Hello,

in response to the email sent earlier today, I'm writing to report that I have included information about the pandemic in my Cropping Systems course (PSE 101). I'm attaching the [link to the slide deck](#) where I lecture about food safety, and talk about pandemic safety concerns for small farms at the end. I delivered the lecture last week.

Please let me know if I can provide any further information.

Best wishes,

Rachel
