MAYOR'S INAUGURAL ADDRESS

GENTLEMEN OF THE COUNCIL :

Together, as public servants, we are charged with the conduct of the business of our municipality. This task will require much thought and careful study.

FINANCES

On April 1, 1930, bonds in the amount of \$55,000 issued March 22, 1910, running for 20 years became due. These bonds were issued to provide for the construction of what is now called the Geo. F. Henley School. I am of the opinion that, by careful planning, you can so regulate your appropriation bill to provide for payment of this bond issue. I am opposed to refinancing these maturing bonds by another bond issue.

SCHOOLS

In 1919 our Appropriation for Schools was \$38,850. In 1929 it was \$137,128. This 10-year increase has been made necessary by increase in number of school pupils and improved standards of teaching combined with better facilities. It is obvious that new school buildings are needed to provide for the growth of the school population. The municipal year just completed saw the occupancy by the school children of the James Otis Kaler School. I trust that I am not hoping for too much if I expect the members of the Council to at least purchase a school lot and commence construction, in that locality where conditions require the erection of a new schoolhouse.

ROAD PROGRAM

I urge that your Appropriation for Roads be expended so far as is possible in Permanent Road Construction. Permanent Roads eliminate the costly item of maintenance. Now that the widening and repaving of Ocean Street has been completed, more attention should be given to the improvement of the lesser travelled roads.

The State Highway Commission has approved the plan for the construction of the Anthoine Creek Bridge on Broadway. Through arrangement with the State Highway Commission and the County Commissioners, South Portland has to pay only about 45% of the cost of this bridge. I understand that construction of this public improvement is to commence just as soon as weather conditions permit.

I think that the results obtained by the Snow Removal Appropriation last year justify the Council in continuing to include this item separately upon the Appropriation Bill.

SINKING FUND

As stated by me last year, I suggest that you give consideration to whether or not it would be advisable to set up by appropriation a Sinking Fund, to be used only for retirement of maturing bond issues.

POLICE AND FIRE DEPARTMENTS

The permanent Police and Fire Departments are now upon a stable basis. The only new matter for consideration in the Fire Department will be the question of new equipment of the volunteer companies.

Many matters will come up during this municipal year that will require action by the Council. I am sure that you will give proper consideration to every pending matter, having in mind at all times the fact that we all desire to conclude the year's business with an unexpended balance in the City Treasury.

The conduct of the City's affairs is now in your charge and I have confidence that the municipal business will be transacted by you upon efficient and economical lines.

Gentlemen of the Council, I thank you for your attention.

E. PERLEY BULLOCK,

Mayor.

CITY OF SOUTH PORTLAND, MAINE

IN COUNCIL.

January 9, 1931.

Ordered, That the Auditor and Committee of Finance and Claims be and are hereby instructed to make the Thirty-first Annual Report of the receipts and expenditures of the City of South Portland and that a combined school and annual city report shall be made in place of two separate reports for the financial year ending January 31, 1930, and that 1,600 copies of the same be printed for the use of the city and for distribution, and reports of the City Officers returned to the City Council at the close of the financial year, be appended thereto.

GEORGE H. HINCKLEY.

A true copy of order passed January 9, 1931.

ATTEST:

WOODBURY P. HARRINGTON,
City Clerk.

AUDITOR'S NOTICE

AUDITOR'S OFFICE, CITY OFFICES,
CITY OF SOUTH PORTLAND, ME.

All bills must be presented for payment on or before the first Monday prior to the first Wednesday of each month to insure payment during that month, and must specify what the article or articles were for, and for what department, and when for labor, where it was performed, with proper dates.

Items charged to different appropriations or departments must be made on separate bills.

The Auditor desires parties, whose claims against the City have been allowed, to be prompt in their calls to receive payment, and when bills have been once presented, ascertain if allowed before duplicating the amount on a subsequent bill, as is sometimes done.

PAY DAYS

In all departments (except teachers and janitors) the Saturday following the second Wednesday in each month. For teachers and janitors, every second Friday following the opening of the school year.

HERBERT L. CRORY,
City Auditor.

RECEIPTS AND EXPENDITURES

*To the Honorable Mayor and Board of Aldermen of the City of
South Portland, Maine:*

GENTLEMEN: I submit the thirty-second annual report of the City of South Portland, Maine, for the fiscal year ending January 31, 1931.

The year of 1930 just past was a hard year to face in finances, as our fiscal year ends January 31. We had within the year the following bonds to pay:

Broadway Schoolhouse bond issue of \$55,000.00, due April 1, 1930, was paid, rather than reissuing for another long period. This was taken care of by appropriating \$25,000.00 direct this year, with the thought in mind to finance the balance of \$30,000.00 through appropriation in 1931. The balance of \$30,000.00 for the present is a part of our floating note account.

We also had \$10,000.00 of bonds to pay January 1, 1931. This amount was taken care of through the receipts of prior years collections.

We will be facing within the fiscal year 1931 \$40,000.00 city debt, which should be taken care of. I feel that \$10,000.00 of this amount, which becomes due January 1, 1932, can be taken care of through prior years collections this year.

I feel, for one, that it is very excellent business to meet our city's debt when it becomes due, rather than reissuing again for a long period.

Respectfully submitted,

HERBERT L. CRORY, *Auditor.*

AUDITOR'S REPORT

To the Honorable Mayor and Board of Aldermen:

I hereby certify that I have examined the accounts of the City Treasurer and find them to be correct, and that the foregoing statement of the receipts and expenditures of the City of South Portland for the financial year ending January 31, 1931, is correct.

HERBERT L. CRORY, *Auditor*.

South Portland, Maine, February 11, 1931.

REPORT OF COLLECTOR OF AUTOMOBILE EXCISE TAX

*To the Honorable Mayor and Board of Aldermen of the City of
South Portland:*

GENTLEMEN: During the period from February 1, 1930, to December 31, 1930, there have been issued from this office 2,185 receipts for excise taxes of 1930 amounting to \$15,670.74.

During the period from September 1, 1930, to January 31, 1931, there have been issued from this office 1,836 receipts for excise taxes of 1931 amounting to \$16,485.00.

The total collections for the fiscal year of 1930 for excise taxes of 1930 and 1931 amounts to \$32,155.74, which exceeds estimated taxes allowed for in the appropriation bill by \$5,655.74.

As your collector of excise tax is also the city treasurer, your Treasurer wishes to take this opportunity to call the attention of the City Fathers to the fact that the collection of the excise tax has added considerably to the work of the office, and with the present personnel, has made it necessary, to a certain extent, to put aside the routine work of collecting delinquent taxes of prior years. Your Treasurer believes that the time has come when a male assistant should be employed, who should be a qualified constable, so that he could be employed during rush periods in the office and at other times be used on outside investigation and collection of delinquent poll and personal taxes.

Respectfully submitted,

WALTER E. BROWN,

Collector of Automobile Excise Tax.

STATE OF MAINE

AN ACT TO PROVIDE EQUITABLE AND UNIFORM TAXATION FOR MOTOR VEHICLES

Chapter nine of the revised statutes is hereby amended by adding thereto sections seventy-six to eighty-five, both inclusive, as follows:

"Sec. 76. An excise shall be levied annually as herein provided with respect to each calendar year for the privilege of operating upon the

public ways, each motor vehicle to be so operated, subject to the provisions of section eighty-two, as follows: a sum equal to twenty-three mills on each dollar of the maker's list price for the first or current year of model, sixteen and one-half mills for the second year, twelve and one-half mills for the third year, nine mills for the fourth year, five and one-half mills for the fifth year, and three mills for the sixth and succeeding years; provided, however, that persons registering under the provisions of sections thirty-four and seventy-five of chapter two hundred and eleven of the public laws of nineteen hundred and twenty-one, the state and political sub-divisions thereof, bona fide dealers or manufacturers of motor vehicles, which motor vehicles are solely for the purpose of demonstration and sale and which constitute stock in trade, telephone and telegraph companies subject to the excise tax set forth in chapter nine of the revised statutes in sections thirty-six to forty-two, express companies subject to the excise tax as set forth in chapter nine of the revised statutes in sections forty-three to forty-six, both inclusive, railroad companies subject to the excise tax set forth in chapter nine of the revised statutes, sections twenty-five to thirty-five, both inclusive, excepting, however, motor busses used for the transportation of passengers for hire, shall not be subject to the excise herein provided.

Sec. 77. Any automobile owner, who has paid the excise tax on his motor vehicle for the year to a city or town as herein provided, shall be exempt from further or other taxation on said motor vehicle for that year by said city or town.

Sec. 78. No motor vehicle owned or controlled by a resident of this state shall be registered under the provisions of chapter two hundred and eleven of the public laws of nineteen hundred and twenty-one and acts amendatory thereof and additional thereto until the owner or person controlling the same has paid the excise tax herein provided to the city or town wherein he resides.

Sec. 79. Any owner who has paid said excise tax for a motor vehicle the ownership of which is transferred, or which is subsequently totally lost by fire, theft or accident, in the same calendar year, shall be entitled to a credit to the amount of such tax towards an excise tax for another motor vehicle which may be required of him in the same calendar year. No portion of any excise tax once paid shall be repaid to any person; and from October first to December thirty-first such credit shall not exceed one-third of the amount of the original tax.

Sec. 80. Receipts for the payment of this excise tax shall be in the form prescribed by the secretary of state. They shall be issued in duplicate, and one copy shall be delivered to the secretary of state, at the time application is made for registration of the motor vehicle, and filed with the application.

Sec. 81. The collector of taxes of each city or town, or such other person as the city or town may designate, shall collect such excise tax

and issue to each person paying it, the receipt therefore prescribed in section eighty.

Sec. 82. The excise tax under the provisions of this chapter during the period beginning with September first and ending with December thirty-first shall be one-third of the sum named in section seventy-six.

Sec. 83. Each designated city official and treasurer of each town shall keep an account of the money received by him for said excise taxes, and deposit the same in the city or town treasury monthly. Failure so to deposit shall be cause for immediate removal from office. All moneys collected in accordance with the provisions of this act shall be apportioned between such town, city and any village corporation, sewer district, fire district or other public municipal corporation, in the same manner as the moneys now collected for taxes assessed on property located within such town or city.

Sec. 84. The collector of taxes of any adjacent town or the city treasurer of any adjacent city shall receive the excise tax and issue the receipt prescribed therefor under this chapter to persons residing in unorganized places in any county. Such fees shall be for the use of the town in which such tax is paid.

Sec. 85. Any person wilfully making any false statement to any person charged with the duty of receiving this tax and issuing the receipt therefor, when making statement for the purpose of the levy of said tax hereunder, shall be fined not more than twenty-five dollars."

(Effective July 13, 1929)

REPORT OF BUILDING INSPECTOR

February 1, 1931.

*To the Honorable Mayor and Board of Aldermen, City of
South Portland, Maine:*

SIRS: The undersigned herewith submits his report as Inspector of Buildings for the Municipal year, February 1, 1930, to January 31, 1931.

During this period the Inspector has issued 191 permits, fifteen of which have been commercial projects and have been referred to the Council for approval before issuing the same. These permits have included 65 dwellings, 65 garages, 15 commercial buildings, 40 alterations and 5 permits to demolish existing buildings.

The commercial buildings included two roadside camps, an addition to a blacksmith shop, one new and an addition to one commercial or public garage, one store, an office building and a storehouse at the Maine Steel Products Co., a rabbitry, a woodshed, an addition to service station, an office building remodeled at Bancroft & Martin's, and the remodeling of the second floor of Union Hall as National Guard quarters.

The approximate value of the work as estimated by the Inspector is as follows: Dwellings, \$280,000.00; private garages, etc., \$15,500.00; commercial buildings, \$14,500.00; and alterations totaling \$345,000.00.

In addition to the above named projects, at Turner's Island the Portland Terminal Company has completed the removal of the "Car Shops" and constructed there two coal unloading towers with wharfage, trackage, etc., and the Texas Oil Co. have the foundation well under way for the new location for the re-erection of the large oil tank whose foundation failed in its first location. Work has also commenced on the Lighthouse Depot Station near the Maine Steel Products Co.

The wooden buildings housing the Sawyer Street Garage and a pool room and the vacant four-family house at the corner of Dyer and Front have been demolished, thus ridding Ferry Vil-

lage section of two fire menaces, the first named having partially burned recently.

In the capacity as Fire Inspector, the Building Inspector has coöperated with the Chief of the Fire Department in the investigation of the cause of the fires in his absence and as he wished and commends sincerely the work of the Chief and his men in their check-up campaign against existing fire nuisances in the city.

Respectfully submitted,

OSCAR I. EMERSON,

Inspector of Buildings.

REPORT OF CITY ELECTRICIAN

To the Honorable Mayor and City Council:

GENTLEMEN: Herewith respectfully submitted is my report for the year of 1930 to Feb. 1, 1931:

ELECTRICAL INSPECTIONS

I have made four hundred and seventy-nine (479) visits of inspections and have issued two hundred and fifty-five (255) service permits and fifteen (15) temporary permits. The above permits were issued after rules of the National Board of Fire Underwriters were complied with.

FIRE ALARMS

There have been one hundred and fifteen (115) bell alarms and one hundred and seventy-six (176) still alarms.

LINE WORK

On account of the sleet storms of the winter of 1929-1930, it was necessary to rebuild the fire alarm lines throughout the city.

PUBLIC BUILDINGS

The work of this department has greatly increased in regard to the public school buildings, which have automatic heating systems. These systems require a large amount of time. There are always a large amount of repairs and additional electrical work in the public school buildings. The wiring in the City Home was found to be unsafe and is now being rewired. The Union Hall on Monroe Street has been completely rewired due to changes that have been made for the National Guard.

FIRE INSPECTIONS

In coöperation with Chief Charles O. Spear, Jr., a fireman from the Central Station has been appointed to locate fire hazards in buildings throughout the City. These inspections have located several buildings with defective wiring, which has been reported to me, and I have ordered the owners of these buildings to have them placed in a safe condition.

REMARKS

I would recommend the installation of an aerial cable from the Central Fire Station to Evans Street. With this cable we could separate the box and tapper circuits of wards six (6) and seven (7). At present there is only one box and one tapper circuit west of Ocean Street. With the aerial cable we could separate Rigby Fire Whistle from the box circuit, which would result in better service from both.

Respectfully submitted,

GEORGE H. LOWELL,
City Electrician.

REPORT OF HARBOR COMMISSIONERS

Portland, Maine, December 1, 1930.

To the Honorable Mayor and Board of Aldermen, City of South Portland, Maine:

HONORABLE SIRS: The Board of Harbor Commissioners submits their report for the year ending December 1, 1930, as follows:

PERMITS GRANTED

1929.

Dec. 3. Portland Terminal Co., Portland, Me., to build a pile wharf, and dredge for same, on property at South Portland, also to remove the old pile bridge between South Portland and Portland, across Fore River.

Dec. 3. Portland Terminal Co., Portland, Me., to build a pile wharf on Commercial Street, property known as Wharf No. 1. 1930.

Jan. 27. Portland Terminal Co., Portland, Me., to dredge out under Wharf No. 1.

Feb. 11. Economy Fuel Co., Portland, Me., to build a pile and timbered bulkhead and dredge for berth on southerly shores of Back Cove.

March 10. Portland Terminal Co., to build a pile wharf on the northerly shore of Fore River near the Portland Gas Light Co.

March 19. Texas Co., South Portland, Me., to build a pile and timbered bulkhead and install 5 dolphins near their wharf in South Portland.

July 3. Granted the Texas Co. permission to change line of bulkhead, it being within bounds of their property, as per new plans filed.

APPOINTMENTS MADE BY THE BOARD

Captain C. W. L. McDuffie was reappointed Harbor Master for a term of one year, from July 1, 1930, to July 1, 1931.

Captain James Perkins was reappointed Assistant Harbor Master for the term of one year, from July 1, 1930, to July 1, 1931.

The report of the Harbor Master for the year ending December 1, 1930, as made to the Board, is attached herewith and made a part of this annual report.

HARBOR MASTER'S REPORT

Portland, Me., December 1, 1930.

To the Board of Harbor Commissioners for the Harbor of Portland, Maine:

I have, during the year ending December 1, 1930, officially visited:

Steamships,	68
Barges,	32
Schooners,	12
Yachts,	9

Total,	121
--------	-----

On June 28, 1930, all buoys were cleaned and painted and refitted with shackles, by "Clinton T. Goudy," at a cost of \$89.65.

On August 10, 1930, battleships "Memphis," "Salt Lake City" and "Marblehead" arrived in Portland Harbor, and all placed in safe anchorage.

Total expenses for the year, \$89.65.

Respectfully submitted,

C. W. L. McDUFFIE,

Harbor Master.

Respectfully submitted by the Board,

ALBERT E. DYER,

J. CALVIN KNAPP,

ALBERT B. HALL,

NATHAN W. THOMPSON,

*Harbor Commissioners for the
Harbor of Portland, Maine.*

REPORT OF FIRE CHIEF AND FIRE DEPARTMENT

South Portland, Maine, February 1, 1931.

*To the Honorable Mayor and Board of Aldermen of the City of
South Portland, Maine:*

GENTLEMEN: I herewith submit the following annual report
of the Fire Department for the year ending January 31, 1931:

Still alarms,	178
Box alarms,	114
	<hr/>
Total,	292
Total value of property involved,	\$225,527.00
Total insurance on buildings,	121,446.00
Loss on buildings,	31,516.50
Total insurance on contents,	60,710.00
Loss on contents,	22,781.84

The loss for the year amounts to \$54,298.34, approximately
\$3.88 per capita.

Respectfully submitted,

CHARLES O. SPEAR, JR.,

Fire Chief.

REPORT OF HEALTH OFFICER

To the Mayor and Board of Aldermen:

I herewith submit my report as Health Officer for South Portland for the past year:

There have been reported to this office the following contagious diseases:

Chicken Pox,	73 cases
Infantile Paralysis,	4 "
Erysipelas,	3 "
Measles,	24 "
Mumps,	53 "
Whooping Cough,	69 "
Tuberculosis,	7 "
Septic Throat,	12 "
Diphtheria,	2 "

There have been over 1800 permits issued for children to go back to school. The infantile paralysis epidemic in the fall necessitated many extra precautions over children absent from school.

I have endeavored to keep the "dumps" cleaned during the past year, but people do not seem to realize that there is anyone else to be thought of but themselves, and dump everything, from tin cans to garbage, and in the easiest place they can. There is a public dump at the rear of the athletic field and one near Spear's coal wharf, but the rubbish should be dumped over the edge, and not anywhere you like to. It is expensive to keep these places cleaned, but with a little care this can be avoided.

The garbage collection has been put under the jurisdiction of the Overseers of the Poor department. There were very few complaints made.

The Public Works department coöperated with the Health Department in "Clean-up Week," and this was done up in three days.

Respectfully submitted,

WALDO T. SKILLIN, M. D.,

Health Officer.

REPORT OF MILK INSPECTOR

February 1, 1931.

To the Honorable Mayor and Board of Aldermen of the City of South Portland:

GENTLEMEN: I herewith submit my report as City Milk Inspector for the year of 1930 as follows:

Eighty-eight (88) licenses have been issued to sell milk and cream in the City of South Portland during the year, including dairies, stores and lunch rooms.

The dairies and sources of supply have been inspected at intervals during the year and have been found in excellent condition.

The City's milk supply compares well with other cities and towns throughout the State as to quality and cleanliness in handling.

As usual, great care has been taken in supplying the schools throughout the city with the best grades of milk.

The dairymen of the city are using modern and sanitary methods in handling the milk supply, and are coöperating in every way with the State Department of Agriculture.

Respectfully submitted,

FRANK W. COLE,

Milk Inspector.

REPORT OF OVERSEERS OF POOR

To the Honorable Mayor and Board of Aldermen of the City of South Portland:

GENTLEMEN: The Overseers of the Poor herewith respectfully submit this, their annual report for the year ending January 31, 1931.

Appropriation (Poor Dept.),	\$ 6,500.00
Cash receipts, almshouse,	11,506.31
Deficit, almshouse and out-poor,	2,596.92
	—————\$20,603.23

EXPENDED

Almshouse,	\$12,988.19
Out-poor,	7,615.04
	—————\$20,603.23

The Board of Overseers wish to call to the Mayor, Board of Aldermen and the citizens at large, to the deficit of \$2,596.92.

Owing to the present depression and business conditions the demands have been greater than ever before. This year the number of families receiving aid from the City, from February 1, 1930, to February 1, 1931, was 68.

The State aid for dependent children increased this year \$244.47.

The milk and eggs used by the home were supplied from the farm.

The City Home is open each day from 2 o'clock to 4 o'clock.

Respectfully submitted,

JOSEPHINE M. FENDERSON,
JOHN I. B. SAWYER,
IRVING T. JONES,

Overseers of the Poor.

REPORT OF THE RED CROSS HEALTH NURSE

South Portland, Maine, February 17, 1931.

Total number of visits for the year, 2,897.

500 made to homes of out-poor and needy.

680 visits to the City Home, and all the patients confined to their rooms given nursing care. Baths given regularly and nursing care.

All out-poor taken care of if ill by the nurse and all medicine needed is furnished by the Red Cross, or through clubs.

Four patients taken to the dentist for extractions and paid for by Red Cross.

Glasses furnished to 4 children.

12 children were sent to Christmas Cove for a two weeks' vacation.

Three maternity cases cared for free.

30 patients taken to the dispensary on India Street for treatments.

Six patients taken to the M. G. H. for chest X-rays. Expense taken care of by Red Cross.

Three patients taken to Children's Hospital for X-rays, free, and six patients taken there for free treatments.

Baby Weighing Day was started last summer and because of the infantile paralysis scare was closed temporarily, but hope to open it again in the spring at the nurse's office at 42 Anthoine St.

Twelve babies have been taken to the Well Baby Clinic at City Hall, Portland, for feeding regulations, and have come along nicely, but my one wish is to have a Well Baby Clinic of our own in South Portland, with a doctor in attendance.

Closets have been built into the nurse's office at the City Home, for storage of clothes, and several hundred garments have been given away during the year. Some of the groups of ladies have made sleeping garments for us and baby layettes to give to the unfortunate. The clubs and societies, etc., have furnished much help in the way of food, fuel, etc. At Christmas time the Express Santa Claus work of South Portland was handled through

the Secretary of the Red Cross, South Portland, and about 350 children were given a Christmas by the kind-hearted people of South Portland.

A Family Welfare Organization has been started now which will help a great deal, in that it will give the nurse more time for the nursing work and baby work.

The patients at the home are very well cared for and happy. Good food, clean beds and warm, clean rooms, also plenty of reading matter.

The home is an honor to any city so far as cleanliness and comforts are concerned, and always open for inspection. Plenty of clean bed linen makes the rooms and beds always comfortable and clean.

MRS. ALICE B. LEWIS, R. N.,
So. Portland American Red Cross Nurse.

REPORT OF CITY PHYSICIAN

To the Mayor and Board of Aldermen:

I herewith submit my report as City Physician for the past six months :

There has been very little sickness at the City Home, but among the Out-patient Poor there has been a large number of calls.

There have been no deaths during my six months on duty.

Respectfully submitted,

WALDO T. SKILLIN, M. D.,

City Physician.

REPORT OF PLUMBING INSPECTOR

SOUTH PORTLAND, ME., February 2, 1931.

To Waldo T. Skillin, M. D., Health Officer, City of South Portland, Maine:

DEAR SIR: I hereby submit my annual report as Plumbing Inspector for the municipal year ending January 31, 1931.

Total number of permits issued were 193, of these 81 were for new buildings.

The following tabulation shows character of same:

Closets,	153
Lavatories,	151
Bath tubs,	145
Sinks,	133
Laundry trays,	91
Conductors.	20
Vaults removed,	12
Cuspidors,	1
Soda fountains,	2
Urinals,	3
Washers,	3

There were 35 master licenses and 21 journeyman licenses issued.

The amount of fees turned over to the Treasurer, \$136.75.

Respectfully submitted,

ERNEST X. DEWYEA,

Inspector of Plumbing.

REPORT OF POLICE DEPARTMENT

South Portland, Maine, February 1, 1931.

*To the Honorable Mayor and Board of Aldermen of the City of
South Portland, Maine:*

GENTLEMEN: I herewith submit the following report of the Police Department for the year ending January 31, 1931:

Stolen automobiles recovered and re-	
turned, value,	\$5,615.00
Automobile accidents reported,	184

Respectfully submitted,

CHARLES O. SPEAR, JR.,
Chief of Police.

REPORT OF COMMISSIONER OF PUBLIC WORKS

SOUTH PORTLAND, MAINE, February 14, 1931.

To the Honorable Mayor and Board of Aldermen:

GENTLEMEN: I herewith submit the annual report of the Commissioner of Public Works for the year ending January 31, 1931.

STREETS

Work on the City Streets in general has consisted of scarifying and regrading, where necessary, and treating with asphalt, coke oven tar and light road oil. Practically all of the streets requiring work done have received the above repairs, one hundred and forty-nine thousand gallons of tarvia, tarmac, asphalt and road oil having been used, this being an increase of thirty thousand gallons of material as compared with the previous year. The Department has practically discontinued the use of light road oils, as this class of material serves only as a temporary relief in laying dust and does not result in a serviceable hard surface. The permanent roads have been treated with tar and asphalt, also patched with a material similar to that used when originally constructed where necessary. One and four-tenths miles of gravel road was constructed and treated with light road oil on the Payne Road and Running Hill Road. Two thousand feet of gravel base was laid on Westbrook Street which will be capped with an asphalt penetration during the Summer of 1931.

DRAINAGE

The Department has endeavored to correct many of the poor drainage conditions throughout the City. Fourteen new catch basins have been constructed, and forty-seven of the old basins have been altered to better conditions. These changes have proved to be of great value in bettering the drainage conditions during the thaws of the present winter.

STREET SIGNS

Fifty-five street signs have been erected during the year of a more serviceable type than previously used, being of metal construction.

BRIDGES

The old wooden bridge over Anthoine Creek, which has been judged unserviceable and not in keeping with the concrete road leading to it, has been replaced with a concrete structure at a cost of nineteen thousand dollars, the cost being divided between the City of South Portland, Cumberland County, State Highway Department and the Street Railway Department.

CEMENT WALKS

Four thousand four hundred and seventy feet of Cement Walks have been constructed throughout the City as requested by owners.

Two thousand four hundred feet of gravel walk have been laid down and three thousand feet are now in project.

NEW STREETS

Four thousand and ninety-one feet of private ways have been accepted as public streets.

STORM DAMAGE

The Winter of 1929-1930, with its ice storms, is one long to be remembered when considering damage done. During the storm and for three months following, the Department, working with tree men furnished by the Cumberland County Power & Light Co., removed all broken and dangerous limbs from the trees throughout the City, hauling a total of three thousand four hundred and fifty loads to the various dumps.

SNOW REMOVAL

A great deal of attention has been given to sanding the various hills throughout the City and to delivering sand for walks, approximately four hundred deliveries of sand to residents having been made.

With new and better snow removal equipment, the department has been able to make a quick and efficient showing during all storms.

EQUIPMENT

The eight-ton roller, which was found to be too light for City work, has been exchanged for a ten-ton roller, which has made it possible to do the work required more efficiently and at a less cost.

A Walter four-wheel drive truck, two Ford trucks, one used Ford truck, two Sargent plows, one road machine and two light-blade plows have been purchased to replace equipment no longer serviceable to the City.

MISCELLANEOUS WORK

The Department has worked with the Police and Fire Departments in maintaining skating ponds and sliding streets throughout the City, which have been enjoyed by many and at a very small cost to the City.

Respectfully submitted,

ALBERT W. WATERMAN,

Commissioner of Public Works.

REPORT OF BOARD OF REGISTRATION

South Portland, Maine, February 1, 1931.

To the Honorable Mayor and Board of Aldermen:

GENTLEMEN: The Board of Registration of Voters hereby respectfully submit the following report:

The whole number of registered and qualified voters is 5,234.
The whole number of enrolled voters is 4,720.

Registration by wards and enrollment by wards is as follows:

<i>Registration</i>	<i>Enrollment</i>		
Ward 1—1,134	Ward 1—982	Rep.	50 Dem.
2— 492	2—388	"	20 "
3— 552	3—462	"	21 "
4— 531	4—465	"	38 "
5— 907	5—775	"	42 "
6— 751	6—644	"	40 "
7— 867	7—705	"	88 "
<hr/>			
Total, 5,234	4,421		299

Respectfully submitted,

JOSEPH F. CHAPLIN,
FREDERICK H. JORDAN,
SIMON M. HAMLIN,

Board of Registration of Voters.

REPORT OF CITY SOLICITOR

To the Honorable Mayor and Board of Aldermen of the City of South Portland:

During the municipal year your City Solicitor has, upon request, furnished opinions as to matters of law to the Mayor, Board of Aldermen, City Clerk, City Treasurer, Board of Assessors, Overseers of Poor, Commissioner of Public Works, Chief of Police and Fire Departments, and Health Officer.

The City Solicitor has been in attendance at the meetings of the Board of Aldermen and has assisted in drafting orders and ordinances. The ordinance passed this year relating to the Storage and Handling of Inflammable Liquids is, in the opinion of your City Solicitor, the most comprehensive legislation of its nature ever adopted by any municipality in New England.

The only action at law brought against the City, the case of John McL. Moore versus the City of South Portland, was tried before Supreme Court Justice Guy H. Sturgis and resulted in a decision in favor of the City of South Portland.

Respectfully submitted,

LESLIE E. NORWOOD,

City Solicitor.

REPORT OF TREASURER

To the Honorable Mayor and Board of Aldermen of the City of South Portland:

GENTLEMEN: Following is a condensed summary of receipts and disbursements by this office for the year ending January 31, 1931, detail of which, with City Auditor's certification, will be found elsewhere in the annual report:

REPORT OF SEALER OF WEIGHTS AND MEASURES

13 Free Street, South Portland, Maine,
February 2, 1931.

*To the Honorable Mayor and Board of Aldermen of the City of
South Portland, Maine:*

GENTLEMEN: I herewith submit my report as Sealer of Weights and Measures of the City of South Portland, Maine, for the year of 1930:

Number of scales tested,	167
Number of pumps tested (gasoline, kerosene and oil),	161
Number of weights tested,	229
Number of measures tested,	84
Number of tank trucks tested,	2
Number of loading meters tested,	4
Number of delivery meters tested,	2
Number of scales condemned,	2
Number of weights condemned,	1
Number of pumps condemned,	2

I have received four complaints of short measure this year, but as there was no apparent intent to defraud, I was able to adjust same without recourse to legal action.

As in former years, the merchants and oil and gasoline distributors have given me their coöperation, and proved, to my satisfaction, at least, that they desire their weighing and measuring devices shall conform to the standards as required by law.

The present equipment of this department consists of:

- 1 Testing scale
- 1 Set (9) brass weights, $\frac{1}{4}$ oz. to 4 lbs., inclusive
- 1 7-lb. iron weight
- 1 10-lb. iron weight
- 1 20-lb. iron weight
- 10 50-lb. iron weights
- 6 Dry measures (wood)
- 5 Liquid measures (brass), $\frac{1}{2}$ pt. to 1 gal., inclusive

- 1 1-gal. "Dover" testing measure
- 1 5-gal. "Dover" testing measure
- 1 hand press for lead seals.

Respectfully submitted,

HENRY TOWLE,

Sealer Weights and Measures.

Report
of
South Portland
Sewerage District
for

SIXTH FISCAL YEAR

Ending January 31, 1931

SOUTH PORTLAND SEWERAGE DISTRICT

Report for the Fiscal Year Ending January 31, 1931

The Trustees of the South Portland Sewerage District herewith submit a condensed report of its activities as at the end of its Sixth Fiscal Year.

New construction during the year was financed from the available funds on hand derived from the last bonds issued therefor on August 1, 1929.

Money spent for Maintenance, Operating Expenses and Interest Charges was financed in the usual manner by a tax warrant on the City of South Portland as provided for in the Charter of the South Portland Sewerage District.

The remaining borrowing capacity of \$25,000.00 is still available as in the previous report.

During the year assessments were levied for sewers constructed on Broadway, Lincoln Street, Parrott Street, Drew Road, Danforth Road, Ship Channel Road, Leighton Street and Kirkland Avenue. All sums derived from these and previous assessments have been applied to the Sinking Fund established to assist in the retirement of the \$575,000.00 in outstanding bonds.

There is now available in the Sinking Fund the sum of \$48,066.77, as shown by the Treasurer's Report.

Next year the first of our bond issue, amounting to \$10,000.00, will become due, and same will be financed from the Sinking Fund.

Following their established policy on private sewer systems, the District has accepted deeds, without cost, for approximately 6,355 feet of private sewers more fully described in the Engineer's Report, agreeing to maintain these sewers as long as they are suitable, but reserving their rights to construct a public sewer in place of them, if same becomes necessary.

The Trustees wish to call attention to the tabulated list of our sewerage system as shown in the Engineer's Report, which gives in a condensed form the work accomplished by the

District, whereby the sewerage system has been increased from 18.67 miles in 1925 to nearly 35 miles in 1931.

There have been many problems met during this time, and there are yet others to come, but the Trustees feel that the main problem which led to the incorporation of the Sewerage District, i. e., The Trunk Line Sewer in the Thornton Heights section, has been successfully and satisfactorily completed, and that the remaining work is maintenance and routine extensions until the District is able to finance further trunk line work, which, as South Portland continues to grow, will become more necessary.

Statements of the District Officers follow, and the complete records of all transactions are open for inspection at the office of the Treasurer.

SOUTH PORTLAND SEWERAGE DISTRICT,

E. PERLEY BULLOCK, *President.*

JOHN A. S. DYER,

HAROLD W. MORSE,

WILLIAM A. WILLARD,

Trustees.

Report of Construction and Engineering Department

February 1, 1931.

To the Honorable Board of Trustees:

GENTLEMEN: A summary of the work during the Fiscal Year ending January 31, 1931, follows:

New sewers were constructed in the following locations:

Pearl Street, from Elm Street towards Kelsey Street, 300 feet of 10-inch vitrified pipe, with one manhole.

West High Street, from Margaret Street to Mussey Street, 368 feet of 15-inch pipe, double strength vitrified.

Forest Avenue, from Elm Street easterly to end of street, 413 feet of 12- and 10-inch vitrified pipe, with two manholes.

East Broadway, extension of previous sewer from Curtis Lane easterly, 129 feet of 8-inch vitrified pipe, with one manhole.

Reynolds Street, extension of previous sewer, from Latham Street towards Cole Street, 98 feet of 8-inch vitrified pipe, with one manhole.

Broadway, at new Anthoine Creek Bridge, 42 feet of 20-inch cast iron pipe, with one manhole.

From the Trunk Sewer Wier Chamber at Broadway and Evans Street, 295 feet of 24-inch vitrified pipe was laid in the bottom of the existing plank storm water overflow and embedded in concrete, forming a permanent overflow.

On Ocean Street, south of Highland Avenue, 26 feet of 12-inch vitrified pipe was laid and one manhole constructed, forming a storm water relief for Ocean Street sewer, discharging into a 30-inch storm water drain at this point.

On Atlantic Avenue, 599 feet of the 10-inch vitrified sewer was relaid, with its outlet changed to Elm Street, and one new manhole constructed.

On Chestnut Street, 383 feet of the 10-inch vitrified sewer was relaid, with its outlet changed to Elm Street.

New manholes were also constructed at Preble and Beach Streets, Chase Street, Elm Street, Mussey and Third Streets, Broadway at Valley Street, Broadway near Walnut Street, Main Street, Mussey and Fourth Streets, and Willard Beach.

The above construction work made possible the discontinuance of Six Outfalls discharging at Tidewater, namely, Atlantic Avenue, Forest Avenue, Chestnut Street, Bagley Street, Third Street, and one under old dock at foot of Mussey Street.

Stoppages were relieved on Preble Street, Cloyster Road, Kelley Street, Kelsey Street, Kincaid Street, Henley Street and Chapel Street.

Heavy deposits of sand were removed from sewers on Broadway, Ocean Street, and at Willard Beach.

During the year there were 64 new sewer connections made and inspected.

By deed, the District has acquired, without cost, ownership of the sewers in Mussey Farm development, comprising approximately 5,910 feet of from 6-inch to 15-inch pipe in Margaret, Mussey, Harriet, First, Third and Sixth Streets, also approximately 445 feet of 8-inch vitrified pipe sewer in Lowell Street, from Pillsbury Street westerly.

Following is a complete tabulated list of the Sewerage System, showing sewers existing at the time the Sewerage District was incorporated and those constructed or acquired by the Sewerage District:

TOTAL SANITARY AND COMBINED SEWERS, JANUARY 31, 1931

Type	Const. Prior to S. P. S. District	Const. or Acquired Since Dec. 19, 1925	Total

REPORT OF SCHOOL BOARD

To the Honorable Mayor, Board of Aldermen and Citizens of South Portland:

The Superintending School Committee herewith submits its thirty-second annual report.

It is a fact that in every report of this committee for the past several years stress has been laid upon the crowded condition of our schools. This year the same condition has existed, making it necessary to shift grades and seats to conform in many sections of the city, and in the High School we have been compelled to adopt the two-session plan.

We do not intend to crowd our allotted space with a report of our difficulties, whether they have been overcome or not, but we do wish to make plain the fact that our schools are very much overcrowded and that some definite plan must be made and put into execution very soon; especially is this true of the High School and here are a few figures to help make this clear.

High School

Estimated Registration in 3 Upper Classes

1930-31 (Actual)	1931-32	1932-33	1933-34
444	600	710	800

By making use of the auditorium, gymnasium, kitchen, etc., as study and make-up rooms, we know that more than five hundred pupils can be accommodated, not comfortably, but they can be cared for; how to crowd six hundred into this same space is a problem to be met this next fall. A year later, in September, 1932, there will be another hundred or more to take care of and in 1933 still another hundred. It can readily be seen that we must have more capacity by 1932. The above figures are all based on actual registration in the High School and grades at the close of school for the Christmas vacation, proper allowance being made for decrease in numbers as the classes enter and advance in the High School.

Taking actual figures all the way down through the grades we can be sure of an increase in the High School every year, varied, but substantial. On these facts and figures we base our recommendations for some definite and speedy building plan be started at once.

In the grades the children have all been placed, the K. of P. Hall and the Thornton Heights Improvement Society building being continued as schoolrooms, one small room being added at Thornton Heights. Due to conditions at the Henley School, part of the fifth grade pupils were transferred to K. of P. Hall and the fourth grade transferred from there to East High Street. Space will not permit of a detailed statement of the conditions in every building. Practically all are filled to beyond the normal capacity, but by shifting and doubling the grades the pupils are all being taken care of.

Our petition to the State Department of Education for a dissolution of the South Portland-Cape Elizabeth School Union was granted and for the first time our Superintendent has had the opportunity of devoting all his time to the South Portland schools.

Our Supervisors of Music, Drawing and Penmanship are all working on a three weeks' schedule; the time thus allowed does not permit the training in these subjects to which our pupils are entitled. This condition will, no doubt, be improved as soon as finances will permit.

In the Henley School basement, rooms have been equipped for Domestic Science and Manual Training and very good work is being done by the pupils in both departments.

Nearly a year ago we were faced with the problem of selecting a new director of physical education. We believe the problem was solved to the satisfaction of all; the high standard of sportsmanship previously set seems to have been maintained and we have no fear of the future.

We wish to thank the Superintendent, teachers and pupils for their faithfulness in coöperation and performance of their duties.

To the Mayor and Board of Aldermen we express our gratitude for their willingness to aid us in conducting this rapidly growing school system.

Respectfully submitted,

DR. MASON H. ALLEN,
ARTHUR C. ELLIOTT,
DR. FRANK I. BROWN,
ERNEST E. GOWELL,
J. L. GOODWIN,
RALPH W. LEIGHTON,
FRED W. SARGENT.

ESTIMATES FOR 1931

High School:	
Salaries,	\$56,000.00
Textbooks,	2,000.00
Supplies,	1,800.00
Elementary Schools:	
Salaries,	77,500.00
Textbooks,	3,000.00
Supplies,	2,200.00
Conveyance,	75.00
Contingent,	3,000.00
Industrial Education,	6,250.00
Physical Education,	3,300.00
School Nurse,	1,740.00
Attendance Officer,	700.00

FRED W. SARGENT,

Estimating Committee.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Honorable Mayor and School Board of South Portland:

I herewith submit to you my sixth annual report of the School Department and the thirty-second in a series of similar reports.

The following statistics show the changes in registration, the number of teachers employed, and the cost per pupil in the different departments as compared with the preceding year:

Number on census April 1, 1930,	4,162
Increase,	194
Number registered in high school,	720
Number registered in elementary schools,	2,847
Total registration,	3,567
Increase,	182
Number of teachers and supervisors employed,	119
Increase,	9
Average cost per pupil in high school for instruction, janitors, fuel, books, supplies, physical and industrial education,	\$91.73
Cost per pupil in elementary schools for instruction, janitors, fuel, books, supplies and industrial education,	\$44.59

At the opening of the school year last September it became necessary to make changes in the location of certain grades.

The most complicated and vital condition existed in the Ferry Village section, caused by only one room in the Henley building being available for fifth grade pupils. On account of this condition it became necessary to hold the fourth grade back in the East High Street building and use the available space in K. of P. hall for fifth grade pupils.

By retaining the fourth grade in East High Street building, one of the first grade rooms had to be given over to a higher grade, thus making a misfit in size of seats. By

crowding all first grades into one room it became necessary to provide an assistant for the regular teacher.

At South Portland Heights, where the first and second grades occupy the same room, it became necessary to secure an extra teacher to handle one of these classes so more time could be given for individual needs.

Owing to a decrease in the Ligonía section it was possible to send the fifteen children registered in the third, fourth and fifth grades to the Lincoln School and transfer this teacher to the K. of P. building, thus not increasing the number of teachers to fill the new position created by placing another division of the fifth grade in that building.

At the Lincoln building there was such an increase in the first grade that it became necessary to provide an assistant for the teacher in order to give the children proper instruction. By splitting up the five higher grades in this building it has been possible to seat these children in four rooms, which is a very unsatisfactory arrangement. This building has six rooms and at present it is housing seven grades. If the number of grades could be reduced to six the arrangement would become ideal, and furthermore, the eighteen children in the Ligonía section could be transferred to this building, thus doing away with the expense of running a school in that locality.

At Thornton Heights the school year opened with a registration of sixty-three in the first grade and an extra teacher had to be secured to help the regular teacher. Because of the peculiar arrangement of the interior of this building it was not convenient to use the hall for class work, so another room was secured in the Community Club building and about twenty-five of these children were transferred to that room.

As a result of these increases in different sections of the city, it has caused an increase of four teachers in the elementary schools.

Our first grade schools are made up of children whose ages range from four years and eleven months to six years,

and the children from such schools naturally divide themselves into three groups or divisions, generally termed A, B and C groups. The first group is made up of children capable of doing the work with very little or no difficulty whatever, and as a result they receive less attention than the others. These children, considering their ability, are retarded, because if they received as much extra time and help from the teachers as the other groups, they would accomplish very much more than the regular grade work. The second group is made up of children capable of doing the average amount of work with the amount of individual help from the teacher that rightfully belongs to them. The third group consists of children of pre-school age so far as mental development is concerned and in many instances the very youngest in the class. This group receives more of the teacher's time and attention than the other groups combined. Such a group is called the sub-primary grade in many school systems, but for lack of room in our schools these are registered with the first children.

Grade meetings are held at certain intervals, at which time work is laid out and plans made whereby all corresponding grades cover the same ground, thus making the work uniform in all schools of the city.

In regard to conditions and work in the High School I refer you to Mr. Beal's report, which explains very clearly how over 700 students are handled in a building with a capacity of only 575. Mr. Beal is to be commended on the way the High School is managed under these trying conditions and also its standing among other high schools of New England and especially those of our own state.

The following statement shows the receipts and expenditures of the school accounts for the municipal year:

**Financial Statement of Public School Fund
For the Year Ending January 31, 1931**

RECEIPTS

Total expenditures,		\$21,004.89

The reports of the High School Principal, Supervisors, School Nurse, Attendance Officer and tables showing the registration of pupils and distribution by grades follow and deserve special notice.

In closing this part of the report, I wish to express my sincere appreciation to the members of the School Board for their coöperation and to the teachers and other workers in this department for their loyalty and faithfulness, also to the public and the several civic organizations of the city for their help and interest in our schools.

Respectfully submitted,

LOEN W. GERRISH,

Superintendent of Schools.

HIGH SCHOOL

To Mr. Loen W. Gerrish, Superintendent of Schools:

I herewith submit the annual report of the High School.

The present Freshman class, the largest ever to enter our High School, forced the adoption of two sessions. The morning session, from 8.00 to 12.30, cares for the 450 pupils of the three upper classes. The afternoon session, from 12.30 to 5.00, cares for the 280 pupils of the entering class.

This plan successfully meets the problem of class rooms. It also permits the pupils the advantage of the proper class instruction without the overcrowding of classes or shortening of periods. The use of two separate faculties has also afforded the teachers the opportunity to carry on their work under favorable conditions.

Although the afternoon session plan is not ideal, it has satisfactorily solved a perplexing problem, and, under the existing conditions, has certain advantages. It has kept a proper balance of teacher-pupil load, relieved some of the overcrowded conditions of last year, afforded the Freshmen the opportunity to have athletic teams with their own schedule.

Yet this system, which is economical in the use of invested capital, because of the extra hours of use of the building, cannot be continued indefinitely. Next year the registration in the three upper classes will increase over a hundred and will cause a congested condition during the morning session. Rooms now available for the Freshmen to do make-up work during the forenoon will have to become class rooms. So the system which is taking care of the condition temporarily cannot be viewed as satisfactory for more than the coming year. The future can only be met by increased accommodations.

The faculty fortunately lost only one member, Mr. Gustafson, whom we all liked and were sorry to have leave. His position is ably filled by Mr. Mapes, whom we find to be not only a capable coach but also an able administrator of the athletic policy. Four other members were added to

the faculty to care for the increased enrollment. These teachers have the same spirit which characterizes the whole faculty,—the desire to do all possible for the pupil, socially and morally as well as scholastically. So long as our faculty maintains this sincere and professional attitude toward the pupils and their work we may be sure that the pupils will make satisfactory progress toward good citizenship.

The school this year received renewal for a four-year period of its privilege of certification granted by the New England College Entrance Board. The school was also granted school membership in the association of New England Colleges and Secondary Schools. College entrance conditions, while more liberal in subjects acceptable for entrance, are becoming ever more severe in the scholastic attainment requirement. The school requires a rank of 88 for certification and the colleges are having so many applicants that a student should rank in the upper quarter of his class to receive consideration. Some colleges are further demanding that these high ranking students take substantiating examinations. To continue to properly prepare our college groups for these requirements, we must put these groups into separate divisions and require high scholarship and attainment. Now that the school is increasing in size so that we are having several groups in each subject this will be possible. This does not mean the lowering of requirements in other groups, but rather the increase of requirements for the college group.

The past year has recorded many achievements of pupils and activities which we trust in a measure indicates the character of the class room work that we are doing.

Willard Wallace, who graduated in June, 1930, won one of the six competitive Olin Scholarships awarded by Wesleyan University. This scholarship carries an annual award of \$500 for four years. Edwin Marshall, the valedictorian, won a Harvard Scholarship offered by the Harvard Club of Maine.

The scholastic report of the six Freshmen at the University of Maine showed no failures and 15 of the 34 marks received were of honor grade.

Keith Huntress won national recognition for writing the best editorial submitted to the Quill and Scroll, the National Journalistic Society. James Desmond, the editor of the "Echo," also won honorary mention.

The debating team has just completed the most successful fall season in recent years. Mr. Hutchinson developed new material into a combination which won eight debates and the championship of the Bowdoin Debating League.

The morale of the school is excellent. The student body again conducted the Curtis campaign and won a special bonus for exceeding their quota. The total profit exceeded \$300. The school play played to a capacity house and netted the largest profit in recent years. Overhead flood lights at a cost of \$144 have been added to the stage equipment. This was paid for from the above receipts, which are also used for defraying expenses of all non-athletic activities, such as debating, assemblies, year-book, "Echo," prize speaking, commercial contests, etc.

As principal, I feel that the school has had a successful year and wish to thank scholars, faculty, superintendent, school board, and citizens for their coöperation.

Respectfully submitted,

GEORGE E. BEAL, *Prin.*

THE SPIRIT OF THE RED AND WHITE

By Edwin Bateman Marshall

1.

See our banner proudly waving,
Waving for the truth and right,
An emblem of South Portland's valor,
Of the courage that wins the fight.
It stands for our Alma Mater,
For her spirit that never will die,
It seems to say, as we meet each day,
"Be true to South Portland High."

CHORUS

Let's give a cheer for Alma Mater,
Let's give it with all our might.
In all the world there is none greater than
The Spirit of the Red and White.

2.

Where our banner goes, we'll follow
O'er the winding road of life.
Looking back with fondest mem'ries,
To our high school, free from strife.
We'll work for our Alma Mater,
For the best we always will try,
And we'll proudly say, as we meet each day,
"Be true to South Portland High."

CLASS SONG

Words by Mary Margaret Greely

Music by Edwin Bateman Marshall

We stand at the gates of our fortress today,
A happy and youthful throng.
As we look out before us life beckons away,
Let us follow with hearts full of song—
The songs of our battles and victories won,
The songs we shall never forget,
The songs that recall the long race we have run,
Of the contest ahead of us yet.

Then the best song of all let us sing ere we leave
A toast to a friend kind and true,—
May we honor and victory ever achieve,
South Portland, our high school for you.

Let our songs in the future be songs full of peace,
That together all nations will bind.
We'll pray that from this day all battles shall cease
And our fortress be one of the mind.
Remembering our school days—the best days of all,
We feel sad to think they are gone,
But ever and always we heed to the call
Of life that is leading us on.

Report of the Supervisor of Drawing*To Mr. Loen W. Gerrish, Superintendent of Schools:*

The work in drawing for the year ending February 1, has been much as last year. We are running on a three weeks' schedule, which gives each class twelve lessons from the supervisor for the year. As planned now if a lesson is lost for any reason, as a storm or a holiday, it can be made up, and at present all such losses have been met.

The outline for the school year is divided into several sections, each part receiving in advancing grades, difficulties adapted to the age of the child. The work follows the seasons somewhat, as:

1. Nature drawing in the fall for form and color and source material for design.
2. Lettering and construction work suitable for holiday projects.
3. Toys and common objects studied for form, proportion and a study of perspective in the upper grades.
4. Color and design round out a full year's work with graded difficulties.

The State Department of Education recommends the following time allotment for drawing in the grades, for grades I to V inclusive 100 minutes per week, for grades VI and VII, 150 minutes per week, for grade VIII, 200 minutes per week. In grades VII and VIII, this time includes Industrial Arts.

I hope that another year we can more nearly meet this requirement than we have been doing as we certainly are not keeping pace with other places, even smaller than ourselves, in the work accomplished.

I realize that the physical conditions in many of our school rooms and the overcrowding in numbers must of necessity cut down on some of the work, but "where there's a will there's a way" and many of our teachers are getting excellent results and some of them in apparently the most hopeless places.

It seems a great pity that some way cannot be found to give the High School students of ability opportunity to develop that taste. Many of our boys and girls go into lines of work in which a more extended knowledge of color and design than can be given in the grades would be very useful. Almost all places give some courses in art in the High School and in some places art appreciation courses are compulsory. Are we giving our young people a fair deal to fit them for useful occupations or to help them better use and enjoy that leisure so much sought after at the present time?

Respectfully submitted,

ANNIE D. McLELLAN.

Report of the Supervisor of Writing

To Mr. Loen W. Gerrish, Superintendent of Schools:

The schedule this year is practically the same as last, each grade being visited every three weeks, grades I to V receiving twenty-minute lessons, and grades VI to VIII thirty-minute lessons. All lessons lost because of time out are made up. By this method each grade receives twelve lessons per school year.

In the majority of the grades excellent work in penmanship is being accomplished. This result is attained only through the coöperation of the teachers, as upon them fall the duty of maintaining the work mapped out by the supervisor.

In schools where the work of the seventh and eighth grades is departmental, the teachers find it especially difficult to devote the necessary amount of time to the technical presentation of the principles of writing. At least one hundred minutes per week should be devoted to writing, an average of twenty minutes daily, or where the work is departmental not less than three thirty-minute periods per week.

Palmer Method awards for 1930 total 2,417, divided as follows:

Silver Star buttons, grades I and II	541
Gold Star buttons, grade II	330
Palmer Method buttons, grades III and IV	604
Merit buttons, grade V	221
Progress Pins, grade VI	293
Improvement Certificates, grades VII and VIII	62
Final Certificates, grades VII and VIII	292
High School Certificates, grade VIII	74
	<hr/>
	2,417

Respectfully submitted,

A. LOUISE ROBBINS.

Report of the Supervisor of Music

To Mr. Loen W. Gerrish, Superintendent of Schools:

Music in all the schools during the past year has been developed in regard to tone, rhythm and theory in much the same manner as outlined in previous reports.

The necessity for music appreciation lessons in the South Portland schools has been a long felt want. There are few school systems of this size which are not doing something along this modern and progressive line. "Listening lessons," if carried on with enthusiasm and following a carefully planned outline, are certain to bring results, increased interest, better tone quality, more perfect rhythm and a desire to study the more unusual orchestral instruments, thus providing us with larger and better balanced orchestras.

With the increasing number of grades to be visited, each year it becomes more and more difficult to give the proper amount of supervision necessary to teachers and pupils, if a high standard is to be maintained. The services of an assistant in the Music Department are badly needed in order that grades may be seen more often and music appreciation may be introduced.

Music in the upper grades, to be successful, should be taught by one teacher who has shown special ability. At Summer Street School all music periods are taught by Miss Smith. Music at the Henley School should also be made a departmental subject. If some especially musical grade teacher could take a summer course in school music and assume charge of all music periods in this building, the problem could be solved without hiring an extra teacher.

Music periods at the High School this year are held in school hours. On the whole this is proving more satisfactory than after school, except that one period for an orchestra rehearsal of forty-four members is much too short a time in which to prepare programs.

On January '9th the orchestra presented a program at

Portland High School at the morning session of the York and Cumberland County Teachers' Convention.

The Girls' Glee Club meets the second period Tuesdays. Only girls having a study period at this time can join. There should be groups rehearsing at other periods in order to give all girls an equal chance.

Music appreciation courses at the High School with credit are also strongly recommended.

At this time I wish to thank all the teachers for their coöperation. I wish to extend special thanks to those teachers who have directed orchestras, Miss Marjorie McKenney at Henley and Miss Smith at Summer Street, also to those teachers who have so kindly taught the music in other grades than their own, in order to help the less musical teachers.

Respectfully submitted,

RUTH B. LIBBY.

Industrial Education

MECHANICAL DRAWING

To Mr. Loen W. Gerrish, Superintendent of Schools:

I hereby submit my fourth annual report on the drafting course of the Practical Arts Department.

The last half-year was devoted to High School work, there being two classes of Freshmen, 14 and 16, and one class of Sophomores, 16. These classes have two periods a day, five days a week, and full High School credits.

The first half of the 1930-1931 year was devoted to Freshman work in the afternoon. There were three divisions, of 14, 17 and 13, and each division came two periods a day, five days a week.

The work covered by the Freshmen consists of lettering, linework, tangents, geometric problems, orthographic projection, intersection of planes, development of cut sections, intersection of solids, development of solids, development

of intersection of solids, isometric, perspective, cabinet and oblique, freehand practical problems and working drawings.

The work covered by the Sophomores was perspective, isometric, cabinet, oblique, helix and application to square and V thread, thread convention and bolt, detail drawing and assembly of 8" bench grinder. In the architectural, drawing of a garage perspective: three elevations, isometric of the frame, building details of the window, window construction details, construction details, corner details, garage door construction.

The first year drawing is to convey the principles of drawing as used in the various branches of work. The second year drawing is to convey the use of the principles of drawing to simple machine work and carpentry construction. These are given to the pupil that he may have an idea of some of the problems of construction encountered by any person in his home life.

Respectfully submitted,

LAURENCE D. COBB.

MANUAL TRAINING

To Mr. Loen W. Gerrish, Superintendent of Schools:

I hereby submit my sixth annual report.

The Manual Training Department of the Practical Arts included in its enrollment 51 seventh grade pupils, 61 eighth grade pupils, and 21 Sophomores for the first half-year. For the second half-year 44 Freshmen started this activity. As a result of the change over, opportunity is provided for the first half-year group to continue the art in the Mechanical Drawing Department.

The work covered the last school year was very satisfying in that it brought out an increased interest and improved manipulation from the pupils.

The aim of this branch of practical arts is to present principles of construction, drawing, etc., to the student in a manner that will lead him to realize whether or not he has an interest and aptitude for mechanics.

The course in this department is based on wood work. This, with elementary electricity, related drawing and home mechanics are covered through the fabrication of specially assigned projects embodying basic principles of construction, standard conventions, proper use and care of tools and knowledge of related materials.

The problems selected are in progressive steps and so designed as to hold the interest of the boy, encourage initiative, create thought, accuracy, integrity, and an appreciation of manual labor.

The value of this work is seen as students finding interest and aptitude follow up their discovery and those not having taste or ability in a mechanical line are saved from exploring this field later in life and are benefited by the carry-over effects of the knowledge gained as a guidance to other work.

Respectfully submitted,

HOWARD L. RICHARDSON.

MECHANICAL DRAWING AND MANUAL TRAINING

To Mr. Loen W. Gerrish, Superintendent of Schools:

I hereby submit my report on the drafting and manual training course of the Practical Arts Department, from September 9, 1930, to January 31, 1931.

School opened September 9th with an enrollment of 171 seventh and eighth grade boys. The first three weeks of school were used for lecture work. When the equipment arrived the boys in the seventh and eighth grades assembled the benches and arranged the room.

This year, half of the time has been devoted to mechanical drawing and the rest to manual training. The drawing consisted of ten practical problems, free hand sketches and printing. Emphasis on dimension was expressed by using Faber's Treatise on Dimensions.

In manual training the problems were selected in progressive steps. Each boy was required to make a complete

working drawing of the article made. He was also taught the proper use and care of tools and the knowledge of related material.

Respectfully submitted,

PHILIP A. BROWN.

PRACTICAL ARTS FOR GIRLS

To Mr. Loen W. Gerrish, Superintendent of Schools:

Specific contributions are made through home economics toward proper health attitudes and habits, the wise selection of foods and clothing, a working knowledge of the processes carried on in the home and skills commensurate with the present needs and age of the individual. The desirable outcomes to be attained by each girl are a growth and improvement in her ability.

1. To select food in relation to her individual needs and those of the family.
2. To plan, prepare and serve wholesome meals within the family income.
3. To develop acceptable standards of skill in all work of the home.
4. To dress suitably and becomingly, taking into consideration the family budget.
5. To plan and make the clothing which can be economically constructed in the home.
6. To select ready-made garments best suited to her individual needs.
7. To have a well-groomed appearance on all occasions.
8. To plan and perform satisfactorily units of work in the home, making those adjustments which the situation demands.

These outcomes give selection of materials, plan of work, and establishment of standards the place of primary importance, but they do not minimize or omit skill. Skill is interpreted as expertness in using materials to the best

advantage with accompanying satisfactorily manipulative processes, organization, plan of work, and evaluation of results.

Respectfully submitted,

MILDRED S. COSTELLOW.

HELEN M. KENNISON.

PRACTICAL ARTS

To Mr. Loen W. Gerrish, Superintendent of Schools:

I herewith submit the report of the department of home economics in the George F. Henley School for the school year beginning September 9, 1931.

This is the first year that the girls of this school have had the privilege of having home economics in their own building. One room in the basement has been equipped to serve as a foods and clothing laboratory and, while there is much in the line of equipment that might be added, for the present we are managing very well.

There are four seventh grade divisions and five eighth grade divisions, totaling an enrollment of 165 girls.

Both the time schedule and course of study followed are as the State Department requires, with few changes being made to meet the needs of our own girls.

I wish to take this opportunity to express my appreciation to all of those who have in any way helped to make my first year in South Portland so pleasant and profitable.

Respectfully submitted,

MARY E. THURLOW.

Physical Education

To Mr. Loen W. Gerrish, Superintendent of Schools:

Physical education activities have been carried on since September in very much the same manner as they have been in past years. The football team enjoyed a successful season, being undefeated. There were about eighty boys playing football this past fall. Owing to the two-session plan the Freshmen had their own team and played a complete schedule. It is the aim of this department to interest every healthy boy to participate in some form of athletics.

Regular physical training classes have been held and a series of health talks given the Freshmen.

Football, track and baseball are under the supervision of the athletic director. The basketball team, under the direction of Mr. Berg, is looking toward a successful season. Mr. Richardson, with football, and Mr. Nason, with the track team, have been very valuable assistants in their respective departments and through them have we been able to handle the large squads of athletes. Freshman athletics, supervised by Mr. Cogan, are giving the boys an opportunity to compete on the various teams.

Because of the few home games on our football schedule this fall the revenue was small; however, we have purchased additional bleachers at a cost of nine hundred dollars (\$900.00) and at this time are free from debt.

Crowded classes have made it necessary for us to conduct only regular gym work. It is, however, the aim of the department to do some individual work with boys having faulty posture.

I have two recommendations to make: first, that each student receive a medical examination at the opening of school in September; secondly, that an outdoor track be constructed as soon as possible.

The physical director appreciates the support accorded our various athletic teams by both students and citizens.

Respectfully submitted,

HARRY A. MAPES,

Physical Director.

Girls' Physical Education

To Mr. Loen W. Gerrish, Superintendent of Schools:

The enrollment in the girls' gymnasium classes is 322, 226 upper classmen and 96 Freshmen. Due to the two-session plan in use this year, the Freshmen are in classes by themselves, which is a very fine arrangement as the work can be graded to fit their needs. If all the classes could be graded in this way, we could do more advanced work than is possible under the present system.

The class work is divided into marching tactics, folk dancing, apparatus work, games and floor work. This year I am trying to work in more of the game type of activity, so that a greater number of girls will be playing games.

Ninety-seven girls reported for interclass basketball, with about 45 taking part in the interclass tournament. From this group, 22 were chosen for the varsity squad, which practices three times a week, with games on Saturday. A group of 30 Freshmen have been practicing whenever we could use the gym, and have games with the Freshmen of the other local schools.

I am hoping to organize a Girls' Athletic Association, which could work out a point system and a program whereby interclass competition might be carried on in various sports, so that we could have more teams and more girls taking part than is possible now.

Respectfully submitted,

BEATRICE I. NESBETT.

Report of the School Health Nurse

To Mr. Loen W. Gerrish, Superintendent of Schools:

During the school year, 399 visits have been made to the schools; 9,136 inspections of children have been made, these inspections including eyes, ears, teeth, throat, heads, weighing and measuring, inspections for symptoms of various

infectious and contagious diseases in all the grade schools and vision and hearing tests in the High School.

Approximately 2,370 defects were noted, as follows:

No. of children with defective teeth,	1,395
No. of children with defective vision,	316
No. of children with defective hearing,	81
No. of children with enlarged tonsils,	131
No. of children 10% or more underweight,	393
No. of children 20% or more overweight,	54

Approximately 1,252 corrections of various defects have been obtained; 549 conferences have been held with parents; 420 home visits have been made; there have been 167 office calls; 68 first aid treatments were given.

A total of 120 pupils have been excluded by the nurse from the schools for symptoms of various infections and readmitted on receiving required physician's permit. Seventeen parents' meetings were attended and 5 health talks given. Two hundred ninety-one class talks were given in the schools. Fifty-seven visits have been made to the clinics and hospitals with children for examination and treatments, when it was impossible for parents to take them. Hearing tests above the fourth grade were given with the 4A-Audiometer and most of the hearing defects noted were slight.

We wish to thank the Portland Speech Readers' Club for again loaning us the 4A-Audiometer. This test is much more accurate than the old method and of great value in detecting the defects before they become serious.

The summer round-up of pre-school children was held this year under the auspices of the P. T. A. Central Council with the school nurse acting as general chairman.

Four health clinics were held, one at the High School, one at Willard, one at Thornton Heights and one at K. of P. hall. Complete health examinations were given the children at these clinics by attending physicians, assisted by the school nurse and Red Cross nurse. A committee from each P. T. A. organization served at these clinics. Advice

concerning the defects found was given mothers by the physicians and health literature was distributed.

We had the coöperation of every physician in South Portland, and wish to express our thanks for their time and services, also the Red Cross, Kiwanis and Lions Club for their support and assistance.

Mothers were invited in September and October to attend the nurse's inspections of the first grade pupils in the various schools and a total of 106 mothers attended these inspections. Advice as to defects and health literature was given.

At this time a check up of the summer round-up was made, showing that: 120 children had health examinations at the pre-school round-up and 34 by their family physicians, making a total of 154 children having health examination before beginning school, and a good percentage of the defects had been corrected or mothers were following physicians' advice in regard to them. I cannot but urge the importance of the summer round-up of pre-school children, especially as we do not have the services of a school physician. It is the right of every child to have a health examination and any defects corrected before entering school.

If this could be accomplished we would have fewer repeaters and better school attendance, as well as better health for our children.

Thanksgiving week the school nurse assisted in placing 75 baskets from the schools, this being done as a Junior Red Cross activity. She also assisted the Red Cross nurse at three Well Baby Clinics in May and June. The six and seven point activities in the school have created much interest in securing correction of defects.

Health programs have been given in various schools and P. T. A. groups.

Health addresses by the Director of Health Education and the Div. Director of Child Hygiene of the state have stimulated interest in health work.

Now that the vision of a dental clinic for the under

privileged children of South Portland has become an established fact and the splendid equipment installed in the office at the High School, we will be able to accomplish more along the line of dental corrections, which means better health and better school attendance.

I am most grateful to the Lions Club for realizing this need and making this service to the children possible. I wish to thank the Red Cross, Lions Club, Kiwanis Club and the P. T. Association for their assistance and the teachers for their coöperation.

Respectfully submitted,

LEONA E. FAIRFIELD, R. N.

Report of the Attendance Officer

To Mr. Loen W. Gerrish, Superintendent of Schools:

I hereby submit my report as Attendance Officer from February 1, 1930, to February 1, 1931.

Number of visitations upon schools	181
Number of cases investigated	674
Number of visitations upon families	442
Number of requests of families	19
Number returned to school without arrest...	9

Respectfully submitted,

JAMES E. SMITH,

Attendance Officer.
