- Start utilizing online orientation and student success workshops

Here’s a screencast that shows you how to log in and what’s included in the site: [Screencast](#)

Wize online tutoring platform is now free supporting students impacted by COVID-19.

[Wize](#), the online learning platform for first-year university and college students, is making its entire library of Exam Prep content and its Homework Help services available for free to help students who have had their academic year upended by the coronavirus pandemic.

Students have access to over 10,000 course lessons that have been created by Wize Certified Profs. Additionally, Wize has curated a pool of qualified tutors over the past 12 years and paired them with a state-of-the-art ed-tech platform to bring students an online learning experience like no other.

The online platform also serves as a marketplace for students and parents to find Wize-certified tutors who meet the needs of each individual college student. Billing rates for personal tutors vary. Full access to the Wize course library would usually cost \$19.99 per month or \$119.98 billed annually. **The service will be free until May 31, 2020.**
