REPORT OF PUBLIC HEALTH NURSE

Maine Department of Health and Welfare
DIVISION OF PUBLIC HEALTH NURSING,
Bureau of Health

Annual Report of Public Health Nursing Service in
Carmel for the year 1967

The effectiveness of a community health service depends to a large extent on the interest in and the understanding of the public health program by all citizens of that community. It is essential that they appreciate the value of that service. From a personal standpoint they should be interested in the program because the individual's physical, emotional and economic needs affect other citizens, and because the cost of this service is directly or indirectly borne by the individual taxpayers of the community.

The public health nurse maintains a program of guidance and education by teaching health rules and assisting in the prevention of disease and deformity, thus lessening human suffering.

A summary of the public health nursing service in your community for the past year follows:

CHILD HEALTH CONFERENCE PROGRAM

Attendance	46
Number Children Examined by Physician	29
Number Immunized:	
Smallpox	5
Measles	5
Diphtheria, Whooping Cough, Tetanus	13
Poliomyelitis	7

IMMUNIZATION PROGRAM

Measles Vaccine 75

Plans are made for tuberculin testing and immunizations to be done the first of 1968.

There are many services given by your public health nurse that are not shown in the above statistical tabulation. These services include health guidance through home visits to individuals and families in their homes and in the schools.

Individuals have had clinic services of the Department of Health and Welfare when they were referred by their family physician.

Your public health nurse thanks those volunteers assisting her in the various health programs.

Respectfully submitted,

GEORGINA J. PATTERSON
Public Health Nurse
