SCHOOL REPORT

REPORT OF SUPERINTENDENT

To the Superintending School Committee and Citizens of
the Town of Sorrento:

I hereby make my third annual report of the condition and progress of our schools.

One hundred years ago Horace Mann laid the foundations of American education by establishing the public school. Looking back over the century we can see that more progress was made during this short period than during all the years before. The eyes of the public have been opened to the need of educating future citizens, and we now believe that the future of our country depends upon good schools. Today, in the midst of this rapidly changing world, the school must not only teach the fundamental skills, but since it carries such a burden of responsibility it must develop personality and build character as well. The school must teach health, industry, thrift, courtesy, sportsmanship and self-reliance as attributes of a type of citizenship which will insure a successful future. The fact that character has to be caught as well as taught places a grave and splendid responsibility upon our teachers. It offers a sort of challenge which I believe our teachers of this year and of recent years have met with spirit and true devotion.

As formerly, we are using the Stanford Achievement Test for the purpose of judging pupil progress and a more intelligent grade promotion. Even though all pupils cannot reach the requirements of their grade, progress on the whole is steady and satisfactory. In a good number of cases children are doing exceptionally well.

The rather intensive spelling program of last year is being continued, with higher weekly averages than ever. By this method pupils are able to learn words which they need in their respective grades, to increase their vocabularies and break the untidy habit of erasing and rewriting.

An effort has been made by teachers and superintendent to provide suitable library books with the hope that a greater in-

terest in reading may be aroused. Our teachers make a real effort to use these books to good advantage and some pupils are getting a reading habit which they did not have before.

We have in our schools a well-balanced health and safety program carefully executed by teachers and nurse which has its culmination in the Annual Field Day, which includes the entire school district and serves not only as a day of fun for children but also promotes good health and is a strong motivating force behind the entire school program. As a crowning feature of the day the Seven-Point Circle tells in an impressive manner the progress which we are making in health. Seven-pointers increased 20 per cent. last year, from 52 per cent. to 72 per cent. of the entire enrollment. Nurses, teachers, and many parents and friends are trying to raise the standard still higher to the end that every child can be physically fit. We solicit your further cooperation and hope that you will find it convenient to attend our next Field Day.

Respectfully submitted,

MERLE R. KEYES,

Superintendent of Schools.

NURSING REPORT

FLANDER'S BAY NURSING SERVICE

To the Citizens and Town Officers of Sorrento, I submit my report from January 1, to December 31, 1937:

In March and April, during the Cancer Prevention and Early Diagnosis Campaigns, many pamphlets on these subjects were placed in public places and homes. Posters were also exhibited.

The Sorrento school children joined with the other towns in Flanders Bay for the annual Field Day, and all seven-point children took part in the exercises.

In August a baby and pre-school clinic was held in Winter Harbor, to which all mothers were invited. Dr. Shorey, a summer doctor from the Point, was the examining physician. The mothers received a great deal of helpful advice.

The annual school inspection was completed in September, and notices of defects found were sent to the parents. A full report of findings from the inspection was left with each classroom teacher. Here are the results of the health inspections: Number of pupils inspected, 27; number with defective teeth, 17; number with defective throat, 3; number with skin infections, 4; number 10% or more underweight, 6; number with defective vision, 1. Since school opened in September, two corrections are reported—one for tonsil and adenoid operation and one for correction of vision.

Five special classroom inspections have been given for infection of the hair. Through good cooperation of parents, this condition was quickly cared for. Thirty-eight visits have been made to the school this year.

During the year, 178 instructive and investigative visits were made to babies, pre-school and school children, pre-natal patients, tuberculosis contacts. One delivery was attended by nurse and eight patients were taken to clinic, dentist and hospital.

In closing this brief report, thanks is extended to all the citizens for their help.

Respectfully submitted,
CLYE H. RICKER, R. N.
