I'm a university employee who has tested positive for COVID-19 with a RT PCR diagnostic test and has completed the isolation period. Now I've been told that I'm a close contact to someone who has tested positive. Can I still come to work on-site?

January 25, 2021 | [Faculty, staff and students](#), [Health and safety](#), [Testing](#)

If you are asymptomatic after a positive COVID19 RT PCR diagnostic test within the last 90 days, you can continue to work on-site on campus or at a UMaine facility statewide. If you are symptomatic, consult with your primary care physician before returning to work on-site.
