ANNUAL REPORTS OF THE SEVERAL DEPARTMENTS OF THE CITY GOVERNMENT

FOR THE FINANCIAL YEAR 1924-1925

.....

SEP 8 1931

ORDERED—That the reports of the several city officers and heads of the departments as certified by the Auditor be accepted and that one hundred and fifty copies of the same together with the Mayor's address, list of officers, etc. of the present City Government be printed and published and twenty-five copies of the same be bound in cloth for exchange.

> Attest—E. A. WOODMAN, City Clerk.

MAYOR'S ADDRESS

Gentlemen of the City Council:

One of the duties devolving upon the Mayor under our City Charter is to communicate to the City Council such information and recommend such measures as the interests of the City may require. In performing that duty today I will only very briefly call your attention to a few matters which I deem of greatest importance.

You have all, with one exception, had some years experience as members of former City Councils in conducting the City business, some of you nearly as many years as I have had, and I feel assured that you have not accepted the office of Aldermen without realization of the importance of the duties you are called upon to perform, nor without the intention of performing those duties faithfully, without fear of or favor for any person or concern, but with the best interest of the City as a whole always in view. Constant and prompt attendance at meetings of the Council is one duty which if neglected leaves the absent one without first hand knowledge of the business transacted, and prevents the Council from having benefit of the advice and assistance of those absent in arriving at right conclusions. The attendance of the five of your number who served last year was all that could be desired, but I would like very much this year to find a full board facing me at every meeting. In none of the years that I have served as Mayor have I been able to say at the close of the year, we have accomplished all that we hoped for. There has always been some unlooked for happening some untoward event or miscalculation that has thwarted us. Last year we hoped to make a good beginning in rebuilding our sidewalks, many of which are in deplorable condition, but the unforseen necessity for repair on the center pier/ of the International Bridge made it necessary to divert the money which otherwise would have been available for sidewalks to that necessary work. But, I am always optimistic, and I confidently expect that at the end of this present year of service we can truly say, we have accomplished all we planned and hoped for.

There is great need of repairs on nearly all of our streets, but we will not have sufficient funds with which to carry out an extensive program of repair, and I recommend that before real work is commenced that the Street Committee together with the Street Commissioner go over every street in the City and lay out a program of repairs to the extent of the funds available, regard being had to that which will be of the greatest good to the greatest number.

The bituminous paving of Main Street has been completed from Calais Avenue to Brown's Corner, and I recommend this work be continued this present year and completed to the International Bridge, and perhaps a beginning be made on lower Main Street.

Very little repairs will be required on our bridges this year. One pier of the Union Bridge was somewhat damaged by ice and water during the winter and will require leveling up and some ballasting. Other than that, unless we have a freshet that does damage, I know of no other outlay that will be necessary.

In regard to the International Bridge, I am pleased to report that the bill authorizing the State to take over and hereafter maintain this bridge has been finally passed by the Legislature, and approved by the Governor. This relieves the City of one burden and saves us from quite an expense for repairs this present year. Much credit is due Senator Miner and Representative Beckett for securing the passage of this bill. They have both been active and persistent in the matter, and by their united efforts accomplished that which will be a lasting benefit to the City.

We have on hand a large quantity of tar bought for sidewalk work, and I recommend that the necessary asphalt or pitch for mixing with it be purchased, and that a considerable amount of sidewalk, where they are in the worst condition, be relaid this year, and in this connection I recommend that a better type of walk than the old ones be laid, with such foundation as will make them more permanent than the old ones, and wherever feasible with proper concrete curbing. I believe it the better policy to lay one mile of reasonably permanent sidewalk than two or three miles that will go to pieces in a few years.

The schools and school buildings are in fairly satisfactory condition. No extensive repairs will be required, except such changes as are required by the New England Insurance Exchange to safeguard the buildings against fire, and the improvement of sanitary conditions at the Red Beach school buildings to conform to the requirements of the State Educational Department.

I do not anticipate that it will be necessary to expend any great amount on sewers this year. A large amount could be advantageously expended in improving our sewerage system, but lack of funds will restrict us to absolutely necessary work. Last year we laid about 200 feet of 24 inch sewer and 180 feet of 18 inch. The 24 inch took the open brook from Brown's Corner to the river, and the 18 inch the open brook from under the Frank Wright building on Main Street to the river. These were open filthy brooks, carrying all of the sewerage from Munroe and High Streets and beyond, and passed under two dwelling houses. The conditions when the water was low can be better imagined than describ-They were an ever threatening menace to the ed. health and well being of the Community, besides being an eyesore to all who viewed and a discomfort to all who smelled them.

Sewer pipe of this size is costly and of course more costly to lay than the smaller sizes. This work cost nearly one thousand dollars, but it abated an intolerable nuisance.

Our fire department is in excellent condition, well equipped with modern apparatus and is giving efficient service. It will be necessary to purchase a supply of new hose this year in order to keep up its efficiency.

Last year we purchased a Chemical Motor Truck for Hose No. 1 on deferred payments. Fifteen hundred dollars and interest will be due on the same August 1st of this year, for which appropriation must be made.

The cost of the Poor Department was unusually

heavy the past year, largely on account of out of town bills for persons having pauper settlement in Calais, one of which alone amounted to more than \$500.00. The result was a heavy overdraft in this Department that must be provided for in this year's appropriations.

The City has been very fortunate in having had for a number of years the services of a very conscientious, efficient Auditor. The City's books are in perfect condition, but Mr. Bradish is getting along in years, and he himself has urged me to take the action I now recommend, and that is that we put ourselves in line with other progressive cities in our bookkeeping department by adopting the State Uniform system of town accounting. I understand that the State Auditor will, at our request, send a competent man from his department to install the system, and I believe it would be wise for this to be done now while we have the services of Mr. Bradish, who will welcome the opportunity of co-operating with the State in the matter. The cost will not be large.

I have no special recommendations to make in regard to other city departments. Their needs and accomplishments will be set forth in the reports of the various heads of departments.

Under the will of the late D. K. Chase, the Chase Poor Fund is to be administered by the City Council. It seems to me that the manner in which it has heretofore been administered is cumbersome and entails unnecessary work upon the City Treasurer and Auditor. As now administered, two separate bank accounts are kept all that is necessary is one. Would it not be when simpler that, if instead of the City Council drawing a check in favor of the City Treasurer for the amount voted to be distributed to beneficiaries, and him depositing this check in a separate account and drawing his checks against this second account in favor of the different beneficiaries, that the City Council should simply pass the order directing the Treasurer to pay the amounts voted to each of the beneficiaries, he would then draw his checks against the one account and eliminate the other account entirely. I recommend the consideration of this matter by the Finance and Poor Committees.

In order to secure aid from the State in continuing

the paving of Main Street, and also to secure from the aid for Third Class Highways, being State. on the Charthe work commenced last year lotte it will be necessary for us to road. appropriations today, as thev make our highway must be reported to the State Highway Commission by the 15th of this month. I recommend the following appropriations for highway and sidewalks. These appropriations can be increased later when we make our regular appropriations.

For	Highways, \$	14,000.00
For	Sidewalks,	2,000.00
For	State Aid Highway,	2,000.00
For	overdraft of 1924 on Highways,	
	State Highway and Center Pier,	
	International Bridge,	4,338.19

Total,

\$22,338.19

The City owes the Cemetery Trust funds eleven hundred dollars which it used many years ago, and on which it has been paying interest to the Trust fund. The City had the legal right to use this money under the laws of the State, but I consider it unwise to do so. Trust funds should be considered sacred and kept entirely separate from other city funds, and used only for the purpose for which they were intrusted to the City.

I, therefore, recommend an appropriation of eleven hundred dollars to repay this amount due. Our entire Cemetery trust funds amounting to \$5,150.00 will then be intact and each separate fund invested separately. I include this eleven hundred dollars in the following recommendations.

The State Legislature at this year's session appropriated the sum of \$50,000.00 for advertising Maine, and the Governor asks all towns and cities to aid in the publicity campaign by appropriating whatever sum can be afforded to supplement this appropriation. Many cities and towns have already appropriated various amounts to aid in the campaign.

I wrote the Committee in charge that while I had no authority to promise anything, that I would recommend an appropriation. You will find the amount I deem sufficient for us to appropriate among the appropriations I recommend.

I recommend further appropriations to be made later as follows:

Abatements,	\$2,000.00
Anti-Tuberculosis Society,	50.00
Calais City Band for Concer	rts, 100.00
Cemetery, (
Cemetery, (

For Compulsory Education and	Cen-		
sus,	150.00		
For Repairs,	1,500.00		

\$36,100.00

Total Appropriations recommended,

\$118,298.19

On the basis of the foregoing recommendations, if the City's valuation is up to what it was last year, and there is not too great increase in State and County taxes, some reduction can be made in the rate of taxation from last year's rate.

During the past year we reduced the floating debt of the City \$10,350.00, and also reduced the net overdrafts of the various city departments \$10,354,00, making a net gain in the city's finances of \$20,704.00, and we should be able to make a further gain this coming year, and leave the City's finances in a very fair condition when we relinquish office at the close of the year. Calais, Maine, April 13th, 1925.

WILLIAM J. FOWLER, Mayor.

FIRE DEPARTMENT

CHIEF ENGINEER'S REPORT

To the Honorable Mayor and Board of Aldermen:

Gentlemen: As Chief Engineer of the Fire Department I herewith present my report for the fiscal year ending March 31st, 1925.

During the year the Department has responded to cne hundred and thirty-six box alarms and twenty-two still alarms.

> Hose No. 1 answering 84 box and 19 still. Hose No. 2 answering 52 box and 3 still.

We have twenty-seven hundred feet of hose at Church Street house and nineteen hundred feet at Boardman Street house.

During the year an American La France Fire Truck with chemical equipment has been added to the Fire Apparatus which has greatly increased the efficiency of the department.

Yours truly,

CHARLES V. GILLIS

CEMETERY, CALAIS

To the Hon. Mayor and Board of Aldermen:

Gentlemen: I herewith submit my report as super intendent of Calais Cemetery for the past year. A large number of new lots were built and many old ones rebuilt and improved at the expense of the owners. The amount received for this work is included in the Auditor's Statemetn below. In addition a large amount of work done the expense of the was at City, straightening, grading and cleaning walks removing dead and and avenues. Also unsightly trees, old ragged hedges and underbrush. All of which has improved the appearance of the cemetery very markedly. These improvements added to the new entrance gates seem to meet the approval of all who have recently visited the cemetery.

Following is the list of interments for the year ending March 31, 1925.

STREET COMMISSIONER'S REPORT

To the Mayor and Aldermen:

٦

Gentlemen: I herewith submit my report of operations of my department for the past year.

During the year about the usual amount of ditching and repair work was done on the various streets.

The State Aid work on Main Street was continued and finished from the Post Office to Union Street, with concrete gutters on both sides of the street. Next year this work should be continued and completed to the International Bridge, which will give us a continued bituminous paved street from the International Bridge to below Calais Avenue. The cost of this State Aid work was \$5023.00, of which the State paid \$1532.83, and the City \$3490.17. The traveled part of the street was widened about six feet at the turn in front of the James Hill house, and the Electric Railway Co. moved their track, making a better curve, both of which aided in great improvement to the appearance and usefulness of the street at this formerly dangerous point.

Very little bridge or sidewalk repairing was done. Considerable sidewalk work should be done this present year.

The principal sewer work done was to lay about 200 feet of 24 inch pipe from Main Street at Brown's Corner to the river and 180 feet of 18 inch pipe from Main Street from under the Wright building to connect with the above 24 inch pipe. These take the sewerage that formerly flowed in open brooks, and greatly improve conditions in that section.

George B. Bates, Te	erm expires,	1928

ACADEMY BOARD

1.

Ashley St. Clair, Term expires,	1926
Frank N. Beckett, Term expires,	1926
W. E. Mann, Term expires,	1926

Regular meetings of the Board are held on the first Monday of each month at 7.30 P. M., Room 4, City Building.

W. H. PHINNEY, Superintendent of Schools.

Office Hours: 4.00-5.00 P. M.: Monday and Friday; 9.00-11.00 A. M., Saturday, except vacation

At Woodland Tuesday and Thursday of each week.

SCHOOL DEPARTMENT

To the Superintending School Committee and Citizens of the City of Calais:

Ladies and Gentlemen:

I have the honor to submit herewith for your consideration the annual report of the conditions and progress of the public schools of the City of Calais.

The school census taken April 1, 1925, showed a total of one thousand nine hundred seventy-five persons between the ages of five and twenty-one. These figures show a slight decrease from last year. Of the above number one thousand one hundred forty-eight are enrolled in the public schools, one hundred forty-four in the private schools of the City.

Our Commissioner of Education in his bi-annual report has two paragraphs devoted to the cost of education and how we spend our incomes that seem worthy of reproduction in this report.

The Cost of Education

"Recently, the president of one of our most powerful foundations said that the people are bound to rebel against the enormous cost of education. It is true that the high school is proportionately the expensive end of public education. The average cost of elementary schools in Maine is \$38.46 while in the high school it is \$70.54 for the year 1923 based on enrollment; and based on attendance it is \$49.49 and \$81.23 respectively. Teachers are some way required to spend more time and money on their preparation for high school teaching and, consequently, have a higher investment in their profession, a larger capital outlay, as we may say. Salaries are higher; text books, supplies and equipment are more expensive. According to last year's costs, it requires \$817,00 to educate a boy or girl from the primary school to graduation from high school. If all of the 768,000 citizens of Maine paid an equal amount for education each of the 365 days in the year, they would pay $2\frac{1}{2}$ cents per capita per day. If we spent our per capita share, we spent in 1922 as much for cigarettes as for education in Maine, as much also for cosmetics."

74

How We Spend Our Income

"It may be of interest to know just how we in the United States spend our income, counting all expenditures, personal, state and national. It would seem especially pertinent at this time when we are demanding a lower tax level. About the first place some think of cutting is in school appropriations. I am glad the people of Maine are still holding up; they deserve much credit. The following figures are taken from the American Digest and tell the whole story.

Church ³/₄ per cent; Schools, 1¹/₂ per cent; Government, 4¹/₂ per cent; Crime, 8¹/₄ per cent; Investment, 11 per cent; Wastes, 14 per cent; Living Costs, 24¹/₂ per cent; Miscellaneous 13¹/₂per cent.

"The Public Education Association of New York expense—a step far beyond the alchemists dream of transmuting baser metals into gold, as it transmutes gold into something far more precious—the spiritual driving force of a progressive civilization."

says: "True education is an investment rather than an Few changes have been made during the past year. The platoon plan has been introduced at the Milltown School, not because of an increase in enrollment but that the pupils from that part of the City might have the benefits of the enriched curriculum possible under this plan. As a whole the plan has been very satisfactory and should be continued.

At the beginning of the school year the Brook School and the Red Beach High School were closed and the pupils have been conveyed by motor bus to the Platoon and Academy buildings. The work has been very capably done; pupils from those sections have lost but two days during the year. These pupils now have the same educational advantages as those living in the city. Through the assistance of the local chapter of the Red Cross warm lunches are served at noon, the lunch period being carefully supervised by the teachers in turn.

The work of the school nurse helps to strengthen the physical education program, and with the efforts of Dr. K. J. Thomas, one of our local dentists, in helping to establish a dental clinic at the platoon school our pupils are perhaps better cared for than the majority of those in this part of the state.

The industrial courses continue to assist in holding boys and girls in school beyond the compulsory school age while giving them excellent training in useful work about the home.

A new fireproof basement has been added to the Academy building making that plant as nearly fireproof as a wooden structure can well be. This year chemical toilets will be installed at the Red Beach building, minor repairs and painting will make a first class school plant for that part of the city.

It is the plan of the present board to remodel the South Street School as soon as sufficient funds are available, since the Sand Bank School can then be discontinued: all school property will then be in the best of condition. With the completion of this plan of consolidation the cost of upkeep will be much less and the general work of the schools much better.

All thoughtful men 'are troubled at the present time, concerning the fact that a large proportion of our boys and girls are growing to manhood and womanhood without any religious influence of instruction. The leaders of our churches sense this condition most keenly and many serious minded laymen are in sympathy with their efforts to alleviate this condition.

A number of plans have been proposed; one that seems the most feasible allows all pupils to attend the church of their choice one period each week for religious instruction under the direction of the church leaders, school credit being given for this work. Religious teaching, however as well as moral teaching must become a part of every child's life if we expect them to be truly fortified against the temptations to which they are constantly subjected.

In conclusion, I wish to thank the members of the board for their helpful assistance and advice, and also express my gratitude to the citizens of this city for their support and co-operation.

Respectfully submitted,

W. H. PHINNEY, Supt. of Schools.

Calais Academy, May 22, 1925.

Mr. W. H. Phinney. Supt, of Schools, Calais, Maine.

Dear Mr. Phinney: I hereby submit my fifth annual report as principal of Calais Academy.

Registration

Senior, Junior, Sophomore, Freshmen,	32 29	Boys Boys Boys Boys	33 59 38 40	Girls Girls Girls Girls	Total 56 Total 91 Total 67 Total 77
Total,	121	Boys	170	Girls	Total 291

Attendance

The attendance during the first term was gratifying, in that we had over 97 per cent. of the total registration as a daily average. The weather and illness caused a slight falling off during the winter term, but at that we had an average attendance of over 90 per cent. It is too early to make any statement about the spring term attendance, but it is holding its own.

Teachers

1

We have had practically the same staff as that of last year, and no changes have been necessary in 1924-25.

Courses

In response to the present-day tenet that we teach the pupil, not the subject, we try to adapt the course of study to the individual, and therefore our courses are not set, or cut-and-dried. Our college preparatory course aim, however, to fit graduates for college entrance, and the business course certainly prepares pupils for office positions. The pupils in the typewriting department have earned many certificates and pins for their expert typewriting; one Senior receiving a special gold pin. There is also a general, or English, course for pupils who_wish neither college nor business. It/ might be well here to state that the results of our work in vocational guidance are to be seen in the fact that 95 per cent. of the Seniors know what they wish to train for in the way of vocation.

Library

One of our aims this year has been the acquiring of a larger school library. We have added to our store of books, dictionaries, biographies, English classics, books on science have been bought and a book case to hold the increase. This wealth in books has been made possible by a fund granted from the Academy, and by gifts, particularly from Mr. F. W. Johnson, a former principal.

Extra-Curricular Activities

Under the heading of outside interests, athletics should come first. We have added no new equipment, and no new games, to our list, but we have an athletic association practically free from debt, and a spirit of fair play and "play-the-game" that cannot be bettered anywhere in the state. The Academy Orchestra needs no eulogy here. It stands for real energy and real achievement. The dramatics under the lead of Miss Bates, are a needed factor in our school life. They help us financially, give the pupils real training, and are invauable in inculcating the lesson of give-and-take; let the best man win. With money earned by dramatics we have bought a new curtain for the gymnasium, and helped pay for the balcony floor. The French play has become a necessary feature for the year. We are justly proud of this example of the work in modern language. Some of our pupils have had excellent training in amateur journalism under the leadership of Mr. Murray. They have prepared articles of school interest for the local paper, and have edited their own magazine, "The Academy Broadcast."

Needs

As always, we could do with more equipment in our laboratories. It is hard to reach the required standard in teaching science without modern equipment. We can make use of more reference material, as the pupils are becoming adept and independent in finding supplementary information. We really need a new school building, but can teach, as we have taught, in this one. It is not adequate for present-day needs, but if teachers and pupils have the right spirit, as they have here, they can instruct and learn, anywhere they may be.

The year just passing will, we earnestly hope, be as productive of good results in the lives of our pupils as it has been harmonious and enjoyable.

Respectfully submitted,

EMILY P. ROCKWOOD

PLATOON SCHOOL

I hereby submit my second report of the year's work at the Platoon School.

Registration

Grade		18	Boys	14	Girls
Grade	2,	18	Boys	14	Girls
Grade	3,	13	Boys	25	Girls
Grade	4,	25	Boys	23	Girls
Grade	5,	23	Boys	25	Girls
Grade	6,	29	Boys	38	Girls
Grade	7,	29	Boys	38	Girls
Grade	8,	,35	Boys	27	Girls
Total,		190	Boys	208	Girls

Attendance

While the attendance is not perfect, we have very few habitual truants, and they, with parental help, would cease to be truants, we believe. The teachers showed much-needed vigilance during the scarlet fever scare last winter, and by their discovery of first symptoms, and prompt action, really prevented us from having an epidemic.

Teachers

We have had the same staff as that of last, with the exception of Miss Emma Foley, who filled the place of Miss Florence Boone, absent for a year; Miss Doreen Gregory, back after a year's leave of absence; and Miss Madeline McEwen, who was hired after the year's beginning to take care of an overflow in the fourth and fifth grades. The teachers have given of their best to their work, and have striven for self improvement, in the way of professional reading and study.

We have had most interesting meetings in the discussion of problems in teaching.

The Lunch Hour

Since we have, in the winter, about fifty pupils who bring their lunch to school, we welcomed the suggestion from the Red Cross that that organization should finance the serving of a hot dish, each noon. Accordingly, with the aid of the Domestic Science Department, this idea received fulfillment, to the satisfaction of the pupils and every one interested. We take this occasion to voice our gratification to Mrs. Gertrude McAllister, of the Calais Chapter of the Red Cross, to whom we owe this hot lunch idea.

Health Program

We have been, as a school, much benefited by the skilful work of Miss Gregory, District Nurse. She gives of herself unsparingly, to improve the physical standard of our school. She has given each child careful examination, and has bestowed special attention upon those found to be underweight, or to be needing glasses or what not. Health posters have been sent to the different rooms, health talks given by both teachers and pupils, two or three children have received free eye examination, and glasses, through Miss Gregory's help.

Special Programs

The teachers have been unfailing in regard to programs for special days, and civic and social instruction. In the two study rooms, programs have been given for Columbus Day, Thanksgiving Day, Christmas, Lincoln's and Washington's Birthday, Safety Week, Health Week, etc. In all the rooms, the children had Christmas trees with exercises, have had health talks and current event

items, have made health and safety posters, and have had elections, with ballots. The English classes have also observed Good English week and Good Book week. The longer school day makes possible this special work, which is of great benefit. The pupils do not slight their regular work for this as they stand well in their classes in other schools, whenever they are sent elsewhere.

The platoon plan is no longer an experiment, but is proving itself an advantage. We have taken care of almost five hundred pupils in our building, and have given them the regular state course of study, and much besides. Though we have more visitors now then we used to have under the old regime, we wish that more citizens would spend an hour now and then here on Academy hill, to see for themselves the progress that the children are making.

Respectfully submitted,

E. P. ROCKWOOD, Principal.

To the Superintendent:

I wish to submit this report of the work done in the Gymnasium during the past year the first full year the Gym has been open. The work carried on was of necessity, much like that of the previous year, though covered more ground owing to the results of last year's training.

The program for a class period consisted of three parts. First, a drill period, consisting of marching—in line and in file—double time, facings to the rear, etc. Second, calisthenics period, consisting of formal gymnastics or setting up exercises and "imitation exercises," where the class goes through the motions of some form of play or work, as chopping a tree, high jump in place, etc. Wands were also used in this period. Third was a play period. In the lower grades as many games as possible were played where the whole class could play together, but in the upper grades this plan would not work so the boys and girls took turns using the floor.

During the exercise period some time was spent on good standing and sitting positions in an attempt to improve the posture of the scholars. The last exercise usually was a toe-hop, using steps or exercises used in some forms of dancing, and these formed the beginning of the dance "Irish Lilt," now being learned by grades 8 and 9.

In grades 2 and 3, the same routine was followed but the marching was simpler and of shorter duration, while folk dancing and singing games were added to the usual group games.

On Wednesday of each week the boys of Grades 4 to 9 had high jumping, while those especially interested were allowed to practice this during other play periods, usually in the balcony. Some jumping was done by the girls of grades 4, 5 and 6, but this was not compulsory. At this time of year, the boys are having pole vaulting, and broad jumping is to be started soon.

During the winter, a basket ball league was carried on for the boys of grades 6, 7, 8 and 9 and grade 8 at Milltown. There was no girls' league owing to their lack of interest last year. The 9B team won the championship, winning every game in the series. The girls of grades 8 and 9 did play some games, though, principally with the High School teams, and made a good showing against their older and larger opponents. They also played a few games with Woodland teams.

A similar league is being carried on in base ball and it is hoped this will revive some of the interest in this sport so lacking in these grades.

Two mats were added to the equipment this year allowing for tumbling, wrestling and adding much safety to the high jump. The thing most needed for next year is a ceiling, making it possible to heat the building properly. During the winter term no work of any extent could be done as it was too cold to allow the pupils to remove their coats. With this remedied, much more and better work could be done during this session which is really best for Gym work.

Respectfully submitted,

CHESTER T. LOVE.

Mr. W. H. Phinney, Supt. of Schools :

In accordance with your request, I hereby submit my third annual report of the Milltown School.

The Platoon System was introduced at the beginning of the fall term. This necessitated some changes being made in order to accommodate all pupils and house them properly. This was easily done and gives us the extra room we needed with little or no inconvenience to teachers or pupils.

The advantages of the present system more than outweigh the few disadvantages. There is only one grade at a time in each of the home rooms which should make it much easier for the teacher and a help to each pupil. The success of this kind of school depends to a great extent upon the cooperation of all teachers. I feel that much progress has been made, particularly during the latter part of the year, and next year much better work should be done. It takes some time to start anything new right, and one year's experience should help greatly. Add to this the careful study of books and periodicals on this particular kind of school.

An urgent request has been made to all parents to visit school, and see for themselves the work that is being done. So far few parents have done this, although some have shown interest enough to do so. A number of parent-teacher's meetings have been held during the year At one of these meetings we were very fortunate in having Miss Hale, a representative from the State Department, with us. Her address given before one hundred and fifty parents and others who were interested, did much toward interesting many in present day school methods.

The public as a whole, are slow in realizing that the day of "The Little Red School House" is a thing of the past, and that people of today are living in a new environment. If their children are to have an equal chance with those from larger and up-to-date schools, they must be sent out into the world without the stamp of decades ago upon them.

Enrollment

At the beginning of the fall term we enrolled the following numbers.

Grade 1,	42
Grade 2,	31
Grade 3,	32
Grade 4,	36
Grade 5,	35
Grade 6,	26
Grade 7,	22
Grade 8,	16
Total,	240

The average attendance has been much better than in past year, while we haven't had one-tenth as many cases of tardiness as usual. A decided decrease has also been shown in the number of dismissals.

The school has been benefited to a marked degree by the work of the school nurse, who has made frequent calls to the building in the interest of the health of the pupils. A decided improvement is noticeable among the pupls, who have tried to follow the health program. Each month every pupil is weighed, and a record of the weight and height of each pupil is posted where everyone can see it; one table for each grade. Much attention has been given throughout the year to the general health program by the special teachers. Parents should cooperate with the nurse in trying to better the health of their children. Many do not realize what harm bad teeth, throat, etc., may do to the health, in hindering the phyiscal development as well as the scholarship of the child. By working with the nurse and giving their attention to notices of defects which are sent them. the parent can do much to mprove the general health of the child.

Special attention has been given to the observance of Christmas, Armistice Day, Washington's Birthday, Lincoln's Birthday, Patriot's Day and Good Health Day. Exercises appropriate for the special day have been given by the pupils of the school.

The interest in athletics has run high during the past year as in former years, and the school has been

represented by some good teams. Basket Ball and Base Ball are the leading sports. During the past winter, interclass games were played, grades 4 to 8 participating. Grade 8 easily won from all others, although some good material in the lower grades was given a chance on the regular teams. By starting teams young, a good bunch is turned out every year who will go into higher schools able to compete with any others for positions on athletic teams. This is a decided advantage to the pupil, in comparison with some other schools that fail to give the youngster an early start.

The eighth grade basket ball team represented the school in the Grammar School League where games were played every Saturday P. M. at the Gymnasium. Some big boys were included in this team that defeated every opponent by large scores, a total of 304 points being scored in eight games, against 89 for the opposition.

In base ball we were handicapped by not having a proper ground to play on, although our school grounds have been made into a base ball field, and other portions of it were used for the lower grades. Much interest has been shown in the out-of-door sports and the playground has been made as conventional as possible for all pupils. The boys show a great desire to play the game and we manage to bring out a running team every season. The lower grades also have an opportunity to play base ball and every pleasant play period during the season, grades as low as the fourth are hustling for the material and the chance to use it.

In conclusion I wish to thank the Superintendent and members of the School Board for the help that they have given during the past year. By means of their support some things have been accomplished which otherwise could not have been successful. I wish to acknowledge also any act of parents or citizens that has been for the betterment of the school system.

Respectfully submitted,

E. M. CARTER, Principal.

Number teachers employed,	42
Elementary teachers,	27
Secondary teachers,	11
Special teachers.	4
Number school buildings in active use,	7
Number school buildings in good condition,	4
Number school conveyances furnished.	3

NO SCHOOL SIGNALS

The no school signal will be used only in extreme cases, where there can be no doubt about its advisability. On stormy mornings parents are urged to use their own judgment about sending their children to school, as some streets may be nearly impassable while others are clear.

.

AUDITOR'S REPORT

To the Honorable Mayor and Board of Aldermen;

Gentlemen: I respectfully submit the foregoing report showing the Receipts from all sources and the Expenditures for the fiscal year ending March 31, 1925 as given in the Treasurer's report. The accounts of the 'several departments are shown under their proper heads. Bills and vouchers are on file in the office of the City 'Clerk.

M. BRADISH, Auditor.
