping others, why not take the benefit ourselves instead of sending our scholars out of town to school, at a great expense to their parents? I feel a sincere interest in the education of our children and feel that too great an effort cannot be made to lay a thorough educational foundation on which they can build their future, and with best wishes for success in all plans for advancement in this direction, I am yours truly,

H. M. LITTLEFIELD,

Supervisor of Schools.

# The New Phosphate

The Odorless Phosphate (or as it is called abroad, "The Slag Meal") is an extract from iron in the manufacture of steel by the Basic process.

This new and most wonderful process invented by Jacob Reese, makes

THE PUREST,  
CHEAPEST, AND  
MOST ENERGETIC  
FERTILIZER EVER USED.

## ANALYSIS OF THE ODORLESS PHOSPHATE.

427 pounds	Phosphoric Acid,	21.37
102 "	Silica,	5.10
118 "	Magnesia,	5.90
80 "	Alumina,	4.01
111 "	Manganese Oxide,	5.56
240 "	Oxide of Iron,	12.00
16 "	Soda and Potash,	.80
906 "	Lime,	45.26
2,000		100.00

It is Odorless as Wood Ashes,  
Pure as Mountain Water,  
Healthy as a Sunbeam,  
A Quick and Vigorous Fertilizer.

It Makes the Flowers Grow,  
It Increases the Crop,  
It Makes the Trees to Bear.  
Everybody who has Tried  
It Uses It All the Time.

It is the Strongest, the Cheapest,  
The Best and the Most Vigorous  
Fertilizer Ever Used.

Do you want a big crop of Corn;  
Do you want a big crop of Potatoes;  
Do you want a big crop of Oats;  
Do you want a big crop of Hay;

THEN USE

## ODORLESS PHOSPHATE.

In the United States Agricultural Report for 1891, pages 174 and 175, you will find the following: "For several years experiments have been carried on which have finally demonstrated beyond any reasonable doubt that the Phosphoric Acid in Basic Slag is available for plant food without previous treatment with Sulphuric Acid for the formation of Superphosphates, as is done with natural phosphates. . . . Within a year or two of the industry of furnishing Basic Slags as commercial fertilizers in this country has assumed large proportions, . . . on account of their being easily pulverized, and from the fact that the Phosphoric Acid which they contain is so readily assimilable. . . . These slags, when properly prepared, are now sold on the market, containing from 20 to 25 per cent. of Phosphoric Acid. It must not be forgotten that these slags probably act in a beneficial way apart from their mere content of Phosphoric Acid. The lime which they contain appears to be in excellent condition for producing a proper flocculation of the soils. The application, therefore, of Basic Slag to stiff, clayey soils would doubtless prove highly beneficial aside from their content of Phosphoric Acid. Thus in the application of this fertilizer, we find a double benefit; first, in the improvement which it makes in the physical condition of the soil, and second, the amount of plant food available in it."
