530 S. B. Marshall M. D., reporting births and deaths	6.00	
		\$1,053.09
Appropriated		\$200.00
Bank Stock Tax		336.86
Overlay		139.51
Damage from first schoolhouse fire		50.00
Damage from second schoolhouse fire		98.60
		\$ 824.97
Overdrawn		228.12
		\$1,053.09

It has been a custom to charge the Insurance of Town's buildings to this account and so we have credited the account with the amounts received from the Insurance Company for fire damage.

We have received as Bank Stock Tax of State \$124.59 less than in 1924.

SUMMARY OF HIGHWAY AND BRIDGES ACCOUNT

On Orders Drawn by the Commissioners

Percy H. Smith	\$ 939.32
On orders drawn by Samuel A. Chad- bourne	1,973.18
For repairs to machines and for metal culverts and two silent policemen with electric lights, etc.	593.84

For repairs of roads occasioned by the spring ruts made by motor vehicles between L. D. Ridleys and Foun- tain in March	124.11	
		\$3,630.45
Of H. G. Littlefield	\$ 15.00	
Of Sanford	40.14	
Amount voted by Town	2,000.00	
Overdraft	1,575.31	
		\$3,630.45

Considerable of this overdraft would have been avoided but for a protest by some citizens to an arrangement made by the Selectmen with the State Highway Commission to change the location of the 3rd Class State Aid road for the year. The location of this road could have been changed without injury to the general usefulness of the highway.

\$1,688.37

Lyman Littlefield Bridge, near John H. Stevens mill has a span of 40', width 20'. We covered this bridge with 5 I-beams 24" deep, tied together with $\frac{3}{4}$ " rods. Used 20 gauge corrugated galvanized arches. On taking off the old wooden covering we found the North abutment wall to be good, but never painted. We painted up the seams with cement.

The South abutment wall, though apparently strong, was very open and we put up a form and poured concrete to form a new face 18" thick at bottom and 10" at top, which ran in, filling all the open seams, making a very solid abutment. Covered the bridge with concrete reinforced with iron. Put up a new rail $1\frac{1}{2}$ " pipe, painting rail and beams and completing the approach at a cost of \$1,564.77.

The Littlefield's Mills Bridge, near the Embroidery factory has a length of beams 30 feet, width of bridge 24 feet. We used 5 I-beams 18" deep, $\frac{3}{4}$ " cross rods, 20 gauge corrugated galvanized arches with reinforced concrete filling and $1\frac{1}{2}$ " iron rail on bridge. Approach rail of heavy posts and 2" x 6" rails of wood. All iron and wood is painted.

We found the abutments to be loosely laid up, though apparently strong. We put up forms and filled in with a heavy face of concrete which flowed into the open spaces and make a solid wall. The owners of the Mills at same time attend to the covering of the Penstock and connected up their stone-work with the bridge. Cost of this job \$1,307.09.

Swett's Bridge was found to be in a very unsafe condition, one of the beams broke while being removed, all were badly decayed.

We used 5 I-beams, 38 ft. long, 20 inch deep with $\frac{3}{4}$

cross tie rods and corrugated metal arches and 1½" iron pipe rail, same as on the other bridges. Concrete reinforced filling. Heavy wooden rails at the approaches, using pieces that came out of the beams of the other bridges, with 2" x 6" rails. We put up a side-fill of heavy rock on the up-river side, where the stream had cut into the very road-way at the south-end of the bridge also put up forms and made concrete face to the abutments and removed a sharp curve at the south approach. This was a much needed thing. The cost of this job was \$1,688.37. Making the cost of these 3 bridges \$4,560.23.

The Treasurer has borrowed to pay for this job as authorized by vote of town at last annual meeting \$4,500. on note to the Sanford National Bank, as will be shown by his report.

The building of these bridges at once enabled us to use the lumber for forms and the sound portions of the old bridges, over and over, and to buy the material in larger quantity and thereby at a better price.

We were most fortunate in having the services of A. E. Carpenter as foreman. He is well acquainted with cement work and with handling such jobs. They could not have been put off longer as both covering and the beams were past their safety.

The foregoing account is submitted for year 1925 to Feb. 9, 1926 date of closing books.

LUCIUS M. PERKINS,
JAMES H. LITTLEFIELD;
JOHN E. ROBERTS,

Selectmen of Alfred.

Alfred, Me., February 22, 1926.

I have examined the foregoing accounts of the Selectmen and find them correct.

HARRY G. LITTLEFIELD,
Auditor.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee and Citizens of
the Town of Alfred:

It is my privilege to submit for your consideration my sixth annual report of the condition and needs of Alfred.

We believe that the past year has been one of consistent progress and growth. With but one exception there have been no changes in the teaching staff. Generally speaking, attendance has been good and there has been evidence of a healthy school spirit. The work which has been accomplished has been of a commendable nature.

Our greatest obstacle at the present time lies in the overcrowded condition of our elementary schools. Our school population has been steadily growing during the past few years and we now find ourselves confronted with numbers for which we have not adequate housing facilities. During the present term we have 49 pupils in the primary school, which includes grades one and two, 43 pupils in the intermediate school, which is made up of grades three, four and five, and 48 pupils in the grammar school which contains grades six, seven and eight. In other words we have 140 pupils housed in three rooms. In the standardization of school it is generally recognized that the number of pupils to be under the charge of one teacher should be about 30, not to exceed 35. By a glance at these figures, it will be seen that on the basis of 30 pupils in a room we now have nearly enough pupils to use five rooms, or, using the maximum of 35 pupils we are in immediate need of one additional room.

The Committee recently met in conference with Mr. R. J. Libby of the State Department of Education who immediately saw the necessity of an adequate addition to our school building. As a result of that conference we would advise the erection of a new wing on the east side of the building, sufficiently large to permit of two recitation rooms on the ground floor, a suitable assembly hall for the high school, and a recreation room in the basement. Such an addition would solve the problem of congestion in the elementary grades, would provide a place for socials and public gatherings in the high school, and would afford an opportunity for physical education for all the schools in the building. With the addition of the facilities our building would be brought more nearly into conformity with present day needs. The school in any community should be one of the important centers of the social life of that community. Before this ideal can be realized, however, we must at least have a building sufficiently large to accomodate the public. It is not to be denied that the addition recommended would mean the expenditure of a substantial sum of money. We also admit that the town is, at the present time, under considerable expense. It is, therefore, with some reluctance that this request is made, but we feel very confident that something must be done in the near future. Our schools are one of the most vital elements of our community and should be worth sacrificing for.

Certain repairs of a general nature will be imperative next year. The building is in immediate need of shingling. Our recent experience with fires would indicate that the roof should be covered with fire proof material. May I also mention in this connection that a fire escape should be provided. The law definitely says that there should be two separate means of egress from the upper story of all school buildings. During the past two or

three years the amount appropriated for repairs has been so meager that very little could be done. We have been able this year to provide a new science table for the laboratory although there was not sufficient money to do necessary plumbing in connection with it. We hope to complete this next year. The interior of the building is sadly in need of painting. The heating plant is by no means satisfactory. Comparison of fuel costs with those of neighboring towns having buildings larger than ours shows that we are wasting money each year by heating five rooms with three heaters.

The high school has had a very progressive year. Although the registration has fallen off slightly, owing to the graduation of a large class last June, conditions in the grades indicate that this decrease in numbers is but temporary. For a more detailed report of the high school I would respectfully refer you to the report of the Principal.

During the past three years very helpful work along the line of school hygiene has been done by the York County branch of the Maine Public Health Association. Thus far this work has cost us nothing. Many towns appropriate money each year for medical inspection. I am informed that if the Public Health Association is to follow up the work begun, another nurse must be employed. Some of the towns in the County will meet this necessity by appropriating money for health work and employ the County nurse. It seems very much worth while for this town to assist in this matter.

Our pupils have shown marked progress in music under the very able instruction of Mrs. Helen Dooley. I trust that we shall be able to continue our work along this line.

With the exception of the repairs account, the schools have been financed within the appropriations. Slight salary increases were given the elementary teachers. It is desirable that we maintain a salary scale which will permit us to retain teachers from year to year. Too much changing is not good for the schools. In the matter of conveyance we have continued our policy of town owned conveyance facilities. This year we had a closed body built for winter use on the "Mountain" route. This has proved very satisfactory. We trust that we shall continue to have the financial backing which we have enjoyed in the past.

In conclusion, I wish to express to the Superintending School Committee and the citizens of the town my appreciation of their loyalty and support during the past year.

Respectfully submitted,

MAYNARD E. WRIGHT.

Superintendent of Schools.

REPORT OF HIGH SCHOOL PRINCIPAL

To the Superintendent of Schools and School Board of
Aifred:—

Following is the report of work in the high school
for the fiscal year of 1925.

The enrollment records as of September 1925 are as follows:

Seniors (1926)	5	3	8
Juniors (1927)	3	5	8
Sophomores (1928)	5	4	9
Freshmen (1929)	4	5	9
	—	—	—
	17	17	34

School opened September 8, 1925 with a total enrollment of 34, 17 boys and 17 girls. At the present time (February 12) all except 3 of this number are attending. The average attendance for the fall term was 31.9, there being 11 pupils not absent for any session during the term.

Alfred High School was approved last year by the New England College Entrance Certificate Board as a Class A school for a period of four years, subject to the following rule: "The Board shall have the power of withdrawing approval from a school and from such a school certificate shall not afterwards be accepted until it shall again have been approved by the Board" There is a danger of being obliged to forfeit this privilege unless certain improvements are made.

The organization of this curriculum remains quite similar to that of previous years. There are two courses, the college preparatory and the general cultural courses. According to the present plan there is little opportunity for individual selection of subjects. This condition necessitates the addition of more subjects and teachers. The most remarkable step forward would be to employ a third teacher. The present curriculum of Alfred High School demands it. Under the present schedule the assistant conducts seven recitations and the Principal

eight, a condition which renders the most efficient work impossible.

The course in music, which was introduced into the curriculum four years ago has aroused much enthusiasm among the students. The hour a week devoted to this subject is invaluable to the school.

The lack of space and material suitable for library purposes in the high school building reveals a striking failure to appreciate the important part which the school library should have in the high school education. It will readily be seen that the conception of the school library requires a more intimate relation to the school where the library is not housed in the school building itself. Better results are likely to be secured where those in charge of the library service are part of the school organization and directly responsible to school authorities. However excellent the public library, the school should have a library of its own.

GRADUATION

The class of 1925, consisting of 12 members, was graduated June 11, 1925.

TEXT BOOKS AND EQUIPMENT

Tanner's Composition and Rhetoric was adopted for the Freshman class in English, Smith's Essentials of Plane Geometry for the Sophomore class, and Bishop and Robinson's Syllabus in Modern European History for the Senior class. The text books are in very good condition. The few old ones in use at present will be replaced soon by up-to-date books. Our General Science text book could be covered in the first half year and Biology substituted the last half. The Chemistry-Physics table, which was added to the equipment this year, has proven to be a real aid in the accomplishing of the work in Science. More materials and apparatus would facilitate the experimental work.

Extra Curriculum Activities

The Annual Senior Class play, No Trespassing, was given last February at the Town Hall and repeated at West Kennebunk Grange Hall with a net profit of about \$110. This amount was used for the expenses of the Washington tour. During the fall term, according to the custom, the entertainment was given by the school

students and a profit of about \$30 was realized. Again on January 22 and January 30 two one-act plays were given with a profit of \$55. Over half the total number of students in the school took part.

The Chronical, the high school publication which made its first appearance three years ago, has been issued this year. The benefits to be obtained by a student publication are obvious; it is a great stimulus to eager student writing, it moulds and develops school spirit, it increases community and public interest in the school, it gives excellent business and vocational training of a certain kind to students on the staff. With a clear idea of the educational purpose of the publication of **The Chronicle**, those interested in the Alfred High School have given generously and deserve many thanks.

By reason of the natural interest in physical games and of their spectacular nature, athletics is by far the most popular form of social activity in the school. The boys have taken much interest in basket ball and the result has been a team of very sportsmanlike young men. Base ball, revived last spring, is already receiving attention for the coming season.

Recommendations

In summarizing, the following recommendations are offered:

1. Medical examination of all pupils.
2. Third year in French.
3. Separation of Junior-Senior English into two distinct classes.
4. Building up of high school library.

5. Third teacher in the high school.
6. Half-year course in Biology to take the place of half-year of present General Science course.
7. More materials and apparatus for science course.

To The Parents

There is a certain amount of routine contact between parents and the school but very seldom do the parents visit as individuals unless some unsatisfactory situation has arisen regarding a pupil's work or conduct. These intermeius do not as a rule prove unpleasant but lead to a better understanding and an improvement of the conditions which are hindering a pupil's success.

To secure the progress of the pupil, the school and the home must work together. Each six weeks a report is sent to you. Please examine each report carefully, sign it, and send it back promptly. If the report is not clear to you or if, for any reason, you wish to talk with the Principal or with a teacher about your child's work, please do not hesitate to come to see us. **You will be welcome.**

Please note that absence from school must be explained by the parents on the **first** return of the pupil.

Work missed by absence approved by the teachers may be made up with the subject teachers at the close of the afternoon session.

Unexcused absence is truancy.

Time lost due to tardiness must be made up at the close of the school day.

Very few pupils can do satisfactory work without spending at least two hours in study in addition to the period assigned for study during the school hours. If a pupil seems to require much less or much more than this for the preparation of his lessons, the parent is advised to notify the teachers promptly.

Going to school is a business that demands regularity and promptness; will you help us to teach your boy or girl that fact?

Permit the writer to express his sincere appreciation to the Superintendent, School Board and parents for the fine spirit of cooperation that has been shown.

Respectfully submitted,

CARLETON L. WALKER,

Principal of Alfred High School.

PARSONS MEMORIAL LIBRARY

To the Board of Directors of Parsons Memorial
Library :—Gentlemen :—

I have the pleasure of submitting the following as the twenty-second Annual Report of Parsons Memorial Library for the year ending March 1, 1926.

Although the past year has not been marked by any great change of method in library work, we think, on the whole it has been a fairly prosperous year.

The number of books taken out is considerably larger than the previous year and, although no record has been kept, we think more people have made use of the library. The young people and children are still the greatest readers and the scholars are making good use of the reference books.

The reading room is used almost entirely by the young people and it is a matter of regret that some of the older folks do not avail themselves of the privilege of reading the many good magazines on the reading table. Not only would they derive pleasure and profit from the time spent there but their presence might have an elevating effect on the atmosphere of the library.

The book shelves, both in reading room and in the stock room, are overflowing and we have already removed some of the older books and still more ought to be removed to make room for the new books which are constantly being added.

We have purchased this year 204 books which is more than last year. Of these 12 are renewals.

Books presented by friends	12
Books received from State library	7
Number of books loaned	5,884
Number of books in library	9,288
Cards outstanding	342

We are still sending boxes of books to North Alfred and the Gile Neighborhood and Mrs. Leland Gile and Miss Elsie Gile continue to take charge of them.

In this way some who might not come to the library are able to have books to read.

To any in need of good books or magazines or one who is seeking information on any subject we extend an invitation to come and try our library.

Respectfully submitted,

MARY C. EMERSON,

Librarian.

All the Directors have to say is, the twenty odd years the Library has been serving this community has demonstrated the economy and vitality of its existence and we are not ashamed to ask for the same appropriation as last year, \$250.00.

LUCIUS M. PERKINS,
H. B. FERNALD,
GEORGE H. WILLIAMS,
MARY C. EMERSON,
G. ELMER MOSSMAN,
GRACE M. CAME,

Directors.
